TRADE VERY POOR.

Cut flower business is very poor. The demand has subsided until it amounts to almost nothing. While a few of the retailers report a fair business, yet by far the majority say it could scarcely be worse even in the good old summer time. It is a pretty hard matter to figure the cause of the slump, there being no special reason why business should go all to pieces at this time of the year, and to have roses and carnations pouring into the city from all points makes the slump doubly unfortunate. Even the extremely low prices at which stock is offered does not help to clean up the market. Several growers report going off crop with carnations, and undoubtedly this will tend to give the market a better tone in the near future. About the only scarce article is sweet peas, and it appears as though every customer coming into the wholesale houses asks for this favorite little flower. Lilac is to be had in any quantity, but this week will see the last of it. Lilies and callas are a glut and hard to move even at reduced prices. Tulips and hyacinths are to be had in any quantity, but the outdoor daffodils have the call on account of being cheap. Smilax remains scarce, but there is too much asparagus on the market.

**NOTES.**

Peter Weiland, of the firm of Weil and & Olinger, is having a very severe attack of rheumatism and left last Tuesday for Hot Springs, Ark., to see if a change of climate and the baths at this famous resort will not benefit him. Meanwhile, Peter Olinger is looking after the growing end at New Castle, Ind., and Wm. Gardner is in charge of the selling end. They have an immense cut of roses, which are sent to this market twice a day, afternoon and evening, and it keeps the store boys working far into the night to keep the stock graded up and put in water.

The Jabez Elliott Flower Market was a sight last Saturday. The stand holders displayed some very well grown plants and all seemed to be doing a nice business. From present indications everything points to a big business in bedding plants this spring and thousands of people patronize the flower market to have their wants satisfied.

Edith F. Kyrk, out in Avondale, is one of the fortunate retailers who was busy the past week and took a great many flowers out of the wholesale district every day. She says that one had to handle too much stock to clean up any money and would rather have less work and more money.

The Florists' Society held the regular monthly meeting on Monday evening, April 11, and only routine business was transacted. The question of the annual outing was brought up, but laid over until the next meeting.

E. G. Gillette is handling some very fine Beauties from the Heller Bros.' greenhouses at New Castle, Ind.

TRADE VARIABLE.

Business had another lull during the early part of the week, but picked up nicely towards the latter part, so that the lull merely amounted to a resting spell before the large amount of funeral work which kept us busy over Sunday. Flowers are plentiful; candytuft has again made a general appearance and eases the design problem considerably. Lilacs are now in nice bloom. Hydrangeas are of good size and move well.

NOTES.

Herman Fachman, proprietor of the Excelsior wire works, has invented and patented a marble game entitled "Possum in the Tree." It is a political take-off. Another invention of which Fachman is the patentee is a chip basket with tacks protruding around the edge. This basket is designed to take the place of the now much used willow basket (flat). Instead of fastening the moss on the basket by wrapping cord entirely around the basket, it is proposed that the cord be laced back and forth from tack to tack opposite. Lacing on these tacks not only makes a neater job than wrapping under the bottom of a willow basket, but also prevents the cord from slipping off at the ends, which is so often the case when a piece is jolted over four or five miles of street enroute to destination.

In the automobile floral parade Louis Deschler, who had his car elaborately decorated with Easter lilies, received first prize. The five lady judges tabooed the paper-flower decorations and gave only a third prize to a car of that sort.

The committee on the Sunday afternoon closed shop club finds that only one of the local florists refuses to comply with its request to close at one o'clock Sunday afternoons.

Albert J. Pittet, who recently bought a fine carriage horse for pleasure use only, is having his trouble in preventing horse dealers around the city from buying it of him.

The representative of the Roseville Pottery Co. was in the city during the past week and seemed to be very successful in booking orders for ivory and mat-green ware.

Homer Wiegand is making preparations to organize the North Side Florists' baseball club team, so as to have a winning nine at the annual picnic this year.

John Bertermann gave an automobile party last Sunday to Cumberland, Ind. The guests were Herman Young and Paul Shidler and their wives.

S. T. Hitz has been selling flowers on commission during the past week, the flowers being sent to him by his brother of Franklin, Ind.

Lester F. Benson is erecting a small conservatory in the rear of his residence property, superintending the work personally.

Tommy Hart is again regular in his attendance upon the Tomilson Hall Flower Market.

Cleveland.

A BUSY WEEK.

The past week has been a very busy  
one, not so much in quantities sold,  
but in quantities handled. Stock was  
very plentiful up to the latter part of  
the week when the weather suddenly  
turned decidedly cooler, shortening up  
the crop considerably, until Satur-  
day, April 9, there was a marked  
shortage, particularly in sweet peas,  
of which there were not enough to go  
around. Carnations also were just  
about equal to the demand, which was  
quite a change from the middle of  
the week, when they went begging.  
Callas are coming in in quantity with  
a good demand. Lilies that came too  
late for Easter are now beginning to  
arrive and the demand is fair. A fine  
lot of Candidum lilies are seen and  
find a ready market. Calendulas and  
daisies sell quickly, as does forget-me-  
not and swainsona. Tulips are not as  
good as formerly, the warm weather  
having got in its work. Daffodills,  
mostly single, are in, good stock; pan-  
sies are selling well; violets have a  
fair call; valley is a little scarce.  
Boxwood is being used quite freely;  
string smilax is much in demand, and  
on Saturday could not be had at any  
price, not a single string being found  
at local wholesale houses. White car-  
nations were much in demand Satur-  
day and Sunday.

## NOTES.

Shortly after the present park board  
was appointed in this city, a short  
notice was published in this paper  
stating that neither one of the ap-  
pointees had any previous experience  
in this line. Now, City Forester Frink  
is very much in the limelight, owing  
to the wholesale slaughter of trees in  
our parks and boulevards, for which  
the local papers are roundly censur-  
ing him. It is claimed \$50,000 would  
not cover the damages, and indigna-  
tion meetings, protesting against this  
system of park management, are being  
held all over the city. It is up to  
every lover of nature, and particularly  
by the local nurserymen who know  
something about trees and their care,  
to protest and advise the present  
seemingly incompetent park board.  
Let us hope some action will be taken  
to help preserve our trees instead of  
destroying them.

The Gasser Co., 1106 Euclid avenue,  
outdid all records in distributing flow-  
ers through the press to the sick and  
the orphans in its annual free distri-  
bution Thursday. Eight thousand red  
and white roses were given out to 26  
hospitals and asylums.

The retailers again lost to the  
wholesalers at a bowling match last  
Wednesday evening. C. B.

## The Seed Trade.

### American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Duryea, New York, First Vice-Pres.; F. W. Boligiano, Washington, D.C., Second Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J. June 21, 1910.

It is understood that as yet there has been no hearing on the drastic insecticide bill as was expected.

KIRBY B. WHITE and Will Bowen, of D. M. Ferry & Co., are making a California trip, going by the southern route.

TOULON, FRANCE.—Latest predictions on the French bulb crop for this year indicate a shortage of approximately 20 per cent.

CHICAGO.—Contract prices on the board of trade April 13 for grass seed were noted as follows: Timothy, \$4.60 nominal. White clover, from 20 cents to 25 cents.

SAN FRANCISCO, CALIF.—A. Ringier, representing W. W. Barnard & Co., Chicago, has returned from Byron Springs, suffering very badly with rheumatism.

SPRINGFIELD, MO.—The Merchants' National Bank of Springfield, Missouri, one of the largest institutions of its kind in this part of the state, re-organized and elected new officers and directors April 5, L. H. Murray, a wealthy capitalist and vice-president of the Springfield Seed Co., going in as president and R. R. Ricketts, president of the Springfield Seed Co., as director. Other stockholders of the seed company are also interested in the bank.

THE society for the protection of the interests of agriculture of Toulon and the coast meets April 16 at Cafe de la Potonde to fix the prices of French bulbs for the present season. A minority wished to defer until April 30. There are now 605 active members of this organization. M. Albert Ordinaire was elected general

secretary of the bulb section. The directors of the immortelle growers section will be chosen later. The secretary telegraphed the senators, representing Province Var., asking that duties on products of the south be made uniform with those of Belgium and Germany.

### The Seed Business to Date.

Amzi Godden Seed Co., Birmingham, Ala.—The March demand for seeds has been unusual in certain lines, in our own section. There was no increase in the demand for vegetable seeds but the demand for farm and field seeds has been extraordinary and unusual. Which leads us to the conclusion that our southern farmers are interested in diversification of crops and are ready to plant something outside of cotton and corn. We confidently believe that the standard of the seed trade in the south will be largely based on an increased demand in farm seeds. But we do not believe that there will be any increase in the garden seeds with the southern truckers. In fact we are inclined to the opinion that the demand for vegetable seed in the south, to be planted for crops to be shipped north, is on a decline and the decline will continue unless new conditions arise which will bring about a change in early trucking.

The Chas. H. Lilly Co., Seattle, Wash.—March is always the biggest month of the year with us and this year is no exception. Trade has been very satisfactory in spite of some severe shortages and the business shows an increase over that of last year.

### The Amzi Godden Seed Co.

J. H. White, a prominent real estate man, and one of Alabama's best-known business men, has purchased a controlling interest in the stock of the Amzi Godden Seed Co., and will, at an early date, become the executive head of the corporation. He has acquired the stock formerly held by Major Joseph Hardie, Dr. T. F. Cheek and others. Announcement to this effect was made April 6. Mr. White came to Birmingham a few years ago from Uniontown, Ala., and still holds large business interests in Uniontown and neighboring towns of the Black Belt. He holds considerable stock of the J. H. White Mercantile Co., a business that was founded by his father.

## Peas AND Beans

**Alfred J. Brown Seed Co.,**

Growers for the Wholesale Trade.

GRAND RAPIDS,

MICH.

He is a stockholder and vice-president of the Planters' and Merchants' bank, of Uniontown, and has other extensive interests. He is a director of the Watkins Banking Co., of Faunsdale, Ala., and of the Bank of Newbern. He will be elected president of the corporation at the first meeting of the stockholders and directors, and will assume active charge of the financial management of the institution.

The present corporation, Amzi Godden Seed Co., is an outgrowth and continuance of the business established at Marion, Ala., in 1857, by the late Amzi Godden, whose demise occurred in 1899. The practical operation and general management of the business will remain in the hands of George B. McVay, who has been with the company for 20 years. His business will be the buying and selling of the goods, and his title will be vice-president and general manager. He will develop and look after the wholesale business of the company.

The secretary and treasurer will be John B. Dolsen, who has been with the company for more than two years. Mr. Dolsen is manager of the retail department of the business located at 2018 First avenue, and will continue in same capacity.

### Catalogues Received.

Welch Bros., Boston, Mass., wholesale list florists' supplies; Wm. H. Moon Co., Morrisville, Pa., hardy trees and plants; S. J. ## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

C. W. Waid, New Carlisle, Pa., President;  
Franklin DeKleine, Grand Rapids, Mich.,  
Vice-President; S. W. Severance, 508 Illi-  
nois Life Building, Louisville, Ky., Secre-  
tary; M. L. Ruetenik, Cleveland, O., Treas.

IN John Dunbar's notes in our last week's issue, page 548, middle column, last line but one from bottom, for 139 feet, read 30 feet.

### Cucumbers and Tomatoes.

We have frequently called the attention of growers to the necessity of balancing the fertilizer elements in their soils for the production of fruit instead of foliage. The conditions that produce excellent leaf lettuce are not so favorable for cucumbers and tomatoes, as here we want fruit. We have found in our beds we can entirely ignore phosphates for leaf lettuce, hence we use nitrate of soda and sulphate of potash during the lettuce season, but as soon as the cucumbers and tomatoes are under way, we correct things by adding heavily bone meal, rock phosphate or guano, as phosphates are of great importance to flowers and fruit.

Another factor is controlled moisture. We prefer to grow both cucumbers and tomatoes rather dry until fruit has set, then water more liberally. The dry growing will build up a powerful root system which will stand a great deal of work later on. Cucumber growers should arrange in time for some bee hives, to have plenty of bees at hand to pollinate the blooms.

MARKETMAN.

### Destruction of Eelworms in Soil.

Eelworms or nematodes in garden and greenhouse soil constitute a serious and troublesome pest for which it is extremely desirable to find some simple and practical remedy. Experiments on various methods of destroying eelworms have been carried on for many years by G. E. Stone, of the Massachusetts Experiment Station, and a recent report of that station gives some of the practical results of these experiments. As Dr. Stone points out, the use of lime is often advocated for destroying the eelworms, but his experiments show that lime has little or no value for this purpose. In fact, it was found possible to keep eelworms alive for several days in a saturated solution of limewater. "Undoubtedly the application of lime to greenhouse soil improves it by modifying its acidity, but eelworms will thrive in soils which are not acid."

The use of formalin has been recommended, but the experiments at the Massachusetts station indicate that this is not effective in killing the worms, and besides cannot be used on soils containing growing plants on account of the injury likely to result to the plants. Of late years formalin has been recommended as a remedy for eelworms on violets. This is used by applying it to holes made in the

H. E. FISKE SEED CO., Boston, Mass.

soil where the plants are growing. The formalin being volatile, the gas penetrates the soil and is said to kill the worms. Our experiments with it would not seem to warrant the use of this method of treatment, as formalin is injurious to plants, and there is reason to believe that it would not affect in the least the eggs of eelworms, which are fairly well protected by a resistant covering. The methods used with more or less success at the Massachusetts station for destroying eelworms in greenhouse soils were as follows:

**Sterilization.**—This is one of the cheapest and best methods of destroying eelworms in greenhouse soil. It is necessary that the soil be heated to at least 180° F., and a higher temperature is better. This is accomplished by driving steam through the soil by a system of perforated pipes.

**Freezing.**—If the soil is frozen for any length of time the eelworms are destroyed, and some use has been made of this method by practical growers. As a rule, the soil is removed from the house and frozen in bulk outdoors.

**Desiccation.**—Drying the soil is destructive to eelworms, but it is difficult to dry soils sufficiently in deep benches to make this method effectual. The application of unslaked lime, however, will materially aid in drying the soil, by virtue of the water-absorbing qualities of the lime.

**Trapping, or the catch-crop method.**—It has been found in Germany that sowing very susceptible crops, like mustard or rape, on soil contaminated with eelworms, and, after the females have become encysted in the roots, pulling up the plants and exposing them to the drying rays of the sun, is capable of reducing the worms to some extent in contaminated soils. We have found, however, that two or three catch crops are much better than one.

The Massachusetts experiments indicate that in some instances simply flooding the soil may prove a successful means of destroying the eelworms, and that manure infested with eelworms may be safely used on garden and greenhouse crops if left for a sufficient length of time in water.

## The Nursery Trade

American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;

W. P. Stark, Louisiana, Mo., Vice-President;

John Hall, Rochester, N. Y., Sec'y.

Thirty-fifth annual convention to be held at Denver, Colo., June 8-10, 1910.

ONE nurseryman said, "As my stock was starting to bloom, I thought it best to dig, but found the ground frozen." This simply indicates the shortness of the nurseryman's season this year.

JACS. SMITS, of Naarden, Holland, will be in the United States through April, May and June, during which time his address will be, Care of Maltus & Ware, 14 Stone street New York.

ROCKFORD, ILL.—This city spent about \$65,000 last year in acquiring land for park purposes and will spend as much more in improvements this year. One large park of about 120 acres on the outskirts of the city has been acquired and two playground parks, one of about five acres, the other of about 25, will be fitted up for use in the heart of the city, besides a number of small spaces which formerly were under control of the city council.

### Notes from Rochester, N. Y.

The Japanese witch hazel never looked so beautiful or flowered so freely as it has here this season. Four large specimens have all their branches completely covered with flowers and the long, lemon-yellow petals, give a massed effect that is quite noticeable at the distance of one-half mile. Of course, the weather has been remarkably propitious for it. The flowers will stand considerable freezing at night without injury. But when it comes in bloom some seasons, and the temperature drops very low, the blossoms are apt to be a little dulled or blasted. It is perfectly hardy and the tips of the shoots are never injured by the coldest winter we have.

It is surprising that American nurserymen do not handle this beautiful hardy shrub. We have either to import it from Europe, or procure it from Japan by special order to dealers in Japanese plants. The plants usually sold are grafted, but seedlings can be procured, as we imported 100 seedlings from Japan a year since, through a New York firm, and looking at them the other day in the nursery row, we noticed a considerable variation in the flowers of some of the individuals that showed a few scattering blossoms. They produce quite a number of blossoms when only 2½ to three feet high. It is an important shrub for planting in city grounds, as it stands smoke well. In a Japanese catalogue just received, I see the seed quoted at \$3.50 per pound, and if it is like the American species it will probably not germinate until the second year after sowing, but it is worth waiting for.

The so-called Constantinople hazel (*Corylus colurna*) has been in full bloom since March 22, and the long pendulous graceful, brownish yellow catkins, thickly scattered over the branches of large trees, look quite pretty. E. H. Wilson, the distinguished

**F. R. PIERSON CO.,** Tarrytown-on-Hudson, N. Y.

## Pink Climbing Rose— Dorothy Perkins

Without doubt the most valuable of all the new Climbing Roses of comparatively recent introduction. The beauty of the double pink flowers is admirably set off by the rich green foliage, which is free from the attacks of insects.

In addition to this charming kind, we have all the popular varieties in climbing and bush Roses. Our General Catalogue, which will be mailed on request, contains descriptions of all the best Roses —also

Fruit and Ornamental Trees, Shrubs and Hardy Plants.

Mount Hope Nurseries. Rochester, N. Y.

**Send Advs. Early for Best Service.**

DELPHINIUM BELLADONA.

# Dreer's Hardy Delphiniums

**Belladonna.** The freest flowering of all the Delphiniums and the most valuable for cutting. Its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants, \$2.00 per dozen; \$15.00 per 100; \$125.00 per 1000.

**Dreer's Gold Medal Hybrids.** Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

**Formosum.** A splendid strain of this popular favorite dark blue variety, 85 cents per dozen; \$6.00 per 100; \$50.00 per 100.

**Chinese Blue and White.** 75 cents per dozen; \$5.00 per 100.

## CHOICE NAMED HYBRID VARIETIES.

**Alfred Henderson.** Bold, massive spikes of semi-double rosy-lavender flowers, 2 inches across, white eye, 20 cents each; \$2.00 per dozen; \$15.00 per 100.

**Beatrice Kelway.** Deep, rich blue with a conspicuous yellow eye, flowers 2 inches across and perfectly arranged, 20 cents each; \$2.00 per dozen; \$15.00 per 100.

**Cerberus.** Sapphire with black brown centre, a handsome spike, 35 cents each; \$3.50 per doz.

**Chinese Cineraria.** (Spurless Hardy Larkspur.) The large flowers without a spur, strikingly resembles a fine rich sky-blue Cineraria, 20 cents each; \$2.00 per dozen; \$15.00 per 100.

**Duke of Connaught.** Rich, Oxford blue with distinct bold white eye; fine large flowers, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**J. C. Jenkins.** Very large, semi-double bright mauve edged with royal blue and white eye, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**King of Delphiniums.** Most vigorous growing, immense size, semi-double rich deep blue with large white eye, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**Lizzie.** Lovely azure-blue flowers, 2 inches across, bold, creamy-yellow eye, arranged in bold massive stems, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**Lemartin.** Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white center, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**Mrs. Creighton.** Semi-double, outer petals deep sky-blue, center rich plum with black eye, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**Persimmon.** Comparatively new; beautiful delicate turquoise-blue, 50 cents each; \$5.00 per dozen.

**White Seedlings.** These have been carefully selected and will be found desirable in any collection, 30 cents each; \$3.00 per dozen.

For the most complete list of Hardy Perennial Plants offered in America see our current Wholesale List.

## Henry A. Dreer, Inc.

714 Chestnut St., PHILADELPHIA, PA.

The above prices are intended for the trade only.

### Washington.

#### TRADE A LITTLE SLOW.

We are experiencing ideal weather, and outdoor flowers such as lilac, and other flowering shrubs are being brought to the city by the wagon load. These flowers are always very useful and effective in house and church decorations, but for some unknown reason this sort of work has been rather scarce during the past few weeks. Excepting funeral work, business has been rather slow, causing a glut of stock, and a noticeable decrease in prices. American Beauty roses sold from \$2 to \$6 per dozen, carnations 50 cents per dozen and roses from 75 cents to \$2 per dozen. Those who had orders for violets had a hard time filling them, owing to the scarcity.

#### NOTES.

F. H. Kramer's show window is filled with various kinds of bulbs, which he is selling at prices within reach of all. One of his Easter specialties was Easter lilies at \$1.50 per dozen.

The attractive windows of the Washington Florist Co. are much talked of; the firm has always a good amount of fine stock and reports fair business at both stores.

J. D. Blackstone's Saturday specials keep his staff hustling from early till late, and he disposes of a goodly number of carnations in this way.

J. H. Freeman, as usual, has a superb stock of home grown plants and cut flowers; he reports fair business. Gude Bros. Co. is handling an excellent supply of home-grown Beauties and other seasonable stock.

Geo. C. Shaffer reports fair business; his electric auto delivery has proven a success.

## A ROSE FOR EVERY GREENHOUSE GRAFTED ROSES

NEW YORK.

All Plants f. o. b. Western Springs, Ill.

CHICAGO.

### Baltimore.

#### TRADE ONLY FAIR.

Business last week was by no means up to the hopes of the trade. There were some weddings, a good many minor social affairs, the never lapsing funeral demand and the requirements of condolence, sympathy and hope which the hospitals always present, but there is not really much active movement. There is too much suspicion of treachery in the weather for much outdoor gardening, and the nurserymen have had so short and unpropitious a planting season that they are not jubilant. The markets are floral bowers; never were there more abundant or more varied supplies than are to be seen on the stalls of the dealers, and from appearances the quantity disposed of is about normal at this date.

#### NOTES.

In the Lexington market ensemble are this spring missed the familiar forms and faces of Joseph H. Brownell and John Donn. The former has given up his greenhouse business and devotes himself to other lines of horticultural activity; the latter is reported to be quite sick. Both of these men belong to the older generation and are

known to thousands of the frequenters of the market; both of them when called upon for advice and suggestions as to planting, treatment in health and diseases of plants of every sort are always accommodating and painstaking in giving counsel to the anxious inquirers whose interest in plant cultivation ebbs and flows with the season.

The question of street selling of flowers has been much agitated for the past week, and there have been various arrests, releases, fresh arrests, etc. It seems that there has been no authoritative settlement of the matter, but the vendors are now required to take a license from the city, to obtain consent from the occupants of the property in front of which they station themselves, and they are not to erect stands or place heavy boxes in the street. They may use baskets or trays, but no permanent structures which will interfere with free use of the thoroughfares. In other words, so long as they conduct themselves peaceably and orderly there is no violation of law, and the nagging by the police is superfluous and unwarranted. There was talk of making a test case, but there seems no ground or necessity even for this, and nothing really to test.

Mention the American Florist when writing

John Cook and Mrs. Cook reached home several days ago from their winter's stay in semi-tropical climes. Both are improved in health, have gained handsomely in avoirdupois and are glad to be home again. Mr. Cook has lost his ancient foe, the rheumatic twinges, which made life at times a torture, and has seen many interesting things and places. All their friends are glad to welcome their return.

Dbl. Petunias, 10 kinds, \$1.00.

Cash with order.

BYER BROS., Chambersburg, Pa.

St. Louis.

MUCH STOCK AND LOW PRICES.

The weather the past week has been clear and springlike. Stock has been coming in heavily. Outdoor lilac has been coming from the country. Carnations are plentiful, but they don't keep. Signs are about the downtown district, "Carnations 15 cents per dozen." Easter prices were exorbitant and now the stock is slaughtered. Roses are plentiful; everything, in fact, is away over demand. The plant men are busy and expect to begin planting earlier than usual.

### NOTES.

The death of Mrs. Vesey, of Fort Wayne, Ind., is much to be regretted. Mrs. Vesey had many friends here and was the guest of Miss Tillie Meinhardt whenever she visited this city. She was well known, always identified with our exhibitions, always pleasant and ready to give information to all inquirers. Miss Tillie Meinhardt left Saturday for Fort Wayne to be present at the funeral and many floral tributes were sent from this city.

The Florists' Retail Association held its meeting last Monday evening. The weather was inclement and hurt the attendance. The association is doing good work. The members are unanimous in condemning wholesalers who engage in retail work. They should go after the crepe-pullers, especially those who, in order to get orders, give the names of representative florists and claim they are working for them.

The preliminary premium list for the fall exhibition of the Horticultural Society is out and copies may be had on application to Otto G. Koenig, secretary, 6473 Florissant avenue. The show will be held at the Coliseum, November 8-12.

The Florists' Club will hold its meeting next Thursday. The club bulletin will make its debut and growers will be invited to make known their needs. This is purely local.

The Riessen Floral Co. is very busy with floral work, one of last week's orders being a bunch of 100 long-stemmed American Beauty roses for a theater party.

The tulip beds at the city hall and in the public parks are now in their glory. The park department deserves great credit for its work and designs.

# Florists' 'Mums

# American Beauty

## BENCH PLANTS

Fine plants for out-door planting or replanting in the benches, cut back to about 18-inches; per 100, \$5.00.

KAISERIN 2-inch pots, propagated last fall.  
Now ready to plant in the benches,

\$4.00 per 100, or \$35.00 per 1000.

Bassett & Washburn,

Office and Store,  
76 Wabash Ave., CHICAGO  
Greenhouses, Hinsdale, Ill.

## FUCHSIAS

There are none better than Little Beauty, Lord Byron, Renan and White Beauty. Strong 2½ inch plants ready \$4.00 per 100 New Heliotrope, Miss Bernice a sport of Mme. Brunt and a great improvement on the latter 2½-inch \$8.00 per 100.

Katalog for the Asking.  
SKIDLEY & IRWIN CO.,  
1215 Betz Bldg.,  
PHILADELPHIA, PA.

There will be quite an increase in greenhouse building this summer in Kirkwood, many of the growers planning to enlarge their plants.

A. A. Buesch is now the Grand Avenue Florists' manager. W. F.

Richmond, Ind.

The E. G. Hill Co. is busy with orders day and night, including Sundays, and has at work all the men and women that can be crowded into the packing sheds. This firm shipped three carloads of young roses last week.

Fred H. Lemon & Co.'s business has attained such proportions that they are compelled to vacate the present quarters in the Westcott hotel for much more attractive and commodious premises across the street.

WOODLAND, CALIF.—A floral festival will be held here April 23 and a large attendance is expected.

## A New Fern NEPHROLEPIS GIATRASHI

Awarded a Certificate of  
Merit by the Horticultural  
Society of New York.

Prices: In 2½-inch pots, \$3.50 per dozen; \$25.00 per 100; \$200.00 per 1000. 25 plants at 100 rates; 500 plants at 1000 rates. Orders delivered in rotation as received. Now Ready for delivery,

GEORGE GIATRASHI,  
463 Summit Ave., West Hoboken, N. J.

We are in the heart of the cactus country, and furnish the healthiest open-grown stock, over 100 varieties, to the foreign and domestic trade. 25-page illustrated catalogue of Cacti free.

**Mexican Resurrection Plants.** We are strictly headquarters for this plant and ship all over the world.

Good-sized dormant plants, guaranteed to "resurrect." 1000.10.00; 5,000 at \$8.50; 10,000 at \$8.00.

**THE FRANCIS E. FLESTER COMPANY,**  
Dept. LS2. Messia Park, N. M.

Rochester, N. Y.

Hiram E. Wilson established his present business on Hudson avenue, on the north side of the city, 28 years ago by erecting an even span greenhouse, 20x60 feet, with stone walls five feet high; the panes of glass 8x10, and the ridge board, nine feet above the ground. This house is still in good condition. The present glass area is about 60,000 feet. The last houses were built about seven years since, and were put up by Lord & Burnham. They are 30 feet wide, and one section is 165 feet long, and the other 450 feet long. They are even span, iron frames; the panes 16x24 inches. All of the newer greenhouses, and about half of the older section are heated by three immense Burnham low pressure steam boilers. Perhaps more roses are grown by this firm than any other establishment in the vicinity. This is not considered a good locality for the winter growing of roses, as it is in a belt where the winter conditions are inclined to be somewhat cloudy, and great skill and watchfulness are consequently necessary for success in rose growing. A house, 30x165 feet, is devoted to roses, and two sections, each 30x125 feet, are also entirely occupied by roses. Bride and Bridesmaid are the varieties mainly grown. Hiram W. Wilson says they will probably start to grow Killarney and White Killarney in quantity now, as there appears to be a growing demand for them, but he thought for general decorative work Bridesmaid was better than Killarney, and as a paying proposition was superior to it. A section of a bench was filled with My Maryland, and it was in fine health. Mr. Wilson at the present time does not think it shows superiority over Bridesmaid or Killarney. One objection was the strong growths so thickly covered with the fierce spines. For convenience of summer supply they allow a considerable number to remain in the benches two seasons, but generally Mr. Wilson thought one year was sufficient for roses in the benches. Although they grow a large quantity of roses, they have to buy a large number for their retail custom.

The palm house is 30x100 feet. Kentia Forsteriana is the principal palm grown, and no other palm sells so well. Mr. Wilson thinks that Phoenix Roebelini is going to be a good palm for commercial use in the future, as it seems to have a fine constitution and is easily kept in good condition. About 8,000 carnations, Beacon, Enchantress, White Enchantress and White Perfection, are grown. They also grow from 8,000 to 10,000 chrysanthemums. As so much space is given to roses, they cannot grow as many chrysanthemums as some other establishments in this vicinity. An immense quantity of bedding plants, such as geraniums, cannas, ageratum, coleuses, alternantheras, lobelias, santolinas, heliotropes, salvias, and the like, are grown. Hiram E. Wilson does not take much active interest in the business now. The oldest son, Hiram W. Wilson, takes full charge of the green-

houses and plant growing, and the two younger sons, Edwin P. and Ranford W. Wilson, take charge of the retail business on Main street. Mr. Wilson's sons are hard workers, and pay close attention to business, and are well known for their high integrity.

JOHN DUNBAR.

Pittsburg.

Summer conditions are fast forcing themselves upon us. Carnations, while yet good, are beginning to show here and there the effects of early summer. Indoor peas arrive in an almost worthless condition, although some that were planted late are producing fine flowers. Violets are a thing of the past. Roses are still magnificent and quantity can be compared to quality to fullest extent. American Beauties are exceptionally plentiful and buyers make their own figures. Spanish iris is moving freely, all colors arriving in quantity. Outdoor tulips and daffodils, although quite short in stem, are very plentiful; in fact, all outdoor plant life is making big strides forward. A sharp frost made many uneasy, especially regarding the fruit blooms, but it seems to have had no effect.

NOTES.

One often hears of strange things that green clerks do and I think the following is a good one: One of our florists had some white roses left over from Easter, and on the following Tuesday had a little cheap bunch to make of these flowers. The clerk used fresh stock, and on being questioned by the proprietor as to why he did not get rid of the old stock, replied: "Why you paid 10 cents for them and six cents for these, and I can't get the value out of the 10-cent ones in this bunch."

## ROSES

We have the following young roses to offer:

|                        |                  |
|------------------------|------------------|

**Cabbage Plants for field, \$1.25 per 1000.**

**J. C. SCHMIDT, Bristol, Pa.**

## Robert Craig Co...

**HIGH CLASS PALMS**

and Novelties in Decorative Plants.

Market and 49th Sts., Philadelphia, Pa

Jos. Thomas, Greensburg, who is developing into quite an orchid grower, visited the Bakerstown establishment during the week, where F. Burki is making a start with them.

The Florists' Club met April 4, before a display of Easter plants. There were prizes given on lilies and cinerarias for private gardeners.

J. A. Keeny, formerly mayor of Monongahela City, and now in the greenhouse business in the same place, was a visitor recently.

C. Peterson, East Liverpool, O., who is having trouble with his eyes, is in town having them treated.

Gross & Aldrige is the name of the new firm which has started business at 551 Lorimer avenue.

Very fine American Beauties and sweet peas are seen at the McCallum Co.

W. Q. Potter was away from work for a few days on account of illness.

Walter Breitenstein spent several days in the east. J.

**Boston Ferns** 2½-in., \$3.00 per 100.

**Henry H. Barrows & Son, Whitman, Mass**

Omaha.

Easter business was the best we ever had, especially in cut flowers. The warm spell of weather during March helped to bring the cut flowers in good shape. Pot plants in bloom suffered somewhat, especially lilies, but the increase in cut flower sales more than made up the loss on lilies. These were not extra good this year on an average. P. B. Floth had the best bunch of lilies in this vicinity. Hess & Swoboda had a fine lot of azaleas, specimen plants, also bougainvilleas and lilacs. A Donaghue had a fine lot of azaleas and lilacs. L. Henderson showed a nice lot of made up boxes which sold well. Peterson Bros. had a general display of pot plants which made a fine impression very nicely arranged. Miss McNamara rented a vacant store during Easter week, which came in very handy and made it more easy to sell her Easter plants.

## Geraniums Coleus

100 1000  
 8 varieties, my selection 2½-in. pots, \$3.00 \$25.00

Prices and  
Booklet.

NATURAL GUANO COMPANY,

Aurora, Ill.

Cattle Manure in Bags  
Shredded or Pulverized

Pure—dry—uniform and reliable.  
The best of all manures for the  
greenhouse. Florists all over the  
country are using it instead of  
rough manure.

Pulverized  
Sheep Manure

Absolutely the best Sheep Manure on  
the market. Pure manure and noth-  
ing else. The best fertilizer for carnations and for  
liquid top-dressing. Unequalled for all field use.  
Write for circulars and prices.

## The Pulverized Manure Company

**ANOKA, MINN.**—The Easter trade at  
the Anoka Greenhouse Co. exceeded  
that of last year by 25 per cent. All  
stock was in prime condition except  
violets, which were driven out by the  
hot weather.

# Ammoniated Lawn Lime

**Kills Weeds.**

**Makes Grass Grow.**

Applied as a light top dressing to lawns it kills all flat leaved weeds such  
as Dandelion, Daisy, Plantain, Sorrel, Chickweed, Moss, etc., in 48 hours  
and without other fertilizer produces a wonderful, luxuriant, rich, green growth  
of lawn grass—which is distinctly noticeable 50 feet away.

The use of Ammoniated Lawn Lime supersedes hand weeding of lawns,  
putting greens, etc. It saves the grass from being pulled up and in many  
cases ruined. Grasses take a new vigorous growth, avoiding probable  
trouble in the future.

**Quantities:** If very weedy 1-lb. to 40 square feet, 25-lbs to 1000  
square feet, (20x50). Half to one-quarter amount  
if moderately weedy.

**ABSOLUTELY GUARANTEED.** Money refunded if not satisfactory.

We want **Seedsmen or Florists** as agents and distributors in  
every important city and town.

**Retail Prices:** 2-lb. cans, 25c, 50 cans per case. 5-lb. cans 50c,  
20 cans per case. Bags, 25-lbs. \$2.00; 50-lbs.  
\$3.50; 100-lbs. \$6.00; 1000-lbs. and over 5c per lb.

Descriptive Circular and Wholesale Prices on Request.

soil. It prevents the onslaught of plant diseases or insect pests. Can be  
used at any time during the growing season, dry or in solution. Put up in  
12 pound cans, Price, \$2.00 each.

**For Sale by Leading Jobbers**

Further information can be obtained from

**D. D. JOHNSON CO., 64-66 Wabash Ave., CHICAGO.**

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.  
The pump is of brass throughout, simple and powerful.  
The mixing device keeps the contents of the tank well stirred up from  
start to finish.

When the machine is filled to within six inches of the top, a few strokes  
of the pump will compress enough air in the tank to produce a continuous  
mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our **Extension Hose, Extension Rods,**

and the **Mastin Whitewash Nozzle** for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

**J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.**

## The Burnham

Why buy half a boiler and then get a mason to build the other half? When you buy a Burnham you buy a base too. No bricking in expense.

**LORD AND BURNHAM CO.**

## Steel Return Tubular Boilers

The Most Economical Type of Boiler for Greenhouse Heating. Highly recommended by well-known florists.

**JOHNSTON HEATING CO.,** 138 E. 31st St., NEW YORK.

Lenox, Mass.

The annual rose and carnation night of the Horticultural Society was held April 2, and was a decided success; the members turned out in full force and were amply rewarded for their trouble. Seldom if ever have roses and carnations been seen in Berkshire county of such a high quality, upwards of 50 vases being staged for competition in the various classes. As a scarlet, Beacon was largely exhibited, while White Perfection, Enchantress, Winsor, Bay State, Rose Pink, Enchantress and Octoroon were strongly exhibited in their respective colors. An exhibit on which special praise was bestowed was two magnificent vases of Mrs. C. W. Ward and Alma Ward, carnations, exhibited by the Cottage Gardens Co., Queens, N. Y., and these were unanimously awarded a first class certificate, the society's highest award. Another exhibit which was greatly admired was an exceedingly fine vase of 50 flowers of a new carnation, White House, exhibited by Dailedouze Bros., Brooklyn, N. Y. This variety was shown in the best of condition, which speaks well for its shipping qualities. The flowers are borne on long stiff stems

## The Superior Standard

### RETURN FLUE FIRE BOX BOILER

contains more heating surface, and less water space than any other steel boiler.  
 $\frac{2}{3}$  of the heating surface is in the tubes.

Ask the man that knows the one using different style boilers—names are yours or the asking.

After using our boiler one season, you will say like all others: Nothing but "Superior" for me.

This boiler has given better satisfaction than any other boiler on the market

MADE IN NINE (9) SIZES FOR HOT WATER.

Send for catalogue and list of growers that are using this boiler.

**THE SUPERIOR MACHINE & BOILER WORKS, 840 -850 Superior St., Chicago.**

### Curved Eave Combination At Derby, N. Y.

A decidedly pleasing combination of our Curvilinear Palm House and Curved Eave Wings. It works out even more effectively than if it was all Curved Eave. And now that we mention Curved Eaves, what do you know about our particular way of building them? It would be a good thing to find out. Write us.

**Hitchings & Co.** 1170 Broadway, NEW YORK.

## The KROESCHELL BOILER

IS THE ONLY PERFECT  
**HOT WATER BOILER.**  
(NOT CAST IRON)

Has water in front, sides, top and a water back.

Made in 15 sizes, heating 6,000 to 50,000 square feet of glass to 60° at 15° below zero.

Prices and catalogue on application.

**KROESCHELL BROS. CO.**  
452 W. Erie St. CHICAGO.

and measure fully  $3\frac{1}{2}$  inches across. This was also awarded a first class certificate. The following were the principal awards:

Elm Court Farm was first for 25 Enchantress and Winsor carnations, and 12 American Beauty and Richmond roses. A. H. Wingett was first for 25 Beacon and 12 Bay State carnations, and 12 President Carnot roses. S. Carlquist was first for 12 White Perfection, Beacon, Enchantress, Octoroon and Rose Pink Enchantress carnations. J. J. Donohoe was first for

25 My Maryland and second for 12 American Beauty roses, Winsor, Beacon, M. A. Patten and Rose Pink Enchantress carnations, and was also awarded a certificate of cultural commendation for an extra fine vase of Stock Queen Alexandra. The judges were: E. Jenkins, D. Speirs, W. Jack and A. J. Jenkins. G. Breed read an interesting paper on "The Orchards of the Berkshires," dealing with the best varieties, soils, pests and general management, etc.

Waterproof Sheetting, Hay Caps, Etc.

**HENRY DERBY, 123 F. Chambers St., New York.**

Orange, N. J.

The regular monthly meeting of the New Jersey Horticultural Society was held on April 8, when Geo. Smith addressed the society upon "The Florist Versus the Private Gardener." Mr. Smith described the importance of the gardener to the community, engaged as he was in producing what was next to God's greatest creation. The speaker seemed to think that a gardener might become a florist, yet the last seldom became a good gardener. In the floral display, Lager & Hurrell staged a collection of cattleyas, dendrobiums, miltonias and phalaenopsis of extraordinary beauty and fine contrasting color. Of chief note among these was a Dendrobium nobile of the Ashworth variety, which is a pure white, and was exhibited for the first time in this country. Thomas Jones, of Summit, contributed a vase of wallflowers. A letter from Hitchings & Co., offering a fine silver cup was read. It was decided to offer this at the dahlia show in October. The contest for 13 silver cups brought out a large display of carnations, some roses and other flowers. The judges for the evening were John Hayes and Edward Eccles.

### Flowers of the Var Valley.

The Valley of the Var has been rightly described, observes the "Globe," as the metropolis of flowers. Bathed in the brilliant sunshine of the Riviera and Provence, the climate is eminently suitable for their culture, and acres of jasmine, violets, roses, orange, and other flowers scent the air with their delicious fragrance. For seven months out of the 12, the flower farms of Nice, Cannes, and Grasse produce enormous quantities of flowers, which are principally used in the Grasse distilleries, where they are made into scents. The traffic in cut flowers is also so great that the market gardeners and florists of Cannes and the neighborhood dispatch nearly 400 tons of cut flowers during the spring and summer months to different parts of Europe.

The season begins with the double Parma violets in January. They were planted in October in long furrows under the shade of the olive, citron, and lemon trees, to protect them from the heat of the sun. In November dots of color appear among the leaves; the green is gradually overpowered, till in December, the whole plantation bursts into a glorious sheet of vivid blue. The blossoms are picked twice a week, for they lose their fragrance if allowed to remain long on the plant. Scents are sold so cheaply in these days, that it will come as a surprise to some people to learn that the essential oils of some of the commonest plants nearly touch the price of radium. Pure essence of violets is quoted by some of the Grasse distillers at over £112 an ounce; 33 tons of fresh flowers are required to obtain a kilo of essence, and often a kilo of fresh violets costs a shilling (24 cents) a pound to buy. Violet essence, can, however, be marvellously imitated by a compound of tincture of orris root, which, when cleansed with alcohol and solidified, has an odor of violets, stronger than the perfume of the actual flowers themselves, and resembles the genuine violet scent so closely that only experts can tell the difference. The violet season lasts till the end of March, and the flower farms of Nice and Cannes together grow nearly 400,000 pounds weight of violets annually.

From May to the end of September is the busiest time of all the busy year to the flower farmers, for roses, orange, jasmine, lemon-scented geranium, heliotrope and many other flowers besides herbs, are then in full bearing, and the people are in the fields from morning till night, picking the blossoms, separating the petals, and taking them to the perfumeries. Roses are cultivated by the thousands, and in the season as many as 150 tons are gathered in the province of the Alpes Maritimes. They are celebrated for a peculiarly delicate perfume exhaled by the flowers, which is said to be due to the pollen carried by the bees from the orange groves to the rose beds. Directly the blossoms are picked they are taken to the factories, spread upon a cool floor, and the petals separated from the stalks. Roses in the Var valley are principally used for the manufacture of spirituous extracts, pomades, and soaps; very little attar is prepared, the enormous number of flowers required to make even a small quantity prevents its being sold in sufficient quantity to insure a profit.

Even more important than the rose to the flower farmer is the orange tree, and he considers it the most lucrative of his stock. From the flowers he obtains an otto worth 10 shillings, and a fat worth eight shillings the ounce, and when distilled with water the blossoms yield a fragrant oil used in making eau de Col-

ogne; from the leaves another fat worth three shillings the ounce; from the rind of the fruit an otto worth 12-16 shillings the pound, and when all the juice has been extracted, the pulp is sold to feed the cows, and greatly improves the quality of their milk. The wood of the tree, which is yellowish-white and close grained, is used for inlaying and turnery. In the Var valley the orange is chiefly cultivated for its blossoms. The season begins in April; gathering the flowers is weary, back-breaking work, for the pickers sit hour after hour, perched up in the trees under the blazing sun, and many fall to the ground, overcome by a peculiar form of syncope, caused by the intense fragrance of the blossoms. Rose leaf geraniums, mignonette, tuberose, jasmine, and other flowers occupy the grower till October, and the flower cycle ends in December with the cassia and the olive.

The Valley of the Var was celebrated during the middle ages and during the thirteenth century the little down of Grasse, round which the flower trade centers, rivalled Marseilles in commercial importance. Though its greatness is now a thing of the past, it has never lost its position in the perfume industry of France. The peasants who grow the flowers and prepare them for the market are a hardworking, thrifty race. In many cases it is they who own the farms and who dispose of their produce to the perfumers the prices they receive varying with the amount and quality of the flowers they sell. They are all born gardeners, and their speech bears many evidences that their forefathers inherited the trade from the Arabs, who were excellent agriculturists. They are never out of work. During the summer months, when the plants are in full bearing, every man, woman, and child is employed, and during the winter which is very short they are busy collecting, melting, washing, and clarifying the grease, lard, and beef suet in readiness for the coming summer. They live mostly on bread and vegetables, with goats' flesh once a week for a treat. As their trade is never fluctuating, they manage to save a considerable sum during the year,

### Bacterial Fertilizers.

The discovery of the mechanism of nitrification and the fixation of atmospheric nitrogen by the bacteria of root nodules, soon led to attempts to aid the process by the addition of nitrogen-fixing bacteria. In 1895, Nobbe and Hiltner patented a process of inoculating peas and beans and the soil in which they grow by soaking the seed with an infusion of a gelatin culture of the bacteria of the root nodules. Bayer offered a pure culture of Ellenbach's bacillus mixed with potato meal, but Maerker soon concluded, from the contradictory results obtained, that the preparation had failed to prove its value. In 1904 the United States Bureau of Agriculture distributed 12,000 boxes of bacterial cultures, which appear to have produced good results, in the majority of cases.

But the effect of these preparations is uncertain, as the abrupt change of medium may avert the development of the bacteria. The soil naturally swarms with nitrifying bacteria, but their growth may be checked by various causes, which will have the same effect on the few millions that are added.

Stocklase has endeavored to obtain harder varieties by cultivating the bacteria in a large mass of earth and has obtained remarkable results, but in view of the uncertainty mentioned above, it is prudent to defer judgment until several more years of experiment have elapsed.

Clayton, Mo.—Werner Bros., two houses 32x165 feet.

### Tacoma, Wash.

The Easter business here was the best ever known. All tell the same story—"Not enough flowers to meet the call." Prices were the same as last year, and even though the Easter was so early the lilies were sufficient. As a rule, the flowers were not so good, yet they were lilies and brought in the money. As a whole, the bulbs this season were not so much diseased as in former years. All kinds of bulbous stock was well cleaned up and all other flowers. One thing noticeable was the absence of roses. The carnations are generally very good and stems longer this year than we have ever seen in this locality. There was very few pot roses in the market, and, taken as a whole, the pot plants were rather inferior of the kinds we did see. It was a profitable Easter and that

## HALF HOUR CHAPTERS FOR PLANT GROWERS

### Hydrangeas.

A good deal of the success or other-  
wise of the Memorial day trade in  
plants will depend upon whether the  
specimens are well finished or not.  
There are many growers that do well  
with plants up to a certain time, lay-  
ing a good foundation, so to speak, but  
failing to put the proper finish on their  
plants that makes for quick sales. Hy-  
drangeas may be cited as a case in  
point. They may be good stock when  
started and the growth up to a certain  
point may be satisfactory, but then  
comes a check and the grower won-  
ders what is the matter. Feeding is  
an art far too little studied by the  
average plant grower. It is more than  
watering with liquid manure or  
sprinkling fertilizer on the surface of  
the compost. To feed judiciously it  
is necessary to know the exact con-  
dition—or as far as it is possible to  
determine it—of the roots, and this  
can only be done by close observance  
of the behavior of the plants. For in-  
stance, one often notices a few speci-  
mens on a bench that do not dry out  
at the root as readily as the others  
and possibly there is a pale yellow  
tint in the points of the new growths.  
These are signs that the roots are  
weak, and are incapable of using up  
the moisture as rapidly as it is being  
applied. Such plants should be se-  
parated from the rest in order to give  
them individual treatment, less water  
more particularly, until they regain  
strength and are again able to take  
the same supply as their fellows.

Then there is danger, on the other  
hand, if all are kept together, that  
some of the stronger plants will not  
get enough, either of feed or moisture,  
and in consequence the flowers will  
not be of the best substance or reach  
their fullest development. Strong,  
well rooted hydrangeas in the com-  
paratively small pots in which it is  
necessary to rear them, must have a  
lot of feeding and it must begin early  
enough for the flower trusses to ob-  
tain the full advantage. The plants  
for Memorial day are showing their  
trusses plainly now, and as there  
is every probability that the weather

will be fine and bright these will  
advance rapidly. The plants should  
be stood well apart to give the  
foliage a chance to enlarge and carry  
on its proper functions of sap elabor-  
ation, thus insuring good substance  
and color in the flowers, and the roots  
must be liberally fed. For these gross  
feeding plants it is immaterial what  
kind of manure is used, but when the  
feeding is kept up for any length of  
time a change should be made fre-  
quently. If ordinary manure water  
is used for a time a change to guano  
and root water is beneficial while  
should the foliage appear to be losing  
color, (not on plants over-watered as  
described above) nitrate of soda is an  
excellent stimulant, bringing the green  
back to the leaves and toning up the  
plants generally. But it should be  
kept in mind that this is more of a  
stimulant than a perfect plant food  
and must be supplemented by manure  
of a more substantial character.

### Geraniums.

We have so frequently referred to  
the culture of geraniums that it  
seems hardly necessary to say much  
about them specially for Memorial  
day, but as this is the one season of  
the year when more are used than all  
the others combined a line or two  
seems in order. The culture now nec-  
essary is to finish the plants properly  
and any that are out of cultivation in  
any way, either out of shape or in  
poor condition at the root, needing  
potting or more room must have the  
necessary attention at once. Although  
the time is short from now till May  
30, it is the best part of the growing  
season and it is wonderful how quick-  
ly the plants respond to proper treat-  
ment if their environments are cor-  
rect. We do not counsel cutting back  
as a general proposition so late in the  
season, but should any plants be bad-  
ly drawn we would not hesitate to cut  
back slightly and take a chance on  
their recovering in time. But this  
will not be necessary with stock that  
has been treated any way fairly and  
a little pinching will, in the majority  
of cases, be all that is needed, not  
even this where the plants are in good

shape. Keep them as far apart as room will allow and turn them around when giving a new stand so every part of the plants will get its proper share of light and air.

#### Marguerites.

Many marguerites are used around Memorial day for planting window and veranda boxes, vases and other ornamental devices, often in connection with dwarf cannas, dracaenas, scarlet geraniums, coleuses and other plants. While the experienced planter may not choose the most finished plants for such purposes, preferring those that are less developed, the general public, in the form of customers, like to see a fine plant full of flower and will not buy others as long as these are to be had. To be in good shape for Memorial day the young stock should be in the flowering pots now, and any that are still in the small pots must have attention right away. Those that are already established may be pinched over for the last time, stood well apart on a cool bottom of ashes on a light bench in a cool airy house and allowed to come into flower slowly. The yellow varieties are usually a little slower than the whites, but they get along well together in the same house if judiciously treated. Marguerites should always be potted firmly and in good but not rich soil. Any feeding that is necessary can be given when the buds show. Plants in loose, rich soil are never so good in habit, being loose and of soft growth—nor do they flower as freely as others given a firm root run.

#### Rambler Roses.

In many cases it will be more trouble to hold pot rambler back for Memorial day than to force them out, especially should the weather keep mild and bright. The plants that have been held outside for the purpose are much more forward than usual, owing to the mild weather, but some plants of Crimson Rambler, Lady Gay and Tausendschon cut back slightly about two weeks ago and stood since then in a cool house are very promising now and look like being just about right. Keep up as natural and airy an atmosphere around the plants as possible, but avoid chilling draughts, as these are safe to be followed by green fly attacks. With the best care in spraying and maintaining a good atmosphere this pest sometimes appears and fumigation is in order. Young rose shoots are very tender and easily damaged so let the fumigation be gentle and often repeated rather than give one strong dose. There is still time to pot young imported stock and get the plants in, but they will not be as good in quality as others that are potted and established. They should be cut hard or slight, according to the condition of the wood and the strength of the variety. Solid well ripened shoots need not be cut so hard as those which are undeveloped and green nor should strong growers be so severely cut as those of less vigorous habit. These plants will need more warmth than the better established specimens and we do not advise their use for the purpose unless they are likely to be really needed for they can never be so satisfactory as plants more naturally treated.

#### Pansies.

Pansy plants are always in demand for cemetery and ordinary planting and the stock must be fully exposed to all the light and air possible from this stage on. Flats with about 18 plants in each are good sellers if the plants are showing a few flowers and all such must be kept well apart and in the full sun. There is plenty of time to make these up from some plants or bench seedlings that were pricked out some time ago. The older of the plants will probably show flower buds but these must be pinched off until about two weeks before the plants are wanted and the flowers will be finer and of better color when they are allowed to flower. Plants in frames that have wintered over should be gone over occasionally and the soil firmed. A little fertilizer may be worked into the surface should the plants appear to be at all weak in growth, but usually the stirring of the surface after firming it will be sufficient.

HAVERFORD, PA.—A flower show is being planned by the society women of this part of the state. It is intended to hold the show here May 28.

BRIDGEPORT, CONN.—The tulips in the parks here look very promising now. There will be no change in the officers of the park department this year.

FAIRMONT, W. VA.—George Doffin, of Wheeling, is making preparations to open a retail store here May 1. It will be in the Cumford building on Main street.

WALLA WALLA, WASH.—Huff & Young say their trade this year at Easter was 40 per cent above that of last at prices about the same. Plants and cut flowers were hardly equal to the demand, lilies, azaleas and hyacinths selling best among the former, carnations, sweet peas and lilies in cut flowers. The weather was all that could be desired.

## THE RETAIL TRADE

THE florist suffers every time he takes a crisp dollar bill for a lady's theater rose, the petals of which fall at her feet before the end of the first act, to the utter disgust of her escort who purchased the flower. When the sidewalk vendor does that kind of thing he pulls his hat down over his right eye so that the buyer will not recognize him again. More alarming, however, is the possibility that the fair, fanciful sprite may hie to the dry goods counter next time out and select the artificial variety which, notwithstanding the dainty shades and fragrance of real attar, have stems and flowers so tough as to lash the life out of the boldest holdup man that preys upon belated wayfarers.

#### April Flowers in the New York Stores.

Although at this writing a cool wave has reached us, the effects of the remarkably warm weather of March are everywhere visible. Spring is here with all its attending charms, and among them are the flowers. That old saying that "April showers bring May flowers," might well be changed for this season, to read in effect that March sunshine has brought April flowers. The term, spring flowers, is now, commercially, rather indefinite, as we see spring flowers throughout the winter months; another tribute to the growers. Nevertheless, aside from commercial features, it is now that we see a profusion of all blooms that accompany the season and it is a feast for the eye.

In these later years, so much fine stock has been grown and sold that the demands and tastes of the experts in the business have become exacting. There were times when much stock that is now considered poor by dealers, would have been quickly taken. While it is a fact that the hot weather has brought in some very indifferent

HAUSWIRTH'S STORE, CHICAGO, AT EASTER.

DECORATED AUTO BY A. WIEGAND & SON AT THE RECENT FLORAL PARADE AT INDIANAPOLIS.

stock there is much that is good. American Beauty Roses are seen in fine form and it is to be regretted that they do not sell faster, but the market is governed by supply and demand. The choicest blooms may be found in the stores and it may be that the conditions of a surplus and low prices may in the end go far toward popularizing flowers and benefit the trade, but it is hard for growers and dealers to get much comfort out of that reflection at present.

Of other roses, Killarney, White Killarney, Richmond, My Maryland, Chatenay, Bride and Bridesmaid, may be seen in good condition. Killarney has distanced all competitors in productiveness and popularity. In the leading stores, moss roses are now seen. The demand for them is not great, but they help to swell the grand total that makes the store of the up-to-date dealer a great and varied collection of the best things in floriculture. Long ago the beauty of the lilies was enshrined in song and story. Doubtless we have more beautiful lilies today than any of those that aroused the admiration of the old poets and writers, but, there are so many of them. Lilies are always useful and beautiful, and a staple stock. The weather conditions of this spring have been so remarkable that it would be unjust to lecture the growers and charge them with responsibility for the prevailing surplus. There was a time when the narcissi of different varieties and the tulips were popular stocks, but it now appears that their popularity is waning. "We have have about cut out narcissus," said a leading retailer to the writer a short time ago. The early spring with the attending great crops of roses and carnations and the great influx of outdoor, southern stock has practically put this class of bulb stock in the discard. Much of it is seen and it helps to decorate a window, but little can be said of it as a commercial factor.

Unless we get another of the surprises that weather conditions occasionally bring, violets may be considered about out for this season. From some unexplained cause, many of them were very poor, even before the hot weather of March, but that about finished them, so far as quality was concerned. Doubtless there will be shipments of violets for some time to come, but conditions are not favorable for any quantity of good stock. Southern lilac is now arriving in quantity. While it cannot loom large as a commercial factor it adds to the beauty and variety in the stores. There are plenty of orchids and gardenias to supply all demands, and the demand is regular. That has been the case for some time regarding orchids, but gardenias are increasing in popularity. Great improvements have been made in their culture since we first knew them, not the least being the long stems. While the weather has had a deteriorating effect on some of the carnation stock, there is plenty that is yet good. If they have suffered from the unusual conditions they have but shared the lot of other stocks. Though all stocks rise and fall both in popularity and in price, it would appear that good carnations are about as safe a proposition as anything.

There is an abundance of lily of the valley and this is another stock which, while it has its ups and downs, will always be popular. Sweet peas are plentiful and much fine stock may be seen. The great improvements in sweet peas in these later years is another indication that we are almost to a point where we are in danger of being overwhelmed with a wealth of good things. There are a number of other stocks on the market that add variety. Daisies, snapdragons stocks, cut primroses and pansies and arbutus are frequently seen. The spring plant trade is now assuming large proportions. Well flowered geraniums, daisies and other seasonable

plants are easily found. While the cut flower trade is not what many would wish to see it, there are signs of an approaching improvement. We have good flowers but too many of them. A decrease in the supply seems inevitable and it would work great good in the market.

INDIANAPOLIS, IND.—Burglars broke into Bertermann's store on Massachusetts avenue at midnight April 7 and looted the cash register, but as the day's receipts had been banked, they obtained but \$7.50. The burglars were frightened away by Walter Bertermann, who happened to make a visit to the store at that time.

State Flowers.

The following are state flowers as adopted in most instances by the vote of the public school scholars of the respective states. This list has been compiled at the request of several readers:

|                |                               |
|----------------|-------------------------------|
| Alabama        | Goldenrod                     |
| Arizona        | Cereus Giganteus              |
| Arkansas       | Apple Blossom                 |
| California     | California poppy (Romneya)    |
| Colorado       | Columbine                     |
| Connecticut    | Mountain Laurel (Kalmia)      |
| Delaware       | Peach Blossom                 |
| Florida        | Camellia Japonica             |
| Georgia        | Cherokee Rose                 |
| Idaho          | Syringa                       |
| Illinois       | Rose                          |
| Indiana        | Corn                          |
| Iowa           | Wild Rose                     |
| Kansas         | Sunflower                     |
| Louisiana      | Magnolia                      |
| Maine          | Pine Cone                     |
| Michigan       | Apple Blossom                 |
| Minnesota      | Moccasin Flower (Cypripedium) |
| Mississippi    | Magnolia                      |
| Missouri       | Goldenrod                     |
| Montana        | Bitterroot                    |
| Nebraska       | Goldenrod                     |
| Nevada         | Artemisia tridentata          |
| New Jersey     | State Tree, Sugar Maple       |
| New York       | Rose                          |
| New Mexico     | Rose, Crimson Rambler         |
| North Carolina | Chrysanthemum                 |
| North Dakota   | Goldenrod                     |
| Ohio           | Buckeye                       |
| Oklahoma       | Mistletoe                     |
| Oregon         | Oregon Grape                  |
| Rhode Island   | Violet                        |
| South Carolina | Carolina palmetto             |
| South Dakota   | Anemone patens                |
| Texas          | Blue Bonnet                   |
| Utah           | Sage Lily                     |
| Vermont        | Red Clover                    |
| Washington     | Rhododendron                  |
| Wisconsin      | Violet                        |

## Diseases of French (Roman) Hyacinths.

Two pests appeared last year (1909) to curtail the production of hyacinth bulbs at Ollioules, France, the home of the Roman hyacinth. The first was an insidious little green worm which worked its way to the very vitals of the bulb and left it hollow as a sepulchre after its passage, while to all intents and purposes the bulb was sound and healthy. It takes an experienced hand and eye and much hard work to sort out the contaminated bulbs from a lot of 100,000 or 1,000,000, but that is what several of the Ollioules shippers undertook to do this season. Some of the smaller cultivators lost their all, as the shippers would not knowingly buy of a grower whose crop was attacked.

A field of hyacinths would be perfectly sound and another right beside it would be attacked so badly that not a healthy specimen remained. Knowingly, or unknowingly, certain of these bulbs were put upon the market, and that is why the mere caliber of the bulbs did not make the market price this year as it had formerly. Even the additional 50 in 1,000, increased in many instances to 100, would not reimburse the shipper for the extra work involved in sorting out the good from the bad, for the peasant grower could hardly tell the good from the bad. A sound bulb of 12 centimetres was worth considerably more than a hollow one of 15. It was this prime cause that accounted for the increased number of shipments of French bulbs to the United States this season from Ollioules and Hyères. In actual volume the sale was perhaps not so large as in former years, but the number of shipments was largely increased by the scarcity of the bulbs at certain moments, for it is a well recognized fact that the product must reach the American market in all cases as soon as it is gathered.

The necessity of watching and sorting the stock as it was brought in to the shippers by the growers round about made the shipment often a slow process. It is to the credit, however, of the growers and shippers of "oignons a fleurs", that this warm little corner of old Provence handled the situation as well as it did, and if, in general, the hyacinth bulbs did not size up as plump as formerly, so long as the quality remained the same there is little likelihood that the celebrated market of Ollioules will dwindle away,

at least until some American grower can produce as luxuriant a crop from the same quantity of parent bulbs as can those of the sunny hillsides of Mediterranean Provence.

Another narrow escape this season was in thwarting the inception of a curious malady which attacked the hyacinth bulbs after they had been taken from the ground. It commenced with the base of the bulb and worked upwards in much the same way that an onion or carrot rots in a damp cellar. It was in fact a rot of some kind, like the black rot that attacks the vine, but the bulbs were not so readily doctored as by the process of spraying a vine with "jus de tabac." A fumigating process was undertaken by burning sulphur beneath great drying racks on which the bulbs were spread, thus killing the rot at its birth, and though many hundreds of thousands of bulbs were supposedly susceptible to a growth of the malady there were not many that were not cured, according to forcing experiments which were undertaken with bulbs taken from among the suspected bulbs which had previously been sulphur treated. The circumstance is worth taking note of and it is to be hoped that no further developments of an untoward nature will be brought about.

Several among the smaller producers not only lost their present season's crop, but all their capital invested in the species. It is to be remarked, however, that strenuous action is being taken to avoid a recurrence of either of the pests, for while the cost of production has steadily been raised with regard to the staple White Roman hyacinth of commerce, the growers and shippers of Ollioules are bound that it shall not be brought about by the lowering of the reputed quality of their product.

Toulon, France.

F. M.

MONTVALE, MASS.—Wm. Ward is planning to build an additional greenhouse in the near future.

READING, PA.—Steabenow Bros. have purchased a plot of ground at Twelfth and Exeter streets, where they will erect a greenhouse and salesrooms.

MINNEAPOLIS, MINN.—Besides furnishing plenty of flowers and plants for the institution, the conservatory of the local workhouse paid a cash profit of \$951 in 1909.

## CHRYSANTHEMUMS

✓  
Rooted Cuttings.

The vast number of rooted cuttings disposed of at the present day and age, prompts a few notes on the subject. In the first place, what constitutes a first-class cutting? Fig. 1 represents three cuttings of the same variety showing a wide range of quality. The first was not only taken before it attained a desirable length, but was too thick and weak to be put in the sand. The second was drawn by lack of air or light, either on the stock plant or by being allowed to remain in the cutting bench until thin and spindling. The third has been given air during the whole operation and from such a quality one might expect to establish every cutting received. A short cutting of good vigor is far preferable to a long one if its length is due to forcing process.

Surely each cutting man has first-class stock, or at least he so says and considers them. The purchaser who has potted the plants from various sources is the best critic. The fact that cuttings are long and well rooted gives little assurance that they are prime, and could not be greatly improved by slight changes in the methods employed. Most of the long cuttings are due to being rooted in a close, warm house with little or no bottom heat or by forcing the stock plants under similar conditions. It is true they will root under adverse conditions, but when potted they are more difficult to establish than when given abundance of air with gentle heat underneath.

The producers of the finest exhibition blooms root their cuttings without bottom heat, but they are not subjected to heat overhead; in fact, not over 40° is considered preferable. The prices received at present will not justify any one in following such a method, it being a question if many of the cuttings being offered are sold at a profit even when produced with the greatest dispatch. If all varieties were as free as Golden Glow, Gloria and the Pacifics, there might be some margin left at the lowest prices, but there are many kinds which neither produce or root as quickly. All of these conditions modify the cost of production. Forcing gives succession

Fig. 1—Various Forms of Chrysanthemum Cuttings.

of cuttings at shorter intervals, but the quality is impaired.

From the foregoing it seems important to strike a happy medium between the cold and forcing process. During the winter months when heat is essential we have found an overhead temperature of 55° with bottom heat about 10° higher give the most satisfactory results, producing roots fairly quickly and still providing sufficient substance. Under such conditions the ventilators must be more or less ajar at all times. There are a few varieties which do not respond to such treatment owing to peculiarities which they constitutionally possess. We refer to such kinds that are both slow in producing and rooting. Probably Virginia Poehlmann is the most reluctant propagator of the present popular commercial sorts and W. R. Church, Maud Jeffries and Fidelity are examples in the exhibition class. Anyone attempting to produce these kinds with any satisfaction or profit must resort to the forcing method. Both stock plants and cuttings require greater heat, as they make very little growth in a low temperature and the cuttings harden if not rooted quickly.

It is true that the quality cannot be considered improved by such treatment and where early deliveries are not important normal conditions are preferable. As the sun returns and the houses feel the result thereof, they will produce excellent cuttings. Throughout the dark days more judgment should be exercised in watering the cutting benches, giving ample supply when it is required, and, as far as possible, in the early part of the day so the foliage is dry by night. Such treatment with a free circulation of air are the best remedies for cutting bench fungus and the rotting and spotting of the leaves.

Some consideration will be necessary toward the welfare of the rooted cutting while in transit. If there is considerable difference in the length of the cutting it is wise to put the long and short ones in separate bun-

dles. The short cuttings always suffer first and if any heat before reaching their destination it is invariably the short ones, which, being excluded from the air, are sure to perish. When mossing and bundling, the object should be to keep the roots moist and the tops dry and for this reason we prefer not to have the paper in which they are wrapped cover their entire length and thus exclude the air from the leaves. If about one-third of the length of the cuttings extends beyond the wrapper, there is less danger of damping.

After the danger of frost is over it is best to pack open, placing the bundles in an upward position and secure them in some manner so that they cannot shift about. It is impossible for expressmen to handle every package with care, and to insure satisfaction to the customer it behooves every shipper to do all in his power to prevent the bundles from being displaced. It is not a bad idea to use printed paper labels and where several sorts are included in one pack-

Fig. 2—Chrysanthemum Cuttings Bundled Ready for Shipment.

age, use a label for each bundle; then in case they shift there is no difficulty in sorting out each kind. If our memory serves us right, the paper labels cost 25 cents per 1,000 printed which is cheaper than a wooden label can be written.

We prefer not more than 25 cuttings in a bundle and, by the way, make the count 26 to 28. It is true 100 cuttings are 100 cuttings to the shipper, but it is very seldom they will give the purchaser 100 plants when established in pots. Fig. 2 shows cuttings bundled ready for shipment. Fig. 3 represents two plants of Ivory in 2-inch pots. The first was a drawn cutting potted three weeks ago and shows how the soft lower leaves have withered, leaving the bare stem. The second was from a short cutting potted in February and still retains its foliage down to the pot. The slow growth is due to the low temperature maintained during the cold months, but from now on all kinds will respond more rapidly. ELMER D. SMITH.

### Chrysanthemums in the South.

The weather is getting rather warm now for propagating in the greenhouse, but the cuttings will root readily in a cold frame. The frame should be deep enough to protect the cuttings from the dry winds. The best material for the bed is composed of about two parts charcoal dust and one part finely sifted loam. This can be pounded firm, and the cuttings set out in the usual way. Sand for cutting bed purposes is being discarded owing to trouble with fungus and the extra care required to prevent damping off. If charcoal dust is not readily obtainable pure loam will answer very well if care is taken in the watering. In very hot dry weather the cuttings may be sprayed a few times during the day, but do not let the bed get soggy. Whatever shade is used should be raised a few inches above the frame, back and front, to allow a good circulation of air. At night the shade can be removed entirely and let the cuttings have the benefit of the dews. At this season the cuttings should root in from 14 to 20 days. Later in the season more or less trouble is experienced from damping off, but if the extreme top of each cutting is pinched out before inserting in the bed the difficulty will be overcome. This is a simple but sure remedy. It is better not to take the cuttings too soft, but go down to the semi-hard wood and make two cuttings from a stem. The cuttings may take a few days longer to root, but the result is surer. As soon as rooted the cuttings should be placed in pots and kept growing without a check until planting out time.

WM. LEAR.

PROVIDENCE, R. I.—John F. Wood was petitioned into involuntary bankruptcy April 9.

LONG BRANCH, N. J.—W. W. Kennedy & Son have leased a new store at 230 Broadway and will be open for business soon.

SALT LAKE CITY, UTAH.—A. M. Holter, who has been the florist at Liberty park for the past 10 years, has resigned. He intends to go into business for himself.

## THE ROSE.

### Roses in Oregon and Washington.

A paper read by Wm. S. Sibson, Portland, Ore., before the meeting of the American Rose Society at New York, March 17, 1910.

You will appreciate the vastness of the subject upon which I have been requested to speak, when I remind you of the extent of territory, and diversity of conditions in regard to climate and soil, that exists within the two states I am to discuss. Combined, they aggregate 165,000 square miles, an approximate acreage of 61,500,000 acres of land, so diversified in character that, in a brief address, it is possible only to select a limited area, and to refer generally to the balance of this wonderful empire, which in development is only in its infancy. Having a coast line on the Pacific ocean of about 500 miles, these states are divided about 150 miles from the coast by the Cascade range of mountains into two great sections, namely: East Oregon and Washington, and West Oregon and Washington. It is of conditions in the western division that I will endeavor to say a few words that may interest those who are strangers to our country.

#### CLIMATE.

The climate of western Oregon and Washington is remarkably mild and even. Occasionally, of course, we have hard winters. The one from which we are now emerging has been, all told, the worst I have seen during a residence here of nearly 40 years. As a rule, however, the winters are mild, rainy and pleasant, with a mean temperature in a series of years for the five months between October and May of about 46°. In the summer months, from May to October, the average temperature, during a like period has been about 63°. These temperatures are averages for a series of years. Cold snaps, which seldom record lower than from 10 to 15 degrees of frost, occasionally occur in winter and the hot spells of summer, which range from 85° to 90° and sometimes a few degrees higher, have been, of course, included in arriving at the averages I have quoted.

#### RAINFALL.

Western Oregon and Washington are frequently credited with an excessive rainfall; in fact, I have heard strangers claim that in Oregon it rains 13 months of the year. As a matter of fact, the precipitation at Portland does not exceed 46 inches per annum, and in a series of years it has not reached this average. Perhaps, to people who visit us in winter, it may appear to rain excessively, because the bulk of our rainfall takes place during the six months, from October to March. I have noticed that when we have an unusually long, rainy winter, generous crops of grain, fruit, and all the products of the ground result, and while I have never seen an analysis of our Oregon winter rain water, I believe it is one of the best natural fertilizers, and laden with plant food by a beneficent nature.

#### ABOUT ROSES.

With such a climate as I have briefly outlined, with soil unexcelled, and with a people who are enthusiastic lovers of the rose, is it surprising that our country should have become celebrated for its roses? The motto of the

American Rose Society, "A rose for every home, a bush for every garden," is with us a condition and not a theory. This sentiment is good, but in my opinion far too modest, and I hereby beg to make a motion to amend and substitute, "Roses for every home; roses for every garden." The motto of the Portland Rose Festival Association is, "Roses fragrant, roses rare; roses, roses, everywhere." And this is consistent with the feelings, opinions, and practice of our people.

#### WILD ROSES.

Wild roses of many species are indigenous and flourish in luxuriant foliage and wealth of bloom. The fragrant sweet brier, vigorous and strong, in many places, lines our country roads. In some districts of deep alluvial soil, the swamp brier attains a height of 20 feet or more. High up some mountain slope, we find wild roses rioting amid the huckleberry, sallal, and other native shrubs.

The late Rev. Dean Hole, a great rosarian and one of the originators of the National Rose Society of England, in his valuable "Book About Roses," says in effect that wherever wild roses grow, rose culture may be successfully carried out. Without a doubt there are in our soil, climate, and surroundings, qualities peculiarly conducive to rose growing. Eastern people are often surprised at the size, perfection, and beauty of roses in this country. To emphasize this assertion, I will quote the opinion of an expert, well known to many of you, who visited Oregon in 1903:

#### PORTLAND, ORE.—AN EXPERT OPINION.

"Portland is the only place I have struck since leaving home that I would like to remain in." This was the remark of E. G. Hill, of Richmond, Ind., a horticulturist well known to most rose growers of this city, who arrived here a few days ago on a tour of the coast. He had heard of the beauty of Portland roses and the first thing he did after getting here was to look about town and visit some of the principal rose growers. He was fortunate

in arriving just after the rain and so found the roses in good condition. He was taken out by James Forbes to visit Riverview cemetery and other places and so had an opportunity to see the best roses to be found in Oregon. He was delighted and said he had never seen such beautiful roses before, though he had traveled through England and France when the roses were at their best and had come through southern California on his way here. Of some of the flowers he said: "I have never seen such a hedge of LaFrance roses, even in France, and as for the Caroline Testouts, the man who originated that variety never had any such on his place." The foliage on the trees and shrubs in the cemetery and the vivid green of the grass Mr. Hill considered perfectly wonderful.

#### SIZE OF ROSES.

I think it was Oregon, and perhaps Portland, that first realized all the good characteristics of that fine variety Mme. Caroline Testout, which is now perhaps one of the five most popular roses in existence. It fairly revels in the warm, moist days of early summer and responds to intelligent and generous treatment, with almost continuous bloom from June until the frost of winter. When I was an amateur, or, as we say here, a rose crank, and before joining the professional ranks, I had the time and inclination to develop the best I could get out of my rose garden. You know Paul Neyron was, up to a few years ago, and perhaps is yet, the largest rose in cultivation. I have seen it credited in your eastern catalogues with this characteristic, and further described as sometimes attaining 5½ to six inches in diameter! In Portland, in my own garden, I have cut this rose, not once but often, measuring 11¼ inches in diameter! Perhaps you will think this is a rose story. It reminds me of a friend of mine, Judge W., of Portland, now passed across to the happy hunting grounds, beloved of all good sportsmen and rose lovers.

ROSES IN PORTLAND.—A FLOWERY CORNER.

A HEDGE OF PORTLAND ROSES.

Many Streets in the Residence District Look Like This for a Large Part of the Year.

Some years ago the judge and I were fly fishing on one of Oregon's lovely streams. A little distance ahead I saw him scientifically play and shortly land a fine trout, calling out excitedly, "Sibson, a 3-pound beauty." While saying this, he had taken from his pocket his scale and hooked it in his beauty's gill, but, lo! it registered only 1¾ pounds! Throwing his scale far into the stream, he cried, "Darn this scale; it never is right." I beg, however, to assure you that the foot rule that measured the roses above referred to was correct. While the size attained above is exceptional, and was the result of constant and intensive cultivation, it indicates relatively the size of flowers that can be realized in our climate and soil.

#### EVOLUTION.

Ever since I have known Portland, when her population was only about 3,000, her people have been devoted to roses, and I believe the same applies to every town in western Oregon and Washington. Nearly 20 years ago excellent rose shows were held in Portland. In those days the ladies of the city took hold and, by united effort and good executive, exhibitions were held that would have been a credit to much larger places. The love of roses thus encouraged, rapidly increased and every new home builder became a lover of the rose. In 1901 the Hon. F. V. Holman, a leading attorney and noted amateur rosarian, suggested that Portland be christened and hence-

forth called "The Rose City." The suggestion quickly took and today, not only in this country, but throughout the civilized world, Portland is identified with fine roses.

In 1905 the Lewis & Clark exposition attracted, I think, some 2,000,000 people to this city, and the reputation and beauty of her roses were disseminated far and wide. About two years later, the Portland Rose Festival Association was organized and annually in June there is held a "week of roses," including the great rose show, under the auspices of the Portland Rose Society. At this rose show last year it was estimated 3,000,000 rose blooms were used in the decoration of the building in which the show was held. Perhaps I am saying too much of Portland, but in this connection it is almost unavoidable, because I live here, and have been, and am, in close touch with these matters. Other towns, however, in western Oregon and Washington are developing the same success in their cultivation. It is invidious to mention names where all are interested, but it would surprise many of you gentlemen to see the beauty and quality of flowers that are exhibited at the rose shows throughout this section. At many of them, the latest introductions of Europe are exhibited. Our rosarians are also discriminating and well posted about their favorites, and woe betide the dealer who is not careful to keep everything true to name. Shakespeare

says: "What's in a name? That which we call a rose by any other name, would smell as sweet." But here we must have the true rose by its true name that was given to it by its introducer at its birth. I could say more about this, but it does not come within the province of this paper.

#### COMMERCIAL ASPECT.

So far what I have written may not have been of interest to you as professionals, wishing to know something about the conditions from a commercial point of view. I regret to say that for commercial growing in a large way, many unsurmountable drawbacks exist. The mildness and beauty of the climate so favorable for the amateur is absolutely impossible for the professional. About five years out of seven, the plants will not ripen until too late for distant shipment. I have often cut good outside roses at Christmas. Then our spring usually opens too early. Frequently when the east is blocked with ice and snow, our roses are budding and getting ready to bloom. I have more than once seen outdoor roses in Portland begin to bloom by or about April 8. On the other hand, several times no roses have been in bloom on Memorial day, May 30.

In the former cases, the shipping season is ruinously curtailed. At other times there are killing frosts late in January or February, and in my own experience I have seen the young

wheat plants frozen out in the middle of March, necessitating reseeded of practically the whole northern part of western Oregon. In such seasons the plants suffer such serious injuries that a year is practically lost before they can again be ready for market.

#### The Gardeners' M. P.

Extraordinary scenes of mourning were witnessed at Sunderland, says the Journal of Horticulture, when the funeral took place of Councillor Thomas Summerbell, ex-labor M. P. for the borough, who died suddenly of heart failure a day or two previously at the age of 48. Among those who attended were the mayor and corporation, and many representatives of the labor party, including about a dozen members of parliament, trade unions and friendly societies. Members of miners' lodges came from great distances, bringing their banners and bands, and in addition there were the bands of the police and the musicians' union. There were altogether over 6,000 people in the procession, and over 50,000 spectators lined the route. All tramway traffic was suspended during the funeral. The North-Eastern Railway Co. ran a special train from Newcastle, calling at the collieries on the road. By request of the mayor the restaurants which are usually closed on Sundays kept open for the convenience of those who journeyed to the town to attend the funeral. Mr. Summerbell was a member of the last parliament, but was defeated at the late election. He was deputed by his party to champion the interests of the young gardeners at Kew, whose conditions of pay were considered unsatisfactory. In token of their esteem and appreciation of the deceased they despatched a large and handsome wreath to be placed upon the coffin.

#### New Use For Privet.

The Fruit, Flower and Vegetable Trades' Journal, (Eng.) has a specially contributed article entitled, "A Possible New Industry," in a recent issue "Some weeks ago," says the writer, "when discussing horticultural matters in general with a friend, he surprised me by informing me that the common privet (*Ligustrum vulgare*) contained precisely the same dye as fustic (*Morus tinctoria*), and that an infusion of privet leaves produced results identical with fustic infusion. Mr. Bolton, who is a medallist and author of a work on wool dyeing is foreman dyer in a large dyehouse, and he followed up this discovery by exhaustive tests which proved that the privet color was not affected by exposure to sunshine or boiling with soap, and that it acted in practice in exactly the same way as fustic. Over 3,000 tons of fustic wood are imported annually. 'Can privet be profitably grown at home to replace these imports, and so keep the money in the country?' asks the writer. The present price of fustic chips is £6 per ton and fustic extract is £36 per ton.

PROPHETSTOWN, ILL.—George Miller intends to make extensive improvements on his greenhouse plant soon.

## THE CARNATION.

#### Care of the Young Stock.

Propagation of young stock is, or should be, completed by this date, for any cuttings put in after the first week of April are too late to make satisfactory stock for this season unless they are permitted to remain in the field later than the average date of planting. The only exception to this rule would be in the case of some novelties that were being propagated for stock purposes rather than for blooming, for in such a case the late rooted cuttings might prove of value as stock producers for another season. These last lots of cuttings require close attention during the first few days after they have been potted off, from the fact that the sun is now strong, and the houses are necessarily aired freely both night and day, and these conditions are very trying to newly potted cuttings. Therefore, careful shading and frequent spraying are necessary until the plants make some more roots. A wilted cutting loses time, and every day counts in the short season that is now allowed for the preparation of carnation plants, for the weeks pass very quickly between the middle of April and the middle of July.

The earlier lots of young plants should now be breaking freely, and

be made for each house, so that one may see at a glance just what sorts are in that particular house, and will save many unnecessary steps in locating the various lots of each variety at the time they are wanted for the field, for it is practically impossible to keep each variety by itself when there have been several successive lots of cuttings put in.

Green fly and thrips will be avoided on the young plants by preventive spraying with nicotine solution, or by fumigating when the weather permits, though there are few opportunities for the latter at this season from the fact that the weather seldom permits the closing of the houses. Thus the spray pump becomes the standby after the middle of March, though adding to the labor of the grower to that extent, for fumigating may be done by the night man, while spraying must be done by daylight in order to be done properly. Plenty of fresh air, both day and night, will have been given to the young stock to harden it off ready for the field, the fires having been done away with just as soon as the weather permits. This practice produces hardy and short-jointed plants that will start away almost as soon as they are planted out. Then with frequent cultivation with either the hoe or the cultivator, and some hand-weeding where it is not safe to

ROSES IN PORTLAND, ORE.

Even Poor Men's Houses Boast a Wealth of Roses.

those that have not yet been topped will need looking over every few days in order to keep them topped as rapidly as they are in condition for that process. It is much easier to do the first topping while the plants are on the benches than it is to do this work after they are planted out in the field, for it takes less time and is not nearly so tiring to the back of the operator. And it is not only neater, but also saves time when planting, if the weeds are kept down while the plants are in the houses. These are merely ordinary cultural details, but they all count at such a busy period as planting time. It is also of much assistance if a careful list of varieties

use the hoe, the stock should get away in good style, given reasonably favorable weather for a few weeks. After April 1 a light shading is usually required on the flowering stock, this practice not only saving the color of the flowers, but also preventing the soil from drying out quite so frequently, and at the same season the plants are generally ready for some extra feeding, either in the form of a topdressing of some fertilizer composted with soil, or a mulching of short manure, either or both being beneficial, according to the condition of the plants, and the amount of fertilizing material that may have been given them earlier in the season.

Winter prices are a thing of the past, a more or less pleasant memory, but there is Memorial day to come, and carnations may be in greater demand at that time, so it will not do to neglect the stock during the spring slump. More syringing will be permissible now, or rather will be necessary, for the hot sun and drying winds encourage the spread of red spider and thrips, and while the latter may be eradicated by the faithful use of nicofume, the red spider is more readily dislodged by vigorous syringing. Ventilation should be as free as the weather will permit, using a minimum night temperature of 50° as a standard.

W. H. TAPLIN.

### To Be Done Now.

#### IN THE GREENHOUSES.

Shift on all the salvias that have not already been attended to and pinch the shoots for the last time.

Do not allow the young fuchsias to flower yet. Keep them growing and see they are not pinched for pot room.

Keep plenty of air on the rambler roses wanted for Memorial day. The present hot weather is likely to bring them too early. A light shade is also beneficial.

Pot the last batch of coleus cuttings as soon as rooted and give them good care. They will need all the time there is between this and Memorial day to finish anything like salable plants.

Pick off all old flowers on the azaleas that are to be carried over another year. If these go to seed it will greatly weaken the plants and they will not flower so freely.

Prick off the seedling ferns in pots before the young plants appear. Shade and cover the flats with panes of glass to keep in the moisture.

Separate young tomato plants before they have a chance to become crowded in the seed beds or flats. Drawn, weak stemmed plants are never satisfactory and are late in producing fruit.

Let seedling *Asparagus plumosus* and *A. Sprengeri* become strong before pricking off but not crowded.

If the houses are crowded some of the forwardest bedding geraniums may go into frames but they must be covered at night.

Keep close watch on the young cyclamens for insects. Thrips and green fly are apt to put in appearance now and if not killed destroy all hopes of healthy plants. Shading is necessary now.

It is not too late for sowing sweet peas inside to produce flowers before those from outdoors are plentiful.

#### OUTDOORS.

When pruning rambler and climbing roses leave as much of the new wood as possible. It is on this wood that the flowers are produced and while it is useless leaving poor or undeveloped wood, none of the well ripened should be taken.

A light mulch of loose, partially decayed manure should be laid on the beds where herbaceous stock has been newly planted. This will serve to keep in the moisture and prevent the sun reaching the roots.

Prepare the quarters for asters, zinnias, sweet sultan and other annuals for cutting with especial care, using plenty of composted soil or half decayed manure rather than fresh.

A light, firm soil is better for colored leaved shrubs than a rich, heavy loam, bringing out the color in the foliage much better.

The finer varieties of wrinkled peas may still be sown. After the end of the month the earlier, quicker maturing kinds are better.

When planting the early sown beets pinch off the end of the tap root.

Oriental poppies are gross feeders and where there is any suspicion of the soil being poor give a good top dressing of rich manure.

Plant potatoes in any soil that has to be cleaned this year. A good crop can be grown and the frequent hoeing and cultivating necessary will destroy the weeds.

Liquid manure is an excellent stimulant for early cabbage. If this is not plentiful nitrate of soda is an excellent substitute.

Frequent hoeing is the best hastener of growing crops. It allows the sun's warmth to get to the roots, sweetens the soil and retains surface moisture.

The Late Rev. D. S. Heffron.

## OBITUARY.

### Rev. D. S. Heffron.

The Rev. Daniel Salisbury Heffron, horticulturist and minister of the gospel, died at his home in Washington Heights, near Chicago, March 30. Mr. Heffron was born at Schroepel, Oswego county, New York, 93 years ago. He was educated at Falley seminary, then went to teaching and was superintendent of the public schools of Utica, N. Y., from 1850 to 1868.

Mr. Heffron was a naturalist of considerable attainments and numbered Asa Gray and the elder Agassiz among his intimate friends. Throughout his entire life he was an enthusiastic horticulturist and engaged extensively in that pursuit, while at Utica, raising among other things a number of meritorious varieties of grapes and potatoes, the latter including Early Rose, which had a world-wide vogue and is still grown extensively.

In 1868 he moved to Chicago and engaged in the seed business, buying out Hovey & Nichols at 170 Lake street, retaining A. H. Hovey as a partner. The latter dropped out in a short time and after the fire was succeeded by James H. Morris as a silent partner, the concern retaining the firm name of D. S. Heffron, with H. G. Savage as manager. After two or three years Morris succeeded Heffron and later Morris sold out to King & Savage. The concern seems to have had considerable difficulty at the time

of the fire, changing location frequently. In 1872 it was located on State street near Harrison in an emergency shanty, moving the following year to a new building farther north on the west side of the same street. Washington street is also given as one of the locations about this period.

It was at Whitestown that Mr. Heffron met and married Dorcas Mandane Chapman. His wife, who survives him, is a direct descendant of Roger Williams. The venerable couple celebrated their golden wedding anniversary in July, 1895. They had been married 64 years. They had eight children, two who died in infancy; Dr. Helen M. Heffron, who died in 1894; Walter S. Heffron and Ella Abbott, the wife of Arthur Abbott, both of whom died in 1902, and his surviving children, Ida Cassa Heffron, Arthur D. Heffron and Cora Heffron Murray. Walter S. Heffron's genial personality is held in loving remembrance by the Chicago flower trade, with which he was identified, lastly in the business of E. C. Amling, and his brother, Arthur D. Heffron, with the Albert Dickinson Co., Chicago, is well and favorably known in the seed trade.

When Mr. Heffron moved to Washington Heights it was sparsely settled, but in 1872 he was largely instrumental in the organization of Bethany Union church and remained its pastor for 17 years. The remaining years of his life were spent in this community and his warm interest in horticulture and floriculture continued to the last.

The funeral services were held at the home of his daughter, Mrs. George W. Murray, April 1, and the interment was at Mount Greenwood cemetery.

### Herman Wild.

Hermann Wild, for 42 years a resident of Sarcxie, Mo., died at his residence Sunday, April 10, of old age. Born in Rosswein, Saxony, December 24, 1824, he left his native country at the age of 20, arriving in New York, from whence he went to Milwaukee, Wis., and in 1848 was married to Miss Maria Haase, who survives him. One of the early settlers at Sarcxie, he purchased a tract of land and commenced farming, later establishing a florist business. He was a man of kindly nature and benevolent disposition. Recently he and his wife presented the city with land for a park. Besides the widow, one brother and six children survive him. He was a member of the Odd Fellows order for 40 years, the body being laid to rest with the honors of that organization.

### Twenty Years Ago.

APRIL, 1910.

A cyclone at Louisville, Ky., did considerable damage to greenhouses.

The season was remarkably early, but owing to a very mild winter not a mild spring.

Fine pictures of the exterior of some of the New York state florists' places were shown in the AMERICAN FLORIST, showing great skill and more care than is usually taken now-a-days.

Vaughan's Greenhouses at Western Springs, Ill., were in their first year.

The old *Genista racemosa* was being sent out under the name of *G. Canariensis*.

Dr. Geo. Thurber, one of the most accomplished of American botanists, died April 2 at Passaic, N. J.

OCALA, FLA.—Andrew McDonald, of Summerville, N. J., has moved here with his family and will establish a flower business soon.

THE McCray Refrigerator Co., Kendallville, Ind., makes a fine line of refrigerators specially designed for florists, full details of which will be found in the handsome new catalogue just issued.

## Mother's Day.

The honor of originating Mother's day belongs to a young lady of Philadelphia, Pa., Miss Anna Jarvis, who conceived the idea of celebrating the anniversary of her mother's birth, which is May 9, under this designation. The white carnation is the floral emblem of the day, but other white flowers are used when carnations cannot be obtained. We understand this is the fourth year of the celebration.

## Chrysanthemum Society of America.

Owing to a clerical error in our issue of April 9, page 530, the date of the annual show at Morristown, N. J., reads November 23, 24, 1910. It should read November 2-3-4.

## Brooklyn Botanical Garden.

Plans are now being made for the new Botanic Gardens and Arboretum which will be located in Institute park, Brooklyn, N. Y. The Institute of Arts and Sciences has an annual fund of \$2,000 to \$2,500 for the purchase of plants while the city will furnish the land and maintain the gardens. Dr. C. Stuart Gager, director of the department of botany at the University of Missouri, has been engaged as director at a salary of \$4,000.

## Fuel Economy.

ED. AMERICAN FLORIST:—

Will you please tell me if a boiler 10 feet long and 42 inches in diameter, with ten 6-inch flues, is as economical on fuel as one of the same dimensions with smaller flues, the boiler to be set in brick?

F. S. W.

With a high chimney, a boiler with 3-inch flues will be found more economical of fuel than one with 6-inch flues, especially if a high pressure of steam is desired, or if the full capacity of the boiler is utilized. On the other hand, if there is considerable reserve capacity in the boiler, and it is only necessary to maintain a low pressure, a very good showing can be made with a boiler with 6-inch flues. In other words, taking two boilers having the same area of grate and fire surface, but with 6-inch flues in one and 3-inch in the other, it will be possible to get more out of the latter with a given amount of fuel, but the difference will be very slight when the boilers are called on for one-half, or less, of their full capacity.

L. R. T.

## Flower Pot Accident.

A WARNING TO WINDOW GARDENERS.

A peculiar and unfortunate accident happened in front of the Belmont hotel, Forty-second street and Park avenue, New York, on the afternoon of April 8. John E. Mayhew, an advertising agent of Worcester, Mass., had just left the Grand Central station and was passing the hotel, when a flower pot fell from the tenth story, struck him on the head and broke his skull. He was taken to Bellevue hospital in a dying condition. We trust that this accident will be a warning to all dwellers in cities. Many times we have noted great carelessness by householders concerning the way they have plants, both in pots and boxes, outside their windows. Doubtless the people who caused this accident are deeply grieved, but that does not improve the situation. Here are some instructive figures from a local paper:

"Distance flower pot fell before striking Mr. Mayhew, 120 feet. Weight of flower pot, about 10 pounds. Its velocity when Mayhew was hit, 128.60 feet a second, or about 100 miles an hour. Force of the blow, about three tons—about the same force a projectile from a 6-inch gun has when it strikes an object."

## Another Pernicious Bill Pending.

H. R. 23252, now before congress (committee on agriculture in the house) provides for importation of nursery stock into this country by permit only and requires that a United States officer inspect all lots so imported at destination regardless of state inspection, that he have 10 days to make such inspection, and that the secretary of agriculture may extend the operation of the law to all seeds and bulbs.

This is another of the drastic laws put forward at the instigation of and by employes or by authority of the Department of Agriculture and should be opposed by every commercial nurseryman, seedsman and florist in the country.

## The Late Mrs. Vesey.

IN MEMORIAM.

Whereas, The Ladies' Society of American Florists has been called to mourn the loss of its beloved first president, Mrs. Wm. J. Vesey, of Fort Wayne, Ind., and is desirous of expressing its sympathy; therefore, be it

Resolved, That in the death of Mrs. Vesey our society has lost a member whom we have prized for her wisdom and advice. The board of directors will miss her executive ability in their session this coming summer. To know her was to love her instantly. She has gone in her prime of life and our hearts go out in sympathy to the husband and children—we grieve with them; and be it further

Resolved, That a copy of these resolutions be sent to the family, and also spread upon the minutes of this society, and published in the trade papers.

MRS. PETER FISHER,  
MRS. J. F. SIBSON,  
MRS. J. C. VAUGHAN.

Whereas, The Supreme Ruler of the Universe has called from labor to rest Mrs. Maggie S. Vesey and thereby caused a cloud of gloom to hover over the immediate family and relatives as well as the large circle of friends in her beloved profession; therefore, be it

Resolved, That the St. Louis Ladies' Home Circle in regular meeting assembled extend to the bereaved family in this their sad hour the sympathetic hand of consolation and affection with the profound hope that the confidence of our loss being her eternal gain shall widen the silver lining around the cloud of sorrow; be it further

Resolved, That a copy of these resolutions be presented to the family and to the trade press, and also become a part of the records of this meeting.

MRS. OTTO G. KOENIG,  
MRS. C. A. KUEHN,  
MRS. THEO. MILLER,

Committee.

St. Louis, Mo., April 11, 1910.

Telephone Central 3284.

### Chicago.

#### AN IMPROVEMENT.

There are chronic "kickers" on the market who said things were getting worse at the end of last week, but nobody pays much attention to them. There was a far healthier tone to the market, the last two days more especially, and stock cleaned up better than for a considerable time past. Of course many growers are throwing out more or less stock and this lessens the supply but there was also a brisker demand, both for local work and for out-of-town shipment and a great deal of stock was moved. Commencement exercises at out-of-town points have called for considerable flowers already in the territory served by this market while the city hotels are doing a big business and the call is large for flowers for table decorations. Roses have been good with more substance to the flowers and carnations are also in good shape. The arrival of *Cattleya Mossiae*, earlier than usual, has put the orchid supply on a better footing. *C. Schroederæ* and *C. Mossiae* overlapping. There are now plenty of flowers for all. Sweet peas are still of medium quality

only and the stock is not too plentiful. We have noted some extra good, long stemmed gardenias during the week and these are selling well. Even violets have appeared again in better form after everyone thought they were "down and out," but they will not cut much figure in the market any more this year, and the end of the month will practically see the end of the violets.

During the present week there has been little change to chronicle. Stock has shortened up still more but, unfortunately, the trade seems not to improve any. Both roses and carnations are good, much better than usual at this time of the year. Orchids keep getting more plentiful and the Spencer sweet peas improve this stock a little though they are not plentiful as yet. Sweet peas are holding their own better than any other flowers. Some excellent gladioli are in and sell well. The early red peony from the southern part of the state appeared this week; the flowers are cut very tight, but they are much earlier than usual. If frosts hold off we may expect the deluge soon.

### OPENING OF THE BLACKSTONE HOTEL.

The opening of the new Blackstone hotel gave John Mangel, who will run the florists' store in the building, a big amount of work. The decorations were very ornate and beautiful, yet simply and effectively carried out. In the main hall, fronting on Hubbard court, large vases of American Beauty roses, large palms and hydrangeas were effectively arranged. The palms were grand specimens and the hydrangeas finely flowered stock. The main dining room is a magnificent apartment, curtains, carpet and all fittings being of a beautiful bright yet subdued red which lit up finely at night. Quite a pretty departure was noted in the combined lamps and flower stand on each table, the shade being just above a vase, shedding a soft light on the flowers with an exquisite effect. My Maryland roses and white daisies were used on all the tables. It is noteworthy that a separate battery is provided for each table, thus insuring a regular light. The ball room and banquet hall were also beautifully treated, large kentias being the main feature, while magni-

ificent specimen kentias 14-16 feet high were used in the smaller dining or coffee room on the west side of the hall. In the lower entrance on Michigan avenue, smaller but splendidly flowered hydrangeas, kept low in front of the plate glass partitions, had a most pleasing effect. The whole decoration, in fact, was very fine and a great credit to Mr. Mangel, whom we congratulate on having secured this important concessions. The retail store will be finished in a few days and is of white marble and plate glass, a very attractive affair. A large icebox and marble top counter is installed, and everything is up-to-date in the fittings.

#### NOTES.

Bassett & Washburn have been very successful of late with Rhea Reid roses and the flowers now coming in to the

store are excellent in every way, long stems, good foliage and equal to Beauties. The Beauty crop is keeping up in fine shape and all other stock shown is good. Mr. Washburn says he never saw a prettier sight than the snow made at Hinsdale on Sunday. The lilac bushes were in full flower, but when the snow came they were covered with it and the effect of the pink flowers coming up among the snow was unique and beautiful. Probably such a thing was never seen before by the oldest or any other inhabitant. Although two inches of snow fell and the fruit trees are in full bloom, Mr. Washburn thinks little or no harm was done to the fruit.

John Zech and M. Mann, of Zech & Mann, and a small party of others interested, paid a visit to the big carnation growing establishments at Joliet

on Sunday last, also visiting Albert C. Rott, the well-known retailer at that city. At the greenhouses everything was found in good shape and Mr. Rott was extremely busy with those elegant designs of his. Mr. and Mrs. Rott's hospitality is unbounded and an excellent dinner was done full justice to, all leaving for home early after a very pleasant day.

The quality of the American Beauty roses now arriving at Vaughan & Sperry's is unusually good and they are handling immense quantities. One day last week 2500 long stemmed flowers went to one customer and there were other orders nearly as large. F. Sperry says the crop will last about three weeks, by which time their growers hope to have another section in which will carry on the supply until after Memorial day.

## VAUGHAN & SPERRY

Long Distance Phone.  
Central 2571.

52-54 Wabash Ave., CHICAGO

The first peonies of the season at Kennicott Bros. arrived on April 18. E. E. Pieser says that in his 30 years' experience he has never known them so early, though some 12 or 13 years ago they came in on April 29. From May 1-5 is considered an early date, but this year they are from 10-15 days earlier than they were ever known before. The variety is the early red, *Officinalis*, and the flowers were cut very tight.

The J. B. Deamud Co. is handling good gladioli, including Augusta and Vaughan's new dark red seedling No. 203. The flowers are so good that they don't stay around the store, being ordered in advance and snapped up almost before the boxes are open. Emperor narcissus is in excellent form here, also lilac from Michigan and all cleans up well daily, though the prices are not as high as could be wished.

Zech & Mann have been handling a great line of Bride and Bridesmaid roses all the week. The flowers are perfect in color, the foliage good, and they say that the crop will last several weeks. All other stock here is in excellent shape and the out-of-town trade is reported good. Carnations are also a strong staple, the flowers being of fine color, large, and with extra good stems.

Among the stock at Wietor Bros., we noted some especially good Mrs. Jardine this week. This rose is rapidly improving in public favor and will be on hand from now on. Its only fault is that it flies open rather quickly in hot weather, and on this account should be cut tight. The long-stemmed Beauties at this store are also very attractive.

H. R. Hughes, of West Van Buren street, returned on Saturday from a very pleasant week's visit to Detroit. He made his headquarters at Breitmeyer's and says he was treated royally by all the Detroit brethren. Mr. Hughes is drilling the children for his May party, which he hopes to make quite an educational feature this year.

B. F. Rubel, of the Fleischman Floral Co., returned on Monday from a two weeks' vacation at French Lick. He is feeling better for the rest and says that business has been excellent during his absence and continues good. Orchids, long-stemmed gardenias and American Beauty roses are among the principal items in demand here.

The shipping trade this week at Peter Reinberg's has been extremely good and city trade is a little better than it was. The cooler weather has put all the stock in excellent condition

### "The Busiest House in Chicago"

**W**HY not send your orders for **Cut Flowers** to us? You save all further worry as you are assured of getting just what you want.

## J. B. DEAMUD CO.

51-53 Wabash Ave.,

CHICAGO

for shipping, the American Beauty and My Maryland roses and all varieties of carnations being among the strongest lines.

Geo. Reinberg is sending in fine *Cattleya Mossiae*, the flowers large and of good color. We have frequently advised leaving cattleyas to fully develop before cutting and are glad to note that the flowers coming to market from various growers show signs of this advice being taken.

The Deamud Bowling Trophy

Won by T. C. Yarnall for Best Average During the Season 1909-1910.

#### BOWLING.

The Carnations are champions of the Florists' bowling league which ended the season on April 14, by rolling the games of which the scores follow, the last of a series of 81. Carna-

tions, first; Violets, second; Orchids, third, and Roses, fourth, is the order. The team and individual prizes will be announced next week. In the competition for the Deamud cup, T. C. Yarnall was successful. There was a very large and enthusiastic crowd at this meeting and the enthusiasm became greater as the evening rolled on. On Thursday of this week a meeting will be held at J. Kruchten's store at which the prizes will be awarded and probably arrangements for the team to represent the city at the Rochester convention in August will be made.

#### First Game.

MARKET IN BETTER CONDITION.

Business has been somewhat better this week and stock has fallen off a little in quantity. This makes a better combination for everybody. Sweet peas have shortened up considerably and the quality is much inferior to that of the past two weeks. They are selling very well and the growers clean up every morning at good prices. Roses are fairly plentiful, but the quality is decidedly off. It is difficult to get Killarney or Richmond with good heads and stems. The smaller grades are much better value in proportion than the larger ones. The prevailing fault seems to be that the roses are cut altogether too tight, and store men complain that they do not develop and open as they should. More often they droop over at the neck before they show any signs of opening. White Killarney is coming best of all at present. Beauties are fairly plentiful and of good quality; prices are down to the point where they are attractive to the buyers. Gardenias are plentiful and a good many are being used. They are off somewhat on quality. Some of the finest snapdragon of the season is coming in and it sells well. Iris is in good demand, but the supply is rather limited at present. A few gladioli have made their appearance and are picked up on sight. Mignonette is plentiful and selling well. Primroses are falling off a little. Easter lilies and callas are plentiful enough for all purposes, and on large lots can be bought quite cheap. Candidums are coming in in goodly numbers. Valley is in good demand and considerable stock is coming in. Orchids are still off a little. Carnations are not so plentiful and are selling well. There is plenty to meet all demands, but no great over-supply. On the whole the markets have been in much better shape throughout the week than during the preceding week or two. The plant trade is lively and there is considerable work going on with pansies, etc. Some fine hydrangeas and rambler roses are coming in.

Yellow marguerites are coming in very heavy, as is usual at this season of the year. They are a popular flower and always sell well. Asparagus Sprengeri is coming in much more freely and is dragging a little at times.

### NOTES.

Peirce Bros. are bringing in the first of their dwarf gladioli. This firm is making them a specialty this season.

#### AN AVERAGE WEEK.

The business of the past week has been about up to the average of the season. Flowers are very plentiful, although the crops shortened up towards the last of the week. This was particularly true of sweet peas, which advanced in price from 75 cents to \$1 per 100 sprays. Two or three cool nights in succession, following a very warm spell, made the shipments light, and Saturday night found the boxes of the commission houses cleaner than since before Easter. American Beauties, the specials, grade up very well and there is a fair demand for good stock. Good white roses are also well cleaned up every day. Carnations move rather slowly, but good white sells as well as any. Easter lilies and callas are seen in quantity, the former selling at \$5 to \$6 per 100 and the callas at \$8. Violets are done for the season, Ed. Reid offering the last New York doubles on Tuesday last. Lilac from the south of us as far as Washington kept the demand supplied for last week and now it is in full bloom in local gardens, almost the earliest on record. Gardenias are plentiful with prices low; the supply of this flower, that is the large quantity offered the past winter, has made it very popular for personal adornment, and while many more were grown than ever before the increased demand made the returns very satisfactory to the growers.

A visit to Adolph Farenwald's at Hillside found everything in good order, not a foot of waste ground and all the houses either in or out of crop as the proprietor desired. A large house of Killarney roses was particularly attractive. There were 10 or 12 beds 200 feet in length so manipulated by the starting and pinching process that they were brought in when most in demand. Two beds, containing 1,000 plants each, produced for the 18 days around and including Christmas 25,000 flowers. Another set of beds were in full swing at Easter, and some others are now just in crop. All of these are growing under one roof, a ridge and furrow house. Killarney is Mr. Farenwald's favorite, for the reason that it figures most and best in the returns. The majority of the stock seen is two-year-old and some

three, while a few four-year-old are also held in high estimation. Grafted plants show up well after the first season, own root stock being the best the first year. A large plant at the end of one of the beds in a row where its mates had died or were removed was

exceptionally strong and was pointed out as an example of what one plant could do if given the chance. This plant will produce 125 good flowers this season.

Mr. Farenwald says the custom of growers is to set the plants 10-15 inches apart in the rows, but he gives 18 and one foot between the rows. He thinks if he only had the nerve to give them 24 inches each way it would pay in the increased vigor of the plants. His My Maryland returned him the most money per square foot of bench space up to February 1, and was then passed by Killarney. Richmond is seen here in perfection, but is not as profitable as of yore. He believes this rose does best on its own roots, producing most in winter when the prices are highest. The figures for his Richmond specials have been better than for Beauties when offered in the same market. Another point is that in 100 Richmonds all were perfect blooms, while the same could not be said about Beauty. The borders about the ground beds in which the roses were grown were all cement, two to three inches in thickness, the 2-inch looking as strong as the other. When asked how much glass his place contained he said by New York measure 52,000 square feet, by the Philadelphia gage 65,000, but when measured by the Chicago rule it was 75,000. New York, he said, counted the square feet of ground covered, Philadelphia the glass in the roof, and in Chicago they counted in the glass in the sides of the house. Cort's fasteners for holding the iron stakes to the wires, running the length of the bed were, he considered, indispensable and were in use in all the houses.

New houses are still going up. The King Construction Co. is erecting two for Didden & Sons 30x200 feet.

K.

## New York.

## A SLIGHT IMPROVEMENT.

There was an improvement in the business of the past week. Though there was no marked advance in prices, there was, on account of cooler weather, less stock, and it moved better. While we are not in the habit of prophesying, it is a reasonable supposition that, for the next two months, business will be more encouraging. Judging by all precedents covering our recollection, there will, for some time to come, be a decrease in the supply of cut stock, and if so it will greatly benefit all branches of the trade. Along about Easter, stock came into this market that was given or thrown away, for the simple reason that it could not be sold. We trust that such a condition will never again be seen. The price of American Beauty roses pushed up a little during the past week. Twenty-five cents each is now the ruling price; a few very good ones sell for 30 cents, but these are not controlling figures. The shorter grades of tea roses seem to go better than the specials. The reason is that in a great city like this there is always an immense amount of funeral work. A feature of the market at present is the very low price of gardenias, and it would appear that this industry, like some other branches of the trade, is being overdone. Gardenias that were formerly sold for 75 cents and \$1 each were of a poorer quality than the flowers now being hawked about the streets of the city for 15 cents each. Four cents per flower is about the best that lilies bring, but it is hoped that there will soon be an improvement. It may have been the warm weather of March, or other reasons, but there are people in this wholesale district that would be glad to find an animal that would eat lilies at a profit.

## NOTES.

A meeting was held in the Grand Opera house building on the night of April 18 to consider the proposition for a plant and cut flower market under the Queensborough bridge. A petition was drawn up and received about 50 signatures, asking the city comptroller to take favorable action. It has been erroneously stated in a local journal that this was a special meeting of the Florists' Club. It was a meeting of interested parties, in which members of various organizations took part. As yet, nothing definite can be stated regarding the course that may be pursued.

The decorations at St. Bartholomew's church for the Gould-Drexel wedding, April 19, by Alexander McConnell, were largely in pink roses (Chatenay and Mrs. Jardine), callas and white daisies. The entire scheme was carried out in an artistic and becoming manner. The bridal bouquet was of moss roses and orange blossoms.

Burglars entered the store of Geo. Saltford, at 43 West Twenty-eighth street, April 18, but failed to open the safe there. In the private office they were more successful in their safe cracking, but only found a few pennies and a couple of boxes of cigars, the best of which they annexed; they also took \$300 from a desk.

Wm. E. Williams, a highly respected citizen of Brooklyn, died at his home, 766 Fulton street, on April 11. Mrs. H. C. Riedel, his daughter, is the wife of H. C. Riedel, foreman of A. J. Guttman's store, 34 West Twenty-eighth street. He was buried in Greenwood cemetery, Brooklyn.

F. C. Sheerer is now with the New York Cut Flower Co., selling the extensive products of the Carl Juergen's estate of Newport, R. I. Mr. Sheerer is making many friends in the trade.

## Orange, N. J.

An announcement was made at the regular meeting of the New Jersey Floricultural Society at Lindsley hall, Main street, April 8, that Hitchings & Co., 1170 Broadway, New York, the greenhouse builders, had donated a silver cup to the society, valued at \$25. This will be competed for at the annual dahlia show which will be held the second Friday in October. There was a large attendance and many beautiful exhibits. Geo. Smith, of East Orange, gave a very interesting talk on the commercial florist. He said that a man can be a florist but he cannot always be a good gardener, and the man who does not love plants is not worthy of the name of gardener. The florist or gardener that finds out what he can do the best and makes a specialty on that point is the man that always has the greatest success. Lager & Hurrell, Summit, had a great display of orchids on exhibition which attracted a great deal of attention, and for which they received 99 points. Foliage and flowering plants, also roses, carnations and other flowers from private places were in competition for points.

A. C. Von Gaasbeck, John Dervan gardener, was awarded 90 points for roses; A. B. Jenkins, Albert F. Larson, gardener, 97 points for roses; S. M. and Austin Colgate, Wm. Reid, gardener, 75 points for roses; Thos. Edison, Frank Drew, gardener, 70 points for roses; Wm. Reid, 95 points for carnations; Chas. Hathaway, Max Schneider, gardener, 90 points for carnations; John Dervan, 85 points for carnations; 95 points for best flowering plant; Wm. Reid, 85 points for flowering plant; 90 points for foliage plant.

Cultural certificates were awarded to John Dervan for calceolarias and to Max Schneider for schizanthus and lilies. Chas. Ashmead was awarded a certificate of merit for lilies and campanulas; Wm. Reid, certificate of merit for calceolarias. Thomas Jones, Short Hills, showed wallflowers. Fritz Berglund, gardener at the Essex County country club, showed sweet peas. Chas. Mc. Taggart of New York was present at the meeting. W. R.

LYNDONVILLE, VT.—The weather here has been extremely cold, with snowstorms almost daily during the last week. Nothing is planted outdoors and trees cannot be lifted because of frost in the ground, but the weather the past few days has been more spring-like.

### Boston Notes.

One of the largest growers of gardenias in New York recently sent a man over to this city and shipped him quantities of these flowers every day to dispose of amongst the trade. After flooding the city for a week, the agent returned to New York far from pleased at the gardenia trade here. He did not choose an opportune time or he might have fared much better.

The salesmen of the Bayersdorfer Co., of Philadelphia, have been in the city for the past week. They displayed a very attractive line of metal designs and Memorial day novelties, and booked several very good orders. They report trade as being very brisk in their lines.

The whole of the park systems are a treat to see at this time. Forsythia in full flower is to be seen everywhere. Everything seems to be unusually forward, owing to the spell of warm weather recently. Several beds of tulips are to be seen in full flower, and fruit trees are much more forward than is usual for the time of year.

Madison, N. J.

Rose night with the Morris County Gardeners' and Florists' Society was held April 13. It was not represented this year by any novelties, though we had hoped to have Radiance here to see if her countenance contrasted favorably with standard varieties. L. A. Noe had American Beauty, Bride, Bridesmaid and Killarney, all of which were shown in the pink of perfection. Joseph F. Ruzicka, the grower, was on hand and ready to answer any questions, cultural or otherwise. A cultural certificate was awarded. Another notable exhibit was from C. A. Work, Wm. Mühl-michel, grower, including My Maryland and Richmond. These were especially well grown and secured for the exhibitor a cultural certificate. H. B. Vyse, of the A. R. Whitney estate, Glimpsewood, had a beautiful batch of Hydrangea hortensis in 5-inch pots, single stem. Mr. Vyse starts his cuttings for these in May, and after the wood is fully ripened in fall he cuts them down, takes a lateral shoot near the base and allows it to flower in a rose temperature, after being duly rested. This way is quite unusual, but very successful with him, as was fully demonstrated.

In view of the grand inter-society show to be held in Morristown, November 2, 3 and 4, the next meeting will be given over to the rose growers to arrange the rose section of the final schedule, so that it will, as nearly as possible, be arranged to the satisfaction of all. Everything looks very bright for a grand fall show. The prizes are invitingly large, and the Whippany River club house is all that could be desired in the way of a show hall. There is lots of room and it is easy of access. Herbert Littlewood was elected to membership. Ernest Wise, foreman in the park greenhouses of the H. McK. Twombly estate, under Robt. Tyson, has resigned his position to accept one with a wider field in Thomasville, Ga. The best wishes of the club go with him. He still retains his membership. There is a warm feeling of goodfellowship in this society—for no less than nine members residing in as many different states retain their active membership. E. R.

Rochester, N. Y.

At a meeting of the Florists' Association, April 11, it was unanimously decided to support the Wilkie bill now pending before the legislature. This bill carries with it an appropriation of \$50,000 to provide adequate greenhouse facilities for work in floriculture at the Cornell University college of agriculture.

Charles Vick, superintendent of the S. A. F. exhibition, reported that space in the hall was going rapidly and that probably the galleries and basement would have to be utilized.

**THE ANDERSON FLORAL CO.**

533 MARSHALL AVE.

Joliet, Ill.

The stock at the J. D. Thompson Carnation Co. never looked better than at present, and P. M. Peterson, the firm's capable and enthusiastic grower, is to be congratulated on its elegant condition. The young carnations are still being shipped and there are large quantities in the best of order. Chrysanthemums, too, are in fine shape, clean and healthy. Mr. Peterson is cutting back and planting up quite a little stock of carnations for early fall work. The stock prepared for early field planting is first class in every way and the whole place is very neat and clean.

Albert C. Rott, though his store has been somewhat overshadowed by building operations, causing pedestrians to take the other side of the street, reports trade as fine, and we found him busy with funeral and other work. When the new stores are finished, he will reap the advantage, for they will be among the finest in the city.

At the Chicago Carnation Co.'s greenhouses the novelties, Sangamo and Mary Tolman, are still flowering freely. Both are great producers and the color of Mary Tolman is exquisite. All the popular kinds are grown here in quantity and heavy cuts of all varieties are in progress.

St. Louis.

TRADE CONTINUES DULL.

The weather has been rainy all week, windy and cold. Trade has been very dull and carnations have been sent daily to the rubbish pile, the public not being anxious to buy even at 10 cents per dozen. The more conservative west end florists have their usual amount of business. Weddings, receptions and funerals have given them a little to do, but things in general are dull. The cold weather has kept the plant men guessing as to planting-out time. The absence of outdoor flowers ought to help the market. Long-stemmed American Beauty roses have been very plentiful and good stock was sold at \$2 per dozen.

NOTES.

Ostertag Bros. have introduced a novelty in the retail business here. They have furnished a suite of rooms above their store on Jefferson and Washington avenues, with what they term their house of flowers. They have table, mantle and wedding decorations and canopies, all in artificial flowers and the customers can choose from these designs what they desire in fresh flowers. There is also a separate room for funeral designs. Henry stated that they had received several visitors, the local papers having given the innovation quite a send-off.

The Florists' Club held its monthly meeting last Thursday, 19 members being present, with President Geo. Windler in the chair. Owing to the plant men being busy many were unable to attend. De Wever's bulletin has not yet appeared, but it is expected some action will be taken on it at the next meeting. Fred Ammann, in a few touching remarks, made a motion that the club extend its sympathy to the bereaved family of the late Mrs. Vesey, of Fort Wayne, Ind.

Arthur E. Beyer, formerly with W. J. Palmer & Son, of Buffalo, for 17 years, is now in charge of Grimm & Gorly's down-town store and is also buyer, being seen at the market daily.

A. C. Canfield, of Springfield, Ill., is shipping some fine long-stemmed American Beauty roses to this market. Some of the finest lily of the valley and carnations from Henry Baer, Peoria, Ill., is seen at C. A. Kuehn's.

The Eggeling Floral Co. furnished a 9-foot gates ajar for a funeral last week in East St. Louis.

Park Commissioner Scanlan is providing roller skating places in the parks for the children.

Louis Geiger now has full charge of Grimm & Gorly's Cass avenue store.

A. J. Meyer is now bookkeeper at C. A. Kuehn's.

**DUNKIRK, N. Y.**—The Dunkirk Seed Co. reports the largest business in its history.

THE demand for seed corn both early and late has been good and many stocks are about exhausted.

AN important illustrated article on the "Diseases of Roman Hyacinths" will be found on page 620, this issue.

**DETROIT, MICH.**—D. M. Ferry & Co.'s travelers' annual meeting and banquet was held April 6, there being 110 present.

**WINDSOR, ONT.**—The seed warehouse of D. M. Ferry & Co., which burned here recently, was insured in seven companies for a total of \$25,000.

**ERFURT, GERMANY, APRIL 1.**—Ernst Benary announces that Ernst Benary, Jr., son of Frederick Benary and Heinrich Benary, son of John Benary, have been admitted to the firm.

THE death of the Rev. D. S. Heffron, who raised the Early Rose potato, and other horticultural productions, is recorded in our obituary columns this week. He resided at Washington Heights, near Chicago.

**YOST SLUIS** and P. 'Sluis, of Sluis Bros., Enkhuizen, Holland, arrived at New York April 16 and will call on the seed trade in the United States and Canada. They were in Chicago April 20, enroute to the coast.

**G. C. ELDERING**, of W. J. Eldering & Son, Overveen, Holland, writing April 11, says: "Dutch bulbs show good growth afield. The flowers, however, are rather uneven and somewhat off in color on account of continued frosts." Mr. Eldering will start for the United States about May 1.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale Trade Only.

**SAN JOSE, CALIF.**

**Pieters-Wheeler Seed Company**

HOLLISTER, CAL.

Growers of High Grade Seeds

Onion, Lettuce, Radish, Sweet Peas, Etc.

CORRESPONDENCE SOLICITED.

THE pure seed bill which passed the Maryland house and senate was vetoed by the governor April 13, after he had decided to sign it. It is said he was not opposed to the provisions of the bill, but that there were some technical points, presumably regarding the authorship, which it seems caused him to veto it.

### French Bulbs.

Special cable advice from Marseilles indicates that at the meeting of the syndicate on April 16, the growers' price for "run of the crop" on the following kinds was fixed at the prices here stated in francs:

Roman hyacinths 11 ctms. and up 80. Narcissus P. W. G. 12 ctms. and up 18.

This means that jobbers in the district will demand for White Romans, 12 to 15 ctms., about 82 to 85 francs and for Narcissus Paper White Grandiflorus a price of from 20 to 25 francs.

### Another Pernicious Bill Pending.

H. R. 23252, now before congress (committee on agriculture in the house) provides for importation of nursery stock into this country by permit only and requires that a United States officer inspect all lots so imported at destination regardless of state inspection, that he have 10 days to make such inspection, and that the secretary of agriculture may extend the operation of the law to all seeds and bulbs.

This is another of the drastic laws put forward at the instigation of and by employes or by authority of the Department of Agriculture and should be opposed by every commercial nurseryman, seedsman and florist in the country.

### California Seed Crops.

Never in the writer's seed growing experience have all of the ranches been in such excellent condition. We have had something over 14½ inches of rain this season, which is sufficient to make a crop. The rain has fallen gradually, so that he ground has absorbed all of the water, which has been a great benefit to all growing crops. The hoeing of the crops will be completed on all the seed ranches, those of other growers in this section as well as our own, within the next two weeks, and if nothing unforeseen occurs, we will harvest a good crop.

## Peas AND Beans

Alfred J. Brown Seed Co.,

Growers for the Wholesale Trade.

GRAND RAPIDS,

MICH.

On our Menlo Park ranch, we have a field of lettuce of various varieties over 2½ miles in length and from one-fourth to one-half mile wide, where we have a magnificent stand. It certainly would be a great sight for any seed dealer to inspect this field of lettuce.

All varieties of onion are looking excellent. The critical time for this crop, however, is when the seed is in the dough, at which time, if we have hot winds, the yield might be injured to some extent; but, from present prospects, everything is in a most promising condition, the season having been ideal.

The radish crop is better than it has been for many years. Our beet crops are looking excellent, also salsify, kale, mustard, celery, carrot, and the various other crops we are growing on an extensive scale are in fine condition.

We hope that many seedsmen can arrange to pay us a visit this year and look over the crops, not only on our ranches, but those of other growers as well, as this is the season above all others to make such a trip.

CHAS. P. BRASLAN.

San Jose, April 11.

### Grapes for Forcing.

ED. AMERICAN FLORIST:—

I will thank you for advice as to the best grapes for forcing, also for some of the best cultural methods.

#### BEGINNER.

The best grapes for forcing are Black Hamburg, Alicante, Madresfield Court, Gros Guillaume, Duke of Buccleugh, Alnwick Seedling, Muscat of Alexandria, Foster's Seedling, Buckland Sweetwater and Lady Downe's Seedling. To be successful in growing grapes, too much importance cannot be attached to the formation of the border. I prefer inside borders exclusively, as the grower has them absolutely under his control, giving him every opportunity to feed the roots and also withhold water when necessary.

To construct such a border I would recommend excavating to a depth of three feet, sloping the bottom to any one point, from which a line of drain tile must be laid to carry off all surplus water. Cement the sides and bottom of the excavation to prevent the roots getting out into cold, unsuitable soil and also to keep water from surrounding land from getting in. After the cement is dry place carefully over the surface of the bottom from 10-12 inches of broken stone to give free drainage. Then over these place a layer of sods taken from an old pasture, laying them carefully grass down, and over these sprinkle a good coat of half-inch bones and also some soot, and a liberal layer of old lime plaster taken from some torn-down building, then another layer of sods and so on, layer by layer, until the border is completed.

When this compost has settled plant one-year-old canes five feet apart and prune back the cane, leaving only three or four eyes, and when these start rub off all except the strongest one, which will grow and form the fruiting cane. This cane, the following season, cut back to within five feet of ground, if proper treatment has been given, will carry handsome bunches without injury, and the following year more bunches, according to its strength, until the fourth year, when a full crop may be ripened.

In forcing grapes a low temperature, from 50° to 55° at night, must be maintained, allowing a rise of 5° by day when artificial heat is necessary. Sun heat of from 75° to 85° with slight ventilation until the buds show signs of growth, when a rise of from 5° to 10° may be given. Syringe the rods three times a day until growth appears, then night and morning only, keeping a moist atmosphere in the house at all times except when vines are in bloom, when a drier and

more buoyant atmosphere must be maintained until the fruit is set. Then continue with syringing and abundant moisture until the grapes are ripening, when syringing of the vines must be stopped, only sprinkling the border and paths on sunny days.

The border should have a copious watering with clear, lukewarm water when heat is first introduced, repeating the dose for three days in succession in order that every portion of the border may get a thorough watering. When the fruits are set and bunches thinned at every alternate watering liquid barnyard manure may be given until the grapes show signs of coloring, when feeding must cease and a free circulation of air kept in the house night and day to assist the grapes to finish properly. As the grapes ripen only water the border to prevent the wilting and shriveling of the berries.

JOHN ASH.

### Success in Market Gardening.\*

The first and subsequent editions of this excellent little book were from the pen of the late W. W. Rawson, of Arlington, Mass., and achieved a great success. The present volume is by Herbert Rawson, his son, who has brought it up to date, by means of notes and memoranda made by his father, who had the work in hand before his death, supplemented by his own large experience, for, as he says, in his preface, "Like my father, I have been brought up in the business of market gardening, and can say, as he said, 'my father followed it before me.'"

In revising this excellent work for those who are not acquainted with it, one hardly knows where to begin. Every page in the book is crowded with facts of great interest and value to the market gardener or would-be market gardener, put forth in a clear cut, trenchant way that makes them easily understood by all. All through the work technical knowledge and practical instructions go hand in hand. Not only is the grower told to do certain things, he is told the easiest way to do them and why they are necessary, yet it is all done in as few words as possible. A busy man can look up a certain crop and can see at a glance the most salient points in its culture. He does not have to wade through a thick shell of indigestible matter to get at the kernel. The kernel is there and it is all meat. The chapters on location and soils, irrigation and rotation of crops should be carefully read by those who are thinking of embarking in the business for many mistakes may be thereby avoided. Another very useful chapter is that devoted to vegetables raised for market, in which are described the most suitable varieties of all kinds most generally grown and many others that are coming into use as market varieties. Manures, implements and other requisites have full attention and the chapters referring to insects and preventives are excellent. In short, there is not a dull or heavy chapter in the book, but each is replete with the best information. It is finely illustrated with cuts that tell what they are intended to, well printed in clear type and a most invaluable little work. The price is only \$1.10.

\*We can supply any books here noted on receipt of price quoted.

## VEGETABLE PLANTS

### Market Gardeners' Ass'n of Monroe Co.

The market gardeners of Irondequoit have formed an organization known as the Market Gardeners' Association, of Monroe County (New York), and have agreed to rent stalls in the market here at the same price as last year or not at all. There has been a rumor that the market commission intends to raise the rent or at least sell the stalls at auction and the gardeners object to this, claiming that they are now paying a fair rental.

The officers of the association (which will be permanent) are: Geo. M. Keller, Brighton, president; Geo. West, Irondequoit, vice-president; A. J. Warren, secretary; John H. Anderson, treasurer.

### Prices of Indoor Fruits and Vegetables.

New York, April 16.—Mushrooms, 45 cents to 70 cents per pound; cucumbers, \$1 to \$1.50 per dozen; lettuce, 75 cents per dozen heads; tomatoes, 35 cents per pound; radishes, 3 cents per bunch; mint, 75 cents per dozen bunches; grapes, Gros Colman, 80 cents per pound. Cauliflower, (cold frame), \$3.50 per dozen heads.

Chicago, April 20.—Mushrooms, 20 cents to 40 cents per pound; cucumbers, \$1.25 to \$1.50 per dozen; leaf lettuce, 20-28 cents per box; head lettuce, Louisiana, \$1-\$1.75 per hamper; radishes, 35-40 cents per dozen; grapes, Gros Colman, 90 cents to \$1 per pound.

WILSON, N. Y.—R. S. Church is building a new greenhouse twice as large as his present one.

WOBURN, MASS.—S. S. Hovey has sold out to M. J. Aylward & Sons who will continue the business under the firm name of "Aylward, the Florist."

**Vaughan's**  
**Lilium Harrisii.**

**1911 Both Plants and Bulbs Carefully Selected.**

While we do not claim that our Harrisii are absolutely free from disease, or that every bulb will produce a perfect plant, we do claim that our growers' efforts in the way of spraying and roguing are producing results, our stock now being freer from disease than ever before and of genuine Harrisii type. In fact, the best general crop grown on the island of Bermuda.

**Vaughan's Seed Store**  
CHICAGO. NEW YORK.

#### Montreal.

Easter was this year the best on record. The prices were the highest ever experienced and this, it is claimed by some, had a lot to do with it, and that, contrary to the usual, some stock was left over on Easter Sunday morning. Others say that everyone was overstocked, but all agree that the business done, figured out in dollars and cents, was by far the best Easter. Lilies were poor and did not sell as well as usual. Azaleas sold well, also all roses in pots. Lilacs sold fairly well, and there was not an overabundance of bulbous plants, as usual; and these, owing to the moderate prices, sold quickly. In cut flowers violets and lily of the valley took the preference over roses and carnations; although most florists were heavily stocked, very little was left over. On the other hand, there was no sign of emptiness, nor were there any places closed for lack of something to sell.

#### NOTES.

At the meeting of the Gardeners' and Florists' Club last Monday night we had two essays, one by Alec Wilkie on mushrooms and the other by S. Viel on hotbeds. James Kean, of Mount Bruno Floral Co. exhibited a splendid lot of My Maryland and Richmond roses. For the former he was given a certificate of merit.

At McKenna's, who occupied an extra store in addition to their already large one, all were very busy. Their lilies and expensive made up baskets, which are specialties of theirs, made quick sales.

324 Dearborn St., Chicago.

S. S. Bain welcomed with a smiling face customer and visitor alike. His stock consisted of a splendid variety, all his own growing. He expressed entire satisfaction with the amount of trade.

Hall & Robinson had a fine show of roses in pots of all the different varie-

ties; their azaleas and lilacs sold well.

A. C. Wilshire is satisfied that trade takes a move up Sherbrooke street.

Wilshire Bros. had the largest sales of any holiday.

Chas. Derynck sold an immense lot of plants.

LUCK.

## The Nursery Trade

American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;  
W. P. Stark, Louisiana, Mo., Vice-President;  
John Hall, Rochester, N. Y., Sec'y.

Thirty-fifth annual convention to be held  
at Denver, Colo., June 8-10, 1910.

WEST CONCORD, N. H.—The Concord Water Works are preparing a tract of land for a pine seedling nursery.

GRAND FORKS, N. D.—The park board has decided to use the Riverside property as a nursery to raise trees for park purposes.

TYLER, TEX.—The East Texas Nursery Co., of this city, has been incorporated with a capital stock of \$50,000. The incorporators are: E. W. Mims, C. C. Crews, J. M. Mims and others.

THE administrations responsible for the appointment of John McLaren and J. G. Morley as superintendents of Golden Gate park, San Francisco, and the city parks, Los Angeles, respectively, having been deposed, those positions are now vacant.

PORTLAND, ORE.—The Wind River nursery has been established near here on the Columbia river by the forest service and it is intended to grow 1,000,000 forest tree seedlings here this season. The capacity will be increased later and many millions of forest trees will be grown annually. This is the only nursery of its kind in the Pacific northwest and nothing will be grown but forest trees.

### Another Pernicious Bill Pending.

H. R. 23252, now before congress (committee on agriculture in the house) provides for importation of nursery stock into this country by permit only and requires that a United States officer inspect all lots so imported at destination regardless of state inspection, that he have 10 days to make such inspection, and that the secretary of agriculture may extend the operation of the law to all seeds and bulbs.

This is another of the drastic laws put forward at the instigation of and by employes or by authority of the Department of Agriculture and should be opposed by every commercial nurseryman, seedsman and florist in the country.

### Three Beautiful Spiræas.

*Spiræa Aruncus* is one of the finest hardy herbaceous plants, growing three feet and upwards in height, bearing graceful spikes of snowy inflorescence, and producing a splendid effect in summer when in good condition. It is a plant for every garden. *Spiræa ulmaria flore-pleno*, the common meadow-sweet, has flowers not unlike miniature white bachelors' buttons, in loose heads, on stems varying from 2½ to 3½ feet in height. It is a stately border plant, and it is somewhat surprising that it has not become a more general favorite. We rarely see it even in good collections of hardy plants. For gardens where the soil is cold and heavy this plant is invaluable. It succeeds best in good retentive soils, but will grow well in any

Wholesale catalog for spring issued Feb. 1st.

ordinary border, and it looks well either associated with the shrubs or brought forward to the front of the border behind the lower growing kinds of herbaceous plants. In pots for a conservatory it is very useful. If for early forcing the plants should be taken from the reserve ground about January, potting them in any good compost, and placing them in a cool house to start them into gentle growth. They can afterwards be introduced to a higher temperature, where they can be brought into flower without being drawn. For blooming during the summer months the plants should be potted any time during early spring, and placed either in a greenhouse, cold frame, or plunged outdoors.

Propagation can only be effected by division of the plants, as the flowers do not produce seeds. The best time for dividing the clumps is in spring just before the plants commence growth. A good piece of ground should be selected for the purpose, and if in partial shade so much the better. After planting out the divisions give the bed a good watering, which should be attended to occasionally afterwards if the weather be dry. No further attention is necessary except cutting off the flower stems that may appear, as this will cause the young plants to make stronger crowns. The variegated meadow-sweet is also a very ornamental plant, and deserves more attention both as a border plant and for conservatory purposes.

The double-flowered dropwort, *Spiræa filipendula flore-pleno*, is a very

old-fashioned garden plant, and may often be met with in old cottage gardens in its best condition. The value of this plant seems to be better known than that of *S. ulmaria fl.-pl.*, for it is grown both in pots and borders, displaying its beautiful trusses of delicate blooms freely. It is much dwarfier than the meadow-sweet, attaining a height of from 15 inches to 18 inches only. The flowers, which are somewhat larger than those of the preceding, are faintly tipped with red, a character more noticeable in plants that are grown outdoors. This is tuberous-rooted, and dividing the plant should be attended to in spring, when every tuber will grow and make a plant.—Journal of Horticulture.

DELPHINIUM BELLADONA.

## Buffalo.

A special meeting of the Florists' Club was held at Kasting's hall, April 12, at which it was decided to hold a flower show in the fall. It is proposed to make this one of the greatest and most up-to-date shows this city has ever had. A most able committee has been appointed to arrange all the details, and a report is expected at the next regular meeting, May 3. At that meeting Chas. Guenther will read a paper on "Summer Roses," and it is expected that Geo. McClure, Jr., will be prepared with criticisms on the paper recently read by E. A. Slattery on "Color Harmony."

A special arrangement of daffodils sent to a reception last week in a very elaborate basket was unfortunately received by the maid. Not appreciating the value of the basket and the florist's artistic work, she proceeded to arrange them herself. She took the daffodils, which were in water, together with asparagus, lilacs, etc., separated them, put them in small glasses and consigned the gold basket and vases under the sink. You can imagine the hostess when it was discovered. The maid is a wiser girl now.

## Davenport, Ia.

## TRADE GOOD.

Business has been very good the past week with barely enough stock to meet the demand. Funeral work has been very heavy. Plant business has picked up, but a check has been put on the business today (April 17) by the fall of two inches of snow. Never in the memory of the oldest inhabitant have we had such an early

# Dreer's Hardy Delphiniums

**Belladonna.** The freest flowering of all the Delphiniums and the most valuable for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants, \$2.00 per dozen; \$15.00 per 100; \$125.00 per 1000.

**Dreer's Gold Medal Hybrids.** Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

**Formosum.** A splendid strain of this popular favorite dark blue variety, 85 cents per dozen; \$6.00 per 100; \$50.00 per 100.

**Chinese Blue and White.** 75 cents per dozen; \$5.00 per 100.

## CHOICE NAMED HYBRID VARIETIES.

**Alfred Henderson.** Bold, massive spikes of semi-double rosy-lavender flowers, 2 inches across, white eye, 20 cents each; \$2.00 per dozen; \$15.00 per 1000.

**Beatrice Kelway.** Deep, rich blue with a conspicuous yellow eye, flowers 2 inches across and perfectly arranged, 20 cents each; \$2.00 per dozen; \$15.00 per 100.

**Cerberus.** Sapphire with black brown centre, a handsome spike, 35 cents each; \$3.50 per doz.

**Chinese Cineraria.** (Spurless Hardy Larkspur) The large flowers without a spur, strikingly resembles a fine rich sky-blue Cineraria, 20 cents each; \$2.00 per dozen; \$15.00 per 100.

**Duke of Connaught.** Rich, Oxford-blue with distinct bold white eye; fine large flowers, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**J. C. Jenkins.** Very large, semi-double bright mauve edged with royal blue and white eye, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**King of Delphiniums.** Most vigorous growing, immense size, semi-double, rich deep blue with large white eye, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**Lizzie.** Lovely azure-blue flowers, 2 inches across, bold, creamy-yellow eye, arranged in bold massive stems, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**Lemartin.** Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white center, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**Mrs. Creighton.** Semi-double, outer petals deep sky-blue, center rich plum with black eye, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**Persimmon.** Comparatively new; beautiful delicate turquoise-blue, 50 cents each; \$5.00 per dozen.

**White Seedlings.** These have been carefully selected and will be found desirable in any collection, 30 cents each; \$3.00 per dozen.

For the most complete list of Hardy Perennial Plants offered in America see our current Wholesale List.

**J. L. DILLON,**

**Bloomsburg, Pa.**

spring, being just 30 days ahead of the usual.

The regular monthly meeting of the Tri-City Florists' Club was held on the evening of April 14, at the home of Henry Gaethje, Sr., of south Rock Island, with nearly every member present. Installation of the newly elected officers took place, Uncle John Temple being the installing officer. The auditing committee reported the books of the treasurer and financial secretary correct, with all bills paid, and a good sum in the treasury. One new member was elected to membership. The topic of the evening, a seasonable one, was greenhouse and bench construction. Ludwig Stapp spoke on "Modern Greenhouse Construction," and Henry Pauli gave a very interesting and instructive talk on "Cement Benches and Their Construction," also his success with crops on the same. Wm. Knees extended an invitation to the club to meet with

him on the second Thursday of May, which was accepted, after which the members enjoyed a fine luncheon and social time.

#### NOTES.

Ludwig Stapp's place was found in the usual apple-pie order, and everything ready for a large spring business. Ludwig is building two new rose houses, 30x300 feet, and is well along with the work of construction. He has already finished one of the finest brick boiler houses in the state, and is at present sinking a well.

Henry Pauli has bought the old Campbell place, lately conducted by Wm. Behring. Mr. Behring retiring from business about June 1. Mr. Pauli will conduct both places.

A snowstorm and cold wave has put a crimp in the plant trade and stopped the planting out of carnations which has been going on at some of the places in dead earnest. T. E.

## VAUGHAN'S SEED STORE,

NEW YORK

All Plants f. o. b. Western Springs, Ill.

CHICAGO.

### Cleveland.

#### ROSES ARE PLENTIFUL.

Stock did not seem to be over plentiful the past week, except roses; of these there were more than could be handled through the regular channels, and many went to the street fakirs, as did a few carnations and violets. This is the street fakir's day and he plunges, buying large quantities of stock that would otherwise go to the dump. Prices are about the same as last week. Callas and Easter lilies still continue to arrive in bunches. Valley was more plentiful this week, but the market slow. Violets do not move very quickly. The demand for colored carnations exceeds the supply, red and Lawson having the call. Enchantress is losing color with some of the growers. Sweet peas are selling exceedingly well, not enough of the better grade being obtainable to meet the demand, pink and lavender being the choice of colors. Dagger ferns are about done until the new crop arrives, fine fancy fern only being obtainable. American Beauty roses are coming in strong and the quality was never better, the shorts for funeral work having a good call; long stock is moving fairly well. Good stock of Bride and

Bridesmaid is coming in. Richmond and Killarney are also good in color and size. The rain that began Saturday evening put a damper on business, as it continued cold and wet until Sunday noon.

#### NOTES.

The new Smith & Fettes Co. held its opening on Thursday, April 14, from 3 to 6 p. m. The store was very artistically decorated for the occasion, nearly every conceivable flower being shown to the best advantage. In looking at the cards attached to some of the flowers donated an idea of the extent of their business and number of friends could be imagined. From east and west, from supply houses and florists, wholesale and retail, local and out-of-town donations were seen, their cards one and all wishing the new firm "Success." Their window decoration in itself was well worth seeing, and attracted considerable attention. All in yellow, it contained some of the choicest Spanish iris, yellow snapdragon, yellow daisies and white and yellow orchids ever seen, all very artistically arranged.

Milford Parks will have the flower stand at Luna park again this year;

BYER BROS., Chambersburg, Pa.

Albany, N. Y.

At the meeting of the executive board of the state assembly of mothers, held in this city on April 14, plans were formulated to have all the mothers' clubs in the state sell white carnations on Mothers' day, the second Sunday in May. The Florists' Club some time ago voted to donate several hundred white carnations to the local mothers' club for the occasion. At the last meeting of the club some discussion was held on the subject of holding a flower show for the benefit of the members. It was decided to find a small hall and to go ahead with the arrangements. Secretary F. A. Danker is engaged in looking for a suitable place and will report at a later meeting. Geo. H. Price was admitted to membership in the club.

Sheriff Platt on April 13, at a public auction, held pursuant to foreclosure proceedings, sold the stock in the greenhouses of Fred Keller, Jr., on the Troy road. The sale was scheduled to be held on April 6, but owing to the small number of bidders it was adjourned for one week. Fred Goldring, Henkes Bros., Patrick Hyde and a number of other local florists bid in on stock they wanted. The sale brought only about \$250. The foreclosure was due to the action of the McEwan Coal Co., of this city, which had an unpaid bill of \$326.86 for coal supplied to Keller's greenhouses. The greenhouses, land and stock growing outside are owned by Fred Keller, Sr., and no levy could be made on them.

Chas. M. van Heusen, president of the Van Heusen-Charles Co., of this city, has purchased a tract of 51 acres of fine country property west of the city and proposes to develop it for a home. Mr. van Heusen has engaged a landscape gardener to go over the property, select a site for a country residence and develop the grounds. The tract has some unexcelled natural beauties, not the least of which is a fine grove situated on an eminence that can be seen a long distance.

Fred A. Danker is building a new residence a short distance west of his present home on Central avenue.

R. D.

## GEORGE REINBERG

51 Wabash Avenue, CHICAGO.

Nashville.

Trade has been rather quiet the past week and as a consequence flowers have been plentiful. Violets are entirely done and bulbous stock is abundant of every kind. Roses are only fairly profuse, sufficient for all demands, but not an overstock. Carnations are abundant and excellent in quality. Outdoor lily of the valley has been plentiful and of good quality, with many bells and a delightful fragrance. This sold at 75 cents per 100 and was much sought after. All kinds of garden flowers are now in the market for a brief season. None of them last very long. Irises, blue and white, have been used a great deal in the spring decorations for small affairs. A most effective decoration, which has been largely used, is the dogwood blossoms. Huge sprays placed in large vases against the wall, gave a fine effect and nothing prettier has been seen here. The dogwood is very fine this year and plentiful in this locality. M. C. D.

## A New Fern NEPHROLEPIS GIATRASI

In small plants we have the following in 2½ to 3-in. pots, at \$3.00 per 100:

**Verbenas**, assorted colors: **Phlox Drummondii**, dwarf and grand-flora. French dwarf **Togetes** (the queen of the Marigolds): **Cosmos**, red, white and pink (assorted or mixed): **Coleus**, Verschaffelti, Golden Badder, Queen Victoria (fancy colors, 4c); **Petunias**, California Giant Inimitable, Dwarf and Rosy Morn; **Sweet Alyssum**, Carpet of Snow or Little Gem; **Tradescantia**, two colors; **Thunbergia**, or Black Eyed Susan; **Salpiglossis**; **Lobelia**, Crystal Palace, blue, dwarf and trailing; **Cornflower** rs (assorted); **Dusty Miller**; **Centaurea Gymnocarpa**; **Parlor Ivy**.

Don't forget that we are the growers and shippers of **Ionomoea Noctiflorum**, the pure white Moonvine with flowers as big as a saucer, very fragrant and the earliest Moonvine in existence, for which we have a world-wide reputation for the past twenty-five years; grows 50 feet and over in one season; over 25,000 are shipped every spring all over America south, north, west and east. Mexico and Cuba: 2½-in. pots. \$5.00 per 100; 3-in. \$8.00 per 100; 4 in., \$12.00 per 100.

Cash with order, please. All plants, 25 at 100 rate. All plants must travel at purchaser's risk only.

Watch for our adv. of **Araucarias** about May 10.

## GODFREY ASCHMANN

Wholesale Grower and Importer of Potted Plants.

1012 West Ontario St., PHILADELPHIA, PA.

Toronto.

### BUSINESS ERRATIC.

Trade the past two weeks has been very erratic, but generally good. The visit of the governor general and suite created quite a demand for flowers, as there were supper parties and social events galore; this, coupled with the death of several prominent citizens and a few weddings, have helped use up the better grades of flowers. Roses are now coming in plentifully. American Beauties, which have been scarce all season, are again fairly plentiful, but hardly up to the standard in quality. Richmond is fine with good strong stems, and the other varieties are all that could be desired. Carnations have shortened somewhat, which is a good thing, for they were being slaughtered at unreasonable prices. Sweet peas, lily of the valley and orchids are all plentiful and good.

### NOTES.

Spring trade has rushed in so quickly that Thos. Manton is more than busy and is looking for more help. There seems to be a small percentage of gardeners among the immigrants.

Richmond roses, which are the mainstay of the Bedford Park Floral Co., have proved so profitable that the firm is putting up another house to be devoted to these.

Fred Brown has opened a store at Yonge and Richmond streets, where

## ROSES

We have the following young roses to offer:

|                        |                  |

### FRANK OECHESLIN

4911 Quincy St. CHICAGO.

bargain flowers are being handled in quantity.

Wm. Jay & Son report a good spring business. Stock in all lines has been plentiful and they are rushed with planting.

John Chambers is busily engaged in landscape work. H. G. D.

### The Stork at New Castle.

The New Castle (Ind.) Times points out that the florists are doing more to make good the slogan "New Castle 20,000 in 1910," than any other class of people. As evidence it calls attention to the stork's recent visits to the homes of the following: Otto Bentley, S. Atkins, L. Dawson and Wm. Brenneke, of J. Bentley & Co., and Carl Ragden and Frank Shelsky, of Heller Bros. This makes a total of six births in two months, which the delighted papas declare is "go in some." All are doing nicely, thank you.

## ROSES IN PLENTY

ON OWN ROOTS.

Summer grown, winter rested.

Boston Ferns 2½-inch, \$3.00 per 100.

Henry H. Barrows & Son, Whitman, Mass.

Newport, R. I.

The Horticultural Society had an unusually well attended meeting on the evening of April 12 to hear a talk on orchids by E. O. Orpet of Lancaster, Mass. He had with him about a dozen varieties of cut flowers from his most choice hybrid orchids which were very much admired, and his address, which was full of information, was very favorably commented on. A standing vote of thanks was given him at the close. At the same meeting a specimen amaryllis was exhibited by Paul Valquardson, gardener to Mrs. W. G. Wild; there were 21 large flowers in good condition on three spikes that came from the same bulb. This was awarded a silver medal for superior culture. John T. Allan, gardener for J. R. Drexel, had also on exhibition a seedling amaryllis of his own raising which he has named Miss Alice

Grafted Rose Stock

Killarney, White Killarney, Bride, Bridesmaid and My Maryland,

2¼-in. stock, \$15.00 per 100; \$125.00 per 1000.

## Gold Letters

Gummed Gold and Purple Letters.

For inscriptions on Floral Designs.  
Best and Cheapest on the Market.  
Send for samples and prices.

J. LICHTENBERGER.

1566 Avenue A, NEW YORK.  
Telephone: Lenox 5644

## The Grate Does It!

Saves 10 to 25% of the coal your boiler is using.

Positive guarantee given

Send for circular "N" and our famous Lecture on Combustion.

U. S. ROCKING GRATE BAR CO.,

77 Jackson Boulevard, CHICAGO.

## Morehead Steam Traps

The Morehead Return Steam Trap is specially designed and constructed for greenhouse steam heating plants. It fills the dual capacity of steam trap and feed water pump. It will create conditions enabling the florist to grow better flowers; save on fuel, water and labor bills, and derive general all around satisfaction from the installation.

Send for "Florist Trap Book."

MOREHEAD M'F'G. CO., Dept. N, Detroit, Mich.

## Wittbold Watering System

The saving in time and labor for one season will pay for a complete equipment.

For particulars write to

E. H. HUNT

76-78 Wabash Ave., CHICAGO.

## Now Is The Time King Iron Frame.

Minimum Shade.

Maximum Strength.

Erickson, who recently purchased the  
Atlanta Floral Co., are adding a de-  
partment of landscape gardening.

# Ammoniated Lawn Lime

Kills Weeds.

Makes Grass Grow.

Applied as a light top dressing to lawns it kills all flat leaved weeds such  
as Dandelion, Daisy, Plantain, Sorrel, Chickweed, Moss, etc., in 48 hours  
and without other fertilizer produces a wonderful, luxuriant, rich, green growth  
of lawn grass—which is distinctly noticeable 50 feet away.

The use of Ammoniated Lawn Lime supersedes hand weeding of lawns,  
putting greens, etc. It saves the grass from being pulled up and in many  
cases ruined. Grasses take a new vigorous growth, avoiding probable  
trouble in the future.

**Quantities:** If very weedy 1-lb. to 40 square feet, 25-lbs to 1000  
square feet, (20x50). Half to one-quarter amount  
if moderately weedy.

**ABSOLUTELY GUARANTEED.** Money refunded if not satisfactory.

We want Seedsmen or Florists as agents and distributors in  
every important city and town.

**Retail Prices:** 2-lb. cans, 25c, 50 cans per case. 5-lb. cans 50c,  
20 cans per case. Bags, 25-lbs. \$2.00; 50-lbs.  
\$3.50; 100-lbs. \$6.00; 1000-lbs. and over 5c per lb.

Descriptive Circular and Wholesale Prices on Request.

**SUPERIOR CHEMICAL CO.,**  
(Incorporated.)  
**Louisville, Kentucky.**

## The "Meyer Green Silkline"

is the only Green Thread that  
should be used by florists and  
growers. It is guaranteed full  
weight and full measure.

Also Violet Thread for tying up Vio-  
lets. Price of both, \$1.25 per lb.  
express or freight paid in good  
sized orders.

JOHN C. MEYER & CO., 1449 Middlesex St., Lowell, Mass.

## Evergreen Brand Flower Fertilizer.

A Pure Plant Food immediately available. It permanently enriches the  
soil. It prevents the onslaught of plant diseases or insect pests. Can be  
used at any time during the growing season, dry or in solution. Put up in  
12 pound cans, Price, \$2.00 each.

For Sale by Leading Jobbers

**D. D. JOHNSON CO.,** Manufacturers,  
64-66 Wabash Ave., CHICAGO.

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.  
The pump is of brass throughout, simple and powerful.  
The mixing device keeps the contents of the tank well stirred up from  
start to finish.  
When the machine is filled to within six inches of the top, a few strokes  
of the pump will compress enough air in the tank to produce a continuous  
mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,  
and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

**J. G. MASTIN & CO.,** 3124 West Lake St., CHICAGO, ILL.

## A Commercial Curved Eave Range.

Of course, the Curved Eave, when it is built our way, is practical for the commercial house.

Here is one built over eight years ago, and Mr. Menand, the owner, swears by it.

Glass breakage at the eave? Not any more than in any of our other constructions, which is practically none.

**Hitchings & Company, New York: 1170 Broadway.**

Strong? Certainly it is strong, why shouldn't it be, as the frame work is all steel and the bars are each one backed by a metal reinforcement from the first purlin down to the sill. It makes a fine looking house and there are no two ways about it—it's lighter.

Send for particulars.

## THE STANDARD VENTILATING MACHINERY

The original machine with self-oiling cups. The most powerful, least complicated, very compact, with ease of operation.

### The New Duplex Gutter

Over six miles in use and highly recommended by all. The only Drip Proof gutter on the market.

# Improved Eave Construction

FOR OUR  
Wide Iron Frame Houses

You must not lose sight of the fact that the wider the house, the more the strain on the eave. There are two things we do to meet this additional strain. One is to support the roof with a sufficient number of columns to overcome the inevitable tremendous eave pressure; and the other is to join the Wrought Iron Post to the steel rafter, by a double Gusset Plate as shown in the illustration.

Then there is another great advantage of that Gusset Plate method—it makes the erection of the house a good bit easier—which means quicker—which means less erection cost—which means it costs you less to erect whether you or we do it.

If you want a house 100 feet wide, say so, and we will show you a section that's most convincing.

### WINDOW BOXES AND LAWN VASES.

**Filling Window Boxes.**  
Every indication at present points to an extremely early season and there is no doubt that customers will want their window boxes fixed and put in order much earlier than usual. For some reason, evergreens that were planted last fall in porch boxes and pedestal vases have stood very badly and are dying or dead and these look very unsightly these fine spring days. There is a good deal of work where there is a large number of window boxes to fill and anyone who has it in charge must have ample help, and help of the right character. The soil will, of course, have been previously prepared and must be richer than is used for plants generally, for the vines and flowering plants take a lot of sustenance, especially during a hot, dry summer, and the space is limited. Raw, fresh manure is not needed nor is old, dried out material that has all the nature burnt out of it, for this is simply the shell that held the nutri-  
ment. Good cow manure that has been laid up thinly for a few weeks to dry is one of the finest stimulants such plants can have. It is mild in action, cool to the roots and lasting while the lumps into which it has to be broken keep the soil free and open in a mechanical way. A fairly good substitute can be found in any of the excellent fertilizers now on the market, though these are usually quicker and less lasting in their action than the cow manure. Good rough bone meal is a good addition to the soil for this purpose, forming a larder for the roots for quite a long time and giving off its food in small and suitable quantities as desired.

Window boxes to carry a good display of flowering plants and vines through the season should be at least eight inches deep and nine inches is a better depth except in some instances, where they have to be kept as low as possible to prevent darkening the rooms. Each drainage hole in the bottom of the boxes should be covered with a piece of broken flower pot with the concave side down to allow the

water to escape. Over this an inch or a little more of strawy manure must be firmly placed, this again being covered with some of the rougher parts of the soil. This kind of makeup will insure the soil keeping in place and not silting down, leaving dirty streaks on the walls or clogging up the drainage holes. As a rule, the soil can be filled in to within about four inches of the top of the box, but a little more can be left if the stock to be planted is in larger pots than usual. The front of the boxes is the most important part and this should be filled in first. Vines of some kind are usually chosen for this and sufficient should be used to furnish the boxes well. The advantage of plants with plenty of top will be seen here, as one large plant takes up less room at the root than two small ones and makes an equally good showing in the box front. One person should stand in front of the box when possible and direct the planter how to place the stock to the best advantage. After the front row is planted take the back, filling in with the taller plants. Then see that the soil is thoroughly worked in between the plants back and front, leaving no holes to settle afterwards, and then fill up the middle with whatever plants are used. A thorough soaking, not a mere dribble of water, but enough to moisten every inch of soil, should be given before placing the boxes in position and the superfluous water allowed to drain away. Of course in the case of large, heavy boxes these have to be filled in place and the work is more difficult, especially when the position is not very accessible. When they are over streets on which the public is passing only the most careful men must be trusted with the work or there is likely to be trouble ahead for the florist, owing to material being allowed to fall. When finishing the surface of the soil a light mulch of well decayed manure helps to keep the soil cool and moist and less frequent waterings will be needed.

**Plants for Window Boxes and Vases.**

There is no lack of variety in the stock suitable for planting in window boxes, vases and similar receptacles. A plant that does not get the recognition it deserves in this country is the ivy leaved geranium or pelargonium. The plants are extremely free flowering, of elegant habit and very beautiful when at their best. They are easily propagated in quantity, flower over an extremely long season and have fewer faults and more virtues than almost any other subjects that could be used for the purpose. The better

**Lawn and Porch Vases and Baskets.**

In filling lawn, pedestal and porch vases, baskets and similar receptacles, a little different treatment is necessary to that of ordinary window boxes. The view of the front is open all around and when planting these the vines should all be planted before filling in the center. The same thing is necessary in porch boxes where both sides show and where vines are used all around. In some positions these have to be kept low so as not to obstruct the view from windows opening on to the porch or veranda; in others

causing the loss first of all the color and afterwards the leaves themselves. The common tradescantia or creeping sailor is another excellent vine, though it does not flower and there are many others that are suitable, such as *Tradescantia zebrina*, *panicums*, green and variegated and *vincas*. The soil and treatment necessary are the same as advised for the boxes, but the baskets in many cases have to be lined with moss to prevent the soil silting out before the roots of the plants are sufficiently advanced to hold it in position. In the concrete and iron vases now so much used in outdoor gardening the soil around the edges is very apt to dry out rapidly. This can be prevented to some extent by leaving it low around the edges and high in the center, thus giving the water a tendency to run to the edges instead of away from them. This may seem a small matter, but it makes a great difference to the health of the vines.

**Memorial Day Preparations.**

This is the busy time for the greenhouse departments connected with the large cemeteries. The final rush is now on, pushing along the various stocks for planting out next month and for Memorial day sales. Any plants that are showing signs of becoming exhausted in the pots they are now in should be shifted into a little larger pot, while there is still time. May 1 should find all stock in such shape that the only work necessary with it will be to care for it as regards watering and ventilating and spacing out to prevent an overdrawn growth. But it is just as much a poor policy to have the plants overdone and exhausted as it is to have them a little behind, for if a plant is small and in active growth it will recover from the transplanting outside quicker than an exhausted root-bound plant and give better satisfaction. Be prepared for this contingency. *Heliotrope*, *marguerites*, *fuchsias*, *ageratums*, *coleus* and all kindred quick growing plants that show signs of getting hard should be shifted to put them into active growth

WINDOW BOXES AT BUFFALO, N. Y.

known varieties of the *Mme. Crousse* order are of scandent habit, but there are some varieties, probably hybrids between the zonal and the ivy-leaved types, that are more erect. They make fine baskets planted in mixture provided due care is used in selecting colors that do not clash. Simple but effective and showy baskets or vases may be made by planting the dwarf blue *lobelia*, *coleuses*, white *marguerites* and *geraniums* with a few trailing vines of the *vinca* or *tradescantia* order. Larger vases require bolder treatment and here the finer varieties of *cannas*, *Caladium esculentum*, *dracænas*, *ficus*, *crotons* and *pandanus* are very suitable. *Aralia gracillima* is a fine subject for planting in this class of receptacle, thriving either in sun or shade and standing well until late in the season. We saw plants of this last year taken out of window boxes in September in splendid condition, though they had been growing in almost total shade. It is one of the most attractive of foliage plants in existence for the purpose. When the baskets or vases are of a size that can be brought inside for filling this is a great advantage, for the plants are, by this means, well established before they go outside. Even in dwelling houses when there is no greenhouse it is possible to gain a good deal of time by planting early and placing on the porch or veranda by day and lifting inside at night. The bright days of May help the plants to get established and well in flower—settled down, as it were—before Memorial day, if only they can be protected from frost at night.

taller, graceful plants have to be used in the center, this being more particularly the case in pedestal vases, on lawns or walks. Suspended baskets depend for their success more upon the vines used than the center plants, as these are most in sight. In the partial shade of a porch an elegant vine for basket use is *Thunbergia alata*. It is not that this plant does not enjoy a fair amount of sun, but exposed fully to the hot sun of summer the leaves are apt to be attacked by red spider which soon ruins the plants entirely.

A PRETTILY ARRANGED WINDOW GARDEN.

VERANDA BOX BY THORLEY, NEW YORK.

Kentias, Phoenix, Ficus Pandurata and Ivy in Terra Cotta Box.

again. At this season plant growth is so rapid that a week or 10 days after potting will find them going ahead again in good shape. It is now too late to do any shifting of geraniums and have them in first class shape for Memorial day sales, but a batch of these plants should be coming along for later sales. Young plants now in  $2\frac{1}{2}$  or 3-inch pots can be potted into  $3\frac{1}{2}$  and 4-inch at this time. These will make ideal stock for summer sales, much to be preferred to the larger left over stock from Memorial day.

The alternantheras should now be in the hotbeds and pushed along with a steady heat of  $75^{\circ}$ , being careful to guard against any drying out. Give air on every favorable occasion but do not allow any strong draughts. A small crack of air will suffice until the plants have become established again after potting. Echeverias, if overcrowded in the boxes, should be re-boxed and given more room; those that have attained the required size can be treated to a cool temperature and by May 1 can be transferred to cold frames, but those that are still undersized should be given a gentle bottom heat in a hotbed for a short while. Lobelia and stocks that have

been transplanted in flats can now be potted into  $2\frac{1}{2}$ -inch pots and plunged outside in cold frames, keeping the glass on with plenty of ventilation until the flowers appear when it can be removed every day that the weather is favorable. Verbenas, ageratum and Vernon begonias should be given their final shift into  $2\frac{1}{2}$ -inch pots which is plenty large enough for these plants, using a light soil for quick growth. The hydrangeas of the hortensis type should now be showing their heads of bloom just above the foliage. Stock in this condition will come in just right for May 15 to 30. These plants must have close attention as regards watering; they will need going over twice a day to prevent wilting, and if any show signs of starvation treat them to liquid manure once a week or an occasional dressing of pulverized sheep manure. Give them plenty of room to develop. Also allow plenty of air and a cool temperature to insure a well hardened plant.

Hydrangea arborescens grandiflora alba promises well for Memorial day. Fine large bunches of buds are beginning to show, indicating fine trusses of bloom later on. This type of hydrangea does not require the amount of

water the hortensis type does, neither are the plants such gross feeders, the roots being very fine as compared with those of hortensis. Pansies should now all be out in the frames and the glass kept off, except during very heavy rains. They should not be allowed to dry out too much and the beds should be kept free of weeds. It will be a difficult matter to hold the forget-me-nots to Memorial day in good shape if this warm weather keeps up. Pinch out all the old flowers as soon as they are finished and when watering avoid as much as possible wetting the crowns of the plants.

Roses in pots should now be budding up and in shape to take plenty of water and an occasional watering with liquid manure. Give plenty of ventilation at all times to promote a sturdy hardened growth; do not cramp the plants for room but allow for their proper development.

The English ivy can now be removed to cold frames to be given a thorough hardening off before planting out, also the Mme. Salleroi geranium. It is best to plunge the pots a little to prevent their being knocked over when watering—and to allow for them to have a little space between each plant.

C. W. JOHNSON.

## Notes on the Chicago Parks.

## LINCOLN PARK.

The earliness of the season is nowhere better shown than in the flower garden at Lincoln park. The tulips were all out and at their best at the time of our visit, April 21, almost a month earlier than last year. The varieties have been well chosen to flower simultaneously and although *Coleur Cardinal* was not quite as forward as the others it was practically at its best. This is a fine tulip and cannot be left out of any collection of bedders. The best white here is *La Reine* and the beds planted to this are excellent. The large mixed beds, too, are good, as are the beds around the fountain of King of the Yellows. *Cottage Maid* is good, but something has happened to kill off quite a number of the bulbs and this, as well as one mixed bed, is patchy. There must be something in the soil in these beds, for the other portions of the same beds are as good as any others in the place. *Vermilion Brilliant* is another grand thing, certainly the most showy tulip now flowering.

Outside of the flower garden everything looks fresh and green and more like June than April. The double plums are in full flower and all the shrubs and trees are very forward. In the herbaceous garden the grape hyacinths, white and blue, are finely flowered and with the dwarf *Phlox subulata*, one or two of the crowfoot family and early narcissi make a bright and welcome bit of color. *Tulipa sylvestris* is already in flower and many other things are rapidly advancing. The white *trillium* is also in flower, being well established here. Head Gardener Scheile is also establishing some of the hardy orchids and they are starting up and looking well. This is an interesting part of the park and all interested in hardy plants should visit it frequently during the coming season.

In the greenhouses, propagation and preparations for the bedding season are going on and there are large stocks of all kinds of plants for the purpose. Cannas and foliage plants generally are largely used and all are in fine condition. The orchids are attractive, *Cattleya Mossiæ* being naturally a feature. *C. Prince of Wales*, a hybrid between *C. fimbriata* and *C. Mossiæ Wagneri*, is in fine condition. The sepals and petals are pure white, the lip prettily marked with purple. *Lælio-Cattleya Corbielense*, a cross between *Lælia Dayana* and *Cattleya Loddigesii*, has the habit of the latter and flowers more nearly resembling those of the *lælia*. *Cattleya Aclandiae*, *C. citrina* and several others are flowering finely and there is a good show of *Vanda suavis* and *V. tricolor* and various *phalænopsis*. The conservatories are gay with flowering plants including some elegant rambler roses, cinerarias, azaleas and others and the whole place is very neat and clean.

## GARFIELD PARK.

The palms and other stock in the big conservatory on the west side are looking fine and the details of the planting scheme are beginning to be more apparent. There are many interesting plants that are not usually seen and, as they have at present

plenty of room to develop, their habit can be seen more distinctly than is usual at such places where only the stems are visible, the growth being close up to the glass. The fernery, too, is very beautiful now, the plants making a magnificent growth. The water basin is being cleaned out and the place put in order. In the show house there is a fine display of greenhouse grown rhododendrons and *Azalea mollis* in big, showy groups as they should be shown, the center bed being devoted to *calceolarias*. The house devoted to foliage plants is in fine condition and at one end is a good display of orchids, consisting of *Cattleya Mossiæ*, *Phaius grandifolius*, a good showing of *cypripediums* and a number of fine forms of *Dendrobium nobile*. Gardener John Sells is to have his troubles again with the glaziers, it having been decided to spend another \$50,000 on the roof this year. They are only waiting for warmer weather to begin the work.

In the propagating houses are some 25,000 geraniums with all other bedding stock in similar large quantities. At Douglas park more flowers have to be used this year, as some of the inhabitants are feeling they have not been well treated in this respect. Consequently Jens Jensen is revising his original plans for this park, allowing for more flower beds and less shrubs, and this makes an additional drain on the resources at the Garfield park greenhouses. South of the greenhouses on Madison street the tulips are now at their best and making a good show, though some of the varieties—notably *Murillo*—are a trifle uneven. *Proserpine* and others are fine and the immense beds make a very fine display.

## HUMBOLDT PARK.

Humboldt park is rapidly becoming one of the finest in the city. The new plantings carried out a few years

ago are gradually growing into shape and merging into the old just as Mr. Jensen wished them to and the park is losing that raw, new appearance that it has borne for the last few years. There are several very pretty bits of wild planting, notably just north of the rose garden, where phloxes, crowfoot and vincas are prettily blended and flowering freely. This is a charming little bit of work that should be repeated on a much larger scale. Around the edges of the lagoons narcissi in variety are flowering freely and the herbaceous and rock plants are coming into line. Peonies are forwarder here than we have seen them anywhere else in the locality, the flower buds being fully formed and ready to open. The rose garden has been cleaned up and put in order for the summer and the yellow tulips around the fountain basin are very showy and good. This is more than we can say of the "fountains," for we can see very little beauty in these ridiculous looking squirts of water from the mouths of impossible animals.

## JACKSON PARK.

There is a freshness and beauty about Jackson park that we look for in vain in most of the other parks around the city and just now in the first flush of the young spring foliage the shrubs and trees are most beautiful. Among the flowering shrubs now at their best must be mentioned the yellow flowering currant. It is a mass of flowers and the fragrance fills the air for quite a distance around the shrubs. The pretty red bud (*cercis*) is showy and good and many of the *berberises* are also at their best from a flowering point of view, though their true beauty will be more apparent in fall when covered with the bright red fruits. Lilacs, pink and white, plums and pyruses in variety are flowering while the young foliage on the maples,

WINDOW BOXES AT A CHICAGO RESIDENCE.

JOHN BERTERMANN'S DECORATED AUTOMOBILE AT THE INDIANAPOLIS AUTO PARADE.

birches and other trees is superb. The rose garden is being sided up for the summer and the plants are starting up well. In the herbaceous beds around the garden we noticed the English cowslip flowering freely, also a number of other polyanthus forms of primula. The tree peonies are just ready to burst into flower and all the herbaceous plants are starting up strongly after their winter's rest. The whole of the wooded island, in fact, with its birds, squirrels and other animal life, supplementing the beauty of the trees and shrubs, is a pleasant place these bright spring days.

[Since the above was written a change has come over the scene and the wintry weather has sadly crippled the beauty of the foliage in many cases. The lilacs have in most places been ruined and the display generally of flowering plants and shrubs seriously curtailed.—ED.]

HUNTSVILLE, ALA.—A severe hail-storm, April 15, damaged the green-houses of John T. Fischer to the extent of \$3,000.

STAATSBURG, N. Y.—Three large greenhouses, one each for grapes, roses and palms, are being erected on the Dinsmore estate.

NEW YORK.—Hanges & Papagelis, 252 West One Hundred and Sixteenth street, have filed a petition in bankruptcy with liabilities \$4,825 and assets \$30 in accounts.

## THE ROSE.

### Care of the Young Stock.

The young rose stock will need careful handling from now on in several different ways. The plants must be shifted along into larger pots at the right time; never let them become pot-bound and be sure to drain them carefully. Again they must be kept free of weeds; nothing softens up the young stock like a growth of weeds, besides which they take much of the strength from the soil. They should be removed as soon as they are late enough to pull easily. Of course there is considerable skill required to water pot roses properly, and also some patience, for one must make haste slowly. The driest plants should be gone over first and carefully spotted out with the watering pot before giving them a general watering with the hose. Grafted stock requires much more water, as a rule, than own-root stock, owing to a quicker root action and many more roots to the plant being a year ahead of the own-root stock in this respect. The grafts must be tied firmly and it is best to remove all of the raffia and stake the plants as soon as possible after they have been shifted from the small pots. A great many fine plants are often spoiled by neglecting to remove the raffia at the right time. See to it also that the plants are given plenty of room. A very good idea is to

place a row of plants across the bench with the pots touching, and let the room they require be between the rows. When this is done one can syringe with great force without upsetting the plants and force must be used when syringing to keep down the spider.

### SUMMER ROSES.

The summer roses should be carefully looked after at this time, that is, Kaiserin and other varieties that have been kept dormant during the dead of winter and started up of late. Give them plenty of air and stir the mulch frequently; it will not be advisable to let them bloom all at one time and by a little judicious pinching the crop can be split up, which is a great help to the plants, as there would naturally be a great many flowers come with only a few inches length of stem, which had better remain to shape or strengthen up the plants; they should also be kept tied up nicely and kept free of weeds.

The regular stock should be in excellent condition now, as it has had time to take on an extra growth during the bright warm spring days, such as we have experienced here in the eastern states. The plants must be kept mulched, but not too heavily, using thoroughly rotted manure for this work, the mulch being put on chiefly to protect and to keep the roots cool, while the feeding should be accomplished by using liquid ma-

nure once per week at full strength. A little air should be left on the houses now at night and do not be in any great hurry to dispense with the services of the night fireman. The greatest danger lies in the weakening effect the early morning chill has on the plants, caused by condensation, and as long as the weather is cool enough between midnight and daylight to cause the condensation to cover the foliage, so long should the

#### Retail Store of A. I. Simmons, Chicago.

The illustrations herewith give a very good idea of the new store of A. I. Simmons, 242 W. Sixty-third street, Chicago. Mr. Simmons has rebuilt the whole place from the foundations up and the new store is 30x40 feet with a greenhouse at the rear 25x30 feet. The woodwork in the store is in colonial style and is carried out in green, white and mahogany. The ceiling is very decorative and is of steel. The

solid piece of cypress 4x20 feet and four inches thick. We congratulate Mr. Simmons on his spirited policy and trust he will continue to receive its due reward in increased custom.

## CHRYSANTHEMUMS

### Current Work.

Propagating the stock for commercial cut flower purposes should be pushed steadily along now, every available cutting in good condition should be taken until the required quantity is in the sand and an allowance made for a small surplus to replace any sickly plants that may crop up or to take care of any increased plantings that may be later decided on. To be able to obtain full double blooms of good size and in good season with the early varieties there must not be any more delay in propagating. They will require all the time possible from this date on to get them in the best condition. The same can be said for most of the second early and mid-season sorts. Successful propagation of chrysanthemums at this season requires a fresh, clean, sharp sand and ample watering of the cuttings to prevent any wilting. Draughts must be guarded against and enough shading provided to keep the cuttings in a fresh, plump condition. As soon as root action has begun pot the cuttings before any weakening occurs by rapid root growth which quickly happens at this season of the year if left over long in the sand.

The early propagated plants being grown on for show blooms or fancy commercial flowers now in 2½ or 3-inch pots should be given larger pots as often as they require them. Firm potting, plenty of ventilation, a cool temperature and space enough between the plants to guard against a spindly growth are the ideal conditions right along for these plants. Do not neglect the fumigation; this is something that if closely followed up now will save lots of trouble after the weather gets warmer. One of the

INTERIOR OF THE NEW STORE OF A. I. SIMMONS, SIXTY-THIRD STREET, CHICAGO.

firing continue. Keep the pipes painted regularly with sulphur and do not let the houses heat up quickly in the morning. Raise and lower the ventilators gradually. The buds will from now on lose something in size and substance; especially is this true of the plants that have been forced through the season. By prompt disbudding this can be remedied to a certain extent by pinching out the laterals as soon as they can be handled. Keep everything moving, including the compost and if it comes to taking the men out of the rose houses or hiring extra help, do the latter—it pays. E.

DAYTON, O.—The Florists' Club held its annual banquet April 14 at the Phillips. The floral decorations were beautiful and a number of short talks on things floricultural were interesting.

LA CROSSE, WIS.—The Florists' Association met April 19. P. Zoelner, of the Oak Grove Cemetery Association, gave a talk on the culture of roses and C. E. Schaffer, of the La Crosse Floral Co., talked about carnations and their culture. After this there was a general discussion by those present of these two subjects. At the next meeting Mr. Sallenthin will talk on the watering of plants and Mr. Schaffer on the soil conditions for carnations, after which there will be a general interchange of ideas on these two topics.

fixtures were designed by Mr. Simmons and are certainly a great credit to him as is the store in its entirety. He finds that the new store has increased his business from 40 to 50 per cent, a good indication of how an attractive store, coupled with good treatment of customers, will draw trade. His counter top consists of a

INTERIOR OF THE NEW STORE OF A. I. SIMMONS, SIXTY THIRD STREET, CHICAGO

most important points in growing this high grade stock is to allow the plants to make a short, stocky growth and to avoid any unnecessary coddling. The specimen plants and standards for exhibition purposes should now be making rapid growth. The bright days, allowing for plenty of ventilation and frequent syringings, give conditions favorable to quick plant growth. Do not allow these plants to become root bound for want of potting into a larger size. If this part of the work is not followed up closely the plants get hard and woody, causing them to bud up, a condition that requires considerable time to overcome. At every potting the soil for these plants can be used a little coarser and richer, but plenty of drainage must be provided. The pinching back of the shoots or growths is a very important item and should be looked after every day or two. Keep them well pinched back, as every pinching hastens another shoot and the more shoots the plants can be made to produce from now on so much larger will be the specimen. The standards and half standards should now be forming their heads, and they should have the stems properly supported by being staked up to prevent any toppling over.

The singles, pompons and anemone pompons are very popular now and ideal subjects for growing into large specimens for exhibition or other purposes. Most of them are easy doers and respond readily to this mode of culture. They are of more rapid growth than the large flowered varieties, consequently small plants now can be pushed along into fine specimens by fall. The one most important thing to remember is to keep them well pinched, as they are inclined to leggy growth. The soil or compost heap for the main plantings should be prepared at this time so that it has a chance to become thoroughly incorporated. Choose a stiff soapy loam if possible, using one part of well rotted manure to three parts of soil, mixing them thoroughly; then stack in a pile until needed and keep down any weeds that appear on it.

C. W. JOHNSON.

#### Carnation Mrs. J. C. Vaughan.

The accompanying illustration shows a flower of Carnation Mrs. J. C. Vaughan, nearly four inches across, grown by E. J. Coster, proprietor of the Saskatchewan Greenhouses, Prince Albert, Sask. Mr. Coster has been retailing this variety all winter at \$1.50 per dozen and says that the variety does well with him.

POUGHKEEPSIE, N. Y. — Catherine Powers, widow of the late M. J. Lynch and mother of T. W. Lynch, J. M., J. E., Mary and Catherine Lynch, died April 19 after a very brief illness. Mrs. Lynch had not needed the services of a physician in many years, but a week before her death she took cold and pneumonia followed, to which she succumbed. She married Mr. Lynch about 40 years ago and they located on South street, where both died. After her husband's death Mrs. Lynch and her sons carried on the business and this will be continued by them.

## FLORISTS' PALMS.

### Work in the Palm Houses.

The regular spring housecleaning and repotting should now be in full swing in the palm houses, for thorough work at this season will help materially in the production of good, saleable stock for the following autumn and winter. The heat and moisture that are necessary in the growing of stock of this character bring about conditions that are trying to bench lumber, and unless cypress is the material used for this purpose there are sure to be found many rotten boards, and much repairing that must be done

about of a palm is very liable to loosen it at the collar, and the plants thus handled never grow away so freely as those that are undisturbed after potting. It is natural for these plants to send out some additional roots from around the base, as they make new top growth, and these fresh roots are likely to be disturbed and injured if the plants are carelessly handled.

As to potting soil, it may be said in a general way, that palms enjoy a soil that contains plenty of humus, and humus is produced from decayed vegetable matter, and with this in view it is found that the best foundation for palm compost is rotted sod.

CARNATION MRS. J. C. VAUGHAN SHOWING ACTUAL SIZE.

before the plants can be reset in their permanent positions. The benches should be cleaned off anyway in order to get rid of dirt and fungus, and this gives a good opportunity to examine the condition of the lumber; to make all necessary repairs, and to give the bench a good coat of white-wash, or cement wash, and then to cover it with a fresh layer of fine ashes, the latter being about the cleanest and cheapest satisfactory material upon which to set the pots.

Then comes the repotting of the stock for which that particular bench has been reserved, it being taken for granted that the plants have been examined for insects and cleaned, if need be, prior to potting. It is much the better practice to do the cleaning before the potting, from the fact that no newly potted plant should be subjected to the bending and handling that is unavoidable in dipping and cleaning. Such bending and pulling

to which is added about one-fifth to one-fourth of well rotted stable manure, a good grade of the latter being formed from equal portions of horse and cow manure. If the soil is very heavy, many growers add peat to make it more open, and also use a moderate quantity of bone dust or other prepared fertilizer as an extra stimulant. Sheep manure mixed in the soil does not seem to have very much value, though it is useful as an occasional stimulant to well-rooted stock when given in liquid form. Much the same may be said for dried blood, this substance giving poor results when mixed with the potting soil, but being taken up quite readily by pot-bound palms. It will help such to recover and maintain the color in their foliage. Soot from soft coal is also beneficial in a liquid form, though to be avoided in the compost.

But all these strongly nitrogenous manures should be used cautiously.

for too strong an application will make the foliage soft, and the leaf stems so brittle that they will sometimes break from a vigorous syringing. Bone dust is a safe fertilizer, if one can secure it of good quality, for bone decays but slowly, and consequently liberates its plant food gradually. But as the packing houses now save so many by-products from their bones, there is not much fertilizing value left in the average sample of ground bone, its chief constituent being lime, and while lime helps in some soils, yet it is not a special fertilizer for pot plants in general. Another detail in the preparation of potting soil for palm growing is the suggestion not to use a sieve too much. It is not needful to use sifted soil for any pots larger than 2 or 3-inch sizes, for if the soil is properly prepared and thoroughly mixed, the lumps will be well broken without sifting, and some of the coarser portion of the soil will answer well to cover the drainage in the bottom of the pot. Pot firmly, using a rammer for all pots from the 5-inch size up, for a firmly potted palm not only grows better, but is also much more satisfactory to the storeman or decorator who ultimately handles it.

Firm potting makes thorough watering needed, and in most cases at least two good waterings will be required in order to moisten the soil down to the bottom of the pots. All newly potted stock should be kept a little closer in regard to ventilation for a few weeks, or until they begin to grow freely, at the same time keeping a moist atmosphere by means of regular syringing in bright weather, and sufficient shading on the glass to protect and keep color in the foliage. Old plants that may have been used for decorating are liable to be in a sad condition at the end of the season, and some of them will not be worth keeping over, but others may be worth saving, and will need repotting to give them a fresh start. Some of these may be benefited by having the roots washed out before repotting, thus keeping the pots down to a convenient size, but in any case they will need the same careful and firm repotting, and should also have extra care in watering, spraying, and shading until the roots resume active growth.

W. H. TAPLIN.

### The Double White Narcissus.

The double white or gardenia flowered narcissus (*N. poeticus* fl. pl. or *N. albus plenus odoratus*) is one of the finest of all flowers for choice decorative purposes around Memorial day. Besides its chaste beauty there is the fact that, after the flowers are cut, they may be kept in the icebox for over a week, so that if they are not timed exactly right for any special day, they can be held over, even longer than this in special instances. This being the case, retailers often buy in advance. In many places this beautiful narcissus has been badly hit by the wintry weather, but not in all, and there are some growers who will have a fine stock. *Narcissus poeticus* fl. pl. thrives on any good and moderately light soil, and those who grow for their own retail stores should plant it in quantity. Its worst fault is that

after being planted in the same position a few years, it occasionally sends up blind flower buds, but this is usually overcome by transplanting into a new position.

### To Be Done Now.

#### IN THE GREENHOUSES.

Pot up the young *Pandanus Veitchi* from cuttings as soon as ready and keep the propagating bench working full time as long as the heat is used.

Push on with the potting of palms as fast as possible and allow a rather closer, moister atmosphere afterwards.

Feed pelargoniums advancing for flower and lay some tobacco stems about the stage underneath them to keep green fly at a distance.

Double Narcissus Poeticus.

The variegated salvia is a fine thing for subtropical bedding. Grow the plants in rather poor soil, as this helps the color.

Never keep old cinerarias around after they have passed the useful stage. They are great breeders of insects, especially fly and the leaf borer.

Place thunias in the full sun in a brisk moist temperature. Very few flowers will be produced in a shady place.

Repot fancy leaved *caladiums* as soon as ready. If they are forced into flowering by being allowed to get pot bound they will not make much leaf growth afterwards.

It is better to sow annuals outdoors, even if they are a little later, than to attempt to grow more plants than there is room for under glass and get the seedlings crowded and spoilt.

Whenever any replating of benches takes place see that they are in good order. Take no chances on a bench falling down and ruining a crop.

Avoid overwatering sweet peas just at the time the flower buds are forming, as anything that hinders root action then causes the buds to drop.

#### OUTDOORS.

Sow annuals plentifully, both for cutting and a display in the beds. These form one of the cheapest methods of making a good show.

Make good any losses in pansy beds in order that the display will be even and not patchy.

Stock arriving from nurseries in full leaf, as much of it is just now, will need especial care to keep it alive. Low growing shrubs should be cut back before planting.

Harden off all stock in frames by leaving the lights off as much as possible by day, but cover at night, as frosts may occur at any time.

The weeds are getting strong already in newly planted shrubberies. They should be taken out and burnt and the surface soil loosened.

Certain lawns and portions of lawns almost always burn up quickly in a hot summer. Such places should not be cut too closely, so set the lawn mower knives up a little when using it here.

Look out carefully for "blind" plants when setting out cauliflowers. They require a rich, light soil.

Propagate cowslips, polyanthus and other primroses by division of the plants as soon as the flowers are over.

Replace storm washed gravel in garden walks, destroy any weeds that are showing and tidy them up generally for the summer.

Lighten the tops of lilac bushes a little when cutting the flowers to allow the light and air to reach the center of the plants.

### Washington.

The rainy spell we have experienced during the past two weeks was much needed, and has added new vim to the outdoor stock. There was some improvement in business, funeral work being especially plentiful. There seems to be an over supply of good stock, which is moving very slowly, on account of the outdoor flowers. The prospects for next week are very promising, however, judging by the number of weddings booked.

Tom F. Gude, John Robertson, W. W. Kimmell, Geo. H. Cooke and Elmer Mayberry, the committee, announce that the annual banquet of the Florists' Club will be held at Rauscher's hall, Commercial avenue and L street, Tuesday evening, May 3, at 7:30 p. m., and they hope to have a good attendance of the members, their wives and friends. Tickets are \$1.50 per plate. A very interesting programme has been arranged, and there is no reason why all should not have the time of their lives. A short business session will be held prior to meeting.

G. S.

### Trenton, N. J.

A feature of the past week was the great amount of lilac being sold. In the stores, markets and on street stands, it was everywhere plentiful.

Martin C. Ribsam, successor to C. Ribsam & Son, whose store was recently damaged by fire, is now located at Broad and Academy streets, and is doing a fine business. Just as soon as the necessary repairs have been made on the building at the former location on the corner of Broad and Front streets, the business will be reinstalled there.

W. J. Chinnick's plant business seems very prosperous. Great quantities of plants are being sold at his stand in the market.

H. E. Blackman has a very neat retail store at 135 North Broad street and is having his share of business.

The cut flower and plant business of Carlman Ribsam at 31 Wall street, is in a flourishing condition.

The store of Frank J. Clark on Broad street is attractive and prosperous.

**Pittsburg.****STOCK CLEANS UP WELL.**

The end of the week found a general clean-up on almost all kinds of flowers. Carnations especially were in most active demand, the supply not being equal to it for the past two weeks, and by Saturday, helped by a number of store openings, not a carnation was to be seen in any wholesale house. Roses, which have been a glut, moved freely and a clean-up was experienced in that line also. Good Spanish iris is very scarce and sweet peas sell at sight. American Beauty roses, while plentiful, have held their own fairly well. Lilies are still in over-supply with prices slightly better. Asparagus plumosus and Sprengerii, both local and southern stock, is arriving in such quantities that half of it is being thrown away.

**NOTES.**

The McCallum Co. is now receiving the summer cut of roses, long stem Kaiserin being quite an improvement over Bride. F. H. Westhoff, De Haven, is consigning this firm some carnations that should have blue ribbons.

The death of "Budget" Seaman, the well known football player and coach, Washington, Pa., caused a big demand for flowers. A floral football field made by Phillips & Sedan of that city was one of the many designs.

Two new firms are slated to open up soon, one on Frankstown avenue and one in the new Oliver building.

A. W. Smith reports quite a run on special American Beauty roses and is moving immense quantities.

Geo. Marshall, of the Pittsburg Cut Flower Co., is the democratic candidate for select council.

Geo. Eickhorn, who formerly ran a stand in the market, is now in the employ of F. Ueberle.

G. & J. W. Ludwig have been busy with a number of luncheons, many being in the east end.

Marshall Anderson reports that his new store in Oakland is pushing ahead right along.

The Pittsburg Cut Flower Co. is strong on fine Killarney and White Killarney roses.

Miss A. L. Wells, Steubenville, O., has returned from her sojourn in California.

John Harris has been spending the past week in Ohio and West Virginia.

Mrs. E. A. Williams has had a number of elaborate decorations lately.

J. B. Murdoch Co. is moving its business to 122 Ninth street.

The South View Floral Co. is cutting a nice crop of callas.

E. Eisner has been on the sick list for the past few days.

Walter Paul is now with W. D. Faulk in Homestead. J.

**St. Paul.**

When the maple trees were in bloom March 20 and all trees quite green with leaves by April 1 it was predicted by a few "wise ones" that vegetation would suffer from cold weather later. While the loss to agriculturists and horticulturists throughout the state will be heavy, I do not think the florists will be heavy losers. Early peonies and some other perennials are badly damaged, as some buds were quite well developed, but no tender plants like carnations have been put out so the loss on that stock cannot be considered. Some bedding plants in hotbeds may have been slightly nipped. The mercury dropped to 20° on Friday night last and Saturday and Sunday nights water froze quite hard. All lilacs, Spirea Van Houttei and early flowering shrubs in bud were badly frozen. Some

snowballs are killed but some not far enough along are all right. Nearly all fruits are killed—late apples and strawberries alone excepted. Early garden truck is hurt severely. The foliage on many trees, box elder, maple, elm, linden, etc., is in some instances frozen black. Many of the early tulips, narcissi, etc., were through blooming, but the later ones caught it badly and were frozen to the ground unless protected.

O. J. Olson, of Holm & Olson, has the sympathy of the trade in the loss of his mother, who was drowned in Phalen creek. Friends and relatives of the aged women think that she was killed by an accidental fall from the bridge over the creek.

D. D. D.

**Urbana-Champaign, Ill.**

The recent cold weather has done considerable damage to the fruit in this locality. Dr. F. J. Burrill is of the opinion that the apple crop in this section is a total loss. All the small fruit seems to have perished also. In southern Illinois orchardists have been fighting with smudges, but as yet it is difficult to say whether or not the work has been successful. Prof. Blair has spent considerable time directing this work in the station orchards. The foliage on shade trees, and on most shrubs, which was dense and luxuriant for this season of the year, was also killed. Saturday morning the thermometer at the experiment station greenhouses registered 28°, and Sunday morning it had dropped to 23°. On going through the herbaceous grounds one finds that aquilegias, monardas, coreopsis, hollyhocks and many other plants are frozen nearly to the ground. Some species of aquilegia were already in flower, but when the sun made its appearance for a short time on Sunday the flowers wilted, and turned black. The early peonies are also killed. A few of the later varieties were just beginning to come through the ground, and it is hoped that these are not injured.

The florists have suffered but little loss. Gus. Johnson reports that his peonies are killed. Thos. Franks & Son report that all tender plants are still under shelter, but that peonies and other perennials are frozen.

ARNO H. NEHRLING.

**Cincinnati.****TRADE BETTER.**

During the past week quite a little activity has been noticed in the cut flower market and better clearances have been possible in all lines. Undoubtedly business will rapidly gain its normal state as the demand for all kinds of flowers has increased and this, with the shortening up of supply, has enabled the grower to realize something like a living price for his product. American Beauty roses at this writing are not equal to the demand, while teas of all varieties are moving better with the call for white predominating. Carnations have stiffened in all colors, the price advancing a cent on colored, while the best white are fetching \$3 per 100. There are just about enough lilies to go around and sweet peas are not equal to the demand. Bulbous stock is on the down grade and another week will see its finish. In the green goods line, smilax is the only scarce article, there being enough asparagus for all wants.

**NOTES.**

Dave and Ollie Honaker came up from Lexington last Sunday to see our baseball club put the kibosh on the Chicagos, but as the cubs turned the tables and won easily they concluded to stay over and see the mighty Hans

Wagner of the Pittsburgs. However, rain, snow and baseball don't mix very well and on Tuesday afternoon a long distance telephone message called them home on account of a large funeral order. Too bad, Dave. S.

The bowling club got together again at Willert's bowling alleys Monday night and while some very good scores were made still no records were smashed. We hope the same interest will prevail and that our city will be represented at Rochester next August with a first-class team.

Geo. Tromeys has opened a branch store on Walnut and Sixth streets; and says that so far he is well satisfied with the investment.

**New Orleans.****SEVERE DROUGHT.**

The season here is now over as far as the plant trade is concerned. The Easter trade was a very brisk one, in fact the best in many years, and the florists are well satisfied. The week of the Shriners' convention was also quite brisk. The weather of late has been quite unfavorable to the growers, there being no rain for the last two months and everything is parching. The private gardens about the city are now at their best, one mass of flowers.

**NOTES.**

The German Gardeners' Club gave its annual fishing outing on Thursday, April 21, to Peach Orchard, where a very enjoyable day was spent by about 20 members. Henry Krack and Louis Buckner in their excitement in fishing capsized their boat, but escaped with a good ducking. At the last meeting the following officers were installed for the ensuing year: Robt. Reinecke, president; Louis Buckner, vice-president; Otto Werner, secretary; John Rinck, treasurer.

At the meeting of the Horticultural Society, April 21, it was decided the society would take its outing this year to Grand Isle, on the Gulf of Mexico, for three days some time in June. The members were guests of President A. Alost, at Rose Villa, April 17, 30 members and friends participating.

A. Alost and Robt. Reinecke leave in the early part of June for an extended trip to Europe and expect to be gone three months.

Ed Baker is making good headway with the tree nursery of the Park Association.

The Metaire Ridge Nursery is still sending out fine stock of cut roses.

Jas. A. Newsham is quite busy shipping orchids all over the country.

Chas. Ebbe has made more additions to his greenhouse plant.

Richard Eichling is the happy father of a fine girl.

C. W. Eichling is nearly sold out of his new fern. D.

**OBITUARY.****John Murray.**

John Murray, of Pawtucket, R. I., died at his home April 9, at the age of 75. Mr. Murray was a gardener of the old school, and was well versed on all kinds of hardy and greenhouse plants. Thirty years ago, Mr. Murray was one of the best known gardeners around Boston, and had charge of some of the best known private estates there. He lived in Pawtucket for the past 30 years and always followed his profession of gardener. He is survived by three daughters and two sons, his wife having died some years ago. J. BRISTOW.

CLEANING UP DAY has been fixed as May 1 in many cities of the United States and whenever our florist and nursery friends have an opportunity they should seek to aid such a movement in their home town or city.

Now the Grand Army is said to be trying to put a ban on the use of plants and flowers on Memorial day because of high prices. We have not heard of the members of this honorable body stinting themselves in other lines because the working men demand better pay.

It is always bad policy to risk tender stock outdoors in advance of the usual time, without adequate facilities for protection.

PROF. ADOLPH BUISSENS, of the School of Horticulture at Vilvorde, Belgium, who visited a number of our commercial establishments last year in the interest of the Belgium government, has prepared an illustrated bulletin on his observations, which has just been issued at Brussels by the minister of agriculture. The firms visited included Poehmann Bros. Co., Bassett & Washburn, Peter Reinberg, Geo. Wittbold Co., and Vaughan's Greenhouses, Chicago; Henry A. Dreer and Robert Craig Co., Philadelphia; F. R. Pierson Co., Tarrytown, N. Y.; Cottage Gardens, Queens, N. Y.; Julius Roehrs Co., and Bobbink & Atkins, Rutherford, N. J.; the Dale Estate, Brampton, and John H. Dunlop, Toronto, Ont.

### National Council of Horticulture.

The fourth installment of the press service of the National Council of Horticulture contains articles on "The Moonvine," "Where Roses Grow Well," "Fragrant Flowers," and "Preparing the Garden Soil." The articles are timely and practical and are entirely free to nurserymen, seedsmen, florists and local editors applying for them to James H. Burdett, 1620 West 104th place, Chicago.

### The American Carnation Society.

#### CARNATIONS REGISTERED.

By Henry Eichholz, Waynesboro, Pa.—Princess Charming.—Helen Boseler X Enchantress: salmon pink, three to four inches; very strong, vigorous grower; very free producer of first-class flowers. Keeping and shipping qualities excellent. Christmas Cheer.—Alvina X Victory, fiery scarlet; two to three inches; habit dwarf, though stems reach 2½ feet after Christmas; extremely floriferous. Will produce 100 or more blooms per plant in a season. Especially fine for pot culture. Through an error this name is printed Winter Cheer in the judges' report in the annual report.

A. F. J. BAUR, Secy.

### Cold Weather Injures Vegetation.

The cold weather experienced in the middle west late last week and early this week damaged nursery stock, fruits and early vegetable crops throughout that region very considerably. The weather was not unusual for April but, following an abnormally mild March, vegetation was bound to suffer. Fruit trees and grapes appear to have been injured most severely, while small truckers in Kansas and Missouri, whose crops of early vegetables were well advanced, lose heavily. The peony growers face a considerable shortage in their crops of flowers this season but it is not possible to estimate their loss at this time as the low temperature in most sections was accompanied by snow, which will undoubtedly protect the plants to some extent. The few carnation growers who had stock in the field will lose a considerable portion of it. Very little bedding stock appears to have been exposed.

### The Government Experiment Gardens.

Peter Bisset, of the Bureau of Plant Industry, Department of Agriculture, Washington, D. C., has returned to headquarters after an extended inspection tour of the government experimental work at many points throughout the United States, including the bulb farm at Bellingham, Wash., the experiment garden at Chico, Calif., now in charge of Dr. Van Fleet, the experiment garden at Brownsville, Texas, etc. Mr. Bisset speaks very favorably of the work in general and is particularly pleased with the progress made in Dutch bulb culture at Bellingham. Much of Mr. Bisset's time on this tour was devoted to investigation of the various public parks and similar institutions in the west and on the Pacific coast with a view to selecting the most desirable locations for trials of new ornamental trees, shrubs and perennials recently introduced from China and other countries.

### 'Northern Indiana Florists.

The Northern Indiana Florists' Association met in Rochester April 20 in regular meeting and the members were given an address of welcome by Mayor Omar B. Smith in the Commercial club rooms, where the meeting convened. President Dederick responded. The out-of-town members present included: W. W. Dederick, Warsaw; J. S. Stuart, Anderson; W. S. Hall, Anderson; A. J. Wagoner, Columbia City; D. C. Noble, Columbia City; Willis Kinyol, South Bend; G. W. Stumpner, Argos; J. A. E. Hall, Anderson; C. C. Arnold, North Judson; Lloyd Isanberger, Warsaw; George Pastor, Huntington; Harry White, North Manchester. Secretary J. H. Shelton received letters from several members who sent regrets.

The morning session was taken up with business matters and it was decided that the association be incorporated. Different members gave short talks in which they gave their experiences for the betterment of the florists' business in general. Directors for the association elected at this meeting are: A. J. Wagoner, W. S. Kircher, J. S. Stuart, D. C. Noble, George Pastor, Harry White and J. H. Shelton.

At 1:30 o'clock the members of the association, with Mayor Smith as guest of honor, enjoyed a banquet at the American restaurant. Following the banquet the business meeting was resumed at the Commercial club rooms. The visitors were all quite favorably impressed with the beauty of the city and complimented the local craftsmen on their excellent greenhouses.

The annual meeting, which is to be held the third Wednesday in July, will be at Winona Lake, where the association will open permanent headquarters.

### Meetings Next Week.

**Albany, N. Y., May 5, 8 p. m.**—Albany Florists' Club, W. C. King's, 24 and 26 Steuben street.  
**Buffalo, N. Y., May 3, 8 p. m.**—Buffalo Florists' Club, 385-387 Ellicott street.  
**Chicago, May 5, 8 p. m.**—Chicago Florists' Club, Union Restaurant, 111 Randolph street.  
**Dayton, O., May 2, 8 p. m.**—Dayton Florists' Club, 37 E. Fifth street.  
**Detroit, Mich., May 2, 8 p. m.**—Detroit Florists' Club, Cowie building, 42-44 Gratiot avenue.  
**Grand Rapids, Mich., May 2.**—Grand Rapids Florists' and Gardener's Club, office of member.  
**Indianapolis, Ind., May 3, 3:30 p. m.**—State Florists' Association of Indiana, State House.  
**Lake Geneva, Wis., May 7, 8 p. m.**—Lake Geneva Gardeners' and Foremen's Association, News building.  
**Louisville, Ky., May 3, 8 p. m.**—Kentucky Society of Florists, Third and Broadway.  
**Milwaukee, Wis., May 5, 8 p. m.**—Milwaukee Florists' Club, Quiet House, corner Broadway and Mason street.

Montreal, Que., May 2, 7:45 p. m.—Montreal Gardeners' and Florists' Club, Royal Guardians' building, 211 Sherbrook street, west.

New Orleans, La., May 4, 8 p. m.—German Gardener's Club, 624 Common street.

Newport, R. I., May 4.—Newport Horticultural Society.

Pasadena, Calif., May 6, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.

Philadelphia, Pa., May 3, 8 p. m.—Florists' Club of Philadelphia, Horticultural Hall, Broad street.

Pittsburg, Pa., May 3, 8 p. m.—Florists' and Gardeners' Club, of Pittsburg, Fort Pitt Hotel, 10th street and Penn avenue.

St. Paul, Minn., May 3, 8 p. m.—Minnesota State Florists' Association, 510 Snelling avenue, north.

San Francisco, Calif., May 7.—Pacific Coast Horticultural Society.

Washington, D. C., May 3, 8 p. m.—Florists' Club of Washington, 1214 F. street, N. W.

## Wants, For Sale, Etc

# Making a Big Noise

Remember the late Mark Twain's delicious story about the boat with the big whistle and the little boiler? "When they blew the whistle the boat stopped"

We are blowing our whistle about our **Brides and Maids** but we don't stop selling them. They are the talk of the market and you know that your most discriminating customers prefer these fine roses to Killarney and White Killarney when they can get them in such fine condition as ours. But not only these, we have all other popular stocks in plenty and of absolutely first-class quality.

There is nothing to beat our **Carnations, Roses** of all kinds, **Bulbous Stock, Valley, Sweet Peas** and all other flowers in season. We are well fixed on all classes of greens, **Ferns, Leucothoe, Smilax, Asparagus, Galax** and others. Let us hear from you.

**We Give Personal Attention to All Orders.**

## Chicago.

### WEATHER SHORTENS STOCK.

Beyond the fact that stock is decidedly shorter in many lines, as well as of much better quality, there is little change to chronicle from last week's conditions. The demand is still only fair in the city while the shipping trade does not show as great an improvement as had been hoped for with the cooler weather. No one was quite prepared for the snow and frost which struck the city and surrounding territory on Saturday when everything was covered with snow and the temperature went down many degrees. After the warm weather of March and the open though not so unusually warm period in April the stock is in very fair condition all around. Bride and Bridesmaid, Mrs. Jardine and Uncle John roses are in better shape now than they have been all winter and delightful flowers of the old favorite white, with the rosy blush on their cheeks that we look for in late fall, are to be seen. The color of Bridesmaid, too, is excellent, reminding one of the best days of this variety which, notwithstanding the rush of other pink roses, is still peerless in its color.

Were it only possible to get as many flowers per plant of Bridesmaid as it is of Killarney and to keep it going the year around, there would be little call for the Irish rose while the same conclusions may be drawn with regard to Bride and White Killarney. Carnations have dropped off considerably in numbers, but the quality is keeping up remarkably well for the season and the flowers are away ahead in quality of those arriving a month ago. All the popular varieties are represented and all are good. Sweet peas are decidedly better, the arrival of the Spencer types in quantity improving their status considerably. Violets are about over, though a few were to be seen on Saturday. There is still a lot of second rate bulb stock on the market and some good. Peonies were coming in before the frost and quite a number were cut when the wintry snap was seen to be imminent, but as to what they will do now we cannot attempt to prophecy. Among the orchids is a sprinkling of dendrobies, some of the Loddiges section of cattleyas and, of course, a big lot of Mossia and all meet with a fair demand. Spring flowers were abundant—also before

the frost—and fairly good flowers of doronicums were seen on several counters, and about the retail stores. Antirrhinum is good and plentiful; pansies are too numerous while forget-me-nots, daisies and a host of smaller stocks can be seen at all points. There is room for a lot more business and this scarcity of trade keeps prices down, not overabundance of stock.

### A RETURN OF WINTER.

The sudden return to winter weather conditions has been the principal topic of conversation since Saturday, when a heavy snowstorm, coupled with a very low temperature, reached this city and vicinity. Considerable damage was done to vegetation generally, but a fortunate circumstance was that the freeze was not followed by sun or heat. The frost went out of everything very gradually and was succeeded by a cold rain, about the best thing that could have happened under such untoward circumstances. The first thought in everyone's mind was about the peonies. The forwardness of the plants were showing bud quite prominently and doubtless the majority of these will be ruined or

so badly crippled that the flowers will be malformed. In some of the worst instances the shoots have simply keeled over and there is an end to them as far as flowers are concerned. Others not so far advanced will probably come through all right, but the general idea is that the crop will be very seriously curtailed. Some of the largest growers of carnations had many thousands of plants already in the field. Probably not many will be killed but all are more or less crippled and checked. The carnation is a hardier plant than is generally supposed, and when the stock has been out long enough to become acclimated it will probably not be much injured. It is the stock just new from the houses that will suffer worst. Other outdoor flowers were of course more or less checked and the lilacs are in

many cases totally destroyed. Shrubs and trees have suffered severely and there is no hope for as good a show as usual of many of our finest flowering species. Some of the principal vegetable growers say they have suffered to some extent but not nearly as much as might have been expected. Radishes, peas and lettuce have been checked, but onions have come through almost unhurt, and potatoes were not showing in many instances. The fruit men are probably the worst hit, acres of trees that promised great things and thousands of bush and small fruits being injured beyond any hope of redemption. The full extent of the damage is not known nor will it be for some time, but it is very great and the figures given by the newspapers though evidently prepared at random and with very little knowl-

edge of the true state of affairs, are likely to be below rather than above the mark. However, it is an ill wind that—etc., and the effect upon greenhouse grown flowers will be a better demand and at higher prices than would have been possible had outdoor flowers not been hit.

#### NOTES.

At the Geo. Wittbold Co.'s greenhouses at Buckingham place, there is an elegant lot of fine foliage and ornamental stock now. Palms, it goes without saying, are very abundant in all varieties and sizes, and among other leaders that struck us as particularly good were Pandanus Veitchi in various sizes, elegant Boston ferns in pots ranging from five inches up, pretty stock of marguerites and caladiums as well as many thousands of small ferns in great variety. Very unusual

in collections are really well established aucubas and cherry laurels (*Prunus lauro-cerasus*). These are grand for furnishing. A large importation of boxwoods and bays was being unpacked the early part of the week. Splendid specimens in all sizes and shapes, and every one in magnificent health.

Manager Pyfer, of the Chicago Carnation Co., referring to the effect of the late frost on peonies says: "On Saturday the peonies looked as though the entire crop would be ruined, as they stood from 12 to 18 inches high and were nicely budded before the freezing weather. The cold caused them to droop over, and it looked as though most of the buds were frozen, but they are gradually straightening up, with every indication that we will not suffer as much loss as first anticipated. Although the crown buds may be blighted, the stems will produce side shoots which afford very good flowers."

Excellent Killarney roses are a strong leader at Bassett & Washburn's just now. The flowers are of fine color, large and with stiff, well leaved stems. Beauties, carnations and other stock are arriving though in reduced quantities to what they have been coming, and the quality, owing to the cool weather, is excellent. Business is increasing and a rise in prices may be expected any time, though as yet it has only gone into effect on carnations.

Miss Lilian Bloom, stenographer at Bassett & Washburn's, left for a week's vacation at Toledo and Cleveland, O. Miss Bloom is known to be deeply interested in W. Feniger of the former city, but whether the shower of rice bestowed upon this charming young lady was premature or not we cannot at this juncture determine.

Carnations of good quality have not been any too plentiful in many houses this week but L. A. Budlong has been fortunate in receiving large quantities of extra fine flowers. Roses, too, in all the popular varieties are again coming in heavily, the summer varieties, such as Kaiserin and Field starting up well.

An automobile parade is scheduled for May 7. There will be separate classes for cars decorated with artificial as well as natural flowers and already several florists have signified their intention of entering. John H. Kelley of the Republic Rubber Co., 1732 Michigan avenue, is chairman of the committee.

Richmond roses have been a very strong feature at Peter Reinberg's

CHICAGO

this week, the flowers being exceptionally good, with long stems and fine color. The foliage on the Beauties now coming in is exceptionally good. Business is fine here, both the city and out-of-town trade having picked up considerably.

A conference to discuss outdoor improvement for the homes, towns and cities of Illinois will be held at Springfield, May 26 and 27 under the auspices of the Illinois Outdoor Improvement Association, A. P. Wyman, secretary, 17 East Van Buren street, this city.

Hoerber Bros. are receiving grand flowers of Bride and Bridesmaid roses. A new typewriter has been installed and a new stenographer and bookkeeper employed, Miss Douglas, who will be of great assistance in handling the increasing business.

Zech & Mann's Bride and Bridesmaid roses are magnificent stock, the latter of beautiful color and great substance. Uncle John, we also noted, in excellent order as indeed are all the varieties offered by this progressive firm.

J. B. Deamud returned from his eastern trip on Saturday. He says John Burton of Philadelphia, took him and Geo. C. Watson for a "joy ride" in his auto to Atlantic City, N. J., and back and otherwise entertained him.

The police of this city are searching for Wm. Shanlev, florist, of Brooklyn, N. Y., according to a local paper, he having disappeared April 13, and is said to have been kidnaped, drugged and taken west by two men.

Vaughan & Sperry continue strong on long stemmed Beauties which are just about equal to the demand. Fine gladioli, carnations and sweet peas are also among the leaders this week.

W. C. Egan, of Highland Park, reports that all climbing roses and Conrad F. Meyer are killed to the ground all along the north shore. Protected climbers are uninjured.

Geo. Crabb, of Crabb & Hunter, Grand Rapids, Mich., who has been visiting the city this week, says he has lost \$1,000 worth of cherries by the recent freeze.

J. M. Killips of the Superior Chemical Co., Louisville, Ky., has been in town this week exploiting ammoniated lawn lime with the Stratford hotel as headquarters.

Wm. O'Brien, who 13 or 14 years ago sold flowers on the board of trade, has been visiting the city this week. He is now located at Pittsburg.

E. Rober, who has been John Muir's foreman for some years, will start in business at Maywood on his own account, taking H. F. Port's place.

J. H. Burdett, secretary of the Horticultural Society, is a candidate for the secretaryship of the South Park Commission.

W. N. Rudd now says the late freeze may modify his statement as to the flowering of local peonies this season.

C. L. Hutchinson has been elected temporary secretary of the South Park commission, without salary.

The Masonic Temple Floral Co. has filed a petition in bankruptcy; liabilities \$3,599.48, assets \$834.25.

Edward Schawel, 3751 Agatite avenue, is about to build another greenhouse, 21 x 125 feet.

C. Lund, Warsaw, Wis., was a visitor this week, exploiting his carnation support.

Visitors: M. Bloy and Chas. H. Plumb, Detroit; Peter Bissett, Washington, D. C.; Geo. Crabb of Crabb & Hunter, Grand Rapids, Mich.

#### BOWLING.

The meeting at John Kruchten's store, April 21, to award the prizes for bowling was well attended and enthusiastic. The Carnations were awarded \$25, the Violets \$15, the Orchids \$10 and the Roses \$5, this being their order as announced last week. Each member of the winning team receives a watch fob, donated by Peter Reinberg, the six highest individuals an umbrella donated by the Foley Manufacturing Co. Frank Pasternick, secretary, has issued a special notice saying that, starting Friday evening, April 29, all florists desiring to bowl and make the team to represent the club at the coming convention in Rochester should be at the Bensingers' alleys, 118 Monroe street, at 7:30 p. m. Everyone has a chance to make the team. The prizes follow:

BUSINESS QUIET.

The business of the past week has been rather quiet. Plenty of stock of all kinds is available. Double violets still hold out. The public seem loth to give them up for the season, but they cannot last more than another week. Carnations are coming in extremely heavy and the markets have difficulty in keeping them cleaned up. Prices are down and the quality is good. Iris is coming in much more freely and is selling well. There is an abundance of Easter lilies coming in, many of them having short stems. They are valuable for funeral work and sell well. Callas are falling off slightly. The May flower season has been very poor and promises to be short. The various dealers report trade as being far behind former seasons and place the blame on the weather conditions. Roses are showing the effects of the warmer weather somewhat. Killarney and Richmond are coming a little better, but are still off on stem. There is an abundance of the shorter grades. Kaiserin is looking good for this time of year, but not selling very well. Beauties are plentiful, but falling off in quality. Cattleyas are coming in more freely and are in good demand. Gardenias and valley are plentiful and selling well. Bulbous flowers and sweet peas are coming in heavily. Pansies are falling off a little. Some good ixia, mignonette, nasturtiums, stocks, etc., complete a most attractive assortment. Adiantum and Asparagus Sprengeri are more plentiful. The plant trade holds up well, some good hydrangeas, ramblers, calceolarias and potted strawberries, together with some superior geraniums and other small flowering plants keep the shop windows looking very pretty.

NOTES.

From present indications the gardenia market will be well supplied next season. Several of the growers are turning their attention to the gardenia situation and possibly the retailers can get their supply nearer home in future.

The bad feature of receiving shipments from New York, Philadelphia and elsewhere is the uncertainty of the condition the shipments arrive in. Many times the retailer loses the majority of the flowers owing to poor packing or over-developed flowers.

There seems to be considerable sickness amongst the various growers and salesmen connected with the markets at this time. Mr. Aylward is confined to his home with a severe cold. Chas. Teika, Mr. Pegler's assistant, is also under the weather. J. Greenwood,

the East Boston florist, is down with the grip. Geo. Noyes is having considerable trouble with his eyes. Chas. F. Boyle, of the Galvin forces, is still at the hospital. He is improving steadily and hopes to be out soon.

H. A. Wheeler, of Newton, and Peirce Bros., of Waltham, are getting their stock in shape and anticipate taking their share in the gardenia trade of next season.

The J. A. Budlong & Son Co. is running strong on good Chatenay, Kaiserin and My Maryland roses. The cut of small and medium grade stock is unusually large. R.

# Roses

THE LEO NIESSEN CO., Business Hours: 7 a. m. to 8 p. m. Wholesale Florists, 1209 Arch Street, Philadelphia, Pa.

Our stock of Roses is hard to beat for quality. Our growers are in with heavy crop, and a large supply insures best selection. Our leaders are

PINK and WHITE KILLARNEY, MARYLAND.  
RICHMOND, KAISERIN.

## Pittsburg Florists' Exchange

Wholesale Cut Flowers  
Everything Seasonable

Headquarters for Ferns, Galax and Leucothoe, and carry a large supply of the best on hand at all times. We quote the following interesting prices on small or large quantities.

Ferns, fancy and  
daggers, \$1.50 per 1000  
Galax, green and  
bronze 45c per 1000.  
Leucothoe, green  
and bronze 65c per  
100.

15 Diamond Square, PITTSBURG, PA.

Philadelphia.  
TRADE SLOW.

The past week has been without any particular feature; there was a fair demand for special stock in all lines, but in the main business was slow. There is an abundance of flowers of all kinds, except valley, which has shortened up in the supply all at once, and the price has advanced to \$5 per 100. Carnations are in fair demand, with Rose Pink Enchantress a leader, it being a very good color at this season. Some fine lilacs are seen, Thornhedge, H. H. Battles' country place, sending in a large quantity of white which finds ready sale. Gladioli have made their appearance and add materially to the decorative stock. Gardenias are plentiful and of excellent quality. Now that violets are out of the way they rival the orchid in popularity for corsage bunches. Easter lilies and callas have been very plentiful. The longiflorums are getting scarcer and callas are moving better, quite a quantity being used in wedding decorations. The calla is one of the best flowers for decorative effect when properly used. The bedding plant men are busy, but mostly with stock for window boxes; quite a number have taken the risk and many boxes are now in position filled with geraniums, vincas and other summer plants. Flower beds are not being planted, although the continued mild summer weather would seem to warrant this work going on.

### NOTES.

Those who remember the run there was last Mothers' day for carnations are taking time by the forelock and getting their orders in so as to insure a good supply. With the various commission men quite a few orders have been placed and the day bids fair to rank as quite a floral holiday. The commemoration of the day appears to meet with great favor everywhere as its object becomes known. It is being taken up by churches, schools, societies and many orders throughout the country. To such an extent has it grown that the governors of California, Nebraska, South Dakota, Minnesota, Ohio, West Virginia, Mississippi and Florida will issue proclamations calling for its observance as a holiday. As its universal observance would mean so much to the trade it behooves all florists to do what they can to popularize the movement by advertisements, placards and displays of flowers.

## All Seasonable Flowers....

We read with great regret of the tremendous loss in the west to small and other fruits by the frosts of last Saturday and Sunday. Such a visitation in this neighborhood would have wrought terrible havoc, as many of the trees have their fruits set, cher-

ries particularly being discernible on the trees. Lilacs will be past by the end of the week and almost all trees are out in full leaf.

Walter Yates, of Mount Airy, will spend his summer vacation in Europe, sailing the middle of July, to be gone six weeks. He will combine business with pleasure and expects to pick up, among other things, a fine line of boxwood, which he says will be very scarce the coming fall.

Liddon Pennock now has a fine Winton six-cylinder touring car. It is a beauty and the country for many miles around this city will no doubt soon become as familiar to him as is the vicinity of Chestnut street.

H. Bayersdorfer & Co. say the Memorial day business is greater than ever, orders for all kinds of material, such as magnolia, metal wreaths and other cemetery decorations being received daily.

F. X. Murphy, Frankford avenue, has opened a branch at the Philadelphia ball park in one of the stores on the Dauphin street side.

K.

NEWTON CENTRE, MASS.—A large greenhouse is being built on the estate of Edwin S. Webster.

SCRANTON, PA.—Trailing arbutus is now at its best here, but owing to ruthless picking, it will soon be extinct in this vicinity.

ONEONTA, N. Y.—The D. & H. R. R. has recently planted 260,000 acorns on a 2-acre tract here and will later transplant the seedlings to their forest lands in the Adirondacks. The company also has a 20-acre tract at Wolf's Pond already planted. It is expected to take 50 years before the trees will be of value as lumber. The work is under the direction of R. Fancher, the company's gardener.

# MOVING DAY

BUILDING COMING DOWN **TRAENDLY & SCHENCK** GOING UP TO

Where our increased facilities will enable us to handle any quantities of good stock to excellent advantage. PHONES: 798-799 MADISON SQUARE.

## New York.

### TRADE FAIR, STOCK SHORTER.

The business of the past week was fair, due largely to a limited supply of stock. As previously noted the supply of good roses and carnations has been falling off. The demand has not been heavy, but there has been a fair clean-up at average prices, with a slight advance in carnations the last of the week. Lily of the valley has been going fairly well, the best stock touching four cents. Lilies, to use a nautical phrase, are still in the "doldrums;" they don't bring much above three cents. Sweet peas are running from 50 cents to \$1.25 per dozen bunches, but it takes extra fine stock to bring the latter price. There is little change in orchids and gardenias. A few fairly good violets are arriving, but violets are no longer a staple stock; on the streets they have been generally superseded by lilac, which is now arriving in large quantities.

April 25—Carnations are not plentiful and have advanced in price. There is not a very large supply of stock arriving, but the demand is correspondingly light, and it is very hard work to push up prices.

### MOVING DAY.

As previously noted, moving day is at hand. Traendly & Schenck and Walter F. Sheridan go to 131-133 West Twenty-eighth street. Ford Bros. will soon be their near neighbors, they having leased the entire building at 121 West Twenty-eighth street. They will move just as soon as the necessary changes can be made in the space on the ground floor, where their store will be located. Grieved at the loss of his good neighbors, George Saltford, who is now located at 43 West Twenty-

eighth street, is going to be with them at an early date. He has leased a store west of Sixth avenue in the immediate vicinity of the Traendly & Schenck, Sheridan and Ford Bros. stores. A. L. Young & Co. vacate the Manhattan Flower Market and continue business at their old stand, 54 West Twenty-eighth street. Horace E. Froment, E. C. Horan, John I. Raynor, A. H. Langjahr, William S. Allen and Henshaw & Fenrich remain at their old stands. They are not worrying as being near to the elevated road and the subway it is presumed that in the future as in the past, they will be able to "catch 'em coming and going."

### NOTES.

W. N. Reed, of Reed & Keller, accompanied by Mrs. Reed, will sail for Europe, April 28. They will spend about three months abroad and will visit France, Germany, Belgium, Holland and Italy. It is generally recognized as a fact that Mr. Reed is a man of very original and progressive ideas pertaining to the florists' supply business and many of his inventions are now staple articles in the trade. Usually robust, he has recently suffered from a severe attack of rheumatism, but is now much improved. It is hoped that a good rest will completely restore him to health.

L. B. Coddington, of Murray Hill, N. J., who ships American Beauty and other roses to H. E. Froment, is building a large addition to his range. Mr. Coddington is well known as one of the most careful and painstaking of growers and his great success exemplifies the saying that there is always plenty of room at the top.

At a meeting of the New York Cut Flower Exchange, April 23, the fol-

lowing committee was appointed to meet and confer with committees from other interested organizations concerning the proposed market under the Queensborough bridge: Philip Einsmann, J. A. Leach, V. S. Dorval, A. S. Burns, Chas. Beckman.

Wm. Elliott & Sons are offering great bargains in rose plants. This firm has had a very busy season with auctions and a great rush of counter trade. It handles everything that the farmer, the florist or the country gentleman needs and everybody gets the worth of their money.

Meconi & Hills is a new firm that has recently entered the cut flower business at 50 West Twenty-eighth street. Both members of this firm have had long experience in the business and it is reasonable to suppose that they will be successful.

Jas. Ebb Weis, Jr., a member of the well-known Weis family of Brooklyn, was married, April 16, to Miss Marguerite Williamson Meese. This young couple have the good wishes of many friends.

The plant attractions at Thorley's "House of Flowers," Forty-sixth street and Fifth avenue, are now very noticeable. Mr. Thorley is a man of original ideas, but not a visionary.

P. Gerlaid, the Manhattan florist, formerly located at Twenty-first street and Sixth avenue, has now a very nice store at 36 West Twenty-fifth street. J. K. Allen, whose health has not been good for several weeks, is now much improved and on duty at his store.

Geo. M. Stumpp sent a number of fine designs to the funeral of Mark Twain (Samuel L. Clemens) at Elmira.

Chas. Walch recently opened a fine retail store at 1084 Amsterdam avenue, opposite St. Luke's hospital.

Boston Notes.

Geo. Butterworth, of Framingham, is handling some remarkably fine cat-tleas. His crop is coming in in good shape and promises to be a heavy one. Mr. Butterworth is one of the largest orchid growers in this part of the country. He is all ready to lift a few of the tempting prizes at the national orchid show soon to be held in this city.

One of the most attractive novelties of the season consists of strawberries grown in pots by A. N. Davenport. They are proving to be very popular and are to be seen in all the shop windows. This grower is establishing quite a reputation as a grower of novelties.

Chas. Evans, of Watertown, is bringing in some fine hydrangeas. He is meeting with his usual success and disposing of large numbers of them daily.

John MacFarlane, North Easton, has been the most successful of the local gardenia growers thus far and next season he will have competition. R.

### To the Trade:

We wish to announce that we are now handling the entire stock grown by John Breitmeyer's Sons, Mt. Clemens, Mich., plant. This addition gives us 400,000 square feet of glass in addition to our already large source of supply.

Our growers are all specialists in their respective lines and we are now ready to fill all orders that we may be favored with, large or small, in the line of Beauties, Killarneys, La Detroites, Brides, Maids, Richmonds, Canadian Queens, Bon Silenes, Kaiserins, Rhea Reids, etc.; Carnations, all varieties, Valley, Sweet Peas. Easter & Calla Lilies. Snapdragon. Tulips, Hyacinths, Daffodils, Poeticus, Stocks, Lilacs, Mignonette, Yellow and White Daisies, Etc. Full Supply of Plumosus, Sprengeri and Smilax.

Fancy Ferns, Galax and Leucothoe are a specialty with us.

Would like to correspond with buyers interested. All stock billed at market prices.

Very respectfully,

Michigan Cut Flower Exchange,

38 and 40 Broadway, Detroit, Mich.

### Detroit.

#### STOCK SHORTAGE CURTAILS BUSINESS.

I can learn of no considerable damage done here by the present cold spell. It has curtailed the cut of all flowers and as carnations are locally off crop the condition of supply is much aggravated. There has been but little outside planting done here, florists even not having done much carnation planting to date. The cold wave is apparently not as severe here as it is at points farther west. Peonies have not suffered, nor will they if we don't get actual frost. Retail trade suffered during these days of rain the past week but with that exception trade is most satisfactory, shortage of stock being the only cause for dissatisfaction.

#### NOTES.

The next meeting of the club, May 2, will be addressed by Frank Dauzen on "Accounting for Retail Florists." At the same meeting it is expected that M. Bloy will present his ideas on the same subject from the growers' standpoint.

Chas. Plumb will sail for Europe on the S. S. Cedric, June 29. Mr. Plumb expects to visit England, Ireland, Scotland, Holland, France and Belgium.

Philip Breitmeyer was called to Buffalo Friday, April 22, because of the death of his aunt there.

M. Bloy and Chas. Plumb went to Chicago Saturday, April 23.

The sympathy of the local trade is extended to W. B. Brown, whose brother died April 18.

FRUIT, CARNATIONS AND PEONIES SUFFER.

We had a very severe snowstorm and a drop in temperature to 22° on Friday night, with fully 12 inches of snow. The damage to fruit trees is very heavy as most of them were in bud and flower at that time. There also seems to be quite some damage to shrubs, just how much is hard to estimate at this time as the snow covered up most of this class of stock and no doubt prevented more serious damage. Carnations that were planted out—there are but few of these—were no doubt damaged, but these as well as peonies and other florists' stock are all covered with snow and it will be several days before we are able to tell the amount of damage.

## The Seed Trade.

### American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Duryea, New York, First Vice Pres.; F. W. Bolgiano, Washington, D.C., Second Vice Pres.; C. E. Kendel, Cleveland O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J. June 21, 1910.

EASTERN seedsmen continue very busy.

VISITED CHICAGO: A. Hansen, Copenhagen, Denmark; J. Martens, Hamburg, Germany.

BAKER CITY, ORE.—The Bergman Commission & Seed Co. has sold its retail business to H. G. Hyde.

DR. VAN FLEET, of the Bureau of Plant Industry at Chico, Calif., is said to be experimenting with 100 varieties of wheat and 50 varieties of barley.

GEORGE W. WILLIAMS, treasurer of W. E. Barrett & Co., Providence, R. I., died April 25 at his home in that city of heart trouble after three weeks' illness, aged 74 years. Mr. Williams was identified with the firm since boyhood.

SEDALIA, Mo.—L. H. Archias, president of the Archias Seed Store, accompanied by Mrs. Archias and two daughters, Elise and Edith, sail from New York May 14, on S. S. Konig Albert for a three months' visit in Europe.

THE A. Ostberg Seed Co. is said to be a Chicago firm recently incorporated with a capital of \$100,000, to deal in plants, bulbs, and seeds, the incorporators being A. Ostberg, C. Swanson and E. F. Bell. Nothing is known of the firm among the trade of that city.

FRENCH BULB prices are firmer according to the latest cable reports. Good authorities predict advance rather than decline in the price of White Roman hyacinths and do not anticipate lower rates than those mentioned in our last week's issue for Narcissus Paper White Grandiflora and other leading varieties, although, as stated previously in these columns, freesia prices will be lower.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale Trade Only.

SAN JOSE, CALIF.

Pieters-Wheeler Seed Company  
HOLLISTER, CAL.

Growers of High Grade Seeds

Onion, Lettuce, Radish, Sweet Peas, Etc.

CORRESPONDENCE SOLICITED.

It is quite certain that the increasing firmness in French bulb prices will interest those jobbers who have booked orders on last year's basis.

HOLLISTER, CALIF.—Seed crops are looking well except onion, which shows considerable mildew, also reported showing in the Santa Clara valley. Earliest of All and Mont Blanc sweet peas are now in bloom.

PROF. BYRON D. HALSTED, of the New Jersey Experiment Station at New Brunswick, is reported to have succeeded in raising a seedless tomato. Some of the fruits contain from 10 to 20 seeds, but a large proportion of them contain none at all.

THE cold weather with frost and snow, which started in last week, has given seedsmen in the middle west a good opportunity to catch up on orders. Counter trade dropped off almost completely and is still fragmentary.

NEW YORK.—The seed stores as a rule, have been very busy, with the help working overtime. This has been particularly noticeable at Thorburn's, Vaughan's Boddington's and the Rickards Bros.' stores.—The new store, with the original name of "Buds," 76 Barclay street, is now a very busy place. For the past week a force of carpenters has been engaged in transforming the interior and it has now all the conveniences of a first-class seed store. Carl R. Gloeckner, president of the company, is well pleased with the volume of business.—Chas. McTaggart's new store, at 123 Warren street, shows evidence of prosperity. He has ample space for the display of plants and seasonable shrubs and catches the commuters, coming and going.

### Seed Corn in Ohio.

Much has been said and written about the low germination of both field and sweet corn in the various corn-growing sections of the country, and the outlook for good seed stock for the coming season is not very good, according to Tom Fagan, of the J. M. McCullough's Sons Co., who says, however, that the section of country within a radius of 80 miles of Cincinnati has plenty of good corn, the weather having been ideal for maturing last fall. The offerings of green corn on the market were so heavy and the price so low that most of the truckers allowed their crop of sweet corn to stand. Of

course it is not to be had in great quantity from any one grower, but collectively there was a large amount of good Zigzag and Stowell's Evergreen produced, and the germination is high.

### Sixty-One Sacks of Free Seed.

Representative Charles A. Korbly of the Seventh Indiana congress district, a candidate for re-election, has contributed sturdily to the post office deficit by sending 61 big mail sacks full of seeds to his constituents in Marion county under his frank. Mr. Korbly's face is new in congress; indeed, he has never been a legislator before or held any office. We do not condemn him for being alert to his prerogative and taking and despatching through the post office all the seeds he is entitled to. In fact, we are glad to note this example of a brand new lawmaker's enterprise and to give it wide publicity.

If Mr. Korbly can send 61 sacks of seeds through the mails at the expense of the government, the other 489 members of congress have a right to do the same thing. If all the representatives and senators exhausted their seed prerogative, and by each of them 61 sacks were deposited in the post office for transportation to constituents who are flattered by receiving packages of seeds from the seat of government at Washington, there would be 29,890 sacks to be carried on fast trains at an expense in the gross which we leave to the expert accountants.

But it is not on this account that we welcome the news of Representative Korbly's dumping his truckloads of seeds into the humble and accommodating post office. Our hope is that all the other members of congress will emulate or excel him, so that the country will have a great object lesson in the operation of the congress frank and there will burst forth a cry of reforming wrath against an abuse which adds yearly an enormous sum to the deficit of the post office department.—New York Sun.

### Imports.

During the week ending April 16, imports were received at New York as follows:

McHutchison & Co., 446 tubs, 1 bundle trees; 12 cases shrubs; 24 cases plants.

Vaughans' Seed Store, 14 tubs bay trees; 1 barrel lily bulbs.

P. Ouwerkerk, 98 cases trees.

H. Frank Darrow, 1 case trees.

To others: 551 cases trees and shrubs; 150 tubs trees; 441 cases plants; 64 cases orchids; 403 bags, 28 cases, 15 packages seeds; 2 cases bulbs.

Imports for the week ending April 23 were received at New York as follows:

H. Nungesser & Co., 100 bbls. grass seed; 50 bags clover seed.

Julius Roehrs Co., 48 tubs laurel trees; 55 cases plants.

P. Ouwerkerk, 81 cases trees.

McHutchison & Co., 51 cases plants; 1 case trees.

Rolker & Sons, 52 tubs laurel trees; 7 cases plants.

Vaughans' Seed Store, 25 cases plants; 6 tubs laurel trees.

Wm. Elliott & Sons, 22 cases trees.

H. Frank Darrow, 12 cases plants; 4 cases trees and shrubs.

To others: 397 tubs laurel trees; 313 cases, 3 boxes, 29 packages plants; 187 cases, 25 packages trees and shrubs; 24 bags, 1 case seed; 6 cases bulbs; 1 case orchids.

### Greenhouse Vegetable Growers and Market Gardeners' Association.

C. W. Waid, New Carlisle, Pa., President;  
Franklin DeKleine, Grand Rapids, Mich.,  
Vice-President; S. W. Severance, 508 Illi-  
nois Life Building, Louisville, Ky., Secre-  
tary; M. L. Ruetenik, Cleveland, O., Treas.

AVOCADOS or alligator pears from South America are on the New York market at \$3 per dozen. South African pears are \$1 per dozen.

COLUMBIA, Mo.—Early April 24 the thermometer registered between 27° and 28°, when tender garden truck like tomatoes, early cucumbers, beans and beets were killed and will need to be replanted. Potatoes were killed back to the ground but will sprout up some below ground. Hardy truck crops like onions, peas, lettuce, spinach, cauliflower and cabbage are not permanently injured.

### Asparagus.

Asparagus is steadily gaining in popularity and the enormous plantings in recent years seem to find a ready market. To hold up these conditions, growers must put up a first-class article. A good many gluts of crops are often caused by products of poor quality or by their being poorly marketed. At this time we will point out some requirements of the cutting season.

Where a market demands white asparagus it is necessary to hill the rows much like celery and even then an addition of a little litter is a benefit. The moment the shoots lift the crust they are cut by using long chisels or knives, and it is of great importance to have careful help do this, so as not to cut so deeply as to injure the crown or sideways and destroy the young shoots. White asparagus is not as popular as the green, and deservedly so, as the green is more tender and more economical for the housekeeper.

Where green asparagus is wanted, we remove as much earth from over the crowns as we can with horse tools, which is done to let the sun warm the crowns earlier thus catching the early market. After the season has reached the heavy cutting, we fill the rows up fairly. This process most effectively destroys any weeds under way. Cut asparagus must never be laid around; it should be washed and bunched at once and stood upright in boxes or baskets. The cut shoots twist very quickly if in a horizontal position, in which condition they bunch poorly and are easily broken.

Our scientific men tell us that a plant without foliage cannot make use of fertilizer elements. However, good growers are satisfied that nitrate of soda does increase the cut; we believe it does, and we use it in connection with potash during the cutting season. Asparagus is not easily hurt by salts, hence we can use cheap forms of potash, such as muriate and kainit.

It is best to cut the beds absolutely clean, and so regular that an even product is assured. And the best way to relieve a young plantation is to reduce the time of cutting. Thus a very young bed, say two or three years old,

should not be cut longer than 30 days. With age and strength this can be gradually extended to 8 or 10 weeks. Ten weeks is about the limit; great harm is done by late cutting, as the summer heat will kill the roots if not supported by proper leaf growth. Generally, after the last cutting, horse tools are used to destroy any weed growth, when the asparagus is given liberty to grow. A vigorous bed should cover the field in several weeks to exclude all weed growth. If not, we must assist by hand hoeing and cultivation.

MARKETMAN.

### Asparagus Beetles.

The two species, the blue (*Crioceris asparagi*) and the 12-spotted (*C. punctata*), have spread over a great part of Ontario during the last few years and in many places are very abundant. Both species are often to be found upon the same plant; the former is shining blue-black in color with creamy-white blotches on the wing covers which vary a good deal in size and shape, and sometimes form a cross of the ground color of the back; the sides and the thorax are dull red and the head black. The other species, says Bulletin 171 of the Ontario Department of Agriculture, is the same length, about a quarter of an inch, but is somewhat stouter; the whole insect is dull red and polished and has 12 round black spots on the wing covers.

Both these beetles pass the winter in the adult stage and are ready to attack the asparagus shoots as soon as they appear above ground in the spring; these they gnaw and spoil for table use, and the blue species deposits upon them its shiny black eggs which are attached by the tip to the plants. Later on the eggs of both species may be found upon the growing plants, and the larvæ soon appear. Those of the blue beetle are dark olive gray grubs, which feed openly upon the foliage; the grubs of the 12-spotted are yellowish or somewhat orange in color, feeding at first upon the tender foliage, but boring into and devouring the pulp of the seed capsules as soon as they are large enough to attack. The life cycle of both kinds requires only six or seven weeks for its completion and we therefore find all through the season till sharp frosts come in the autumn, eggs, larvæ and beetles in great numbers at the same time; the pupal stage is passed beneath the surface of the ground.

The simplest and most efficient remedy is to let poultry have the run of the beds; they will devour both beetles and grubs and will not touch the asparagus. Where this is not practicable, the young shoots should be dusted with fresh air-slaked lime when the morning dew is on the plants; this, of course, should be washed off before cooking. At the same time some of the shoots may be allowed to grow and attract the beetles which may then be killed with paris green or arsenate of lead. If the plants have many eggs upon them, they should be cut off and burnt and others left to grow in their place.

After the cutting season is over the plants should from time to time be sprayed with one of the arsenical poisons, but when the seed capsules are formed this will be of no avail against the grubs of the 12-spotted species.

Substitution of cheaper grades is thus easily exposed. Fresh sample brick, with illustrated book, mailed postpaid by manufacturers upon receipt of 40 cents in postage. Address

Trade Mark. American Spawn Co., St. Paul, Minn

To get rid of it, the seed bearing plants should be cut off and burnt. In early autumn it will be well to cut down and burn the whole of the plants.

### Over-Year Seed.

Last spring I disposed of some runner bean seeds to a seedsman, but on inquiring if he wanted more this year, I found he had much left over. I questioned him as to whether they had not deteriorated, and he replied: "Not a bit." This decided me to try a little experiment right away, says a correspondent in the Journal of Horticulture, and I at once sowed 12 new and old beans in two pots, and have noted their behavior. The whole 24 beans grew, the old, strange to say, appearing slightly in advance of the new; but the difference between the two lots when fully up, and with seed leaves developed, was most decided. The old ran up thin, spindly, and absolutely without stamina, whereas the new, treated exactly similarly as regards heat and moisture, were short and sturdy, while the color of the foliage was many shades deeper than the attenuated old lot. After this, no old seeds for me.

### Prices of Indoor Fruits and Vegetables.

New York, April 23.—Mushrooms, 35 cents to 45 cents per pound; cucumbers, \$1 to \$1.50 per dozen; lettuce 50 cents per dozen heads; mint, 50 cents per dozen bunches; grapes, Gros Colman, \$1 per pound.

Chicago, April 27.—Mushrooms, 40 cents to 50 cents per pound; cucumbers, \$1 to \$1.25 per dozen; leaf lettuce, 22-25 cents per box; head lettuce, Louisiana, \$1-\$1.25 per hamper; \$6½ barrel (sugar barrel size); radishes 25-30 cents per dozen.

**Vaughan's**  
**Lilium Harrisii.**

**1911 Both Plants and Bulbs Carefully Selected.**

While we do not claim that our Harrisii are absolutely free from disease, or that every bulb will produce a perfect plant, we do claim that our growers' efforts in the way of spraying and roguing are producing results, our stock now being freer from disease than ever before and of genuine Harrisii type. In fact, the best general crop grown on the island of Bermuda.

**Vaughan's Seed Store**  
CHICAGO. NEW YORK.

**Cleveland.****STOCK SHORTER.**

It is surprising what a few days can bring in the way of a change in the flower market. The last few days of cold and dark weather have shortend the crop considerably. So far as sweet peas and carnations are concerned there was almost a famine, especially the latter part of the week. Some of the growers are off crop with carnations and sweet peas. The weather we are now having seems to have brought in quite a lot of funeral work. Tulips and daffodils are still plentiful, but the call for this stock is very limited. Callas and Easter lilies are still plentiful with fair demand. Roses have cleaned up better the past week than for some time, owing no doubt to the shortage of carnations and sweet peas. A fine lot of Kaiserin roses are coming in. Adiantum has been a good seller right along, as has Asparagus plumosus. Asparagus Sprengeri drags a little. Boxwood continues to have an exceptionally good run. Lilac in limited quantities arrived this week. So far as could be learned the cold and snow the past week did little damage to the outdoor stock. Several growers, however, report their grapes and cherries will be done for.

**NOTES.**

Mother's day, which comes on Sunday, May 8, will be more fully observed this year than the last or preceding years. Retailers can boom this day for themselves by a little advertising or a card in their window announcing a special sale or dollar box and keep the day fresh in the minds of the public.

### 1,500 NEW NAMES IN ITS 570 PAGES

**Price \$3.00 Postpaid.**

Every name is keyed to show the branches of the business in which each individual or concern is engaged, with greenhouse area and acreage of land.

**AMERICAN FLORIST CO.,**  
324 Dearborn St., Chicago.

H. Piggott, who opened a retail store in the Taylor arcade last fall, has has been laid up with rheumatism for some time and has been unable to attend to the business. He is now offering the fixtures for sale and intends to give up the store, at least for some time to come.

The dedication of the new baseball

grounds at the opening game April 21 was the occasion for quite a floral display. Baskets, bouquets and designs were shown and many florists were present despite the boycott by the labor union.

The city greenhouses in Gordon park will supply the city hospitals with flowers this summer. C. B.

## The Nursery Trade

### American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;  
W. F. Stark, Louisiana, Mo., Vice-President;  
John Hall, Rochester, N. Y., Sec'y.  
Thirty-fifth annual convention to be held  
at Denver, Colo., June 8-10, 1910.

VISITED CHICAGO: W. Taat, representing W. van Waveren & Sons, Hillegom, Holland.

ROSES INJURED.—W. C. Egan, Highland Park, Ill., reports that all climbing roses and Conrad F. Meyer are killed to the ground all along the north shore of Lake Michigan. Protected climbers are uninjured.—Supt. West of Lincoln park, Chicago, says that Dorothy Perkins and other roses have been killed the past winter.

EXCELSIOR, MINN.—S. M. Robinson has just turned over 35 acres of his land at Vine Hill for the growing of nursery stock and perennials. In the past month he has planted several thousand young shade trees, and he now has several large shipments of fruit trees and shrubs. Mr. Robinson is also figuring on several houses to be erected during the summer months.

### Alleged False Consular Invoice.

Jacs. Smits, a florist in Holland, who arrived today from the Netherlands, was arrested by Marshal Henkel on the charge of presenting a false consular invoice for a shipment of blue spruces, Japan maples, rhododendrons and other plants which were shipped here on April 11 on the steamship Rotterdam.

The complaint against Smits, sworn to by Customs Inspector Howard D. Esterbrook, states that the value of the imported plants was stated falsely to be \$163, whereas their true value greatly exceeded that amount.

Smits was arraigned before United States Commissioner Shields and held in \$2,000 bail for examination.—New York Evening Sun, April 20, 1910.

### Rochester, N. Y.

The establishment of Vick & Hill Co., Barnard, Monroe County, is about five miles from the center of the city. The greenhouses aggregate about 25,000 feet of glass and are mostly 20x100 feet and run east and west. They are built low and are well adapted for the growing of small stock, such as the firm handles. About 33 acres are devoted to the growing of aster seed and hardy plants, mostly perennials, and some of the most popular hardy shrubs. It is about 16 years since the business was established in its present quarters. Fred W. Vick is the president of the company, and has the absolute management in his hands. The business of the firm is mainly a wholesale and mail-order trade. A leading specialty is the growing of aster seed. Its reputation for a fine strain of branching asters is well known throughout the country and the present status in the improvement of the branching asters is largely due to Fred Vick.

An immense quantity of the leading bedding plants are grown and, of geraniums particularly, there are never enough to supply the demand. Mr. Vick does not think much of *Salvia Zurich* sent out a few years since, and has practically given up

Wholesale catalog for spring issued Feb. 1st.

its culture. He thinks for an all-around salvia it is hard to beat Bonfire, and grows a large quantity of it. They still grow a considerable quantity of the typical *Salvia splendens*, and grow and handle an immense quantity of *Nephrolepis Piersoni* and *Whitmani*. At the time of the writer's visit, large numbers of them were being packed for shipment. They grow a considerable number of roses, and only the standard varieties are carried; that is, a few of the best teas, hybrid teas, polyanthas, hybrid perpetuals and the leading ramblers, and *Wichuraiana* hybrids. They carry a large quantity of the standard chrysanthemums, and a large number of them are ready for shipment.

They produce a considerable quantity of chrysanthemum flowers in the fall, but that is only done as an incident, Mr. Vick says, to carry the stock plants. Carnations are grown in considerable quantity, and from 15,000 to 20,000 plants presented a good appearance for shipment on the benches. Mr. Vick said that whilst they grow and handle a considerable variety of hardy perennials, that the hardy herbaceous phloxes, peonies, delphiniums, Shasta daisies, *Gaillardia grandiflora* and Japan irises are what they sell most of, and they do propagate and grow them in immense numbers. The soil on the grounds is of a light, loamy nature, well drained naturally, and very responsive to cultivation and fertilization in the growing of plants. As is well known, Mr. Vick

# You Ought to Have More of the Palm Business of Your Town

And Heacock's Palms will help you to get it! There's a lively demand in every locality, as you know, for good Palms—both from persons who purchase outright, and from those who rent for weddings, receptions, social functions, etc. In either case, you can supply the demand with profit to yourself by furnishing Heacock's Palms—Kentias, Cocos, Arecas, etc.

We grow them by the thousands and our men are real Palm experts. Our stock is vastly superior to any imported stuff you could buy—our Plants are clean, healthy, vigorous, acclimated.

The accompanying illustration shows how perfectly they mature under our care. We would like to fill a sample order from you—for a dozen or a carload—each specimen just as perfectly developed as this one.

Following are our current prices for this choice stock of Palms:

## Areca Lutescens.

|                                                |      |        |

## St. Louis.

### PRICES ADVANCING.

The weather the past week has been rainy and Saturday evening and Sunday snow covered the ground. Temperature fell slightly below freezing. Any stock not protected was somewhat damaged. Peonies probably were frozen but no reports have as yet been received. The trees on the streets were seen dropping many of their leaves. Prices have stiffened somewhat. American Beauty roses have also shortened up. The baseball opening at the Browns' park caused quite a demand for green carnations, the Daily Star boosting the "wearin' o' the green" in honor of Jack O'Connor, the manager. Shipments of roses show signs of mildew. The ban of Grand Army on the use of cut flowers and plants on Memorial day, owing to the exorbitant prices, would not ordinarily have much effect here, as cheap plants and outdoor flowers rule at that time. This year, however, the cold spell probably will cause indoor stock to be scarce and high.

### NOTES.

W. A. Rowe, of the Woodbine Floral Co., Kirkwood, was married on April 20 to Miss Minnie Geringer, of Rhineland. The happy couple will spend part of their honeymoon at the home of the bride and two weeks at the home of the bridegroom, Menomonee, Wis.

Ostertag Bros. made a green harp 18 feet high and six feet across, cost \$300, presented by the business men to Baseball Manager O'Connor. This firm disposed of 11,000 green carnations at 10 cents each.

Gus Eggeling, of the Eggeling Floral Co., has been confined to his room the past 10 days with rheumatism.

J. L. DILLON,

Bloomsburg, Pa.

The Bentzen Floral Co. had a splendid horseshoe at the ball park opening last Thursday, which they presented to Manager O'Connor.

W. F.

## Indianapolis.

### GRAPES SEVERELY INJURED.

Four degrees below freezing April 23 broke all records in this vicinity for the past 39 years. A snowfall was general over the state on Saturday and it was a common spectacle to see the gardeners covering their young tomato plants and other outdoor stock with soil to prevent them from freezing. It is believed that the fruit crop is irreparably damaged; grapes will certainly be short this year, as nearly all the grape vines in this locality seem to have been frozen beyond recovery. But as to the florist stock, there does not seem to have been much damage done. Carnations in the field, together with peonies, escaped according to most of the re-

ports. There were very few, if any bedding plants, that suffered for the simple reason that the bedding season has not as yet opened with us. The bedding plants are still very comfortable under glass.

### NOTES.

Speaking of bedding plants puts us in mind of the fine large stock of John Heidenreich's. All of his greenhouses have been given over to that line this season. John's new Sears automobile is kicking up once in a while, but he attributes the fault to his inexperience with gasoline engines rather than to any imperfections of the machine.

John Bertermann celebrated his sixtieth birthday anniversary during the past week, having all of his children and their children out at his home on East Washington street.

Alfred Warner is talking somewhat of starting another down-town store.

Henry Rieman has supplied his drivers with uniforms.

A. W. B.

DELPHINIUM BELLADONNA.

# Dreer's Hardy Delphiniums

**Belladonna.** The freest flowering of all the Delphiniums and the most valuable for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one year old plants, \$2.00 per dozen; \$15.00 per 100; \$125.00 per 1000.

**Dreer's Gold Medal Hybrids.** Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one year old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

**Formosum.** A splendid strain of this popular favorite dark blue variety, 85 cents per dozen; \$6.00 per 100; \$50.00 per 1000.

**Chinese Blue and White.** 75 cents per dozen; \$5.00 per 100.

## CHOICE NAMED HYBRID VARIETIES.

**Alfred Henderson.** Bold, massive spikes of semi-double rosy-lavender flowers, 2 inches across, white eye. 20 cents each; \$2.00 per dozen; \$15.00 per 1000.

**Cerberus.** Sapphire with black brown centre, a handsome spike. 35 cents each; \$3.50 per dozen.

**Duke of Connaught.** Rich, Oxford blue with distinct bold white eye; fine large flowers. 25 cents each; \$2.50 per dozen; \$20.00 per 1000.

**J. C. Jenkins.** Very large, semi-double bright mauve edged with royal blue and white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 1000.

**King of Delphiniums.** Most vigorous growing, immense size semi double rich deep blue with large white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 1000.

**Lemartin.** Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white center. 25 cents each; \$2.50 per dozen; \$20.00 per 1000.

**Persimmon.** Comparatively new; beautiful delicate turquoise-blue. 50 cents each; \$5.00 per dozen.

## VINCA MINOR.

### Periwinkle or Trailing Myrtle.

This common but very useful plant for carpeting the ground is always difficult to procure in quantity in really first class stock. We have therefore, prepared, during the past season a large stock of plants which we offer in strong undivided field-grown clumps, at \$6.00 per 100 or \$50.00 per 1000.

## HARDY PHLOX.

All the standard varieties in strong one year old field-grown plants now in 3-inch pots, in prime condition to make a good display this summer, \$5.00 per 100, \$40.00 per 1000.

For the most complete list of Hardy Perennial Plants offered in America see our current Wholesale List.

# Henry A. Dreer, Inc.

714 Chestnut St., PHILADELPHIA, PA.

The above prices are intended for the trade only.

## Providence.

### STOCK IN HEAVY SUPPLY.

The market the past week was very unsettled and unsatisfactory, owing to the enormous quantity of all kinds of seasonable cut flowers that are coming in. While a very good retail business is being done, and as there is a good demand for funeral flowers, and quite a number of weddings taking place, also a great many social functions at this time, not nearly all the stock is consumed. Roses of all kinds, carnations and bulbous stock, are very plentiful at fair prices. Pansies, trailing arbutus, mignonette, daisies, candytuft, iris, forget-me-not and heliotrope are seen in the stores in great profusion and are selling for the best price obtainable. Very handsome branches of the various flowering trees, and shrubs are seen in the store windows and make a grand display. Greens are plentiful at their regular market value.

Pansy plants are selling well at 50 cents per dozen. Some bedding plants are being disposed of by street peddlers with wagons, but their sales are limited, as it is a little early yet. The nursery business is booming, all the nurserymen reporting extra good trade, 50 per cent better than last year.

## NOTES.

Olney H. Williams has closed his store on Mathewson street. Mr. Williams maintained this store for the past two years as an outlet for the great amount of cut flowers and bedding plants which he raises for the retail stores here. He finds that he

## One Year Old Grafted Bench Plants

Fine plants for out-door planting or replanting in the benches, cut back to about 18-inches; per 100, \$5.00.

**KAISERIN** 2-inch pots, propagated last fall.

Now ready to plant in the benches, \$4.00 per 100, or \$35.00 per 1000.

**Bassett & Washburn,** Office and Store, 76 Wabash Ave., CHICAGO Greenhouses, Hinsdale, Ill.

can do without the store, as it is impossible for him to look after both store and his large greenhouse plant at Pocasset. Mr. Williams has been appointed custodian of the personal estate of his father, the late Alfred A. Williams, with a bond of \$15,000.

John F. Wood, 178 Westminster street, made an assignment April 7 to Attorney Frank H. McKenna, who says that Mr. Wood's assets are more than \$3,000, and that there are 32 creditors whose claims aggregate about \$1,400. There are also claims for about \$1,600 by former employees. Mr. Wood's intentions are to settle with all satisfactorily, as soon as possible and continue business.

John Harris, an old employe of the trade here, died of pneumonia recently, 60 years of age. He had no relations in this country except a niece.

rates. Orders delivered in rotation as  
received. Now Ready for delivery,

**GEORGE GIATRASH,**  
463 Summit Ave., West Hoboken, N. J.,

Toronto.

TRADE VERY GOOD.

Business continues to be very good;  
the many spring weddings and the  
horse show are all using quantities of  
flowers. Where a week ago there  
was a surplus in roses and carnations  
and the prices lowering, conditions  
are now reversed and there is a short-  
age of carnations, only a fair supply  
of roses and higher prices predomi-  
nate. American Beauties are still  
backward as to quality though they  
are a little more plentiful. In teas  
the quality is excellent and Rich-  
mond still hold first place in demand  
though Killarney is a great favorite.  
The blush on the Brides makes them  
most acceptable, and Canadian Queen,  
owing to the excellent color and stur-  
dy stem, always has its admirers.  
Cattleya Mossiae is in large crop and  
good blooms are selling at \$25 per  
100.

The Canadian Pacific Railway Co.  
sent out 80,000 packages of seeds to  
the various stations and section men  
along its lines. Shrubs and bed-  
ding plants are also being distributed  
and prizes ranging from \$10 to \$50  
are being offered in the different divi-  
sions for the best gardens.

The T. and N. O. railway has built  
greenhouses and are planting nurse-  
ries at Englehart which lies 365 miles  
north of here, and will supply flowers,  
etc., for the adornment of their sta-  
tions.

### Chrysanthemums

The best of the new ones and the best of the standards. Commercial varieties exclusively. We are booking orders for both rooted cuttings and plants from pots for present delivery.

### Our Catalogue

Contains the Carnation and Chrysanthemum lists. It includes our Rose list and the bedding stock. You need our catalogue. If you haven't received one, send for it. We can handle your order, whether it is large or small.

### For Fuller List of Plants

which we have to offer, see our full page advertisement in THE AMERICAN FLORIST of March 26th.

Glen Cove, N. Y.

A lively meeting of the Nassau County Horticultural Society was held April 13, President Duthie in the chair. Mrs. D. G. Geddes was elected an honorary member. The winners of the monthly competition were: V. Cleres, for vase of antirrhinums, and G. Wilson, for cinerarias. Cultural certificates were awarded to E. Fardel, for vase of ranunculus, also for three fine plants of Boddington's Matchless calceolaria hybrids; Paul Reul, for geraniums, also seedling geranium and climbing rose Hiawatha. Honorable mention to I. Barton for spinach, H. Gaut for petunias, stocks and peas, V. Cleres for carnations and F. Petroccia for mushrooms. A very interesting test of alpine was made during the afternoon. O. E. A.

### Snow-White Sport of Helen Frick Chrysanthemum

From 2¼-inch pots \$10.00 per 100.  
Rooted cuttings, \$8.00 per 100.  
Unrooted cuttings, \$5.00 per 100.

HENRY EICHEHOLZ, Waynesboro, Pa.  
Mention the American Florist when writing

### ASTERS and DAHLIAS.

ASTERS, Vick's Early and Late Branching, select colors, strong transplanted plants, 2-in., \$2.00 per 100; \$18.50. per 1000.

Cabbage Plants for field, \$1.25 per 1000.

J. C. SCHMIDT, Bristol, Pa.

### Kansas City.

#### MARKET AND STOCK CONDITIONS.

The cold weather in the Missouri valley has greatly decreased the quantity of stock in the market. Roses, while not of long stem, are of very good quality, especially American Beauties. There is a ready sale for carnations and bulb stock but the prices on this stock is only medium. The bulk of the Easter lily crop of some florists is just now coming in and is being used to good advantage in funeral work. Easter prices are still held on select stock and there is a ready sale for all good stock. The small growers are finding ready sale at present for their 2-year-old rose stock. Select bench bushes are bringing \$8 per 100 and are retailing at \$3 to \$4 a dozen. The outlook for outdoor bulb stock is exceptionally good, notwithstanding the cold weather that has prevailed the last two weeks. Peonies promise a large yield this year if no cold weather comes.

#### NOTES.

The cold wave which swept Kansas and Missouri last week did great damage to fruit and other crops. In many sections the loss of fruit was complete. Grapes are an entire loss. Even the leaves on the trees were killed in many places. Small gardeners and truck raisers are the heaviest losers as all their early vegetables were well advanced. In this vicinity the loss was not so great as the temperature did not go below 32°. There was not much damage to bedding plants as this stock has not yet been planted in any great quantity. Peonies, irises and carnations suffered slightly, but the damage can not yet be accurately ascertained.

Fred Fromhold, manager of the W. L. Rock Flower Co., was married April 17, to Miss Rose of St. Joseph. A reception was held at the house of Mr. Fromhold, which was decorated in Chateaufort roses and bridal wreath.

A great many flowers were used in the inauguration ceremonies at the City hall, April 18, American Beauty

## LOOK BARGAINS IN Bedding Plants

For Immediate Shipment.

NOW READY.

Godfrey Aschmann, the busy bee, is more active than ever. Come and look at what he and his sons and employees have done in four weeks' time. Inspect it yourself, judge it yourself, and you will say "Is it possible?" Ten greenhouses and equally as many frames are filled with choice bedding plants of all descriptions.

## Ferns for Dishes...

Assorted varieties, 2 1/4 in. pots, \$3.50 per 100; \$30.00 per 1000. Cash with order.

### FRANK OECHSLIN

4911 Quincey St. CHICAGO.

and green foliage. In the gardens may be seen the Cherokee rose, wreathing the trees with brightest colors; acres of azaleas and Pyrus Japonica, wild violets and wistaria, rendering a color scheme that makes a second visit almost compulsory. The trip up the river is a fine one, as the boat passes all the great phosphate works, and on the banks may be seen the great pines draped with gray moss. No visitor should come here and not see the Magnolia Gardens.

## TRADE LIST

Ferns, Boston and Scotti. From 3 in pots \$5.00 per 100.

Funkia, variegata, strong plants. 4½-in. pots, \$1.00 per dozen.

Morehead  
Steam Traps

The Morehead Return Steam Trap is specially designed and constructed for greenhouse steam heating plants. It fits the dual capacity of steam trap and feed water pump. It will create conditions enabling the florist to grow better flowers; save on fuel, water and labor bills, and derive general all around satisfaction from the installation.

Send for "Florist Trap Book."

RAT'S NEST OF CARNATIONS.—Luther  
Acheson, Pittsfield, Mass., who missed  
so many flowers at Easter that he  
complained to the police, found 225  
of his carnations April 22 in his cellar  
made into a rat's nest.

# Ammoniated Lawn Lime

Kills Weeds.

Makes Grass Grow.

Applied as a light top dressing to lawns it kills all flat leaved weeds such  
as Dandelion, Daisy, Plantain, Sorrel, Chickweed, Moss, etc., in 48 hours  
and without other fertilizer produces a wonderful, luxuriant, rich, green growth  
of lawn grass—which is distinctly noticeable 50 feet away.

The use of Ammoniated Lawn Lime supersedes hand weeding of lawns,  
putting greens, etc. It saves the grass from being pulled up and in many  
cases ruined. Grasses take a new vigorous growth, avoiding probable  
trouble in the future.

Quantities: If very weedy 1-lb. to 40 square feet, 25-lbs to 1000  
square feet, (20x50). Half to one-quarter amount  
if moderately weedy.

ABSOLUTELY GUARANTEED. Money refunded if not satisfactory.

We want Seedsmen or Florists as agents and distributors in  
every important city and town.

Retail Prices: 2-lb. cans, 25c, 50 cans per case. 5-lb. cans 50c,  
20 cans per case. Bags, 25-lbs. \$2.00; 50-lbs.  
\$3.50; 100-lbs. \$6.00.

Descriptive Circular and Wholesale Prices on Request.

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.  
The pump is of brass throughout, simple and powerful.  
The mixing device keeps the contents of the tank well stirred up from  
start to finish.

When the machine is filled to within six inches of the top, a few strokes  
of the pump will compress enough air in the tank to produce a continuous  
mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,  
and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

**J. G. MASTIN & CO.,** 3124 West Lake St., CHICAGO, ILL.

## Baltimore.

After frosts for several mornings, which were not heavy enough in most localities to do great damage, we have had all through this section another heavy rainstorm which has soaked the earth, filled the streams, and, in many cases, washed out the roads. Fortunately it came down without much wind, and the soil absorbed a large proportion of it. So heavy a precipitation as that of the past 10 days has not been encountered here for several years. Business is very quiet. Just how to account for the dullness no one seems to know. With seasonable weather, a good many social observances always in evidence, some weddings and the inevitable funerals, it would be supposed the demand for flowers would be up to normal proportions, but this does not seem to be true. The plant trade is likewise light, by comparison. The stores and market men alike complain. The weather is credited with some of the default. First it was too warm and dry, later it was too cold and wet. The ground now after the torrential rainfall is as full of water as a submerged sponge, and some days must elapse, in most soils, before planting operations can proceed.

## NOTES.

A regrettable incident last week was the charge made public by Mr. Hoffman, a member of the city council, of mismanagement, negligence and irregularities in the conduct of the work on the parks against the park board, incidentally, and against Wm. S. Manning, its general superintendent, primarily. Called upon to give his authority for the arraignment, Mr. Hoffman named Charles L. Seybold, superintendent of Carroll park and a long-time employe of the department. Mr. Manning, in a public statement, defends himself from the charges, going into them item by item, with apparently convincing frankness. The matter has been adjourned until May 3, when an investigation will be held by the park board.

The building up of suburban sections is almost compelling the florists to add to their business of producing plants and flowers, the growing and selling of trees and shrubbery. James Hamilton, of Mount Washington, who has a large greenhouse plant situated in the very midst of the development of numerous suburban towns has gone quite extensively into the nursery branch. He has made a number of importations of stock from abroad and has lined out for growing on a large quantity of desirable stock such as new places demand and finds already that the demand is heavy. Besides growing cut flowers, which he sells through the Florists' Exchange, Mr. Hamilton does a large business in bedding stock, his chief difficulty this year being, as he says, to prevent people buying it so early. The new comers with the first few days of spring like weather feel the gardening fever in the blood and want forthwith to make beds and fill vases. To fight off this inclination, sure to be followed by losses and disappointment, seems a little hard on the florist anxious to empty his benches, but it is profitable in the end. Mr. Hamilton is a great advocate of the sterilization of soil. He has an arrangement in the way of a sterilizing pit for doing this work expeditiously and economically and is thoroughly elated with its success. Nematodes and stem rot in roses and carnations are things of the past, there is no need for the labor of weeding, all the weed-seeds being destroyed, and the advantages of the operation are seen at every step. DES PLAINES, ILL.

Hamilton is a practical minded man, with a genius for mechanical operations, energetic and interested deeply in floriculture, so that his successes seem to come naturally.

The movement for the improvement of back yards to city homes and the substitution of garden decorations for the neglected areas which so prevail generally on city lots is gaining headway. This and the more liberal use of porch and window boxes to improve the appearance of city house fronts is being urged by our Municipal Art society, which has raised a committee to encourage this work. The newspapers have been sympathizers and are aiding the movement, giving reproductions of photographs of well-kept and ornamented yards, and some practical men write to the press with timely suggestions as to the planting, treatment and care of the boxes and hanging gardens. All of this ought to help business, and almost everyone in the trade can contribute something to promote success and stimulate the taste developing in this direction by suggestions, and often by presenting good examples of what is obtainable, not bringing too much into the foreground the commercial aspects.

John Cook and Mrs. Cook returned from their winter's sojourn in Florida some days ago. Both enjoyed the experience and both profited by the trip in renovated health, improved appearance and increased weight. They found much that was interesting in horticultural and botanical lines and viewed almost with amazement the development of commercial fruit and truck growing in Florida and Cuba. In the latter island they remained about two weeks and enjoyed the climate, the unaccustomed methods of cultivation of the soil, the differences in social observances from home, the sub-tropical flora, and all the rest

Grand Rapids, Mich.

FROST INJURY NOT SERIOUS.

The weather the past two weeks has been cold and wet. Previous to this the weather had been unseasonably warm, which brought out the buds and blossoms. As far as can be ascertained, this section has not suffered to a very great extent from the freeze of the past week. The blossoms of shrubbery, especially *Spirea Van Houttei*, have suffered some, and in low places cherries and strawberries have been frozen a little. It has been raining or snowing for the past three days and of course this was a great benefit to the fruit and flowers. Henry Smith, who has about 200 acres of fruit, says that he has had scarcely any fruit killed. There has been quite a large number of carnations planted out in the fields, and the top leaves have been touched, but so far the damage is light.

L. Bruins Slots, who had been in the hospital for four months, and had his foot taken off at one time and his ankle at another, for blood poisoning, was taken home recently, but last week his condition became serious and he was taken to the hospital again, when his leg was amputated at the thigh. At the present time he is resting very easy.

### BUSINESS CONTINUES FAIR.

All busy but nothing exciting, will about describe the situation for this vicinity since Easter. Weather conditions for April have not been altogether satisfactory. The unusually warm March advanced outdoor stocks very much and it has been followed by April weather that kept us all guessing. Several sharp frosts have considerably damaged the fruit prospects. High winds have been frequent, 54 miles per hour being the worst, but this was sufficient to take a number of lights out of the greenhouse roofs. Such conditions in a country noted for much nice weather have a rather bad effect on trade, particularly transient trade in the greenhouse lines. Store trade suffered less, as the call for cut flowers for funerals is not so dependent upon weather conditions. This and a fair degree of social activity, have softened the situation's blue setting.

The carnation crops that were producing heavily at Easter and immediately following have fallen back to low water mark, leaving no surplus to worry over at present. A special sale at 40 cents per dozen for Saturday only, disposed of a threatened surplus with W. H. Culp & Co., and, as it found the other growers also with plenty of stock, they met the advertised quotations and all gained in the increased buying for that day.

The establishment of C. L. Shanks, Newton, which was closed by bankruptcy proceedings last fall, has been taken over by Miss C. A. Hurst and Mae R. Jones, under the name of the Rosebud Greenhouses, C. A. Hurst manager. These ladies are fully familiar with the conditions at Newton and have good prospects for a successful business.

G. M. Reyburn, representing Vaughan's Seed Store, Chicago, visited the trade here last week. He is

RANDOLPH & McCLEMENTS, Successors to  
Chas. T. Siebert, Baum & Beatty Sts., Pittsburg.

Albany, N. Y.

The second annual flower show of the Florists' Club is a possibility. At a special meeting of the club, held at the establishment of W. C. King on the evening of April 21, Fred A. Danker, chairman of the flower show committee last year, made a report showing that the committee had on hand \$140.53 in cash and that \$198 was due from advertisements in the programme and for tickets not yet returned. All bills have been paid with the exception of a few premiums. The members decided to go ahead with the preparations for the second show to be held this fall. John Sambrook, Watervliet, was named chairman of a committee of five to visit local florist and others interested in the trade and have them contribute exhibits. The subject will be more fully discussed at the May meeting. In connection with the meeting the members held a small floral display, mostly of carnations. Fred A. Danker had on exhibition a new seedling raised in his establishment. It is a pink of good size, firm texture, and long stem. Mr. Danker said it is a cross between Victory and Lawson. President Frederick Goldring showed some red seedlings that attracted favorable comment. Henkes Bros., Newtonville, had on exhibition two deeply colored maroon seedlings. One was larger than the other but of about the same texture. The color is not a favorite one here but in the vicinity of Boston is popular on account of its being the tint displayed by Harvard students. W. W. Hannell had a good display of a large white carnation, already on the market, and vases of Bride and Bridesmaid roses. A vase of pink lupin, shown by Mr. Danker, attracted some attention. In the discussion on seedlings that followed the examina-

tion of the different specimens President Goldring said that seedlings of carnations are often capricious; a variety may do well with the originator and when sent away to a different section of the country with different soil conditions may not be at all good. The meeting came to a close with a luncheon provided by the social committee and some clever parodies on modern songs by J. J. McCarthy, a local artist, who has a wide circle of acquaintances among the members.

R. D.

## HALF HOUR CHAPTERS FOR FLOWER GROWERS

### Lilium Lancifolium.

The practice of growing Easter lilies throughout the whole year has to some extent put the beautiful forms of *Lilium lancifolium* or *speciosum* in the background, but there is always a demand during summer for such fine forms as *Rubrum*, *Melpomene*, *Album* and others in good funeral work. The plants should now be a foot or more high and the foliage almost fully developed. These lilies do not relish forcing and cannot be pushed along like the *longiflorum* forms. That is, the flowers will not be as good, either in substance, size or color if heat is used as they will be if the plants are allowed to come along slowly in a cool house slightly shaded to prevent the foliage burning. The leaves are subject to attack by green fly and gentle fumigations on several successive evenings should be allowed. The roots are not particularly gross feeders, but a little manure water given from now on will assist the growth and flowers. When the bulbs are grown on benches a top-dressing of rich soil answers the same purpose.

### Lily of the Valley.

Although we do not advise the clearing out of the sand in lily of the valley frames frequently, the present is as good a time as any to renew it should it be necessary. Sometimes there are low forms of fungus growth in the cases and wherever these appear the sand should be either cleared out or thoroughly sterilized by saturating the whole thing with boiling water. If the sand is taken out entirely the sides and bottom of the frames should have a thin coat of hot lime wash. The shutters should be thoroughly cleaned, but not limed, as the dry lime shales off and falls onto the flowers when they are covered or uncovered. The best sand for the purpose is a very fine grained one, the sharp sands that are so suitable for propagating not laying so close together and consequently not being so suitable. We are not saying the pips will not thrive in such sands, but the

closer it lays the better. There is no need of washing the sand but a close lookout should be kept while handling it not to allow anything of a woody nature to go in. Sticks, leaves or anything of this class is apt to lead to fungus, and the same thing is true of soap, so if this is used when washing the frames see that plenty of water is used to swill off all traces of it. These small matters attended to may prevent a lot of trouble later. When it is necessary to keep up a succession of flowers the cases cannot all be attended to at once, but they may be taken one at a time after the flowers are past and before replanting.

### Crotons for Leaves.

Where there is a demand for good funeral designs the foliage of the better varieties of crotons comes in very useful. There are probably a number of old plants around that are not in good enough order for sale in pots. If these are turned out of the pots and planted up now on a bench in a hot, sunny house they will grow rapidly and produce large, showy leaves, just the kind that are needed for the purpose indicated. Plants that have been used as stock plants during the winter and have consequently been cut back more or less severely should be allowed to break into growth again before being planted out, and this can be hastened by placing them in a hot, moist house, keeping the roots a little on the dry side and syringing the heads regularly two or three times daily. When the young shoots are getting well away and before the roots make much progress they can be planted out, first loosening up the old ball a little should it be very hard or tight. Crotons are apt to be attacked by scale, but if they can be induced to make a free vigorous growth it is surprising how little insects of any kind bother them. When growing for leaves the shape of the plants has not to be considered, so there is no need of pinching, pruning or anything else—just let them grow. Should insects prove troublesome there is nothing to beat a kerosene emulsion for destroy-

**Turn Your Surplus  
Stocks Into Cash  
By Advertising in the  
Ready Reference  
Department.  
See Page 745.**

ing them. The kerosene should be added to a hot solution of soap and water and kept constantly agitated while in use, and this not only kills the insects but puts a gloss on the foliage that is very pleasing. Soot water used a stimulant is also a great aid to coloring the foliage, especially that of the deeper colored varieties. Nitrate of soda, judiciously used, also has a good effect upon the foliage and hastens the growth. Should any flower buds appear nip them out at once, as they are useless and only hinder the free growth that is so desirable for this kind of cultivation. A pretty plant often used in conjunction with croton leaves is the old *Cissus discolor*. It will do well in baskets suspended in the croton house, making a free, well-colored growth.

#### Gladioli.

There is not much money in growing gladioli on a small scale for market, but a retailer who has a demand for the flowers can make them pay well. The flowers are not like roses or carnations that have to be cut the day they are ready, for they may be left several days after the first flowers open and cut as needed for funeral or other work. The bulbs may still be planted with perfect safety, but the sooner they are in and rooting now the better. Bulbs in store after this time begin to root and grow, and every bit of growth made before they are planted tends to weaken them. The gladiolus likes a fairly rich, light soil, moderately moist, but well drained. In small plantations they can go one foot apart between the rows and nine to ten inches in the rows. Some support will be necessary as the plants develop, a wire running the entire length of the rows, to which the plants may be loosely tied, being as good as anything.

#### Dahlias.

The pot and dry roots of dahlias started some time ago will now have good shoots for propagating from, and any plants that are to be ready for putting out in June must be rooted at once. The earlier rooted stock will probably be ready to pot on and should go to a cool house or frame with a south aspect, in which a little heat can be turned on if frost occurs at night. With all its ease of culture the dahlia is an extremely tender plant and the least frost checks the growth, even if it does not kill the plant back entirely. The pots should be plunged into fiber or some such material to conserve the moisture about the roots and prevent too frequent watering being necessary. They will probably root through a little, but this will not matter for home planting, and it may be prevented to a great extent by placing boards or bricks underneath them before placing the plunging material. It is still a little too early to plant even the old dry clumps outdoors. During a warm spell in May the shoots spring up very rapidly and frosts are very liable to occur around the end of the month, so the plants are safer under cover. They may be taken out of store and placed in a frame, where they can be moistened over several times daily and will plump up and start into growth. In the meantime the quar-

ters should be prepared with especial care and plenty of good, well decayed manure thoroughly incorporated with the lower layers.

## THE RETAIL TRADE

### Mother's Day.

The movement to make the observance of Mother's day national and even worldwide, has grown beyond the wildest expectations of the founder, Miss Anna Jarvis of Philadelphia. Individuals of note, Sunday schools, churches, organized bodies of all kinds, mayors of cities and governors of many states have gladly

Miss Anna Jarvis.

Founder of Mother's Day.

(Photo Copyrighted by Anna Jarvis.)

taken hold of the idea and helped the observance of the day, with example, with good words and, in the case of men holding official positions, with proclamations calling the attention of the people to the beautiful custom of wearing a flower in honor of and setting aside the day to the adoration and remembrance of "the best mother who ever lived—your own."

The accompanying photograph is of Miss Jarvis, the originator of Mother's day. The first anniversary of her mother's death was observed by Miss Jarvis in wearing white carnations, her mother's favorite flower. The happy thought then occurred to her that all mothers, whether living or dead, should be so honored each year, that the second Sunday in May, the date of the first observance, should be set apart or so recognized as the time for this tribute to the living or in memory of the departed mother. In furtherance of this plan she began writing letters to churches, societies, people in official positions, and all whom she thought would interest themselves in the movement. It was no light work; it took time and considerable money, but

Miss Jarvis is a worker and it was her great love for her mother that prompted her to go ahead and work to found this Mother's day federation, which is the organization name of Mother's day, in her honor.

This is the fourth celebration of the day, which has now grown to such an extent that its observance will be almost universal throughout the United States and Canada. Flowers will be worn by so many that everyone will want a flower of some kind with which to honor the best mother or her memory.

The success of this movement has encouraged a following that is trying to direct the beautiful custom into other channels, such as collecting money for poor mothers or for endowing beds in hospitals, selling badges to be worn on Mother's day and in other ways obtaining money, bringing in a commercial feature that Miss Jarvis greatly deplores and with which she is not at all in sympathy.

K.

### No Flowers by Request.

"Is it any wonder that people don't want flowers at funerals?" said a prominent retailer. "Who wants to pay \$25 extra for carriage hire for a lot of inartistic, ugly gates ajar, broken wheels, urns and other 'designs' that do not show good taste either in the donors or the florist who made them up? Few people object to flowers arranged in an artistic manner, pretty sprays, wreaths or loose bunches. But why should an ugly bag of immortelles or asters be sent to the funeral of a man who in life has been a 'knight of the road' or a steam engine, equally ugly, to an engineer's funeral?" We must say we are quite in accord with this, but then a retailer is in the business for the money that is in it and if these freaks are ordered by patrons there is a great and good reason why they should be supplied. All the same, we believe that the ultimate good of the craft will be served by keeping this kind of thing in the background as much as possible and educating the public to higher ideas as to the beauty and significance of flowers.

### Decorating Automobiles.

The growing popularity of automobile parades looks like opening up another good outlet for stock and, incidentally, a chance for the retailer to make money. There are many ways of decorating them but, as a rule, it is best to use one flower entirely with suitable foliage. For instance, peonies will shortly be in evidence and fine effects can be got by their use with their own foliage entirely. Later in summer, *Hydrangea paniculata grandiflora* is an elegant species for the purpose, the big billowy spikes of pure white flowers showing up remarkably well if suitable greens are used. Asters again work in well for the purpose and, in short, any flower that happens to be plentiful at the time. Chrysanthemums and autumn foliage make an elegant decoration in fall and, where money is not

DECORATED ELECTRIC AUTOMOBILE.

a consideration, American Beauty roses are splendid decorative flowers for the purpose.

As to the manner of decorating there is little to be said. The style of car, the amount of money to be spent upon it and the season of the year have all to be taken into consideration. Unfortunately for the retailer's profits, it takes a lot of flowers and a good deal of time to decorate a large car successfully, and a customer is apt to look at a \$100 bill twice when asked that much to decorate his car. But with stock selling at anything like present prices and practically no outdoor flowers to draw upon this is the lowest price at which a retailer can hope for a fair profit and carry out the work creditably. It may be done a little cheaper when there is a large amount of outdoor stock, but from \$100 up is a fair price to ask for work of this description. Florists are not in the business for their health, and there is far too much price cutting going on all around for the ultimate good of the business.

## THE CARNATION.

### Planting in the Field.

Planting the young stock in the field should receive attention now as quickly as the land can be got into condition. It is a poor policy to work the land while it is in a very wet state, but as soon as it is dry enough to work without leaving it rough the work of preparing it for the young carnation plants should be attended to. After May 1 the sooner the young plants are in the field the better, in most soils, but the nature of the ground should be the guide to a certain extent. If the ground lays high and dry and the soil is of a medium light texture which dries out quickly during hot weather the plants should be planted out right away to enable them to make good growth and get thoroughly well established before drought has to be contended with. But if the land is heavy and naturally remains wet and cold it should be allowed to get warmed up a little before planting. When the plants are hastened out on such lands they are very apt to turn yellow in the foliage and suffer a considerable check. After the ground is ploughed it should be well harrowed and dragged to thoroughly pulverize the lumps and make it as level as possible. No holes or low places should be left for the water to settle and cause stem rot. Any spots that are low enough to allow any chance of the plants being flooded at any time should be avoided.

The question of the distance to set the plants apart must be governed to a great extent by the amount of planting space at command, also by how early the plants are going to be housed. Where early planting is practiced and the plants are brought in again in July, or the first week of August, they do not require to be set as far apart as those that are to be left out in the field until September. However, ample allowance should be made for properly working the land and to guard against any crowding of the plants. We prefer to set the plants 15 inches each way, which gives a chance to cultivate both ways with

a hand cultivator without damaging the branches of the plants. The best method of our experience in marking out the land is to make a marker with six short pieces of 1x4 placed endways at the required distance apart on a plank of 2x6, with two handles sticking up from the center for a man to drag it with. This marker is dragged lengthwise of the planting ground and then crosswise, forming squares. The plants are then planted at the corners of each of the squares. By a little care in walking between the rows that are planted instead of those not finished the soil can be kept in an easy planting condition and considerable work finished up in a short time.

The work of planting carnations in the field is one of the particular parts of their culture and ought not to be done in a haphazard way. Care should be taken to see that roots of the young plants are properly covered and the hole is made large enough to take the ball of the plant without any squeezing and flattening of it out, but do not plant deep enough to cause the soil to extend up the stem of the plant more than is necessary. A little extra care should be given plants as regards watering a few days previous to planting. The soil at the roots ought to be in a well moistened condition, but it should not be saturated, or dry. By being a little careful this can be worked right. Plants growing in pots should be knocked out and set in flats in the greenhouse. They can be carried out as needed, but do not knock out more than the planters can properly take care of, so that there is no chance of them drying out. Those that are growing in beds or flats should be cut out, with the roots preserved as much as possible. These should be kept out of the wind until planted. After several of the rows are planted go over the ground with a hand cultivator to loosen up the surface of the soil.

C. W. JOHNSON.

### Climbing Annuals for the Flower Garden.

Among the host of annual plants which are available for growing outdoors there are some which possess a climbing habit, and for this reason may be regarded as of special value. There are few gardens where ugly corners, fences or buildings cannot be found, and which it is desirable to screen, says the Garden, if not permanently, at least during the summer months, and it is for work of this description that the climbing annuals come in exceedingly useful. Generally speaking, they grow rapidly, and need but little attention once the seeds have been sown and the young plants given a good start in life.

Of course, the gem of climbing annuals is the sweet pea; but the culture of this has been so fully dealt with in special articles that it is not necessary to refer to it at length here. For the purpose of forming a screen, however, strong-growing and free-flowering varieties should be chosen, and unless special soil culture is given, the plants should be left rather closer together than is generally recommended for this annual.

Morning glory (*Convolvulus major*) is a climbing annual that finds favor

with many. It should not be sown until the third week in April, as the young plants cannot withstand the slightest frost. Unfortunately, the large, bell-shaped flowers close during sunny days, but in the early morning their exquisite markings and delicate colors are fully revealed. This plant is an inducement to garden owners to rise early, and so enjoy the new-born fragrance of many of the occupants of the garden. It grows very fast, and will quickly reach a height of six feet. It likes deeply cultivated and moderately rich soil.

For forming a dense screen, the climbing nasturtium (*Tropæolum majus*) is a very useful annual. The plant itself likes rich soil, but this must not be given it if a good display of flowers is desired. If planted in well-manured ground this nasturtium will grow away at a great rate and produces an abundance of large, healthy-looking leaves, but the owner will look for flowers in vain. Poor soil is the secret of success with this and also the dwarf nasturtiums, and I know of no better annuals for sandy gardens. Another near relative of the nasturtium is the charming little Canary creeper (*Tropæolum Canariensis*). It is best to sow seeds of this in pots in a greenhouse or frame early in April, two seeds in a 3-inch pot filled with rather sandy soil answering very well. When the seedlings appear give them free ventilation, and plant out one foot apart early in May. The plants do not grow so rapidly as many annual climbers, and it is usually rather late in the season before they produce their golden yellow flowers. I once saw this climber used in the center of a large lawn bed, some neat pea-sticks being used for it to scramble over, and surrounding it was a broad band of lemon yellow African marigolds. The effect in late autumn, when the ordinary bedding plants presented a shabby appearance, was very good indeed.

The variegated Japanese hop (*Humulus Japonicus variegatus*) is a quick-growing annual climber that is valued for its handsome foliage. Seeds ought to be sown in pots in the greenhouse in February or early March, but if sown in April good specimens for planting out early in May can be secured. It likes a moderately rich soil, and prefers poles to climb upon.

A climbing plant which is not an annual, but which is best treated as such, is *Cobæa scandens*. This is an exceedingly useful climber for the greenhouse, but does not do well outdoors except in the very warmest localities. It has large, dull purple, bell-shaped flowers. Plants for outdoors should be raised in pots under glass, and planted out the middle of May. *Eccremocarpus scaber* is another climbing plant that can easily be raised from seeds, and which will produce its pretty orange scarlet flowers freely providing it is given a warm position. Seeds should be sown under glass in March, and the plants put out in their flowering positions about the third week in May. In addition to its handsome flowers, the foliage of this climber is much serrated and of a neat and pleasing character.

## ORCHID NOTES.

DON'T forget the date of the great orchid show at Boston, May 26-30.

THE pretty little *Oncidium concolor* is one of the clearest yellows in this genus, in which good yellows predominate.

*CATTLEYA MENDELII* is showing up in great form now among the commercial orchids. This beautiful species is well worth growing in large quantities.

*DENDROBIUM CAMBRIDGEANUM* requires no distinct resting season in winter, but should be allowed to take its own way. It often starts to grow at the base before the flowers are past.

### Packing and Exhibiting Orchids.

It is one thing to grow a fine specimen orchid and quite another to pack and ship the plant, possibly hundreds of miles, and have it arrive in first class condition at a show. It is considerable trouble to pack orchids properly and the condition of the plants at some of our leading shows, after a long railway journey, points conclusively to the fact that those who have this work in hand thoroughly understand their business. In other instances we have seen plants that have only come a few miles, with the flowers rubbed and bruised showing that insufficient care or forethought had been exercised. The one salient point to keep in mind is to so fix the flowers that they cannot possibly move and rub against other flowers or other parts of the plants. This is imperative no matter what else is done or left undone and we propose mentioning a few of the principal kinds and the methods we have employed in packing and shipping them long distances.

### RARE AND VALUABLE PLANTS.

In the packing of choice varieties and hybrids of great value the use of stakes in the compost must not be allowed. No matter how carefully these are placed it is practically impossible to push stakes down into the compost without disturbing it or the drainage or breaking the roots. We have overcome this difficulty by placing the pots containing the plants in larger pots and filling in the space between them firmly with rough sphagnum moss. Say we have a rare hybrid *cattleya* in a 3-inch pot: This pot is placed in a 6-inch one and the moss rammed firmly between them with a potting stick. Three or four stakes, according to the size of the plant, are then pushed down between the two pots, quite to the bottom of the large pot, left long enough to clear the head of the plant by six or eight inches and tied together at the top. Stout string is then tied over the surface of the compost and down under the bottom of the pot, bringing it back half way up and making a pass around the pot. The plant itself is now so securely fixed that, even if turned upside down, it cannot possibly move. Where the strings cross the surface of the compost we always put a little loose moss to prevent any possible injury to roots that may be on or near the surface. The plant itself has to be considered next. *Cattleyas*, *lælias* or *lælio-cattleyas* being upright growing are the easiest to fix.

Stout strands of raffia, twisted double, are laced between the stakes and at the point where they meet the principal bulb or stem is tied. The flower or flowers are then encased separately in soft oiled paper and loosely tied with raffia, the ends being anchored to the stakes. Thin wrapping paper is then tied around outside the stakes and the plant is ready to go into the case for shipment.

*Phalænopsis*, *cyripediums* and other plants that have foliage hanging over the sides of the pots are a little more difficult to handle as this foliage is often very brittle and easily damaged. The utmost care is necessary when ramming in the moss between the pots, and it is a good plan to have the outer pot sufficiently large so that the foliage can lay on the moss without hanging over the edges. Small individual stakes must be placed to each flower of the *cyripediums* and the stems tied to these. If they stand pretty well apart there will be no need to wrap the flowers in paper, but if they do not, treat them as advised for *cattleyas*. The flowers of *phalænopsis* are very easily damaged. To fix these a light stake should be placed in the center of the plant and tied at the top, where the outer stakes join. It need only be just entered in the compost as, the top being tied, it cannot move. Wrap some oiled or tissue paper around this center stake and tie the spike upright to it at intervals of about a couple of inches between the ties. It will not be necessary to wrap the flowers. In case the leaves are too large to be covered by the outside pot, they must be gently lifted and twined around outside the protecting stakes, raffia being laced around the latter after inclosing the leaves with tissue paper. These, too, must be closely papered up before going into the cases to exclude dust, which is always plentiful where new wood is used.

### DENDROBIUMS.

The evergreen *dendrobiums*, such as *D. thyrsiflorum*, *D. densiflorum*, *D. chrysotoxum* and allied species and varieties are among the finest exhibition plants in the whole orchid family, and when presented in good shape always command admiration. The large, loose racemes of flower are, however, easily damaged by shaking around in the cases and they must be so fixed that they cannot, under any ordinary circumstances, move about. For ordinary sized plants we use one stout stake in the center and loop the flowering stems to this, tying the flowerless bulbs away from them so the flowers cannot rub. A small wad of moss, covered with tissue or wax paper, is placed near each bunch of flowers and the latter tied loosely to it, either upright or drooping naturally, as is most convenient. Another tie is placed at the end of the bunch and secured to the stem that is carrying it. For large plants more stakes are needed, but the process of protecting and tying the flowers is the same. The deciduous *dendrobiums* are more easily managed. Here it is only necessary to place a papered stake to each flowering stem and tie the stem to it at intervals of a couple of inches or so. It will not be advisable or necessary to tie the flowers; just let them take their chances as they are for they are short in the foot stalk, and if the stems are well secured they will take no harm. Those of a pendent habit, like *D. Pierardi*, *D. primulinum* and others, must be brought into an upright position before being tied, to be again released when they arrive at the exhibition hall. These, too, must be well papered up before going into the shipping cases.

Much the same treatment as advised for the deciduous *dendrobes* is necessary for *odontoglossums* of the *crispum*, *Pescatorei* and *luteo-purpu-*

PRIZE WINNING DECORATED AUTO BY GUDE BROS., WASHINGTON, D. C.

Z. D. BLACKSTONE'S DELIVERY AUTO WAGON DECORATED FOR FLORAL PARADE AT WASHINGTON, D. C.

reum section, also for the oncidiums with upright spikes, such as *O. ampliatum*, *O. tigrinum* and others. *Phalænopsis* may also be treated the same way if the foliage is taken care of as advised above when treating of rare varieties. Always see that the stakes used are long enough to clear the tops of the spikes by at least six or eight inches or the latter are likely to be injured in transit. The pendent spikes of *Odontoglossum citrosum* also carry best if drawn up to upright stakes and tied in tightly so they cannot move about, but those of the scandent flowered oncidiums of the *O. macranthum* order should be treated differently. Here we place three or four stakes in the pot and twine the spikes around them, taking care that they are not crippled by being bent too sharply. The small side branchlets of flowers are loosely drawn in to the main stem and an outer row of stakes are placed to hold the paper used for wrapping away from the flowers.

Large heavy plants of vandas, ærides, saccolabiums or angræcums require careful packing as, owing to their size, they are likely to receive rougher handling than smaller plants. In the days when these magnificent orchids were more popular than they are today we had excellent results by making a kind of crate or cage for each one and, after securing it the whole thing was incased with stiff

wrapping paper, mats being also used to protect them in case of severe weather. The packing of the plants themselves is simple. Each principal growth is supported by a stout stake and the flower spikes are tied in to this, using wads of paper covered moss to protect the stems from injury. Those carrying large heavy racemes, like *Aerides Fieldingi* (foxbrush), *A. suavissimum*, *Saccolabium Blumei* and *Vanda Batemani* are the most difficult and the ties should be so arranged that the weight of the spikes is supported along their entire length. This can best be done by tying stout strings from stake to stake and looping the spikes to these, always being careful not to have the ties so tight that they cut the spikes, or so loose that the latter moves about in transit.

#### SHIPPING CASES.

The size and shape of the shipping cases is immaterial as long as they are large enough to clear the tops of the plants well and not so large as to be unduly heavy when filled. Slatted crates are better in mild weather than closely made boxes, but the latter have the advantage in cold weather. As far as possible plants in the same sized pots should be placed in the same case. No litter or straw should be put on the bottom, but as the plants are placed in position hay or some other soft packing should be placed between them. When all are in a stout cord should be laced over the

tops of the pots and through holes bored in the sides of the boxes. This will hold the plants firmly in position no matter how the box is turned about, and even if turned over they could not move. It seems a good deal of trouble but it is far better to take this trouble and be able to put a good collection of plants as fresh and neat looking as when they come out of the green-houses before the judges than to run the risk of having battered and bruised flowers and have a competitor take the coveted award simply because his plants, though possibly inferior, are presented in good condition. The interested exhibitor will travel with his plants when he can and, whenever possible, will see that the baggage smashers use them as gently as it is in their nature to do.

The careful and judicious grouping of orchids has a great deal to do with their success on the exhibition table. The aim of some exhibitors appears to be to crowd just as many plants as possible into the space allowed them. Naturally, when space is limited, a grower wishes to show as many as possible of his favorite plants, but this should not cause him to so crowd them in that their beauty and individuality are lost. Each plant should show and, as far as possible, each flower on that plant. Exhibitors in this country are sadly behind those in European countries in the art of grouping plants ef-

fectively. A round, hard outline, regularly sloping from front to back, with nothing to break up the flatness, seems to be about as far as most of their ideas carry them. There are exceptions, it is true, but it cannot be denied that groups of plants of any kind as seen, even at our best shows, are not by any means as artistic or effective as they could be made.

To show orchids off to the best advantage some other foliage plants are necessary. Orchid foliage, with few exceptions, is not highly ornamental, though there are, among the anæch-tochili, some of the most lovely foliage plants in existence. This being so ferns help to set off the beauty of the flowers and should always be used unless the schedule forbids it. We never recommend the association of other flowering plants with orchids for there is no other class than can vie with them. The bright red spathes of the anthuriums, especially A. Scherzerianum and A. Andreanum, are suitable, as the bright tints act as a foil to the neutral tints of the orchids while a few of the lilies and irises are also fairly satisfactory. But, as a general rule, orchids should be arranged by themselves except, as noted, for the addition of ferns. And a very beautiful group may be put up at this time of year when so many of the choicest kinds are in flower.

In arranging a group for competition there are two salient points to keep in mind. One is to create a good general effect, the other to show prominently any rare varieties that are depended upon to catch the eye of the judges. Cattleyas are beautiful orchids but there are almost always too many of them in a group and they have a most monotonous appearance. A large specimen or a group of small ones in prominent positions in a group is all right, but repeated all over they lose all effect and are quite wrong from an artistic point of view. *Lælia purpurata* is a far better plant for grouping; it is livelier in color than the cattleyas, stands up better and is in every way more satisfactory. In many collections the fine old *Vanda suavis* is flowering now and this, too, makes an elegant plant for prominent positions in a group. To be effective there should be depressions in a group of plants, little bays framed by drawing back from the more prominent specimens. Here can be shown bright little *masdevallias*, such plants as *Lælia Dayana* and choice hybrids while scattered through the group any of the small flowered erect *oncidiums* give a grace and brightness that are inseparable from good work.

Plants of *Phalænopsis amabilis*, *P. Schilleriana* and others of this class should be elevated and the spikes allowed to fall naturally and gracefully from a background of small palms or suitable ferns which may be used to hide the baskets in which the moth orchids are growing. A few specimens of the butterfly orchid, *Oncidium Kramerianum* or *O. Papilio*, may also, be used, not regularly all over the group but in certain positions. They are a sure drawing card with the public and a distinct aid to graceful grouping. The front of the group is where many otherwise good exhibits show a weakness. It is not necessary to finish to a stated line, excepting

where the groups are set on a straight table, and here the exhibitor cannot help himself. *Panicum variegatum* (*Oplismenus Burmannii*) grown in small pots, is one of the best of trailing plants for the front of a group; the little branchlets may be allowed to trail on the floor, over the edge of a table or back between the forward plants, hiding the pots and breaking up the line. Small pieces of *Cyperus alternifolius* and *crotons* are also useful, while the showy little *Caladium argyrites* is one of the brightest and best of plants for the purpose. There is, in short, no lack of material, and it is the grower's own fault if he fails to annex a prize owing to faulty finish in the front.

#### SHOWING LARGE SPECIMENS.

In showing large specimens there is not, of course, the same chance for effective display as with groups of small plants, but a good deal can be done that is often left undone to improve their appearance. Large unsightly stakes should never be used and only as many neat ones as are absolutely necessary to support the plants. Ugly labels should be removed and a neatly written or printed one shown prominently where it can be easily seen. The compost should be neatly surfaced with live sphagnum points dibbled in firmly and any old and worthless pseudobulbs removed. In many cases the pot containing the plant can be slipped inside a new one and the surface neatly rounded up with the sphagnum points. Where three, six or any other number of plants are shown arrange them so that each shows its best points and, as far as possible, avoid clashing in color. It goes without saying that the plants should be clean, every leaf being carefully sprayed and the plants so tied that every flower possible shows to the best advantage.

ORCHIS.

#### Bergamot Dying Out.

ED. AMERICAN FLORIST:—

Can you inform us how we can get a new start with bergamot? Our plants have all died out this winter, though they have stood in the same spot eight years.

Michigan.

THISSELL.

This looks pretty easy. Bergamot is about one of the toughest plants in existence and is plentiful in a wild state along the shores of Lake Michigan. These plants may be dug up and planted in new soil or small plants can be obtained from any dealer in hardy perennials.

G.

#### Crop for Small Greenhouse.

ED. AMERICAN FLORIST:—

Do you know of any crop one could grow for wholesaling in a small way? We have a small cool house and plenty of good rich sandy soil. We are trying mushrooms under the benches.

Michigan.

THISSELL.

There are so many crops "Thissell" could grow that we really hardly know which to advise. Were we in his place we would endeavor to find out what is really in demand in the locality and, as the house is small, plant it to this entirely. We do not consider the space under benches a good place to grow mushrooms, occasional partial successes notwithstanding. Bedding stock is usually a profitable line in small towns and this can be followed by chrysanthemums. Violets in winter and tomatoes in summer also prove satisfactory in some places, while carnations are in demand everywhere. But the best plan to follow is to find out what the local market is short on and grow this.

G.

MONTREAL, CAN.—The Mount Bruno Floral Co., which will do business here, was incorporated recently with a capital of \$50,000.

PRIZE WINNING DECORATED AUTO BY GEO. C. SHAFFER, WASHINGTON, D. C.

## Indoor Grapes.

ED. AMERICAN FLORIST:—

Please give me some directions with regard to the growing of grapes to apply in New York state, best shape and size of house, how it should run (north and south or east and west), heating, dimensions of borders indoors and out, soil for borders, varieties, and

water and keep the border dry and warm. It will thus be seen the surface line of the border having been decided on, that a depth of four feet will be needed to allow for a layer of concrete and 18 inches of broken brick or stone. If the question were asked of successful growers all would admit that good drainage is of the first importance. With regard to the best ma-

PRIZE WINNING DECORATED AUTO BY MARCHE &amp; CO., WASHINGTON, D. C.

any other information likely to help a young gardener.

## BEGINNER.

The house we have found to be the most suitable for growing grapes is an even span, facing east and west—that is to say, one end to stand north and the other due south, an arrangement which exposes the vines on each side to an equal share of sunlight. The whole being glass, an abundance of air and light, so essential to the maturing of the wood and fruit, can at all times be obtained. In regard to the dimensions of the house, much depends on what quantity is required. We recommend houses 22 feet wide with a center walk about three feet with top and bottom ventilation. In the arrangements of hot-water pipes the heating engineer must, of course, be guided by local conditions. As heated air naturally ascends, it is advisable to avoid too close proximity to the stems of the vines, to place the tiers of pipes near the ground line and in the coldest part of the house. For early graperies more piping is required than in late ones, but to insure an abundance of heat in severe weather and to avoid overheating at all times the shrewd man will always furnish the house with ample piping. The trellis on which the vines are to be trained is an important part of the structure. This should not be less than 12 inches away from the glass, the mode of supporting the wires being a matter of detail.

In the formation of the border it is usual to make it the width of the house, but instead of making it all at once it is advisable to make half the border the first year and add each year as the roots may require until completed. It may vary in depth from two feet to 2 feet 6 inches, and there should not be less than from one to two feet of drainage to carry off the

terial for making the border we would recommend fresh virgin loam, which includes any kind of old turf from the side of a road. Chop this into rough squares with a spade, add 10 per cent of coarse bone with a liberal supply of charcoal and a dusting of air slacked lime. If any wire worm is in the soil a dusting of soot would be beneficial. No animal manure need be added, as young vines will grow freely in any fresh, well drained soil, but it may be used as mulching to keep the roots near the surface and prevent them from striking down into the cold drainage. It is better to guard against all hidden dangers at the outset than to have the trouble and expense of doing the work over again. In regard to outside borders we do not consider them practical or necessary in our climate.

Assuming that one-year-old vines are planted at this time there is danger in cutting them back to the fifth or sixth eye, as is generally practiced when planting dormant vines. A better plan would be to rub out each bud to the above distance from the base of the vine, taking the strongest bud for a leader, when the old part can be cut out when they become quite dormant. The latter part of December or early in January is the safest time, as there is no danger then of bleeding. With regard to the distance the canes should be planted, I have found four feet very convenient; some plant wider, using supernumeraries to crop until the permanent vines get established, when they can be cut out. Varieties which will do together in one house are Black Hamburg, Bowood Muscat, Muscat of Alexandria, Madresfield Court, Gros. Maroc and Melton Constable. There are many other varieties which could be grown together, but the above mentioned will make a very choice collection. As to the treatment of vines for the first year they should be started in a temperature of 50° to 55° at night and 10 to 15 degrees higher by day, but no rule can be laid down for forcing. Early growth progress must be made under the influence of sun and light and rest allowed when the days are dark and cold. When a period extending over 10 days has passed, raise the temperature to 60° at night, giving air in the mornings when the mercury reaches 70°, gradually increasing until 80°. Spray every bright morning and keep the floors regularly sprinkled through the day, closing down early in the afternoon until the weather gets too hot. Firing may be discontinued after June 1. Towards the fall, when the vines will have finished their growth, watering must be done carefully and sparingly and all air possible left on to insure the wood ripening. A word regarding the making of borders which we omitted is that they should be made good and firm, and when planting vines out of pots into the border we do not believe in the practice of shaking and spreading out the roots. This we consider a bygone fad. Simply make the hole, put in the

PRIZE WINNING DECORATED AUTO BY GUDE BROS., WASHINGTON, D. C.

plant, using a rammer to firm the soil as firm around as it was in the pot, so that when watering there is no danger of the old ball getting dry at any time. M.

### Trade Mark Protection of Plant Names.

Lowe & Shawyer, Ltd., The Nurseries, Uxbridge, Middlesex, Eng., write as follows in the Horticultural Trade Journal, of that country: "It may interest you to know that we have now been granted a certificate under the trade marks protection act, for the name of our Chrysanthemum White Countess. In our view, the establishment of the principle that plant names can be so registered as trade marks should afford raisers of new varieties a degree of protection which, in all fairness, they are fully entitled to, and of which they will, in many cases, be glad to avail themselves."

In The Gardener of April 16, a correspondent writes as follows: "Walter P. Wright, in his 'Records and Reflections' that the N. S. P. S. intend taking action to check the sale of novelties by firms other than the raisers. This is well, but why have not individual raisers long since taken the obviously simple course of protecting their interests under the trade marks act? I am not a lawyer, but as a large manufacturer I am accustomed to protecting my new introductions by registration, and I am sure that similar methods of protection are available for sweet pea raisers."

"Under the trade marks act of 1905 one may register for one's own use an invented word . . . having no direct reference to the character or quality of the goods, and not being according to its signification a geographical name or surname, ergo an invented appellation may be given to a sweet pea, and no other grower of a similar (or even the same) variety may sell it under that name without the original raiser's (i. e., registrant's) permission, which permission, to prevent accumulation of synonyms, should be generally given after the first year of seed distribution. For example: The sweet pea of 1910 may be named Waltrite, but only the raiser could sell it under that name, until such time as he withdrew his trade mark claims, and possessors of a competing variety trying to secure for themselves the advantages of the N. S. P. society's certification of Waltrite would have to introduce, say, Allwrong, which they might describe as 'identical with Waltrite and quite as good,' and we growers, even amateurs as myself, know the value of the 'quite as good' phrase."

### Rooting Cuttings of Vinca.

ED. AMERICAN FLORIST:

Will Vinca variegata strike if cuttings are inserted now in rose benches in sand, using the soft tops for cuttings? S. S.

Vinca cuttings will root all right if properly looked after, but we do not use the soft tops. We prefer semi-ripened wood and make it into two-eye cuttings in August or September. Still, if kept moist probably some at least of the cuttings will root. G.

MT. STERLING, KY.—John Corbett is about to build two new greenhouses, 30x80 feet.

### To Be Done Now.

#### IN THE GREENHOUSES.

Keep vincas well supplied with water or the foliage will suffer, especially if in small pots.

Harden off bouvardias before planting outdoors, if they are to be grown this way. If they are to be kept inside or in frames keep them very cool and allow plenty of air.

Pinch cucumbers regularly at the second joint beyond the fruit to prevent the growth getting too strong at the expense of fruit.

Nitrate of soda is a fine stimulant for backward lettuce and radishes at this time.

If green fly appears on the antirrhinums fumigate lightly and often with some nicotine preparation.

Repot the early dahlia plants and keep them growing gently in a cool house or frame.

Cut down plants of marguerite, Queen Alexandra and plant them up for early cuttings.

If freesia bulbs are to be grown again place them on a light sunny shelf to get thoroughly ripened after the growth is finished.

Pot off seedling Asparagus plumosus and Sprengerii early before the roots have a chance to get matted closely.

Avoid ventilating too freely in the rose houses when the wind is cold. Draught striking the plants is a frequent cause of mildew.

Look out for red spider in tuberoses. Spray frequently and feed the roots as soon as these have filled the pots.

Cut worms are getting busy in the smilax benches. Look out for them and lay traps of poisoned bran.

#### OUTDOORS.

There is no better time than the present for replanting evergreens, provided the roots are kept moist.

Plant out vincas for propagating purposes in clean, light and well cultivated land.

Crinums and the hardy pancratiums and hymenocallis may be planted out now with perfect safety.

Rake out any old moss from the lawn and give a top dressing of bone meal and nitrate of soda.

Sprinkle soot and lime in mixture around lettuce plants to keep slugs and snails at a distance.

Remove all manetti or other stock shoots from roses as they appear, as they are weakening to the plants, but see that the basal rose shoots are not injured.

Prepare some material for protecting fruit tree stems from sunscald in localities where they suffer from this.

It is far too early to be watering flower borders nightly, as some people do. It brings the roots to the sur-

face where they are later exposed unduly to the influence of the sun.

Sow Shirley poppies on any piece of ground that is not particularly wanted. They are fine for cutting and make a great show in the garden.

Be careful in hoeing or cleaning herbaceous borders not to damage any shoots on late starting bulbous or other plants.

Do not allow any weeds to go to seed in vacant land or headlands. Plow them under where they will benefit the land instead of impoverishing it, or hoe them off.

### Heucheras from Seeds.

Since the introduction of the original Heuchera sanguinea, remembered for the paucity of its flower production, there has been such an extension of color and character among these flowers by the efforts of the hybridist that now it is an easy matter to raise plants from seeds which will give quite an interesting assortment. Two years since I obtained a packet of the variety H. sanguinea splendens, and sowed the seeds during the spring in the ordinary way. When sufficiently advanced they were pricked off into shallow boxes, and finally set out in groups in an open border, where they made very satisfactory headway. Last summer these were a perfect picture in a floral sense, and the amount of flower produced was such that it was scarcely possible to suppress their freedom, a condition opposite to that afforded by the original introduction. Everyone acquainted with their decorative value for small vases will welcome them. For special purposes, of course, named stocks will maintain their place, and of which there is now many that are more or less distinct.

Among our stock of seedling plants were many equal to the best named sorts; indeed, it was an easy matter, when comparisons were made, to find counterparts of those with distinctive names. When required for effective border purposes they should be planted in groups, because as single plants the diminutive stature of the flower renders them inconspicuous. In a group they at once assert a prominence. When required for cutting purposes it will be found advantageous to allot them a small space of border where they may be gathered without discrimination. Perfectly hardy, (they seem unaffected by any extreme of weather) they appear to us to be able to accommodate themselves to any position. What we would emphasize is the importance of procuring seed from a reliable source, and a specially selected stock, then one may reasonably anticipate a resultant issue satisfying in its every aspect.—Journal of Horticulture.

## Greenhouse Culture of Caladiums.\*

## STARTING THE TUBERS.

Being found directly under the equator, caladiums are distinctly tropical, and cannot be treated to too high a temperature. This is particularly true in greenhouse culture, and heat and moisture are the two essentials. The tubers can be started in January, but on an average better results can be obtained by starting them in February or the beginning of March. If they are started early in the season, they will be well grown in the early summer months and the foliage well developed and in a condition to stand exposure at that season. This also makes it possible to store the tubers away under the benches at that time in fall when all plants must be under glass, and the space occupied by caladiums is needed for winter flowering plants. This early start therefore has a twofold advantage. But those who have not a warm house commanding at least a temperature of 65° at night had better wait until later in spring when a good brisk heat is attainable.

At the Missouri Botanical Garden the tubers are started about the second week in March and by the first week in June, the plants are in an excellent condition to transfer into the show house. They will be in fairly good condition by September, which is an advantage, because there is nothing of value which could be used in place of caladiums at this time of the year. This method has been found more satisfactory than the one previously mentioned. The tubers should be planted in various sized pots according to their dimensions and vigor. Some may require a thumb pot while others may require a 4, 6 or even an 8-inch pot. The pots must be well drained, as the plants require a copious supply of water, which, however, must not be allowed to stagnate about the tubers. When the pots have become well filled with roots the plants should be shifted from time to time into pots of larger sizes. Slight bottom heat will be advantageous when the tubers are first started, but when several leaves have been developed this will not be necessary.

A method of growing caladiums was practiced in France in 1884. The object was to have the plants just coming into full beauty when, in a general way, they have died down, and this is accomplished by starting the tubers the first year in May or June, and the second year in August or September, so that in two seasons the growing and resting periods are entirely reversed, and the plants are in full growth during the winter months. This method is followed regularly each year at Schoenbrunn, near Vienna, the gardens of the emperor of Austria. It is, of course, a great advantage to have these fine leaved plants in full vigor in the winter, for caladiums are almost matchless in regard to decorative value and a few well grown plants would render a warm house very attractive during the dull months of the year. One real advantage is gained: The task of preserving the tubers is much facilitated, as it is understood that the requisite preservative conditions can more easily be maintained in summer than during the cold months of the year.

\*Mr. Nehrling's paper commenced in our issue of July 10, 1909, and was continued July 31, October 9, November 27 and January 8, February 19, and April 9, 1910.

## OBITUARY.

## Ludwig Möller.

Ludwig Möller, editor and proprietor of Möller's Deutsche Gärtner-Zeitung, and the most forceful figure in the horticultural journalism of Germany, died at Erfurt April 12, 1910, after a protracted illness.

Herr Möller was born December 4, 1847, at a small settlement of only two houses near Charlottenthal, Mecklenburg. He attended first a rather primitive country school, where a single teacher had to teach children from the age of 7 to 14 years in one class and afterward a public school in a small town nearby, which he left at the age of about 14 to become a gardener. He served his apprenticeship in the extensive private gardens at Diestelow, Mecklenburg, where he found ample opportunity to become acquainted with almost every branch

The Late Ludwig Möller.

of horticulture, the gardens including large collections of plants, parks, orchards, forcing houses for vegetables and fruits, vegetable gardens, etc. Having finished his apprenticeship he went to Hamburg and worked in different horticultural establishments, both commercial and private. From here he wandered mostly on foot, through a large part of Germany, Austria and Switzerland, working here and there and availing himself of every opportunity to enlarge his experience in all branches of horticulture under different conditions.

The international horticultural exposition at Hamburg in 1869 attracted him again to this city, but soon afterwards he went to Erfurt, where he worked in the nursery of Haage & Schmidt some time. From here he made his way, on foot as usual, to Frankfurt-on-Main, and then along the Rhine to Barmen, where he found employment, first with a florist, but soon after became head gardener of an extensive private garden, a position which he held about 10 years. There he became an active member of the young association of German gardeners (Deutscher Gärtner-Verband) and was soon elected president. He founded then, for the association, the

Deutsche Gärtner-Zeitung, of which the first number appeared July 1, 1877. Under his able direction the association began to grow and to extend in a way that he found it necessary to resign his position as gardener to devote his entire time to the association and the conducting of the paper. He transferred the office of the association to Erfurt, the horticultural center of Germany.

In 1886 he separated from the association and changing the title of the paper to Möller's Deutsche Gärtner-Zeitung, he published it on his own account and founded at the same time a business in horticultural supplies, including the publication and sale of horticultural books. The paper in its changed form met with great success, the number of subscribers increased from year to year and the paper itself grew from a modest bi-monthly to a weekly richly illustrated journal with a staff of contributors consisting of the leading men in their respective branches of horticulture. The paper has done much in making known improved and profitable methods of cultivation and in drawing attention to new and valuable plants. It is now easily the leading horticultural publication in Germany and has extended its circulation throughout the world, wherever gardeners of German origin are living, and among others who find it necessary to keep abreast of horticultural progress everywhere.

## Charles M. Treanor.

Charles M. Treanor, late of South Bend, Ind., died May 1, at Miami, Fla., from the effects of a paralytic stroke. Mr. Treanor had gone to Florida for his health, which had not been good of late, and although he was known to have been sick his death came as a shock to his friends as it was very sudden. Only a few days before he had written to friends on the Chicago market saying he was feeling much better. Mr. Treanor was formerly in business as a grower in South Bend. He was afterwards in partnership with Wm. Reddick under the firm name of Treanor & Reddick. They sold out to Wm. Gingrich, who failed, and the South Bend Floral Co. was formed. Mr. Treanor was for some time manager of this concern. He married a Miss Wood, by whom he had two children who, with his widow, survive him.

## San Francisco.

## TRADE FALLING OFF.

The condition of the cut flower business for the last week shows a considerable falling off, although most of the firms report that their returns from funeral work was fairly good, which helped to offset the otherwise dull business. There is an abundant supply of stock in the market at the present time, especially of carnations and roses, which can be obtained from the growers at the retailers' own prices.

## NOTES.

Chas. Leopold, formerly connected with the firm of Pelicano, Rossi & Co., recently severed his relations with that firm and has taken a responsible position with H. Sanborn Co., of Oakland.

S. R. Lundy, Pacific coast representative of W. A. Manda, left for an extended business trip through the east.

Dr. J. P. Parker, a well known orchid grower of Santa Cruz, was in the city for a few days this week.

THE Philadelphia and Reading Railroad has distributed 200,000 plants from its greenhouses at Wayne Junction, near Philadelphia, for the adornment of the grounds around the stations along the road.

## National Council of Horticulture.

The sixth installment of the press service of the National Council of Horticulture contains articles on "How to Prune Roses," "Four O'Clock," "How to Have Good Geraniums (continued)," and "Trees in Place and Out of Place." The articles are timely and practical and are entirely free to nurserymen, seedsmen, florists and local editors applying for them to James H. Burdett, 1620 West 104th place, Chicago.

THE cost of producing geraniums is still an unsolved problem.

"WARM dry rains" are the latest panacea for crop troubles, according to the Chicago Examiner.

THE ORCHID SHOW of the Massachusetts Horticultural Society will be held in Horticultural Hall, Boston, May 26-30 inclusive.

AMERICAN ROSES IN AUSTRALIA.—Andrew Kingsmill writing from the vicinity of Melbourne, Australia, to the Gardeners' Chronicle (London) says that General McArthur, Richmond and Rhea Reid are his best red roses. E. G. Hill will perhaps find new Eldorados in Australia and South Africa for the many good things in rose novelties which he has coming along now.

## Society of American Florists.

### REGISTRATION OF VIOLET.

Public notice is hereby given that Thomas DeVoy's Son, of Poughkeepsie, N. Y., offers for registration the violet described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

### RAISER'S DESCRIPTION.

Violet Marie Elise.—Sport of Marie Louise, 1907. Identical with parent plant in foliage and habit of growth; flowers double and of a dainty light wistaria shade.

H. B. DORNER, Sec'y.

April 28, 1910.

## Corrupt Practices in England.

### WHISKEY OR INSECTICIDE.

A case that has aroused unusual interest in gardening and trade circles generally in England has just ended in the complete exoneration of the parties implicated. The case was brought under the "prevention of corruption" act of 1906 against a member of the old and well known firm of Cutbush, of Highgate and Barnet, and a traveler in their employ. The charge was that, in December, 1908, they gave or agreed to give one gallon of whisky to Chas. Kidd, gardener to Captain Starkie and also of giving whisky as an inducement to the latter to vouch for the receipt of 300 tulips, said to have been delivered but which, in fact, were not. The principal evidence relied upon by the prosecution appeared to be that of a discharged employe of the defendant firm and was in part to the effect that "Cutbush's insecticide" was billed to customers and whisky instead was sent to the gardeners. That when a gardener needed whisky all he had to do was to send an order for "Cutbush's insecticide" and everybody connected with that firm would know that whisky had to be sent.

Various documents were put in as evidence to prove that these charges were true and a whole mass of evidence was gone through but by Messrs. Cutbush's records it was amply proved that the transactions were absolutely genuine and the judge in his summing up said that there was not a tittle of evidence to prove the charges. As to the present of whisky, which was not

denied, he said that there was a suspicion as to the motive and he said that the practice ought to be stopped. However, the jury was only absent five minutes and on its return intimated a verdict of not guilty in the case of both defendants and on both counts. The case was heard at the Manchester assizes, April 16.

## Unlimited Control of Seed and Plant Trade

### PROPOSED BY SIMMONS BILL.

No more high handed piece of federal control legislation has yet been proposed to our knowledge than the Simmons Bill, H. R. 15656, Section 3 of which puts the secretary of agriculture in entire and unrestricted control of all seed importations. Further we learn the following from a gentleman who was present at the nurserymen's hearing in Washington April 26 and 27:

"One of the witnesses at the hearing was an official of the Department of Agriculture, who we had understood was slated for the management of this matter if the bill goes through, and he stated frankly and emphatically that in his personal opinion all foreign nursery stock should be absolutely shut out. It is not difficult to guess what sort of trouble we should be up against if a man of that sort was intrusted with the administration of the law."

Seedsmen will please take notice of the following part of Section 3 of this proposed law:

"The secretary of agriculture may at any time extend the provisions of this act to fruits and vegetables or bulbs or to other plants or seeds not specified in this act," so that it would seem to us that the florists and seedsmen are likely in the future to be bothered as well as the nurserymen.

Seedsmen and florists should write their congressmen and senators at once protesting against the passage of the bill and insisting that these trades be given a hearing.

## Meetings Next Week.

Baltimore, Md., May 9, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

## They Are Still Talking

About those elegant **Brides** and **Maids** of ours. And they are worth talking about. Such stock as this is very seldom seen on this or any other market in May. Then don't forget that **Mother's Day**, May 8, will be the occasion of a great many white carnations being sold. We shall be in good shape to take care of all your orders, large or small. Don't be left, write or wire us now what you want and you will get them.

Besides the above we are long on good roses of all kinds. **Gladioli**, fine red, will be coming in about ten days, and **Peonies** were not damaged as much by frost as was thought. We shall have plenty in all the best varieties. **Sweet Peas**, **Valley** and all other flowers in season may be had in quantity and of the best quality. Let us hear from you and we will let you know just how the market is on anything you may need.

**We Give Personal Attention to All Orders.**

Telephone Central 3284**

### Chicago.

#### BUSINESS BETTER.

There is a better tone to the market this week and stock is good. There is no shortage in any lines, though the best carnations and roses are none too plentiful and move out briskly. American Beauty is plentiful, several of the most prominent growers around the city being in good crop with fine long stemmed flowers, while from other points south large consignments are received daily. Funeral work has been plentiful and this has caused a fair demand for the shorter grades. The summer roses are becoming quite plentiful, fine Kaiserin, Field and Carnot being seen at the principal growers' stands. Carnations are cleaning up fairly well, and there is something of a scarcity in good whites. Pinks, such as Winsor, are keeping their color well, and the flowers now coming in would be a credit to any grower in February or March. The frost did not cause as much damage to the peonies in the southern parts of the state and at the Missouri line as was anticipated, and

there are elegant flowers appearing of the old red, Early Rose and other early sorts. Some growers are cutting them much too tight and many do not open up. The Greek Easter called for some extra stock and it is thought that the dual effect of Mother's day and the automobile parade which is scheduled for Saturday of this week will cause a good demand for the various classes of stock. Cattleya Mossiae, C. Mendelii and C. Loddigesi form the bulk of the orchids coming in, and the demand is very good. Bulbous stock is, apparently, on its last legs, but there is still a lot of it around. Lilac was hit hard by the frost and very little good stock is on the market. The outdoor lily of the valley, so far, is not attractive, being small and showing the effects of the ungenial weather. Forced stock is excellent. Some shrub flowers are in. The pretty bush honeysuckles being among the most attractive. The snapdragons are fine and plentiful, a deep pink form being exquisite and selling well at good prices. Pansies, daisies and other small spring stocks are fine and plentiful. With moving

day over there is every prospect of a few weeks' good business, and there will doubtless be lots of stock to carry it on.

#### NOTES.

Orders come thick and fast to John Mangel for funeral work. Chas. Schnell's fine wreaths in the windows of the Wabash avenue store are sure drawing cards, for this clever decorator's color and form schemes are unique and very beautiful. At the Blackstone last week a luncheon was given by Mrs. Drake to about 20 ladies and the decoration was quite unusual and decidedly good. Tall, slender vases were filled with long branches, made on 36-inch wires, of Mrs. Jardine roses and white lilac. The table was strewn with the same flowers and Adiantum Farleyense, altogether an elegant decoration, kept sufficiently high that the guests could see underneath, and quite novel. We noticed in the store a fine lot of beautiful art glass ware imported direct by Mr. Mangel. Another very beautiful table decoration was carried out on Saturday, when 60 guests were seated at a series of tables arranged in the form of an oblong with an open center. Here

was placed a large kentia with smaller ones and Boston ferns in an undulating effect that was very good. Long stemmed Beauties, arranged in the manner described above with Mrs. Jardine were used on the tables and many encomiums were passed on this novel and attractive decoration by the guests.

Bassett & Washburn's Beauties have been coming in extra fine this week and they are selling them in large quantities to eastern customers. Miss Bloom has returned from her vacation in Ohio. E. B. Washburn has sent from California a box of thornless roses to his father's firm, who will try growing them at Hinsdale. Mr. Washburn says that their peonies and carnations were practically unhurt by the recent severe weather.

Vaughan & Sperry are handling the biggest cut of American Beauty roses they have ever had, the long stemmed flowers coming at the rate of 1,000 per day with plenty of medium and short flowers. Peonies, gladioli and fine carnations are also handled in large quantities here, and we noticed some pretty flowers of the bush honeysuckles and other outdoor shrub flowers.

Zech & Mann are well fixed on good carnations and their growers report that good cuts will be in for Mother's day. The fine roses this firm has been handling still continue to arrive in quantity as well as all other popular stocks.

Chas. M. Treanor, late of South Bend, Ind., well known in this market, died at Miami, Fla., May 1, from

a paralytic stroke. Fuller particulars are given in our obituary column.

Orders for white carnations for Mother's day have been arriving all the week at the J. B. Deamud Co.'s store. The stock is fine here and moving well.

The stock at Hoerber Bros. this week has been fine, especially the carnations, which clean up daily. Business here is reported as excellent.

Peonies are arriving in large quantities daily at the Kennicott Bros. Co.'s store, all the best early varieties being represented.

W. N. Rudd and Carl Cropp, held their thirteenth annual discussion on pansies at the Kaiserhof May 4.

W. Homburg has left the employ of the J. B. Deamud Co. and is now with J. A. Budlong.

# BEAUTIES AT THEIR BEST

Our Beauties are coming in at the rate of 1000 of the long-stemmed flowers per day, with the shorter and medium grades in proportion. The following are

## A FEW OF OUR SPECIALS FOR THIS WEEK:

|                                      |                           |                              |                          |
|--------------------------------------|---------------------------|------------------------------|--------------------------|
| Beauties .....                       | \$4.00 to \$20.00 per 100 | Fine Brides and Maids.....   | \$4.00 to \$6.00 per 100 |
| White Carnations for Mother's Day... | 4.00 to 6.00 per 100      | Peonies, pink and white..... | .75 to 1.00 per doz.     |

We also have all the best popular Roses, Carnations, Lilies, Callas, Gladioli, Fancy Valley, and all kinds of Greens, including Fancy Ferns, Galax, Leucothoe, Mexican Ivy, Etc.

## LONG STEMMED BEAUTIES

They are undoubtedly the best in this market, and cannot be beaten on any other. The foliage is good, the flowers of fine color, and they have not a fault.

**Our Roses, Carnations** and other flowers are perfect, and we are in full cut on all popular varieties. We are paying especial attention to out-of-town orders, and our facilities for shipping are of the best and most up-to-date.

Let Us Have Your Next Order.

We will be well fixed on

WHOLESALE  
GROWER OF

# CUT FLOWERS

At the J. A. Budlong store some of the finest long stemmed Beauties ever seen on this market have been shown this week. Killarney, Kaiserin, Mrs. Jardine and Field are also in fine order, and carnations were never better. Charlie Zapfe, of this firm's staff, is ill in hospital, having been operated on last Friday for appendicitis. From last reports he was doing well.

The John C. Moninger Co. has made extensive additions to its plant recently, including a piece of property 135x150 feet on Hawthorne avenue, also a five-story building 90x123 feet and a seven-story elevator 42x70 feet. Changes in the construction of the buildings are now being made and the firm expects to occupy the new quarters about May 10.

Peter Reinberg has a fine new automobile. Stock is coming in elegant shape here, the Carnot, Beauty, Richmond and Killarney roses being especially fine. Orders are coming in fine for Mother's day, and there will be lots of fine stock to fill them. Tim Matchem has been suffering all week with a severe cold, but has pluckily stuck to his guns.

The Fleischman Floral Co. reports a heavy demand for the best class of funeral work and some of the designs, casket covers and other pieces have

been in Geo. Wienhoeber's very best style, eliciting much favorable comment from customers. Trade in cut flowers is also good and a large amount of the best quality stock is being handled.

E. C. Amling reports good sales on red and pink peonies, and the flowers arriving are fine in every way. Good business is Mr. Amling's report, and he says that the chief damage to his consignors' stock by the recent frost was to lilacs, cherries and other

shrubs. Peonies were very slightly injured and the flowers arriving are perfect.

Good Cattleya Mossiae has been arriving at the Poehlmann Bros. Co.'s store all week from the greenhouses. Orchids are evidently becoming a staple here. Cardinal rose, too, was noted as very good this week.

A. I. Simmons has reproduced very attractively on his stationery the medal which he was awarded by the Horticultural Society.

CHICAGO.L. D. Phone Central 1496. Private Exchange  
All Departments. If you do not receive our  
price list regularly send for it.

At the A. L. Randall Co.'s store, business is excellent. Good orchids are much more plentiful now and find a good demand. Frank Johnson reports a very brisk demand for the Evergreen brand fertilizer and says he feels certain there will be a very big call for this excellent manure when its merits become fully known.

The D. D. Johnson Co. is now putting up its Evergreen Brand of fertilizer in attractive small tins, each containing half a pound. Thirty thousand was the size of the first order to the makers of the tins and these were already bespoken by jobbers who are handling the goods.

Superintendent West is making excellent progress with the extension which will make Lincoln park double its present size. He reports that many roses in the older section of the grounds, notably Dorothy Perkins, succumbed during the past winter.

Wietor Bros.' carnations are superb this week, especially the light colored varieties. Mrs. Jardine rose is also arriving in fine shape and business is good, there being a fine call for all stocks.

W. A. Reiman, of Vincennes, Ind., has been in the city this week and says the frost did very little damage to his peonies of which he is a large grower.

Sinner Bros. are receiving good roses and carnations. All the earliest stock in the greenhouses is now planted but some later plantings will be made.

Visitors: Albert C. Rott and wife, Juliet; E. P. Barnett, of the Oshkosh Floral Co., Oshkosh, Wis.; Andrew Schlevogt, Brooklyn, N. Y.; Otto Schwill, of the Idlewild Greenhouses, Memphis, Tenn.; W. A. Reiman, Vincennes Ind.

### A Hybrid Calla.

A hybrid calla, raised from a cross made in May, 1906, between Richardia Mrs. Roosevelt X R. Rehmannii violacea, the pollen parent being an exceptionally deep colored specimen, was figured in a recent issue of the Gardeners' Chronicle (Eng.) R. Mrs. Roosevelt is itself said to be a hybrid, and, if so, its habit, form and comparative hardiness would suggest R. Africana X R. Elliottiana; but I have flowered a species sent to me from Natal which is very similar, and in absence of certain evidence I should hesitate to accept its reputed hybrid origin, says a correspondent of that journal. I have also seen an unsupported statement that it is a hybrid of R. albo-maculata X R. Elliottiana, but from the form of the spathe this is probably a mistake, that of albo-maculata being even more stiff and funnel-shaped than that of R. Elliottiana, while Mrs. Roosevelt approximates more to the opener, laxer form of R. Africana.

R. Mrs. Roosevelt grows two to three feet high, has large open spathes, pale primrose or sulphur-colored, with a deep purple base inside, and the large, broad, sagittate leaves are freely spotted white, almost, if not quite, as much as R. Elliottiana. R. Rehmannii violacea is only nine inches to one foot high (with me), and is a much smaller plant in all its parts. The spathe is small, stiff, and funnel-shaped, and colored a rosy violet, deepening to dark violet-purple at the base. The leaves are comparatively small and narrow, hastate or lanceolate.

The hybrid is intermediate. It is a strong plant rather nearer R. Mrs. Roosevelt in habit, vigor and hardiness. It has four leaves at flow-

ering, the flower-scape being two feet high. The blades of the leaves are about 10 inches to 11 inches long, nearer Mrs. Roosevelt in size and form, but rather more pointed or hastate towards the ends. There are a few elongated and irregular white spots (about 20) confined to the median portion of the blade. The spathe is intermediate in size, form and substance.

The color of both parents is also represented in the hybrid, but apparently is not blended. The red-violet of R. Rehmannii overlies the primrose of Mrs. Roosevelt, and being spread over a larger area is rather weaker. The color at the base inside the spathe is a deep pansy-violet (Repertoire des Couleurs, No. 191, tone 4), thinning out gradually to a reddish-violet-purple (R. de C., No. 185, tones 4 to 1, or lighter), with the primrose ground showing through towards the edges. The outside of the spathe is also veined with purplish veins, as in R. Rehmannii.

#### WEDDINGS HELP BUSINESS.

Several important weddings gave an impetus to the business the past week; but for these, however, it was quiet, there being a perceptible falling off in the demand. There is plenty of stock of all kinds although roses shortened up a bit with the cold nights which also left their mark on the foliage in the shape of mildew. American Beauties are quite plentiful and as the price is low they are in fair demand. Sweet peas are a great factor and quantities are used. New crops appear to be coming with different growers which keeps up a succession of fine flowers all the time. Carnations are about to have their innings and will reign supreme for the balance of the week, particularly the white varieties for which \$8 per 100 is asked for specials for Mothers' day and it is quite likely that they will soar higher, if the demand is anything like it promises to be. The commission men say the demand is easily twice that of last season and they look forward to a complete clean up of these and many other flowers before the week is out. The weather appears settled enough for planting and the hardest of the bedding stock is going out in large blocks and keeping the growers busy filling orders. The early Easter gave them a grand chance to get up a large stock and there is a fine assortment at most places. There is one exception, however, as it is said that geraniums will be scarce. Those who depend on stock for growing on from a distance, say they all found it very scarce and there is not now time to work up any themselves.

#### NOTES.

In speaking to Miss Anna Jarvis, the founder of Mother's day, she deplores the fact, as evidenced from newspaper clippings received from various parts of the country, that several parties and organizations are endeavoring to turn the observance of the day into a money-making scheme, by obtaining subscriptions for poor mothers and selling buttons to

be worn on that day, in place of flowers. Large quantities of these buttons are, it is said, being manufactured with the expectation of a ready sale. It is hoped this feature of the observance of the day will not be a success and all florists should do what they can to discourage their use.

The Leo Niessen Co. is handling a splendid line of carnations and sweet peas. Large quantities of special stock are handled here every day. The latest addition is peonies, southern stock. The first locals were handled on Tuesday; these were the early red. The later varieties will be ready in about a week and it is feared the

crop will be past before Decoration day, except they are saved by cold storage.

A splendid lot of Crimson Rambler roses, which will be in about May 15, are seen at W. K. Harris'. R. Craig & Co. have also a fine line of Ramblers in variety.

Chas. Poryzees, of Fifteenth and Chestnut streets, has gone to his native country to bring back his family—who have been spending the winter there. K.

### Philadelphia Notes.

H. Bayersdorfer and wife sailed from New York for Europe on April 23. Their trip will be an extended one, combining business with pleasure. In the meantime Paul Berkowitz is looking after the big store and orders for Memorial day keeping pouring in.

M. Rice has been in Europe for the past month on business connected with his extensive trade. Another story has been added to the Race street store and the firm now occupies seven floors. Spring business has been very heavy.

John Burton is sending in a fine cut of American Beauty and Mme. Chatenay roses. His salesman, W. G. Stephen, is a very active man and has the advantage of always having good stock.

George L. Faulkner is now well established in his new store on Fifteenth street near Walnut street, and is well pleased with his location and the condition of business.

Frank L. Polites is handling a large amount of stock at his various stores. James Paul, formerly with John Droganges, New York, is now his buyer.

Berger Bros., the Filbert street wholesalers, are handling very fine stock, most of which comes from Stockton & Howe, of Princeton, N. J.

The Philadelphia Cut Flower Exchange, managed by John Waxam, at 1207 Market street, makes a fine display of cut flowers and plants.

The Pennock-Meehan Co. is handling a large amount of good stock. Noteworthy are the American Beauty roses, peonies and gladioli.

John McIntyre makes occasional trips to New York and has worked up a good business among the leading retailers of that city.

NOW IS THE TIME TO ORDER

# "Michell's" Giant Strain of Cinerarias Chinese Primrose Seed

## 518 Market St., Philadelphia, Pa.

### New York.

#### STOCK CHEAP.

The weather continues fine, and though there is not an enormous supply of stock, there is more than enough to supply all demands, with a tendency toward lower prices. The outdoor lily of the valley is now on the market and it has caused a drop in the prices of the greenhouse product, \$1.50 and \$2 per 100 being now a fair average for the latter, whereas it was, a few weeks ago, up to \$4 per 100. There is no surplus of good sweet peas and the best bring \$1 per dozen bunches, but there is much short stock selling for half that. Cattleyas move slowly at an average of 50 cents each. The street men are handling many of the shorter gardenias, and as a matter of course selling them cheap. Lilac is yet a factor, largely in street trade. Many fair roses are also being sold on the streets. There is a good movement in plants, and the veranda and window boxes are now features throughout the city. Much English ivy is being used in boxes.

May 2.—There is little change in the condition of the market. There is an abundant supply of stock.

#### NOTES.

There was a number of weddings during April that called for fine decoration. Although May was once considered an unlucky month for weddings, that superstition seems to be passing away, and there are a number scheduled for this month. In this connection the wise ones say that the coming June will be a record-breaker, all of which should make the hearts of the retailers glad. With good June business, the lean days of July and August are more endurable.

The Best Oil Co. is a new enterprise, with A. J. Guttman, 34 West Twenty-eighth street, as president. This oil, it is said, is a good substitute for linseed oil in painting, and can be manufactured at much less cost. Mr. Guttman is a man of original ideas and it is hoped that his venture will be successful.

Noteworthy features of this market are the fine palms, ferns and foliage plants that come in from the John Scott range, Brooklyn.

J. H. Small & Sons are handling beautifully flowered hydrangeas grown by Chas. Hunt, Port Richmond, S. I.

NOBSCOTT, MASS.—Adolph E. E. Koch, foreman for Geo. E. Buxton, of Nashua, N. H., has purchased the Whittemore greenhouse. Mr. Koch will make carnations a specialty.

## All Kinds of Cut Flowers

31-33 Lick Place,

San Francisco,

Calif.

WHOLESALE

### Buffalo.

The April weather has been a drawback to trade and the supply of flowers. Nothing but roses which were of good quality could be called plentiful. Carnations are decidedly scarce with prices that are high for May and quality poor in many varieties. American Beauty roses are plentiful. Outdoor stock, such as tulips, daffodils, etc., were looking good, but rain and cool weather has retarded their growth. Lilacs from the south, also dogwood in profuse bloom, have been an acquisition to the market. The first jonquils have arrived, also Narcissus Pheasant's Eye, which are fair.

#### NOTES.

The event of the past week was President Taft's visit as the guest of the Chamber of Commerce and Manufacturers' Club on Saturday. The city did herself proud; from his arrival Saturday morning until his departure Saturday evening it was one round of entertainment. He stayed at the historical Wilcox mansion, which was originally the home of the Hon. A. P. Lanning, then purchased by Hon. Ansley Wilcox, being the house in which Theodore Roosevelt was sworn in as president of this United States after the assassination of President McKinley, and once more

had the honor of entertaining the present president, W. H. Taft. The first reception was given by the Ad club at the Buffalo club, where the decorations were in charge of W. J. Palmer, American Beauty roses playing the principal part. Next was the University club, where palms were mostly used by S. A. Anderson. The most elaborate was the banquet at Convention hall, where the color scheme was in yellow. The ceiling of the immense building was in yellow, done by Geo. D. Hale, while the tables were in yellow with centers of white lilac, mounds being used with the centerpieces of white lilac. The effect was grand and no expense was spared on the part of the Manufacturers' club or the decorator to make the harmony in color all that could be desired.

Some good yellow chrysanthemums in clusters have been on sale at S. A. Anderson's, also a fine lot of daisies. Hydrangeas are good and on sale. The Florists' Club will have an important meeting on Tuesday when Chas. F. Guenther will read a paper on summer blooming roses.

Receptions have been scarce as have weddings, no doubt owing to the near proximity of May 1, which necessitates the removal of many people and puts society at a standstill.

BISON.

**E. A. BEAVEN, Evergreen, Ala.**

St. Louis.  
STOCK GOOD.

The weather has warmed up considerably but it is raining at the time of writing. Trade is not what it should be. Stock is good but not bringing good prices. A few peonies are in and bring from five to eight cents. Some American Beauty roses of good color are seen in medium, short and long, but are not cleaning out by any means. Outdoor stock is scarce. The opera last week moved a few flowers. This week is the farmers' convention and visit of President Taft, which may help some. Fancy ferns are about \$3 per 1,000. In about a week we can look for hardy ferns.

### NOTES.

Eddie Garlech, for 15 years in the employ of C. A. Kuehn, is about to resign and enter into the paper business with Hagen & Co., of which firm he becomes a member. Eddie has been a faithful servant and he will be sadly missed by all the retail trade. He was always strictly businesslike and was respected and liked by everyone in general. George Schriever, his fellow worker will, it is believed, become his worthy successor.

Ostertag Bros. decorated the boxes 57, 58 and 59 at the Coliseum for the opera. These were the boxes of Governor Hadley and his staff. Three hundred and fifty long stemmed American Beauties were used and the ladies carried bouquets of orchids. A supper was given in their honor. Mountain laurel, Japanese cherry blossoms and asparagus, were used; 42 tables were decorated.

The Louisiana Purchase Co. met for its sixth anniversary of the opening of the world's fair last Friday. From the surplus still left it is proposed to build a hall of fame in commemoration of the world's fair and of Jefferson. The building is to be erected at Forest park on the site of the main entrance of the late world's fair.

Alex Johnson at Wellston, who is ably assisted by Jim North, reports good trade in plants and cut flowers. A visit to his greenhouses showed a fine supply of carnations, some Beacon being especially fine.

Quite a few Kirkwood growers will be busy this summer erecting new houses. We expect to have some rose growers next winter.

Young & Sons, since the warm weather has started in, have had their

hands full with sales of bedding and other plants.

Most of the summer gardens have opened but the floral displays have been delayed on account of inclement weather.

Grim & Gorley placed tags on all the green carnations they sold April 21 with "Oh, you O'Connor" printed on them.

At Union Market the plant men came out during the week. Owing to the cold weather the season is backward.

Fred Bruenig reported that the freeze did not do him as much damage as he thought it probably would.

W. J. & M. S. Vesey are shipping some finely colored American Beauty roses to this market.

A fine display of hydrangeas can now be seen at Shaw's garden.

W. F.

### Cincinnati.

TRADE GOOD.

Business the past week has been very satisfactory. Social affairs are becoming more numerous and some of those which occurred lately have been of rather large proportions. The present week is May festival week and no doubt all the florists will have something to do for this occasion. Funeral flowers are also in active demand and at this writing there are no gluts of anything, with the exception of a surplus of roses. This can be attributed to the very warm weather of the past few days. Carnations are in ample supply, as are also lilies of all kinds. A few more sweet peas could be used to advantage. In the green goods line everything is in good supply and the demand satisfactory.

### NOTES.

Fred Blecher, of the Blecher Floral Co. on last Tuesday had a window decorated with Taft roses, which certainly was a gem. On this day the president was a visitor to the city

attending the May festival and Mr. Blecher took advantage of the opportunity to do a little advertising. Fred is nothing if not original.

Miss Edith Kyrk had the decorations for the reception at the Batcheller residence last Thursday and received a great deal of praise for her efforts. This is one of the swellest homes on Rose Hill and Miss Kyrk says it is also one of the easiest to decorate.

Critchell's greenhouses were sold this week at auction.

Visitors: Mr. Brothers, of the Honaker firm, Lexington, Ky.; Frank Farney, of M. Rice Co., Philadelphia.

S.

### Chicago Notes.

Emil Nelson, of Morton Grove, is consigning splendid stock of Richmond, Bride and Bridesmaid roses to John Kruchten. They are excellent in every way, the color good and the stems and foliage showing remarkably good culture. It need hardly be said that such stock does not wait long for customers.

Winterson's Seed Store is showing a big consignment of resurrection plants, 10,000 having been received. The seed business is booming here. Everyone sympathizes with J. Lonegren, of this store, whose brother was run over and killed by a Metropolitan "L" train early in the morning of April 29.

President Kelley of the Horticultural Society has returned from Florida, his health much improved, and will go to his summer home at Oconomowoc, Wis., shortly.

Ed. Hauswirth has disposed of the store lease in the Congress (formerly the Annex) hotel and will go to Twin Lakes, Wis., to engage in chicken farming.

Leonard Kill sticks to the Rialto idea, being now a Los Angeles, Calif., theatrical manager.

TRADE BETTER.

There has been considerable more volume to business the past week, which, with continued dull weather, has created a demand for stock which at times was difficult to locate. Roses continue in the best of shape and are fairly plentiful but carnations seem very short with all growers and many orders for these go unfilled. The horse show was responsible for a heavy run on yellow flowers and the visit of the governor general has caused a flurry to social circles, for which the retailers are truly thankful. Cattleyas are plentiful and moving well as is also valley while sweet peas have been at a premium.

NOTES.

Special windows have been featured this week, Dunlop's having a most artistic effect in daffodils with yellow ribbons and shower effect of bebe ribbon which elicited much admiration. J. S. Simmons showed a model of a horse in his window, with crossed whips and riding crop, horseshoes, etc., with a groom attending, which proved a drawing card to the curious. While many daffodils were used up in window decoration they were not plentiful enough to fill orders.

W. E. Mackay is going to remodel his place and will extend his conservatories to the street line to prove more enticing to the retail trade. A new residence is also contemplated which should make a fine improvement to his business.

Grobba & Wandrey have purchased the orchid collection which Wm. Hill has been accumulating.

Thos. Manton has some specimen bougainvilleas which prove attractive in the store windows.

The Steele-Briggs Seed Co. has a nice batch of calceolarias, which find a ready sale.

H. G. D.

DANVERS, ILL.—Leo Wellenreiter has been rebuilding his greenhouses, bringing them up-to-date in all respects and using cement blocks in their construction. Two new ones are to be built, each 20x65 feet. The recent freeze did a good deal of damage to outdoor stock.

STOCK PLENTIFUL.

The warm weather after the cold wave opened up the stock so fast that the market was soon flooded with roses and carnations. Bride and Bridesmaid roses especially came in unusual quantities. They are of fair quality, but are selling for very little. Killarney is plentiful but very short in the stem and with poor heads. Carnot and Kaiserin are very good and bring good prices. American Beauty is holding up well, being of good stem and color. Richmond and Perle are plentiful but only of fair quality. Carnations are on hand in great quantities for this time of the year and are selling for \$10 to \$12.50 per 1,000. Sweet peas and Spanish iris are scarce, the market taking all that come in at a good price. Callas are selling slow and are almost gone, also Easter lilies. There is still an insufficient supply of Asparagus plumosus, A. Sprengeri and good adiantum. The sale of bedding plants is increasing rapidly. Geraniums, pansies, rose bushes, etc., are in constant demand. The dry weather we are now experiencing is hard on the carnation plants and other outdoor stock.

NOTES.

One of the funerals which helped clean up the surplus stock last week was that of Mr. McGowan, of McGowan, Small & Morgan, gas grantees; \$1,000 would be a conservative estimate for the amount of funeral work done for him.

Jas. Papodukus, Eleventh and Main streets, is looking for a new location, as his present place of business is to be replaced soon by a 15-story office building.

The Geo. M. Kellogg Flower & Plant Co. has commenced tearing out the Killarney houses and reports an excellent season on this rose.

An unusually large number of orders have been received for white carnations to be used on Mother's day.

E. Boucher, who recently started as a retailer across the state line, reports a rapidly growing business.

J. E. Murray & Co. have moved from their location at 1021 Grand avenue to 212 E. Twelfth street.

Wm. Rock of the Rock Floral Co. has just purchased a large Pope-Hartford touring car.

The Greek Easter, May 1, took care of all the late Easter lilies which the florists had on hand.

The city park board has commenced setting out bedding plants and shrubbery.

The Alpha Floral Co. reports an exceptionally good business for this time of year.

## The Seed Trade.

### American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Duryea, New York, First Vice-Pres.; F. W. Bolgiano, Washington, D.C., Second Vice-Pres.; C. E. Kendel, Cleveland O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J. June 21, 1910.

CHAS. P. BRASLAN, San Jose, Calif., is sailing for Europe from New York, May 21.

SLUIS & GROOT, Enkhuizen, Holland, have issued an attractive new set of colored plates of their specialties of flowers and vegetables.

GOSHEN, IND.—A. E. Kunderd, formerly of Kendallville and North Wayne, has purchased 50 acres near this place and is now planting gladioli on the land.

CHICAGO.—Contract prices on the board of trade May 4 for grass seed were noted as follows: Timothy, \$4.25, nominal. White clover, from 20 cents to 25 cents.

THERE is more litigation this year than usual in the seed trade. Decisions should result which will make clearer the legal relations between buyers and sellers of seeds.

MICHIGAN BEAN PRICES.—According to a recent bulletin of the Michigan Experiment Station, the average prices paid Michigan farmers for beans from 1899 to 1908 inclusive are as follows: 1899—\$1.08; 1900—\$1.68; 1901—\$1.66; 1902—\$1.55; 1903—\$1.66; 1904—\$1.70; 1905—\$1.39; 1906—\$1.25 1907—\$1.34; 1908—\$1.94. The average price paid for 10 years is \$1.52.

JOHN BRANTFORD ALCOTT, widely known as a grass expert, died at his home in South Manchester, Conn., April 23, of dropsy. He was born in Manchester in 1830. He traveled extensively in this country and abroad and had made a special study of grasses, having in his garden, it is said, species of grass from almost every quarter of the globe. He laid out the grass gardens of the Smithsonian Institute, Washington.

CORRESPONDENCE SOLICITED.

PHILADELPHIA, PA.—All the seedsmen seem well pleased with the volume of spring business.—At the Henry A. Dreer store Manager Thilow was found in a smiling mood. In the meantime at the Riverton range and grounds there is a wonderful exhibit of things that grow.—At the Henry F. Michell Co.'s store, 1018 Market street, there is always plenty of business. Philip Frewd of this store is managing an interesting window display of lawn mowing which attracts the Market street crowds. Fred Michell, Sr., is spending part of his time in the new store, 518 Market street.—Walter P. Stokes is cheerful over the situation and judging by the volume of business being transacted, he has reason to be.—Skidelsky & Irwin are finely located in the Betz building, R. J. Irwin is on the road, while S. S. Skidelsky is attending to headquarters.—W. J. Sherry, of the Johnson Seed Co., has been confined to his home by illness for the past week.

### The Haarlem Flower Show.

The General Society for the Advancement of Bulb Growing and Horticulture has just celebrated its semicentennial at Haarlem, Holland, by an exhibition of flowers of extraordinary extent and quality. There were thousands of visitors, including Prince Henry of the Netherlands, who represented the queen at the opening ceremony, and ex-President Roosevelt. The highest award was gained by the Overveen-Bloemendaal district, which exhibited marvelous hyacinths.

### Michigan Beans.

The field beans most widely grown in Michigan, and probably the most popular commercially, belong to the pea group. The following names are commonly, though perhaps not properly, applied to the varieties grown; viz: Pea, navy, white navy, white field, marrow pea bean, etc. Despite the variations in name, the types are practically identical.

The five leading varieties of beans grown in Michigan are the pea, medium, red kidney, white kidney and black turtlesoup. A great number of varieties of garden sorts are grown in the state by farmers to be used by seedsmen in the retail trade. The varieties in the pea group will, in most cases outyield the other sorts and are

the most profitable to grow. After 15 years' experience in growing beans the Hon. A. B. Cook of Owosso, Mich., says, "I have come to the conclusion that as a money crop, one year with another, the little old fashioned pea bean has the advantage. It is hardy, early maturing, is always in demand and is the safest to tie to."

From one-half to three-fourths of a bushel of seed per acre of the smaller varieties of beans is sufficient. All of the large varieties, such as red kidney, require one bushel to the acre.

### Unlimited Control of Seed and Plant Trades

#### PROPOSED BY SIMMONS BILL.

No more high handed piece of federal control legislation has yet been proposed to our knowledge than the Simmons Bill, H. R. 15656, Section 3 of which puts the secretary of agriculture in entire and unrestricted control of all seed importations. Further we learn the following from a gentleman who was present at the nurserymen's hearing in Washington April 26 and 27:

"One of the witnesses at the hearing was an official of the Department of Agriculture, who we had understood was slated for the management of this matter if the bill goes through, and he stated frankly and emphatically that in his personal opinion all foreign nursery stock should be absolutely shut out. It is not difficult to guess what sort of trouble we should be up against if a man of that sort was intrusted with the administration of the law."

Seedsmen will please take notice of the following part of Section 3 of this proposed law:

"The secretary of agriculture may at any time extend the provisions of this act to fruits and vegetables or bulbs or to other plants or seeds not specified in this act," so that it would seem to us that the florists and seedsmen are likely in the future to be bothered as well as the nurserymen.

Seedsmen and florists should write their congressmen and senators at once protesting against the passage of the bill and insisting that these trades be given a hearing.

### Seeds By Flying Express.

Assistant Postmaster Shideler of Indianapolis—fretting perhaps under the pressure of harder work and longer hours than usual—announces to the world, not in so many words but by implication, that the free-seeds business is a confounded nuisance and keeps the postoffice department from paying profits. On Monday he received under the frank of Congressman Korbly of the seventh district for distribution in Marion county 61 big sacks crammed full of seeds, the Korbly allotment for 1910; they must now be divided up into thousands of smaller packages and be remailed to his admiring and appreciative constituents throughout Marion county—the Indianapolis postoffice doing the dispatching and, again, under the Korbly frank.

"When," remarks the perspiring Shideler incidentally, "people complain about the cost of handling the mails, they should remember that the shipment of seeds by mail in this manner costs a lot of money. In any other business such a shipment as this would be made by freight, but a congressman always uses his postoffice

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

C. W. Waid, New Carlisle, Pa., President;  
Franklin DeKleine, Grand Rapids, Mich.,  
Vice-President; S. W. Severance, 508 Illi-  
nois Life Building, Louisville, Ky., Secre-  
tary; M. L. Ruetenik, Cleveland, O., Treas.

NEW YORK.—M. O'Brien & Son, Inc., 213 Washington street, extensive dealers in all kinds of vegetables, report that the unusually early spring has brought in a large supply of outdoor vegetables. Noteworthy, are tomatoes, potatoes and string beans of fine quality from Florida. There is a good supply of Virginia and North Carolina strawberries.—Van Dyke & Lindsay, 209 Washington street, are handling Jamaica mangoes that are remarkable for their size and quality. They wholesale at \$4 per dozen.

### The Culture of Mushrooms.

A paper read by Alex Wilkie before the Montreal Gardeners' and Florists' Club, April 4, 1910.

For best results good spawn is absolutely essential, and where large quantities are grown the best plan is to make the spawn at home. First procure fresh horse droppings, cow dung and a little loam. Use about a tenth part more horse droppings to equal parts loam and cow dung. Mix all together by the addition of stable drainings until it is of the consistency of mortar. Then spread it on the floor of an open shed, about two inches in thickness. Leave until sufficiently dry to cut and handle (without fear of breaking) into blocks about six or eight inches square. When half-dry make a hole in the center of each with a dibber about an inch square to admit a piece of good old spawn, deep enough to allow a covering of clay on top, then place on edge in a dry, airy place until nearly dry. Make a bed of horse dung on a dry bottom, about nine inches thick; on this pile the bricks rather openly, to allow of the free circulation of the steam and heat, and cover all over with a layer of litter to keep the heat in. Keep the temperature about 60°. The spawn will soon begin to run, and, on trying a brick, if the spawn appears throughout like a white mould, then the process has gone far enough. Remove the bricks and allow them to dry, then store them away in a dark dry place ready for use.

If the trouble of making spawn at home is too great buy it, but not all from one dealer. Divide up the order with as many dealers as possible. If all is ordered from one dealer that particular order may be old, useless spawn. Again, every dealer does not make the spawn at the same time, so as to get a longer season in crop.

#### MAKING THE BEDS.

It has been found that horse droppings, from horses fed on oats and hay, is best for growing mushrooms. They should be gathered fresh, laid in ridges or thin layers, in an open dry shed. The long litter ought to be shaken out, but the short can be left, provided it is saturated with the urine

of horses. These materials should be kept turned and in an incipient state of fermentation until the rankness is got rid of. In order to retain all the ammonia possible it is a good plan to mix a little friable maiden loam with the droppings. The style of beds generally put down depends upon the amount of floor space at command. If there is room put down ridges, as these give a larger surface for production, and a larger body of material, which means a longer season in crop, as a larger body of material tends to longer production by retaining the heat longer.

If growing on shelves is intended, a front depth of nine inches and 12 inches at the back should be provided. First put about two inches of loamy turf, then three layers of droppings, each layer to be beaten firm in turn and made as compact as possible. When the mass heats make holes about eight or 10 inches apart, as deep as the loam beneath. Put in a thermometer and when the heat has declined below 80° fill the holes with a mixture of loam and horse droppings to within two inches of the surface; insert a piece of spawn about two inches square, then fill up level with the surface of the bed. Be sure that the heat is on the decline from 80°, a temperature the beds should never exceed. When satisfied that all danger of overheating is past soil over at once, the surface of the beds to be covered over thinly with loam. In a week or 10 days this covering should be made up to two inches thick; it ought also to be about the same temperature as the material in the bed to prevent chill; then cover the surface over with litter.

From this time the temperature of the house should never exceed 65°, and when the mushrooms appear it can be reduced to below 55°. Watering is a common cause of failure. Too much water will stop the spawn from running. Water applied cold has the same effect. The water temperature ought to be about 80°; then, as long as the litter is kept moist, the material will be all right. Mushrooms delight and flourish in a moist temperature and every mushroom house requires a little artificial heat at some time of the season. A good way to supply both heat and moisture in the atmosphere is to run a hot-water pipe from a small boiler and fix evaporating troughs on the pipe, keeping them filled with water. Too many pipes are detrimental to a moist atmosphere and I would suggest that just enough to keep the house at 55° be installed. The chief points that make for success in mushroom culture are good spawn, well prepared beds, a nice moist even temperature, careful watering, and careful picking. Never cut mushroom stems. Always twist them off, as cutting causes the part of the stem that is left to decay and create a fungus, which spreads to the younger stools and gradually over the whole bed.

LEAVENWORTH, KANS.—The Sunnyside Floral Co. is building two rose houses, each 24x150 feet. In the future the company will grow its own roses instead of buying them from out-of-town growers as heretofore.

New York, April 30.—Mushrooms, 40 cents to 50 cents per pound; cucumbers, \$1 per dozen; mint, 36 cents per dozen bunches; grapes, Hambros, \$1.25 per pound.

Chicago, May 4.—Mushrooms, 40 cents to 50 cents per pound; cucumbers, \$1 to \$1.25 per dozen; leaf lettuce, 22-25 cents per box; head lettuce, Louisiana, \$1-\$1.25 per hamper; \$6½ barrel (sugar barrel size); radishes 25-30 cents per dozen.

PECKVILLE, PA.—Thomas Hodgson of Rose street is constructing a greenhouse which he expects to have completed by Memorial day.

**Vaughan's**  
**Lilium Harrisii.**

**1911 Both Plants and Bulbs Carefully Selected.**

While we do not claim that our Harrisii are absolutely free from disease, or that every bulb will produce a perfect plant, we do claim that our growers' efforts in the way of spraying and roguing are producing results, our stock now being freer from disease than ever before and of genuine Harrisii type. In fact, the best general crop grown on the island of Bermuda.

**Vaughan's Seed Store,**  
CHICAGO. NEW YORK.

## Cleveland.

## CARNATIONS SHORT.

The market conditions the past week were about the same as the previous one, shortage of carnations and sweet peas being the chief characteristic. The weather is moderating somewhat, and, with a few days of warm sunshine, conditions will be reversed. String smilax is again very plentiful with a good demand. Asparagus plumosus is still rather short of the demand. All varieties of flowers sold up clean, the demand being steady and strong. Roses are coming in good shape and are selling up nicely, not enough of the shorter grades to fill orders being obtainable. Tulips and daffodils are about done for. A few choice orchids are coming in regularly.

## NOTES.

City Forester Frink has resigned. "I want to get out of this," he said. "I don't have to stand all of this." Through the death of a brother recently Frink has become the executor of an estate amounting, it is said, to \$40,000. He is probably going back to tree selling. A row of sycamore trees is being planted by the city forestry department along the entrance to Brookside park in place of the willows that were cut down. They are also planting trees at the Superior avenue entrance to the boulevard.

The Smith & Fettes Co. had a very attractive window, an ocean liner, the Mauretania, being represented made entirely of pansies, real smoke issu-

## The Nursery Trade

### American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;  
W. P. Stark, Louisiana, Mo., Vice-President;  
John Hall, Rochester, N. Y., Sec'y.  
Thirty-fifth annual convention to be held  
at Denver, Colo., June 8-10, 1910.

WASHINGTON, D. C.—The house committee on agriculture gave a hearing to nurserymen from various sections of the country April 27, who spoke for and against the Simmons bill. This bill aims to prohibit the importation of nursery stock without a permit.

STOCKTON, CALIF.—The park commission is improving Liberty park, this spring, in which a pumping plant has been installed to water the park from. The other seven squares are furnished with water by a water company. L. C. Mindach is head gardener for the park commission.

#### John Hall.

### SEC'Y AMERICAN ASS'N OF NURSERYMEN.

We have pleasure in giving a few details of the career of John Hall, Rochester, N. Y., the well-known secretary of the American Association of Nurserymen. Much of the matter has appeared in the recently published History of Rochester: "John Hall is a member of the Park Commission of Rochester and in this city is rated with those men of genuine public worth who stand for advancement in the city and in the individual, his influence being ever on the side of right, justice, truth and culture. He is on the city parks committee and chairman of the park playgrounds committee, also associated with Wm. C. Barry, nurseryman, on the committee having supervision over the famous Highland Park. A native of England, Mr. Hall was born at Little Chester, near Derby, in 1845, a son of William and Mary Ash Hall. The father was a magistrate of Derby and one of the pioneers in the great temperance movement. In his home locality the latter was very prominent and influential, and acted as almoner for the late Sir William Harcourt and the late Samuel Plimsoll, the 'Sailor's Friend.' He was prominent in all benevolent work and for 28 years was president of the Temperance society. The family has been noted for longevity, and William Hall died in August, 1906, at the advanced age of 88 years.

"John Hall is a self-made man. His educational privileges were very meager. He attended the common schools only until eight years of age, because of the then limited income of the father, and began earning his own living as errand boy in the public health department of his native town, working for two shillings (50 cent) per week. He subsequently entered his father's printing office to 'learn the case,' and later served an apprenticeship on the Derby Mercury. The printing office has been aptly termed 'the poor man's college,' and it proved the case with Mr. Hall, for it was in this office that he picked up most of his education. At the same time he learned Pitman's system of shorthand. Believing that he would have better business opportunities and advantages in the new world, he came to America in the spring of 1868, and made his way direct to Omaha, Neb., locating there when it was a city of only 6,000 inhabitants. He was with

coln, Mr. Hall met George S. Harris, the then land commissioner of the Burlington & Missouri River railroad, and entered his employ as stenographer and correspondent, writing all his letters with the pen because the typewriter machine was not then much in use. He remained with Mr. Harris until the latter's death, in 1874, during which time he was located at Burlington, Ia.

"Mr. Hall moved to Rochester, N. Y., in that year, and for one year was with R. G. Dun & Co., and afterwards with the late James Vick, seedsman. In 1878 Mr. Hall returned to England, taking with him his wife and three children, and was absent

for four years. Mr. Vick, visiting England, hunted him up and insisted on his return to America in his employ. Mr. Hall therefore embarked again for the new world, but Mr. Vick died before Mr. Hall reached Rochester in the spring of 1882. However, he remained with the Vick house until 1887, when he engaged in the life and fire insurance business, which he still follows. Mr. Hall has been secretary-treasurer of the Western New York Horticultural Society for nearly 22 years, the membership having grown in the years following from less than 300 to 1,500. Mr. Hall is a man of well-rounded character and of evenly balanced mind, and this has enabled him to take an active and helpful part in many movements for the public good. He is prominent and influential in the Methodist church and served as superintendent of the Sunday school of Monroe avenue church for nearly a decade. He is also widely and favorably known in musical circles, and possesses great love for the art of music, with no inconsiderable talent in that direction, and has sung in chorus for nearly 40 years.

"In 1871 Mr. Hall was married, in Omaha, to Lillie Staley, a native of Miamisburg, O. They have five daughters and one son: Lillian, the wife of Professor F. Collins Baker, director of the Chicago Academy of Sciences; Grace Mortimer, wife of Frank S. Brewer, of Unionville, Conn., connected with the Upson Nut Co.; Gertrude Taylor, wife of J. Eugene Masten, credit man of the Lisk Manufacturing Co., Canandaigua, N. Y.; Maude Emily, wife of Prof. Howard W. Lyman, prominent in musical circles in Boston, Mass., associated with the New England Conservatory of Music in that city; Harry Staley Hall, of the Whitehead & Kales Iron Works Co., as superintendent of estimates department and also of work under construction; and Edna Elmore, at home. The members of the family occupy an enviable position in cultured social circles where true worth, intelligence and refinement are received as passports. The entire family are total

abstainers from intoxicating drinks and tobacco, and have been so from birth. John Hall of this review is well known as a man of strong convictions, quick to discern the right, and unfaltering in his support thereof. He is a lover of society and of his friends, a genial, companionable and entertaining gentleman, with whom association means pleasure, elevation and expansion."

**Catalpa Cordifolia.**

Something like 150 trees of this species were raised from seeds in the gardens of the Royal Horticultural Society at Chiswick, and distributed amongst the fellows, in the spring of 1880 or 1881, so that if any of the seeds fell into appreciative hands, they should, by this time, be making handsome trees. At the time of which I speak *C. speciosa* seemed to be regarded, merely as a fine variety of *C. bignonioides*, though it may be distinguished by its soft, downy, more acuminate and inodorous leaves, as well as by its larger flowers, fruit, and seed. In America it is more valued as a timber tree than *C. bignonioides*, because of its more upright growth. The western catalpa is still known in America as *C. speciosa*, though *C. cordifolia* is the correct name; its habits are western Kentucky and Tennessee chiefly. The seeds are flat, oblong, and terminate in a fringe of fibers at either end. These fibers are the prolonged and lacerated testa, and, by reason of the fact that they remain free at the ends, the seeds of *C. cordifolia* may be distinguished from those of *C. bignonioides*, which, beside being narrower, have their fringes rolled up into a pencil or point. The two species may thus be distinguished at the time of sowing, and disappointment avoided from the outset by those acquainted with these differences.—Gardeners' Chronicle

**The DINGEE & CONARD CO.,** West Grove, Pa.

# A BLUE ROSE

**The Greatest Rose Novelty of the Century**

*It flowered with us this season and was greatly admired.*

**ELLWANGER & BARRY**  
Mount Hope Nurseries

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.  
*Send for description and price.*

**ROCHESTER, N. Y.**

ASPARAGUS SPRENGERI.

# Asparagus

## ASPARAGUS PLUMOSUS NANUS

We handle this Asparagus both in seed and plants of all sizes, in very large quantities and make very close prices on larger amounts on application. Our seed is pure, fresh, of best germinating quality and vitality.

### Northern Greenhouse Grown Seed.

Per 100 seeds, 60c; 250 seeds, \$1.25; 1000 seeds, \$4.00; 5000 seeds at \$3.50 per thousand.

**SPRENGERI** 100 seeds, 15c; 250 seeds, 25c; 1000 seeds, 75c; 5000 seeds, \$3.25.

**Starting Asparagus Plumosus Nanus Seed.** This seed may be sown at any time of the year, but April or May is the natural time. Bottom heat is of great advantage. If soaked four days, and given good bottom heat say 70 degrees, the plants can be sprouted in 25 days and transplanted 25 days later.

SINGLE SPRAY ASPARAGUS PLUMOSUS NANUS.

**Vaughan's Seed Store,** 84-86 Randolph St., CHICAGO.  
25 Barclay St., NEW YORK.

## Neph. Whitmani

2 1/4-in ..... 5.00 per 100  
MAGNIFICA (new), 2 1/4-in., 25.00 per 100

**Boston Ferns** 2 1/4-inch,  
\$3.00 per 100.

Henry H. Barrows & Son, Whitman, Mass.

Mention the American Florist when writing

Providence, R. I.

The great influx of cut flowers of first-class quality has somewhat diminished owing to cooler and cloudy weather. Those of second-class quality are very plentiful and sell at a very low price in large quantities. There has been a number of weddings and social functions as well as good funeral, cut flower and design business, also a good transient cut flower trade. Carnations and roses continue to come in in great quantity and good quality. Spring greenhouse flowers such as heliotrope, candytuft, feverfew, marguerites, pansies, daisies, forgetmenots and hardy tree and shrub flowers are very plentiful and sell well. Gardenias are much sought. Cattleyas, Spanish irises and gladioli are all seen in small numbers. Pansy plants are selling well. Nursery and seedsmen are extremely busy. Nurserymen report business 50 per cent better than last year.

### NOTES.

President Robert Johnston of the Rhode Island Florists' and Gardeners' Club was host to the members of the club at dinner. The membership list was increased by the election of James King of this city at the regular monthly meeting held at the rooms of the association. President Johnston conducted the business session, which was brief, and at the conclusion he extended the invitation to the members. The party was received by Mrs. Johnston, assisted by William H. Barrows and Mrs. Ray Davis. The table and house decorations were of Killarney roses. The affair was entirely informal and much enjoyed by all. Those present included W. E. Chapell, W. Appleton, Eugene Appleton,

## A ROSE FOR EVERY GREENHOUSE GRAFTED ROSES

White Killarney, My Maryland, Pink Killarney, Richmond.

Rose pots ..... \$15 00 per 100  
3 1/2-inch pots ..... 18 00 per 100

Bride, Bridesmaid, La France, Kaiserin.

Rose pots ..... \$10 00 per 100  
3 1/2-inch pots ..... 15 00 per 100

## OWN ROOT ROSES

White Killarney, My Maryland, Richmond, Pink Killarney, American Beauty.

3-inch pots ..... \$ 9 00 per 100  
4-inch pots ..... 12 00 per 100

Bride, Bridesmaids, Perle, Chatenay, Kaiserin.

**J. L. DILLON,**

**Bloomsburg, Pa.**

Eugene McCarron, James Hockey, H. R. Bellows, Clarence G. Hartistra, James P. Dillon, Owen McManus, H. Howard Pepper, Alexander Macrea, Michael Sweeney, William H. Barrows and Sheldon Davis.

N. D. Purce of Norwood, William Creation of Pawtucket avenue and Machanicutt Park Nursery Co., Cranston, all report business very good, 50 per cent better than last year. They are driven up very much, owing to the advanced state of all trees and shrubs. This stock is four weeks further advanced than any time in 30 years at this season of the year.

Mrs. John A. Macrea on Wednesday entertained the Women's Federation Club of Rhode Island with a pink tea at her home, 1046 Smith street. The decorations were very elaborate and the colors used were pink, both in cut flowers and lights.

The seed and supply stores of Walter S. Pino, Potter's Seed Store and the W. E. Barrett Co. all report an excellent business in all lines of seeds, bulbs for spring planting, shrubs and all kinds of implements connected with the garden.

There seems to be a scarcity of greenhouse, forestry and landscape help, as in all the daily papers here advertisements for such help can be seen every day. This is a good indication of the prosperous condition of the business.

Johnston Bros. had two very extensive decorations at Brown University and used several thousand carnations and several carloads of decorative plants.

Hall & Lyons Co., a large department store, gave away 3,000 roses on Saturday, April 23, as souvenirs of the anniversary of its opening in this city.

Noonan Bros. are bringing in a great quantity of first-class pansy plants; they say they have some 50,000 to dispose of yet.

Visitors: Stephen Green, representing Bayersdorfer & Co., New York. Reed & Keller's representative.

M. J. J.

COLLEGE POINT, N. Y.—John Lurk is disposing of his stock and will remove to Lakewood, N. J., where he will engage in farming.

ALEXANDRIA, IND.—H. A. Maximer, formerly of Herkimer, N. Y., and later, the Isle of Pines, has now located here and is again in the flower business.

JEFFERSON CITY, Mo.—Hugo Busch has purchased the Jefferson Floral Co.'s plant of five greenhouses, from W. H. Gundelfinger. The price paid, it is said, was \$7,500.

CARTHAGE, Mo.—Stephen Hyde has started to erect two new greenhouses, each 28x390 feet. One of the houses will be finished in a few weeks, the other some time in the summer.

# Dreer's Hardy Delphiniums

**Belladonna.** The freest flowering of all the Delphiniums and the most valuable for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one year-old plants, \$2.00 per dozen; \$15.00 per 100; \$125.00 per 1000.

**Dreer's Gold Medal Hybrids.** Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one year old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

**Formosum.** A splendid strain of this popular favorite dark blue variety, 85 cents per dozen; \$6.00 per 100; \$50.00 per 100.

**Chinese Blue and White.** 75 cents per dozen; \$5.00 per 100.

## CHOICE NAMED HYBRID VARIETIES.

**Alfred Henderson.** Bold, massive spikes of semi-double rosy-lavender flowers, 2 inches across, white eye. 20 cents each; \$2.00 per dozen; \$15.00 per 1000.

**Cerberus.** Sapphire with black brown centre, a handsome spike. 35 cents each; \$3.50 per dozen.

**Duke of Connaught.** Rich, Oxford blue with distinct bold white eye; fine large flowers, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**J. C. Jenkins.** Very large, semi-double bright mauve edged with royal blue and white eye, 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**Lemartin.** Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white center. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

**Perisimmon.** Comparatively new; beautiful delicate turquoise-blue. 50 cents each; \$5.00 per dozen.

## VINCA MINOR.

### Periwinkle or Trailing Myrtle.

This common but very useful plant for carpeting the ground is always difficult to procure in quantity in really first class stock. We have therefore, prepared, during the past season a large stock of plants which we offer in strong undivided field grown clumps, at \$6.00 per 100 or \$50.00 per 1000.

## HARDY PHLOX.

All the standard varieties in strong one year-old field-grown plants now in 3-inch pots, in prime condition to make a good display this summer, \$5.00 per 100, \$40.00 per 1000.

For the most complete list of Hardy Perennial Plants offered in America see our current Wholesale List.

# Henry A. Dreer, Inc.

714 Chestnut St., PHILADELPHIA, PA.

The above prices are intended for the trade only.

DELPHINIUM BELLADONNA.

## Pittsburg.

### CARNATIONS SCARCE.

This city is known as one partial to carnations, and a scarcity of this flower is felt very much indeed. The continued dark weather has kept the flowers back so much that there has not been a day when there was half enough to go around, and it probably will not be until after Mothers' day that we will have enough of these. Roses are quite plentiful and with a little more sunshine there will probably be a glut. The market is pretty well crowded with Beauties, but they are holding up nicely. Lilies continue to arrive in such quantities that many of them are either sold for very small prices or else thrown away altogether. Sweet peas and valley clean up daily at nice prices. Cattleys are again plentiful, but keep their price. Miniature gladioli have made their appearance and are well liked. Smilax sells at sight, but same cannot be said of Asparagus Sprengeri and A. plumosus.

### NOTES.

The Florists' Club met May 3 at the Fort Pitt hotel, where the private gardeners had a display for prizes of foliage plants and ferns. The subject for the evening was "Seasonable Flowers."

Very fine Beauties in all lengths are seen at the McCallum Co., also fancy Kaiserin and Killarney roses, grown for summer cutting.

J. B. Murdoch & Co. are now settled in their new quarters on Ninth street. This concern is handling a nice lot of carnations.

# Maids and Brides

## One Year Old Grafted Bench Plants

Fine plants for out-door planting or replanting in the benches, cut back to about 18-inches; per 100, \$5.00.

## Carnation O. P. Bassett

From soil. R. C., \$6.00 per 100.

# Bassett & Washburn,

Office and Store,  
76 Wabash Ave., CHICAGO  
Greenhouses, Hinsdale, Ill.

Thos. Malbranc, Johnstown, stopped here on his way to Chicago, where he is purchasing material for several new houses.

Fred Burki, who is confined to his bed with rheumatism, is not reported any better.

The store of Fritz Ueberle was closed by the sheriff Saturday, April 30.

Spanish iris is in evidence at the Pittsburg Cut Flower Co.

A. W. Smith, Jr., is back from his eastern jaunt.

Visitors: Martin Reukauf, Philadelphia; S. Ford, New York; Mr. Sterns, Sefton Box Co., Chicago; T. Fitzgerald and daughter, Beaver.

J.

ARLINGTON, N. Y.—William Bock has completed a new greenhouse, 28x200 feet.

## GOOD, CLEAN, HEALTHY 2-inch Stock

We have the following in surplus stock, a few thousand to dispose of:

| ROSES                     | Per 100 | Per 1000 |
|---------------------------|---------|----------|
| Maid and Bride.....       | \$3.00  | \$20.00  |
| Mrs. Jardine.....         | 4.00    | 35.00    |

BYER BROS.,

Chambersburg, Pa.

# A New Fern NEPHROLEPIS GIATRASH

Awarded a Certificate of  
Merit by the Horticultural  
Society of New York.

Prices: In 2¼-inch pots, \$3.50 per  
dozen; \$25.00 per 100; \$200.00 per 1000.  
25 plants at 100 rates; 500 plants at 1000  
rates. Orders delivered in rotation as  
received. Now Ready for delivery,

GEORGE GIATRASH,  
463 Summit Ave., West Hoboken, N. J.

Baltimore.

The variations of temperature with-  
in the past week probably makes a  
record so far as the memory of the  
oldest resident goes. On Friday morn-  
ing the mercury was perilously near  
the freezing point, and on Saturday  
it had climbed to 93°, a difference of  
almost 60 degrees in little more than  
24 hours. Since then it has dropped to  
a more normal and reasonable  
figure. Business is not encouraging.  
The production of roses and carnations  
appears to be overdone and there is  
no outlet at times for the excessive  
stock coming upon the market. From  
now on, however, it looks as though  
the quantity would diminish, but the  
demand diminishes in about the same,  
or in larger proportion.

The nurseries have had an encour-  
aging season, and great quantities of  
stock have been sold. During the pe-  
riod of extreme drought which marked  
the earlier spring months operations  
were a good deal retarded, but latterly  
all conditions are favorable. The  
great suburban development, which  
includes planting of a great number of  
shade trees on public avenues, the  
beautifying of innumerable new  
places, the setting out of orchards,  
which is being done extensively in  
every direction, have made things very  
lively and agreeable to the nursery-  
men. The embellishment of city lots  
and back yards and the use of win-

**Bulb Stock**—Cannas, Caladiums, Tuberous-rooted Begonias, Dahlias, etc., etc.

**GEO. A. KUHL**, Wholesale Grower, Pekin, Ill.

Plainfield, N. J.

Chas. L. Stanley conducts a very prosperous cut flower and seed establishment. His store is admirably equipped for business and his large area of glass enables him to supply on short notice anything that his customers and retailers call for.

Carl Peterson, the veteran florist of 217 Watchung avenue, reports good spring business. Everything about his greenhouses shows evidence of careful attention to detail, which goes far toward success.

At the A. E. Lincoln store good and quick service is noticeable. There are few cities in the country that, in proportion, have such an efficient lot of florists as this.

Mrs. L. J. Denton is one of the pioneers. Her store is always well stocked with the best flowers.

## LOOK BARGAINS IN Bedding Plants

For Immediate Shipment.

NOW READY.

Godfrey Aschmann, the busy bee, is more active than ever. Come and look at what he and his sons and employees have done in four weeks' time. Inspect it yourself, judge it yourself, and you will say "Is it possible?" Ten greenhouses and equally as many frames are filled with choice bedding plants of all descriptions.

## Gold Letters

Gummed Gold and Purple Letters.

For inscriptions on Floral Designs.  
Best and Cheapest on the Market.  
Send for samples and prices.J. LICHTENBERGER, NEW YORK.  
1566 Avenue A,  
Telephone: Lenox 5644

## IT IS NOT...

what you pay for the advertisement but what the advertisement pays you. It pays to advertise in the American Florist.

Morehead  
Steam Traps

The Morehead Return Steam Trap is specially designed and constructed for greenhouse steam heating plants. It fills the dual capacity of steam trap and feed water pump. It will create conditions enabling the florist to grow better flowers; save on fuel, water and labor bills, and derive general all around satisfaction from the installation.

Send for "Florist Trap Book."

MOREHEAD M'F'G. CO., Dept. N, Detroit, Mich.

## The Grate Does It!

Saves 10 to 25% of the coal your boiler is using.

Positive guarantee given

Send for circular "N" and our famous Lecture on Combustion.

U. S. ROCKING GRATE BAR CO., 77 Jackson Boulevard, CHICAGO.

Wittbold  
Watering System

The saving in time and labor for one season will pay for a complete equipment.

For particulars write to

E. H. HUNT

76-78 Wabash Ave., CHICAGO.

## "GREENHOUSE MATERIAL"

300,000 feet of Standard Pipe, all sizes, will be cut to any length.

JACKSONVILLE, FLA.—Mills the Florist has secured a 99-year lease on the valuable property of Dr. P. J. Stollenwerck on Adams street.

# Ammoniated Lawn Lime

### Kills Weeds.

Applied as a light top dressing to lawns it kills all flat leaved weeds such as Dandelion, Daisy, Plantain, Sorrel, Chickweed, Moss, etc., in 48 hours and without other fertilizer produces a wonderful, luxuriant, rich, green growth of lawn grass—which is distinctly noticable 50 feet away.

### Makes Grass Grow.

The use of Ammoniated Lawn Lime supersedes hand weeding of lawns, putting greens, etc. It saves the grass from being pulled up and in many cases ruined. Grasses take a new vigorous growth, avoiding probable trouble in the future.

**Quantities:** If very weedy 1-lb. to 40 square feet, 25-lbs to 1000 square feet, (20x50). Half to one-quarter amount if moderately weedy.

**ABSOLUTELY GUARANTEED.** Money refunded if not satisfactory.

We want Seedsmen or Florists as agents and distributors in every important city and town.

**Retail Prices:** 2-lb. cans, 25c, 50 cans per case. 5-lb. cans 50c, 20 cans per case. Bags, 25-lbs. \$2.00; 50-lbs. \$3.50; 100-lbs. \$6.00.

Descriptive Circular and Wholesale Prices on Request.

**Louisville, Kentucky.**

## The "Meyer Green Silkline"

is the only Green Thread that should be used by florists and growers. It is guaranteed full weight and full measure.

Also Violet Thread for tying up Violets. Price of both, \$1.25 per lb. express or freight paid in good sized orders.

**JOHN C. MEYER & CO.,** 1449 Middlesex St., Lowell, Mass.

## Evergreen Brand Flower Fertilizer.

A Pure Plant Food immediately available. It permanently enriches the soil. It prevents the onslaught of plant diseases or insect pests. Can be used at any time during the growing season, dry or in solution. Put up in 12 pound cans, Price, \$2.00 each.

**For Sale by Leading Jobbers**

Further information can be obtained from

**D. D. JOHNSON CO.,** 64-66 Wabash Ave., CHICAGO-  
Manufacturers,

## The Mastin Automatic Whitewash and Spraying Machine

### Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods, and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

**J. G. MASTIN & CO.,** 3124 West Lake St., CHICAGO, ILL.

**AMERICAN FLORIST CO.**  
324 Dearborn St., Chicago.

Dallas, Tex.

The Green Floral Co. has just completed inventory of its first year's business since the firm was incorporated. Colonel Green states that the trial balance shows a much larger percentage to their credit than had been expected, which is very satisfactory to the corporation. It had been rumored that the colonel had lost his enthusiasm in the work, but a few moments talk with him will convince any one that he has just started, and as he says, shortly some of his good friends will sit up and take notice.

Col. Green states that the demand for cut flowers in the state of Texas is increasing so rapidly that the present plant is not large enough to meet it. Therefore, this present season he will add 100,000 square feet of glass, making it the largest and best equipped plant in the south, and this will be used exclusively for growing cut flowers for the wholesale trade.

In addition to the above plant, he now has under construction 100,000 square feet of glass which, when completed, will be used exclusively for growing pot plants for the catalogue trade. It will be operated in connection with the Southern Floral Co., of this city, which Colonel Green purchased last February. This department of the business will be separate and distinct from the Green Floral Co.

## The Logical House for the Logical Grower

Logical because it perfectly meets the requirements for a house of greatest productiveness and greatest safety.

Its complete Sectional Iron Frame, with the essential number of columns for its support, makes it unnecessary to obstruct the light by a network of trussings. No part is heavier than necessary for safety, and still it is lighter than any other house built any other way.

It is only logical that columns relieve the ridge and eaves from bearing the strain of

the tremendous weight of the roof, besides safely fortifying it against wind and snow pressure.

In all its history of a quarter of a century, it has a record of no blow downs or cave-ins. And so we say again it is the logical house for the logical grower. This one is Alban Harvey & Sons' at Bradywine Summit, Pa., and is 45 feet wide and 250 feet long.

When you think of building, think of us as the builders.

## HALF HOUR CHAPTERS FOR PLANT GROWERS

### Caladium Esculentum.

Without going into the question of the beauty or suitability of Caladium esculentum for window boxes the fact remains that some people like them and this makes considerable demand for started plants around the end of the month. Any old roots or bulbs that are still laying around should be put into shape and will sell if there are one or two fairly well developed leaves on them. The plants do not need much heat, but the leaves will develop more freely in a fairly moist atmosphere and it means a good deal to have them looking fresh and good at the time of sale. A more legitimate use for this plant is for bedding out in summer and many customers will be looking for "elephant's ears" for they are very striking when well placed in the flower garden. At any rate it is a plant well worth growing in fair quantities for which there will sure to be a demand.

### Ardisias.

Seeds of Ardisia crenulata may be sown now. Sow the seeds in a fairly warm house and grow the young plants on in a cool, light house. With due care they will be strong enough in 12 months to bloom freely, and these flowers will set berries, making the plants fit for sale the following Christmas. Old plants that have become leggy may have the tops mossed the same as crotons or dracenas are treated and, when rooted, potted in small pots and grown on. The flowers will go on forming even while the tops are being rooted, and will set berries in time for Christmas sales. This popular plant may also be increased by means of cuttings of young wood inserted now and grown on through the summer as advised for seedlings. Many growers appear to fight shy of these plants for some reason. They are not difficult to grow but probably the most trouble is with insects. Red spider and scale both bother the plants, and no amount of care will keep them healthy if these are allowed to remain. But kept clean

in a cool, airy and comparatively moist house no grower need be afraid of tackling these plants which always sell well at good prices.

### Crotons.

Where there is a brisk demand for crotons their propagation may be carried on practically all the year around, providing there is a bench with heat beneath it. The cuttings inserted last month are now ready to be potted, and when cleared out another batch can be inserted at once. They root very easily if kept moist, both above and below, and with a brisk bottom heat. The leaves have to go pretty close together in the propagating cases and in consequence are apt to fall afterwards if exposed too suddenly to bright sunlight. This necessitates a closer and somewhat shaded position for a week or two after they are taken out of the cases, but when growing freely and well established crotons delight in plenty of sun heat tempered with abundant atmospheric moisture. Not only do the leaves color better in such positions, but the growth is more solid and stands better than that produced in hot, shady houses. Good loam and semi-decayed cow manure in the proportion of six to one and a liberal sprinkling of sand is a good compost for these plants. Highly nitrogenous foods are not advisable as they lead to poor color in the leaves.

### Primulas.

From now on, primulas will have to be kept as cool as possible by day, and the night temperature should be kept around 50°, with air on if possible. This will prevent the young plants becoming drawn and weakened as they will do in hot houses or in frames kept tightly closed. Keep the plants as near the glass as possible for the same reason, and maintain a moist atmosphere rather than moisten the roots too much. It is true the primula is a moisture loving plant and cannot thrive without plenty of water, but the young plants are not any too well rooted and cannot take up the

moisture as freely now as when they are larger and in full growth. Seed pans or flats containing seedling plants about half an inch high sometimes scale over on the surface and this scale should be frequently broken up with a pointed stick or label to admit air to the roots. If this is not done the plants lose color and grow but slowly. Besides this, the surface being caked over prevents the water percolating to the lower part of the compost and the roots are starved. This is a frequent cause of damping off at the collar or just above ground. As soon as ready the seedlings should be pricked off into other flats and the new soil will give them a fresh start. It is not too late to sow again, either *Primula Chinensis* or *P. obconica* and the plants will be at their best early next spring, at a time when good flowering plants are always in demand.

#### Winter Flowering Geraniums.

There is always a demand for small, well grown geraniums and cuttings rooted now will make nice stock by next winter. By the end of the month the propagating cases will be relieved of some of their load and there will be room for a good batch of geraniums if the stock can be procured. It will not do, of course, to be cutting away at stock intended for bedding, though there may be a few cuttings taken without doing any damage but with the plants that are to be set out for stock purposes it is different. These can all be relied on to supply a cutting or two and altogether quite a respectable batch of plants can be worked up with very little trouble. Although every two eyes will make a cutting it is not good policy to cut the growth up too small and well furnished tops are best. These should be kept in a batch by themselves and the lower part of the stems cut up and kept in another. All will root easily now in the ordinary cutting bench if kept moist. Pinch the point out of each and remove any flower buds that show before inserting. As soon as rooted, the plants should be potted in small pots and grown on in frames or a light bench. The idea is to keep them growing right along steadily and to avoid a rapid, soft growth. With this end in view the plants must be potted firmly, using the potting stick freely. During the whole of the growing season the plants should be occasionally pinched to cause them to bush out freely and all flower buds removed on sight.

KANSAS CITY, Mo.—The W. H. Humfeld Floral Co., which has been located at Ninth street and Highland avenue for the past 18 years, will move to 1010 East Thirty-first street on or about August 1. The firm has leased a large store room at this number. We understand that some greenhouses will be built in the rear of this store. Mr. Humfeld says that many of his firm's customers have moved to this part of the city and it will be much better to be in this location. The name of the firm will be changed to the Humfeld-Orear Floral Co. L. N. Orear, whose name now appears in the title, has been with this firm for the past few years, and as a decorator he ranks among the best in the city. We wish the firm every success in its new location.

## THE RETAIL TRADE

### Chicago Automobile Parade.

From every point of view it is much to be regretted that the weather man was so unkind on Saturday last, the day scheduled for the automobile parade at Chicago. The rain commenced just about the time for starting and continued so persistently that it was decided to postpone the parade until Monday. This was all right as far as those cars decorated with artificials were concerned but for the natural flowers it was, of course, disastrous as two days would greatly mar the decorative effect of the flowers. This being the case several of the cars were started out and made a tour of the city but the effect from a spectators point of view was, of course, very poor. On Monday the real parade was staged and, taking all things into consideration, was very successful. Thousands of people lined the route taken by the cars and the enthusiasm as various popular devices passed was great, though it must be admitted artificial flowers were greatly in excess of natural.

The work of decorating the cars appeared to be pretty well divided up among the principal retailers and their efforts were crowned with complete success from a decorative point of view. The Geo. Wittbold Co. decorated two large cars for the Chicago Examiner, carrying out a scheme of window box and flower garden effect with all classes of stock used for this purpose, palms and other large decorative plants being used on top. August Lange also decorated one for the same firm, using American Beauty roses entirely. He also decorated a Studebaker touring car with Beauties and another with pink and white roses, swainsona and white lilac. One of the most popular cars in the whole parade was that decorated by the Fleischman Floral Co. for Tom Murray. This was treated with Killarney roses all through with fine specimen hydrangeas on the roof. This car on Saturday was certainly magnificent and, unlike some others, it showed little the worse for wear on Monday. John Mangel decorated two Studebaker

cars, one with Winsor carnations and *Asparagus plumosus* being very artistic and effective. Harry C. Rowe put in some good work on a large Buick limousine, the windows being panelled with white carnations, lettered "Buick" and draped with asparagus. In another touring car Mr. Rowe decorated the body with Beauties and asparagus and built arches six feet high of Beauties, the wheels being picked out in red carnations. A large Welch touring car by the same florist was treated with pink and white roses, carnations and Beauties and draped with *Asparagus plumosus*.

### Hughes' Maypole Dance.

As a May day attraction to his store, H. R. Hughes of West Van Buren street, Chicago, annually trains some 100 children for a Maypole dance, as shown in the accompanying illustration. Naturally, the children look forward to his party and talk about it, interesting their parents and thus proving an excellent advertisement for Mr. Hughes' store. This is one of the many advertising schemes he pulls off at various holidays and probably one of the most satisfactory, for it is a well known fact that if the children are interested the interest of the parents and other "grown-uns" will assuredly follow.

### Keeping Cape Jasmines.

A shipper of the pretty Cape Jasmines to the principal markets and retailers writes as follows respecting their keeping qualities: "After being packed the flowers can be kept in a cool dark place for a week or 10 days, if the packages are undisturbed, but the top of the crates should be removed and the top papers kept damp, but not wet, with a watering pot.

The night before they are wanted stand the packages in cold water almost to the flowers. In the morning they will be found as fresh and white as if just picked. If retailers understood their lasting qualities they would use them more. When they come too early, and for Decoration day, if ordered and kept as directed, many people would not be disappointed."

## THE ROSE.

### Summer Roses.

A paper read before the Buffalo Florists' Club on Tuesday, May 3, by Charles T. Guenther.

Not so many years ago there was practically no demand for good summer roses and in consequence none, or very few, were grown. Whatever demand there was had to be filled with roses which were grown for winter cut or all the year around. Of course a lot of LaFrance roses were grown during the whole year and it was certainly a beautiful flower, and I am at a loss to understand why it is not grown now.

About 1892 or 1893, Testout was sent out and first grown for winter flowering and was found to be too expensive. Kaiserin followed about the same time and while working at a well known rose grower's place around New York, it gave such poor satisfaction during the winter months that it was thrown away after two years' trial. But what a grand flower for summer cutting! After trials in several places for summer flowering it gave such satisfaction that it is today the only good white summer rose grown. It has several faults but these can be overlooked when we get these grand flowers which the plants will produce all summer long. Testout was tried the same way and extensively grown on the same principle in the east.

Shortly after, President Carnot was sent out and while wanting as a winter bloomer, the fine flowers produced on long stems during summer were very pleasing to the grower. The public, however, was slow in taking hold

and I remember that we were growing this rose for about a year and a half before there was any real demand for it. Now it is well liked and a rose of the same color for winter cut would be very welcome. A few years after Killarney appeared and while disappointing when first seen, we must say that since, it has conquered the world. It is a free bloomer during winter and the same plants will produce good flowers during the summer. It is more particular about treatment than other roses, but when well grown, the color is good, also the stem. The foliage takes mildew easily and the flowers are somewhat single, but the public likes the flower just the same.

La Detroit made its appearance shortly after and we always liked the flower. We are growing a few for the summer cut at present, but as it opens so quick during warm weather, we will probably replace it with another pink one, called Ideal. This is a sport of LaFrance, somewhat darker than the parent, but the plants we have have given such satisfaction that we may grow more for pink for summer cutting. When the flower is cut it seems quite single, but the flowers open so nicely and are so full that you can scarcely improve it, and the flowers have fine fragrance. Wellesley is another good pink summer rose, but as we have not grown many, I cannot give you my opinion until later.

In the darker red roses, we have practically only American Beauty, which gives satisfaction to the buyer at any time of year, if not always to the grower. Of the newer roses, My Maryland is very well spoken of, but what it will do can be seen only next year, as the limited stock in this

country is used this year for propagating. White Killarney showed up fine in several places where I have seen the flowers and if it will prove as good a seller as Killarney, it may become a standard rose for all the year round. President Taft is another new rose and by what we have seen of the flowers we would think that it will make a fine summer rose. All these roses have to be grown in greenhouses around Buffalo to give good results.

But one rose has given us very good satisfaction outdoors and that is M. Cochet. Flowers from outside are better than those grown inside unless they should get spoiled from rain. After several trials of keeping plants of this variety outside, all winter, we dig up the plants in the fall, pot and store them in a cold house where they begin to grow slowly in the spring. At the end of May we plant them outdoors and if watered well we get a lot of good flowers all summer long. Cochet and its white sport should have the widest dissemination among owners of gardens who like to cut a few roses during the summer from their gardens. Around Baltimore this rose will stand the winter outdoors but here we have not succeeded in keeping it in good shape. Many more roses fairly good for indoors and very good for outdoors can be mentioned, but as my experience with these has been limited, I leave it to some one more able to handle the subject.

WORCESTER, MASS.—The H. F. A. Lange Co. is now in its new store at 371 and 373 Main street and held open house all last week. The store is modern in every respect and the interior is as convenient as it is artistic. It was designed by A. H. Lange.

## ORCHID NOTES.

### Orchid Flowers.

In studying the flowers of the great orchid family, their wonderful variety is perhaps the most striking feature. Although it is not the largest family in point of numbers there is certainly no other natural order that contains such a varied lot of flowers. Yet, with all this wondrous change of form and feature there is that distinctness about an orchid flower of any species or

and revered it almost as much as their patron saint.

The famous Chatsworth collection of orchids in England is said to have been started, many years ago, owing to the vivid impression made upon the Duke of Devonshire of that period by some flowers of the butterfly orchid, *Oncidium Papilio*, when shown at one of the meetings of the London Horticultural Society. In this singular plant, the head, antennæ and eyes of a butterfly are wonderfully imitated while the petals easily pass for the

The fly, spider and lizard orchids are also well worth noting as interesting and striking instances of mimicry.

### FLORAL STRUCTURE.

Outside of exact likenesses to insects or other things the floral structure of orchids is very remarkable. We do not propose to go minutely into this as it is far too big a subject. Those interested will find a mass of information in a little book by Darwin, "Fertilization of Orchids," in which the wonderful means taken by Nature to prevent self fertilization of the flowers and the marvelous contrivance in their structure to invite fertilization by insects are fully described. It is a most fascinating and delightful study and the great naturalist was very happy in his language and very convincing in his arguments. But there are many of such singular structure that they command attention. Take for instance the beautiful *Dendrobium Brymerianum*, a plant that is well worth growing from an ornamental point of view besides being of great interest botanically. The lip is cut up into a number of long, delicate filaments of the most beautiful golden yellow, twisted and curled like those of a Japanese chrysanthemum. As a purely botanical species *Bulbophyllum barbigerrum* is worthy of note and is a most remarkable plant. Dr. Lindley's description of this plant is worth quoting:

"The lip is one of the most extraordinary organs known, even among orchidaceous plants. It is a long, narrow, flexuous, sharp-pointed body, closely covered with a yellow felt; just within its point is a deep purple beard of exceedingly fine hairs; on the under side at a little distance from the point of the lip is another such beard; and, besides this, there is at the end of the lip, a brush consisting of very long purple threads, so exceedingly delicate that the slightest disturbance of the air sets them in motion when they wave to and fro like a tuft of threads cut from a spider's web. Some are of the same thickness throughout, others terminate in an oblong club so that when the hairs are waving in the air (and I do not think they are ever entirely at rest) a part floats gracefully and slowly while others are compelled

WINDOW BOXES AT BUFFALO, N. Y.

variety that anyone who is of an observant turn of mind, no matter how inexperienced or unversed in botany, can tell an orchid at a glance. The commercial man does not bother himself about this, he goes on and grows his cattleyas and there is nothing else in the orchid world for him. But the great interest in orchids generally, that seems to be reviving all over the country, must be our excuse for leaving the commercial end for once and taking a hasty glance at some of the real attractions of these "aristocrats of the floral world" as they have been called.

### MIMICRY.

We have no patience with the people who pretend to find a resemblance in orchid flowers to everything on earth from a baby to a rattlesnake. There are sufficient really striking and remarkable instances of mimicry in the flowers to render the finding of fanciful and outlandish ones unnecessary and the far fetched ones serve only to lessen the interest taken by would-be patrons of the cult. Although everyone will not agree with us we think that perhaps the most beautiful and striking instance of mimicry is the dove orchid, *Peristeria elata*. Looking at this plant from a commercial point of view, there is not much to it. Even as a decorative plant it has many superiors, but look into the flowers. The column in the center is an exact representation of a pure white dove, with wings partially erect as if just settling down upon its nest. What wonder that the superstitious natives of Panama, its habitat, worshipped it or that the Spanish settlers in Central America called it *El Spirituo Santo* or Holy Ghost plant

wings. At a little distance the long wiry peduncles of the flowers are almost invisible and by a very little stretch of the imagination one can fancy the butterfly hovering over a flower. It is a striking and beautiful instance of the wonderful works of Nature. Not less remarkable is the wild bee orchid, *Ophrys apifera*, which is found plentifully on the chalk hills in the southern parts of England and in various parts of the European continent. The likeness to a bee is more striking in dwarf plants growing in the open than in others that grow in shaded or moister positions. The bee appears to be settled on the grass and naturalists tell us that even birds have been deceived by the striking likeness.

WINDOW BOXES AT BUFFALO, N. Y.

VERANDA BOX BY THORLEY, NEW YORK.

Terra Cotta Box Filled With Ivy, Foliage Plants and Palms.

by the weight of the glandular extremities to a more rapid oscillation. Nor is this all: The lip itself is articulated with the column by such a very slight joint that to breathe upon it is sufficient to produce a rocking motion so conspicuous and protracted that one is really tempted to believe there must be something of an animal nature infused into this most un-plant-like production."

Another remarkable plant in a totally different way is the long spurred angræcum. *A. sesquipedale*. The beautiful pure white flowers of this species have spurs to the nectaries over a foot in length and these give a most remarkable appearance to the flower. Again referring to Darwin he suggested that there was probably an insect with a proboscis of sufficient length to reach the nectar at the bottom of this spur, an idea that was scouted by the wiseacres of his day. It is said, however, that there are insects with probosces over 10 inches in length kept rolled up until needed for use when they are unfolded, so possibly the great naturalist was not so far out in his conjecture after all. Those singular cypripediums, too, of the caudatum

group with their sepals elongated to over a foot in length, pendant and ribbon like, are very beautiful and sure to command attention wherever seen. There is, in short, a most remarkable number of quaint, wonderful and striking variations in the orchid family. In this note we do not pretend to describe them in any measure fully but if it causes anyone to take an interest in these wonderful creations—"these un-plant-like productions"—then the time spent on it will not be altogether wasted.

## ORCHIS.

## Claim for Orchids.

Morristown, N. J., May 5.—On the question as to when is an orchid dead hangs a claim of \$2,055, suit for which is before the Circuit court. Lager & Hurrell, of Summit, ordered from M. A. Ordonez, of South America, 73 cases of orchids of that country. When the plants arrived at Summit, the firm claims that most of them were dead and declared \$500 was paid for the good ones.

Mr. Ordonez told Justice Black yesterday that he and his brother gather-

ed the flowers in Colombia, South America, and that the plants were carefully packed, passed the custom-house and were in good condition when they reached Summit. The witness said further that he was in Summit when the cases were opened. The plants, he said, were gathered in the interior of Colombia and were wrapped with dry fern leaves about the roots for shipment.

John D. Lager, of the Summit firm, told the court that the plants were not properly packed, and that the heat and drought had killed them during the voyage here. Many of them had the appearance of being alive, he said, but the vital parts of the plants had been affected. Out of the 73 cases received, he said, only eight were fit for use.—Newark News.

ATLANTA, GA.—The Atlanta Floral Co. had a very effective window May 2 in honor of the music festival and of Madame Fremstad, the great Swedish singer, in particular. The Madam visited the store to view the decorations in her honor, which of course made news for the local papers and advertising for the store.

## THE GLADIOLUS.

GLADIOLUS GROWERS, by making a proper presentation of their case at the Rochester convention of the Society of American Florists next August, should obtain recognition as a section of the national organization, which would serve all practical purposes at a minimum cost and largely eliminate the undesirable features of separate societies, tendency to varia-

this line. Knowing this, one or two growers have very generously volunteered to carry out some co-operative experiments. With this suggestion I have prepared a plan for such field and harvesting experiments, as we think most promising, judging by what we have learned of the nature and cause of these diseases. This plan is submitted below for the benefit of growers who might be interested. We shall be glad to have as many as possible test out any or all

or possibly even adhering to the surface of healthy corms or possibly even adhering to the surface of healthy corms that have been in contact with diseased ones. As to which of these methods prevails or when and how infection takes place, we have yet to learn. We therefore consider it probable that certain sanitary methods of handling the crop would materially reduce the rot in many cases. With this in view the following experiments are suggested.

### FIELD EXPERIMENTS.

Plat 1.—Perfectly sound seed corms on soil where gladioli have never been grown.

Plat 2.—Perfectly sound seed corms sterilized by immersing in five per cent formalin for 10 minutes on soil where gladioli have never been grown.

Plat 3.—Diseased seed corms on soil where gladioli have never been grown.

Plat 4.—Healthy seed corms on soil where diseased corms had grown last year.

Plat 5.—Diseased corms on soil where diseased gladioli had grown last year.

Plat 6.—Healthy seed corms sterilized on diseased soil.

Plat 7.—Healthy and diseased seed corms on diseased soil, heavily limed, two tons per acre.

Plat 8.—Healthy and diseased seed corms on diseased soil fertilized heavily with acid phosphate, 1,000 pounds per acre. In selecting sound seed corms the husks must be removed and each examined very carefully.

In cultivating, the infection may be carried to the new soil plats by tools. If available use another set for these. If not, cultivate clean plats first each time. Observe conditions at harvest time and store corms from each plat separately. Sort in winter to determine percentage of rot in each.

### HARVESTING EXPERIMENTS.

I would suggest some experiments in regard to harvesting. It seems that the disease continues to develop quite seriously after harvesting, in storage. Now, whether the infection has all

GLADIOLUS BULB ROT—CHECKS, NOT INOCULATED.

tion in standards, duplication of work, lack of authority, spasmodic activity, etc.

### Gladiolus Bulb Rots.

#### CO-OPERATIVE EXPERIMENTS.

During the past season many letters of inquiry have come to this department asking for information concerning diseases of gladioli. Many growers are anxious to know how to control, or prevent the rot affecting the corms, which is so common and which in some cases causes serious loss. During the season of 1908 and 1909 the writer undertook an investigation of these diseases and succeeded, after some difficulty, in locating the organisms responsible for several types of disease. From quite similar types of rot three different fungi have been isolated, grown in pure culture and the diseases reproduced artificially by inoculation. With two of these the inoculation experiments of last season have been repeated within the past month and the results seem conclusive. The inoculated corms have in every case developed the rot in less than two weeks, while the check corms remained perfectly sound. I have now, therefore, no doubt that the fungi which we have located are the cause of the disease. A full description of these diseases and the associated fungi will appear later in a bulletin of the Cornell Experiment Station. A very brief description with some notes was given in the Rural New Yorker March 19, 1910.

Unfortunately we are unable as yet to give any definite information as to methods of control, and have not the time at our disposal necessary to personally conduct experiments along

of the points here mentioned and report results to us. The larger the number who can duplicate these experiments, the more reliable will be the conclusions to be drawn therefrom.

Judging from what we now know concerning the fungi causing these diseases, it does not seem probable that any method of spraying can be devised to control them. They are evidently more or less soil organisms and are probably carried over in the soil or in or on diseased seed corms

GLADIOLUS BULB ROT—INOCULATED MARCH 10, PHOTOGRAPHED APRIL 2.

PHLOX SUBULATA.

## HARDY HERBACEOUS PERENNIALS.

### Low Growing or Tufted Perennials.

A large number of the low growing perennials are charming plants for the front part of the perennial border, or for use in pockets in nook work. Some of them can be also used to good advantage for edging in situations where that is desirable. Such things as *Armeria maritima*, *Cerastium tomentosum*, and *Dianthus deltoides* are good subjects for this purpose, depending, of course, upon the height of the border desired. *Armeria cephalotes* and its variety, *alba*; *A. maritima* and the varieties *Lauchiana* and *alba*; and *A. juncea* are amongst the best of the armerias. The different species and varieties flower at various periods throughout the summer season. They are easily raised from seed, and if sowed in spring, nice plants can be had the following year. They are also easily propagated by division of the stools. This may be done early in spring or in August or September. *Armeria verna*, and its variety *caespitosa* are charming dwarf little plants, and are well adapted for rock work. The white, somewhat star-shaped flowers, in summer are attractive. They are easily propagated by division, and seeds germinate readily. *Arabis alba* and its double flowering form is a most useful early blooming perennial plant. The white flowers in early spring are conspicuous at a long distance and it is remarkably easy of cultivation. Perhaps the best time to divide this is about August or early September. If the divisions are potted and placed in a cold frame from which frost is excluded in winter, so as not to smash the pots with frost, nice plants can be had to plant out the following spring. The aubretias in different forms, such as *Graeca Leichtlini*, and *deltoidea* are charm-

ing low plants with differently tinted lavender blossoms in spring. They do nicely on sunny, well drained slopes. In such a position *A. Graeca* has maintained itself with us for a great many years. Aubretias are easily raised from seeds. They are not good subjects for division, but they can be propagated from cuttings. *Alyssum saxatile*, and the variety *compactum*, are beautiful in spring with their dense sheets of golden yellow blossoms, and they always attract attention. *Alyssum saxatile* is so easily raised from seed, and this is certainly the best way to get up a stock of it. Of course, the variety *compactum* to make sure of it had better be propagated from cutting. The hardy pinks (*Dianthus*) are everybody's favorites, and no florist who deals in hardy plants should be without a supply of them, and no garden that includes a few hardy perennials in its limits should fail to be without them. *Dianthus caesius*, *D. arenarius*, *D. deltoides*, *D. petreus*, *D. plumarius* and *D. cinnabrinus* are amongst the best of the hardy pinks. They are all easily raised from seeds and their propagation from cuttings is an easy matter. Care should always be exercised in planting them on warm, well drained soils. They will not succeed at all on cold, heavy soils. *Heuchera sanguinea*, with its tufted heart-shaped leaves, surmounted in midsummer with the graceful spikes of deep red flowers about 1½ feet high, is a charming, beautiful plant. The long, graceful spikes lend themselves appropriately to house decoration when cut. It can be profitably raised from seeds, or it can be readily divided in spring, or at the end of August. There are several varieties of this, but so far we do not think that any of them are superior to the types for graceful

taken place in the field or continues to take place in storage we are not able to state positively. If it continues to take place in storage there is a possibility of the germs of the fungus being spread from the affected bulbs to the healthy ones during the process of harvesting. To illustrate: If the corms are harvested and thrown together in the bins with the old mother corms, still adhering and allowed to stand for a couple of weeks or so before cleaning up and removing the old corms, there would seem to be ample chance for the germs to be spread into all the corms of the bin from the few diseased ones by means of the particles of soil that are adhering to them. During this time, unless they have been thoroughly dried at harvesting, they are likely to take more or less of a sweat, which results perhaps in the production of sufficient moisture to favor infection, wherever the fungus is present. This is merely a suggestion as to what might happen and I would not dare to label it as even probable, as yet, but experiments as outlined below should give us some line on this point.

First, select some variety that is susceptible to decay in storage. In harvesting in the fall allow each corm to lie where it has been pulled until dry. When thoroughly cured remove the mother corm, husk, treat with five per cent formalin for about five minutes, and then store. Do not pile in heaps or bins before treatment. Another lot from a row close by treat in a similar way, omitting the formalin treatment. In part of these omit the husking but simply allow individual corms to dry thoroughly before being heaped together and remove the mother corm and as much of the adhering soil as possible before being heaped together, in the bins. In another row close by gather and dry and store in bins with the mother corm attached, and re-sort two or three weeks later in the usual way.

ERRETT WALLACE,

Cornell University, Ithaca, N. Y.

beauty. The perennial candytufts (*Iberis*) with their sheets of snow-white blossoms in spring are indispensable for garden decoration, and the evergreen effect they maintain throughout the season renders them particularly valuable. *Iberis sempervirens* is the most useful of the genus and is remarkably showy in April and May. *I. corifolia*, *I. Tenoreana*, and *I. Gibraltaria*, are fine garden plants. The last named, however, is somewhat tender and requires good winter protection in our latitude. They are easily raised from seeds and can be readily multiplied from cuttings.

The tufted phloxes are a class of hardy perennials that are remarkably useful and showy in garden decoration. *Phlox subulata* in its numerous forms is one of the best of them. The white variety is very beautiful in sheeted masses. There is a variety of *P. subulata* under the name of vivid, with intense rosy-pink flowers that blossoms much later than the type, that is an excellent garden plant. Masses of it in bloom present a very brilliant appearance. I remember about 12 years since seeing a cemetery at Belfast, N. Y., 70 miles south of Rochester, in which there was several thousand square feet of *Phlox subulata* in several forms, which had completely covered the ground, and even choked out the grass. It was in full flower at the time I saw it, and the effect was so glorious that I felt like raising my hat to it, and I have never forgotten it. *Phlox amœna*, *P. reptans* and *P. divaricata* are excellent decorative plants. *P. divaricata*, to do well and be satisfactory, should always be planted in partial shade, and should have a little winter protection, for although a common native plant in

our rich woods, it does show a tendency to winter killing in cultivation. The tufted phloxes are all readily increased by division of the clumps. To break them into small bits in August and September, and pot them in 2½-inch pots, and treat them as above mentioned, for *Arabis albida* is a good method to secure a stock of them. In the following spring nice plants can be had, which, when planted out, will soon spread and make dense mats. There are many more good low perennials we have not mentioned, but these are perhaps a few of the best of them.

JOHN DUNBAR.

### Society of American Florists.

#### THE CONVENTION CITY.

Most of the readers of the *FLORIST* know that the twenty-sixth annual convention of the Society of American Florists is to be held in Rochester, N. Y., August 16-19, 1910. For some of our friends it will undoubtedly be the first visit to the flower city, and the handsome streets, homes, parks and gardens will be attractive points of interest. Others will find many changes in the business center as well as in the residence sections that will be worthy of a visit. But for all it will be a "city of delight," with artistic effects pleasing to the landscape gardener, greenhouses and fields of flowers to claim the attention of the florist, and, in the largest nurseries of the world, the horticulturists will find many of the new introductions.

The convention hall, an illustration of which is shown herewith, is located two blocks south of Main street east, facing Washington park, with Clinton avenue south on the left, and South street on the right. The hall consists

of two large buildings, the main structure being 70 x 170 feet. The front of this building will be given up to the sessions of the S. A. F., a special room having been prepared for this purpose. The remainder of this building will be given over to the trade exhibition and here the cut flowers, pot plants, and florists' supplies will be arranged.

The adjoining building, which was erected in 1909, gives a floor space of about 92 x 130 feet, and here the light machinery and the heavier appliances—boilers, heating apparatus, and greenhouse construction—will be exhibited. A large gallery extends over three sides of the main building and will be used for some of the exhibits. Altogether Convention hall contains about 48,000 square feet of available exhibition space. Supt. Chas. H. Vick says the 1910 exhibition will be "the biggest ever," and states that entries for space are coming in daily and that space reservations are very large.

Band concerts will be given afternoons and evenings by the Fifty-fourth regiment band of 25 pieces. The Rochester florists are planning great doings for the S. A. F., and the Ladies' Auxiliary, and every visitor is sure of a royal welcome and the best that Rochester can give.

MINNEAPOLIS, MINN. — Twin City members of the Minnesota State Florists' Association met at the Commercial club April 28 to make preliminary arrangements for the fall flower show. The following directors were elected: Wallace G. Nye, chairman; Theodore Wirth, L. S. Donaldson, J. S. Mitchell and O. C. Swanson of Minneapolis, and A. S. Swanson, L. L. May and O. J. Olson of St. Paul.

CONVENTION HALL, ROCHESTER, N. Y.—VENUE OF THE CONVENTION OF THE S. A. F., AUGUST 16-19, 1910.

## OBITUARY.

### The Late George W. Williams.

The late George W. Williams, of Providence, R. I., whose death was briefly chronicled in our issue of April 30, page 686, had been in failing health for a year. He was 74 years of age and had lived all his life in Providence and its vicinity, being a descendant of Roger Williams, the founder of that city. He was born May 16, 1836, and attended the public schools, Belding's classical institute and a business college. When 18 years of age he entered the seed and implement house of Burdick & Barrett and five years afterwards bought out Mr. Burdick's interest, when the firm name was changed to W. E. Barrett & Co. There were sundry other changes previous to Mr. Barrett's death in 1891, when the concern was incorporated as the W. E. Barrett Co., with Wilbur A. Fisk, president, Geo. W. Williams, treasurer, and Geo. F. Williams, the latter's son, secretary.

Mr. Williams was much interested in the agricultural fairs formerly held in various parts of the state, and was treasurer of the old State Fair Society. He became interested in Prudence Island as a summer resort, was heavily interested in the Prudence Land Co., which acquired several hundred acres of land in the southwest part of the island, later called Prudence park, and built his summer home there. Mr. Williams' first wife, Amy Ellen Westcott, whom he married in 1857, died in 1876, and his second wife, Elizabeth Darling Nickerson, to whom he was united in 1878, died in 1895. He is survived by five sons, Geo. F., Leon J., Edward B., Clinton N. and Ralph E. Williams, and by one brother, Francisco C. Williams of Pawtuxet.

### Baron Schroeder.

Baron Schroeder, one of the most munificent patrons of horticulture in England, died at Sidmouth, Devon, in his eighty-sixth year, April 24. "The Baron," as he was familiarly known among horticulturists, was the possessor of one of the finest collections of orchids in existence and for many years his exhibits at the Temple and other shows of the Royal Horticultural Society were looked forward to with greater interest perhaps than those of any other exhibitor owing to the great number of rarities always found among them. But not only orchids were grown at The Dell, Egham, though these were the most famous. Plants of all kinds, indoor and out, were included and nothing but the best in its class was good enough for inclusion there.

As a business man and a liberal patron the late Baron Schroeder was among the best friends of the Royal Horticultural Society. He first joined the council in 1886, soon after the trying South Kensington experiences of the society. In 1901 he was made vice-president and soon found a site for the new hall which the society had needed so long owing to the cramped conditions at St. James hall, Westminster. So highly did he think of the site that he promised the equivalent of \$25,000 to the building fund for the hall and later gave another \$5,000 for the equipment of the Lindley library rooms. He was also a most liberal patron of gardening charities and in 1893 was chairman at the festival dinner of the Royal Gardeners' Benevolent Institution. His home was filled with most beautiful works of art of all kinds and the late Queen

Victoria was known to have a warm regard for him. He was a true sportsman, a fast rider to hounds and a first-class four-in-hand whip as well as a fine shot, indulging his taste for the gun in the great forest he rented in Scotland and the usual game shooting in England. The funeral took place at the Englefield Green cemetery and was attended by the president of the R. H. S. and many other distinguished horticulturists.

### Henry C. Eickhoff.

Henry C. Eickhoff, one of the best known nurserymen in Indiana, died suddenly April 29 of heart trouble at his home about five miles southeast of Indianapolis, on the Michigan road. Mr. Eickhoff was born June 9, 1853, on the farm where, since his twentieth year, he carried on the nursery business. Originally he conducted the business in partnership with his brother, Edward A. Eickhoff, under the firm name of Eickhoff Bros., nurserymen. In later years, however, he conducted the business in his own name. His home and surroundings were always a beautiful example of

The Late Baron Schroeder.  
After 'The Gardeners' Chronicle.'

landscape gardening. In 1907 he became ill with heart disease and complications, from which he never fully recovered. He leaves a widow, formerly Miss Elizabeth Kuehn, and eight children, five girls and three boys.

### Henry Blanksma.

It is with a feeling of sadness that we again are called upon to chronicle the death of one who has been among us for many years. Henry Blanksma of the firm of Blanksma Bros., Grand Rapids, Mich., died at the Reeds Lake sanitarium of pneumonia May 5. He was one of the best known greenhouse men in the city, a man of excellent character and held in the highest esteem by every one who knew him. He was a good business man and his good judgment was sought by many who were near to him. Henry Blanksma was born in the Netherlands May 10, 1876, and came to Grand Rapids in 1892 and began working at the Grand Rapids Floral Co. He worked there several years and was with Henry Smith for about four years, then went into business for himself on Bates street for two years, after which he and his brother Peter entered into partnership on Kalama-

zoo avenue, where flowers were grown four years. The business was then changed over to vegetables and Blank-sma Bros.' cucumbers are known and sought after all over this part of the state. He graduated from the Fried-rickorle Horticultural College, Netherlands State V. P. of the National Vegetable Growers' Association and was a member of the executive board of the Grand Rapids Growers' Association. He leaves two sisters and one brother in his native country and his brother Peter of Grand Rapids, who will continue the business as before.

B. S.

### Joseph W. Congdon.

Joseph Whipple Congdon, formerly of Providence, R. I., and East Greenwich, where he practiced law for several years before taking up his home in California, and who died at the home of his son-in-law, E. W. Jerauld of Waterman, Wash., was said by scientific men to have been the foremost authority on botany in the world. He was born in Providence April 12, 1836, and was the son of James and Mary Whipple Congdon. He was educated in the public schools of this city and was graduated from Brown University in the class of 1855.

Mr. Congdon was well known in Europe, where he made extensive researches. A collection of plants he made in Europe and in the east he presented to Stanford University. European institutions have also received highly valued gifts of the same character from him. When he died he had a herbarium of about 10,000 specimens. In following the law he made a success of the practical side of the profession because of a remarkably thorough training, but he was more keenly interested in the science of the profession than in its actual practice. He became well known throughout California and earned the cognomen of "The Honest Lawyer" because of a discriminating sense of justice and integrity shown in every case with which he was connected. Mr. Congdon is survived by his wife, Mrs. Mary Barlett Congdon; his son, George C. Congdon; a daughter, Mrs. F. W. Jerauld; two brothers and a sister, Mrs. A. A. Wood.

### A. M. McLaren.

Anthony Murray McLaren, proprietor of the Westwood Nurseries, Westwood, Mass., died April 27 at Roslindale from paralysis. Mr. McLaren was out driving with his son on the day of his death. For 40 years he conducted a florist's business at Forest Hills Square but his property was needed for railroad purposes and he moved to Westwood in 1896. He has laid out many beautiful estates in various parts of the country and was landscape gardener for the New York Central R. R. He was a member of the Massachusetts Horticultural Society. He was married in 1856 to Miss Mary Ann Campbell who with four daughters and three sons survive him.

### Alpena, Mich.

A. Linke & Son met with a serious accident a month ago by fire. Their house being situated on the north side of the greenhouse caught fire, causing a loss of \$700, and for a while the greenhouse was in danger. Mr. Linke is proud of his carnations and thinks there are none better. He has a sport from Lawson that looks promising this year. He expects to propagate as many as he can from it. Everything is in fine shape for the spring trade.

ABYDOS.

## Personal.

H. A. Barnard, representing Stuart Low & Co., London, Eng., will attend the Boston orchid show, May 26-30.

## Hail.

The florists of Wichita, Kans., had more than 75 per cent of their glass destroyed by hail on the night of May 1. Inside stock was also badly damaged. Emporia, Strong and Lawrence, Kans., also had an inning with hail, but not so severe as Wichita. The florists of that town, except one, have the consolation that they were insured. Dallas, Texas, and Oklahoma City, Okla., were hit by hail earlier in the season.

PRESIDENT ASMUS at a recent meeting of the Chicago Florists' Club made a good Mother's day move in suggesting that the trade recommend colored carnations where the mothers are still living, white to be reserved as an exclusive token of the departed.

THE severe freeze has been a setback to the florists and seedsmen of the country. Bedding and like stock in the hands of florists, which should have been moving freely the first 10 days of May, has been touched but little by buyers who were so thoroughly discouraged by the weather.

MATTHEW MCNAIR of Providence R. I., writes as follows: "Mother's day brought out many purchasers of white carnations, which sold singly and in half-dozen lots. The combined sales sufficed to clean up every white carnation in town. When we consider how much forced advertising has been given Carnation day with such small compensation, and then think of the splendid results following the spontaneous publicity so recently given Mothers' day, we are obliged to wonder why one thing fails and another succeeds." The semi-political character of Carnation day may account for some lack of enthusiasm regarding it, many good citizens, including ladies, being too young to vote. Everyone can and should join in Mother's day celebration.

## National Council of Horticulture.

The seventh instalment of the press service of the National Council of Horticulture contains articles on "Preparing a Canna Bed," "Watering Plants" and "Trees in Place and Out of Place (continued)." The articles are timely and practical and are entirely free to nurserymen, seedsmen, florists and local editors applying for them to James H. Burdett, 1620 West 104th place, Chicago.

## Duty on Palms and Trees.

In overruling a protest by Wadley & Smythe of New York the general appraiser gives the following decision: "This is an importation of 49 trees, comprising 35 orange trees, six myrtles, four oleanders, one palm, and three pittosporums. The examiner of nursery stock at this port testified that he personally examined this importation; that it consisted of old and fully matured trees, which were intended for ornamental purposes about the grounds of the importer; that these trees were planted in large tubs, and were moved in and out of the greenhouse to protect them from the rigors of this climate; that they were not intended or used for propagation or cultivation.

"Paragraph 560, under which the principal claim in the protest is made, reads as follows: '560. Fruit plants, tropical and semitropical, for the purpose of propagation or cultivation.' In framing this paragraph, we think the intention of congress was to admit without duty, for the purpose of encouraging agricultural and horticultural pursuits, such plants as were intended to be used in increasing the stock or for cultivation in raising and producing fruit. To give this paragraph any other interpretation would

deprive the words 'for propagation or cultivation' of any force or effect. This importation is therefore not classifiable thereunder. We do not think these trees and plants should be classified under the first of paragraph 252, but rather under the latter part of the paragraph as 'nursery or greenhouse stock not specially provided for.'"

## Mother's Day Article Inspires Mayor.

ED. AMERICAN FLORIST:—

Enclosed please find a clipping from our daily paper of Wednesday, last. I read your article on Mother's day and sent it to the mayor of our city; he thought it a good idea and issued a proclamation and recommended the wearing of the carnation in honor of your mother. If the mayor of every city would do the same thing it would not be long until it would rank among one of the first of our national holidays.

J. H. ORTH.

"To the people of McKeesport: During the last few years a number of American cities have adopted the very beautiful custom of designating a certain Sabbath of the year as Mother's day and requesting every man to wear on that day a flower in honor of his mother, and I feel that it would be entirely fitting and proper for the city of McKeesport to observe this day.

"Therefore, as mayor of the city of McKeesport, Pa., I recommend that by general consent, Sunday, May 8, 1910, be set apart as Mothers' day and that on that day every man and boy in the city of McKeesport and every visitor within our gates, wear a flower in honor of his mother. And I suggest that the day be made a special occasion for sending flowers to the invalids in McKeesport homes, to the sick in the hospitals and the various public institutions.

"It is eminently fitting that in this as in other worthy movements McKeesport take her proper place, and let us hope that the first Mother's day observed in this city will be so successful and inspiring that other cities will, in the future, follow the example. Witness my hand as mayor of McKeesport, Penn., this fifth day of May, A. D. 1910." H. S. ARTHUR.

## Meetings Next Week.

Boston, Mass., May 17.—Gardeners' and Florists' Club of Boston, Horticultural Hall.

Detroit, Mich., May 16, 8 p. m.—Detroit Florists' Club, Cowie building, 42-44 Gratiot avenue.

# No Complaints

It makes no difference where our stock goes. Its fine quality, the care taken in packing and shipping just at the right time insures its safe arrival and in the best possible condition. **Bride** and **Bridesmaid** roses continue in the finest order. **Richmond** we have in superb flowers with long stems and ample foliage. **Carnations** are fine and it goes without saying that we have

## Everybody Satisfied

who has favored us with orders, no matter what the distance shipped. Repeat orders prove this and, while we are anxious to secure new customers, the approval of our old ones is even more appreciated. We are long on **Roses** of all kinds, **Gladioli**, **Peonies** and **Valley**. **Sweet Peas** have been scarce as have **White Carnations**, but we can take care of you. Let us get acquainted.

We Give Personal Attention to All Orders.

#### WHITE CARNATIONS SCARCE.

Although trade is not rushing there has been far more stock handled this week than the average for the middle of May. Indoor flowers are remarkably good for the season, the cool weather keeping the plants in track, and this, combined with a decided shortage in all outdoor stock, makes a good demand and keeps things moving. The out-of-town trade may best be described as a good, steady demand for medium priced and good stock. Mothers' day created a large demand for white carnations and the prices by the end of the week had mounted to six cents for the best stock. This is not altogether an un-mixed good. Everything that creates a demand for flowers is to be encouraged, but when a certain flower—and, in this case, a certain color as well—is run on, it simply causes a scarcity of that particular kind and dwarfs the amount of business done by forcing the price up to an abnormal figure. The idea that one's mother can only be honored by wearing one kind of flower is not bene-

ficial to the trade, especially when it is a flower like the carnation, that is in vogue the year around. Make it a day to wear a flower by all means, and also to carry a few flowers or a wreath to the grave of those who have been near and dear, but get customers away from the one flower idea if possible. While the automobile parade was the outlet for quite a little stock of various kinds, the weather on Saturday was very discouraging and the natural flower bedecked cars had to give way to those with artificial decorations and put up with a postponement. This was unfortunate in view of the fact that those decorating their cars will be led to think more of artificial than natural flowers for the purpose should the parade be repeated.

American Beauty roses are still coming in fine form and there is practically no change in the prices. Kaiserin is beginning to be a factor in the market, the flowers arriving being clean and of fine substance, with good stems and foliage. Mrs. Marshall Field is also coming in considerable quantity, but the weather is still too cool for this purely summer

rose and its full beauty is not yet. Mrs. Jardine is a revelation. Those of us who thought the eastern men were too enthusiastic over this rose a year or two back have had ample cause since then to change our opinions, and Mrs. Jardine is certainly making good as a fine rose the year around. Richmond is in better form now and there is the usual quantity of the other popular kinds being shown. Short roses for funeral work, especially white, have been on the scarce side this week. Carnations keep up in quality remarkably well and they are worth the price asked. Good reds and pinks were plentiful all through the week. It is difficult to account for the scarcity of good sweet peas. The weather has been suitable and not too hot, yet the quantity and quality of the flowers is far below what it should be. Gladioli are coming in great shape, the lighter forms especially being splendid. The dark reds are handsome, but the spikes generally not so well flowered. That is, there are not sufficient buds open at one time to make a good display. The pretty blue cornflowers have appeared and make a welcome

|                              |  |                          |                                    |                          |                                                |                        |

bit of color. Orchids are numerous and of good quality, Cattleya Mossiae predominating. The outdoor Lily of the valley is slightly improved, but is far from good. That from indoors is plentiful and of good quality. Peonies are becoming more plentiful daily, but all we have seen show plainly the effects of the cold snap and are not up to the usual fine form. There is still plenty of variety in the smaller stocks.

#### NOTES.

There was a good attendance at the regular meeting of the Florists' Club May 5, President Asmus in the chair. Vice-president Philpott, all the way from Winnipeg, was again on hand. A. A. Vermeier, care Nelson Bros., Marquette building, was elected a member. P. J. Saunders, 4901 Cottage Grove avenue, and George Grimm.

Peoria street, were nominated for membership. The subjects discussed included prospects of peonies for Memorial day and the scarcity of white carnations for Mother's day. President Asmus suggested that the trade recommend colored carnations where the mothers are still living, white to be reserved as an exclusive token of the departed.

Zech & Mann have been very busy with out-of-town orders. While speaking to John Zech on Monday he had three long-distance calls in about the same number of minutes, one from Iowa, one from Michigan and one from southern Illinois, showing that the good stock handled here and the careful attention given to packing and shipping are well repaid. We noted some remarkably fine white antirrhinums here as well as good stock in

all the popular roses and carnations.

Mothers' day created a big demand at Peter Reinberg's, the long distance shipments of white carnations beginning on Wednesday night, those going to less distant points going out on Thursday and Friday. The local as well as the out-of-town trade has been very brisk here this week. Richmond roses have been of exceptionally fine quality, also Brides and Maids. The Beauty cut is still in strong and the flowers coming in are fine in every way.

The Fleischman Floral Co. did good work at the automobile parade. The large car decorated in Killarney roses for Tom Murray was a splendid effort and richly deserved all the encomiums passed upon it. Trade at the store has been well above the average. Some magnificent hydrangeas from

Is in first-rate condition, and we have plenty of it in all lines, but we wish to call special attention to our

## LONG STEMMED BEAUTIES

They are undoubtedly the best in this market, and cannot be beaten on any other. The foliage is good, the flowers of fine color, and they have not a fault.

**Our Roses, Carnations** and other flowers are perfect, and we are in full cut on all popular varieties. We are paying especial attention to out-of-town orders, and our facilities for shipping are of the best and most up-to-date.

Let Us Have Your Next Order.

Our Summer ROSES are coming in excellent order.

Kaiserin, Mrs. Jardine and Field are especially good.

that well known grower, J. A. Peterson of Cincinnati, sold almost as soon as they were unpacked and there has been a big demand for all classes of decorative work.

The Bohannon Floral Co. is out after the steamer business with a large model of an Atlantic liner in the window. A pretty idea of Bohannon's is white steamer trunks in various sizes for filling with flowers and sending to steamers sailing from various ports. Thos. Young, Jr., New York, is handling these in that city and filling them to the order of the above firm. They are a cut above the ordinary in attractiveness.

Bassett & Washburn's Beauties are still coming in fine shape as are Killarney, Rhea Reid and Kaiserin. Rhea Reid sells like hot cakes according to Mr. Washburn. He reports trade as excellent and says they could not begin to fill the orders for white carnations for Mothers' day. They managed in some cases to get customers to take white roses, but even at that could have sold another 50,000 had they been at command.

Fred Strail, for some time in the employ of Aug. Lange, and more recently with the Bohannon Floral Co., will start in business at once in the Wellington hotel building on Jackson

### "The Busiest House in Chicago"

STOCK promises to be scarce for Decoration Day, and advance orders are already arriving. So get your orders in early. In the meantime we are in an especially strong position to take care of any of your cut flower needs. Let us hear from you.

boulevard. He has a partner, Henry H. Hahn, and the firm name will be Strail & Hahn. All Fred's many friends wish him success in his new venture, which seems likely, as he has a fine location and a neat store.

At Vaughan & Sperry's Mother's day just about doubled the business. On Wednesday, Thursday and Friday orders kept tumbling in for white carnations and they were well prepared for them with good stock.

Beauties are still a leading feature here, the flowers coming in all lengths and of the best quality. Good gladioli in the light and dark shades are also shown.

Excellent flowers of Cattleya Mossiae have been coming to Geo. Reinberg's all the week as well as good stock in all the principal varieties of roses and carnations. Pot roses are offered here. Beauty plants, potted in 6-inch from the benches after being

cut down. The should be good sellers  
for Memorial day.

Business has been booming at the  
J. B. Deamud Co.'s this week. The  
first consignments of the double white  
narcissus have arrived in fine con-  
dition and sell on sight. Good gladi-  
oli in light and dark shades are also  
being handled, and a large supply is  
promised for Memorial day.

At J. A. Budlong's Mrs. Jardine rose  
is a specialty. The flowers are excel-  
lent in every way, of fine substance  
and color and have good stems. Other  
summer roses shown are Field and  
Kaiserin, the latter in especially good  
order.

Hoerber Bros. made a very lucky  
strike with white carnations for Mothers'  
day. All the carnations, in fact,  
have been coming in good and in  
large quantities. Winsor and En-  
chantress have been particularly good.

Wietor Bros. have been showing excel-  
lent Kaiserin roses during the  
week. All the best varieties of car-  
nations are in good order and busi-  
ness is good. Victory, in reds, has  
been a leader.

John Kruchten made a flying trip  
to Omaha the end of last week, stay-  
ing only a short time. He says every-  
body appeared to be busy. Business  
at the stores has been good.

In addition to large stocks of peo-  
nies, Kennicott Bros. Co. has been  
handling a fine line of outdoor lilac,  
quite the best we have seen on the  
market this season.

WARMER WEATHER WANTED.

The past week has been a very disagreeable one, rain nearly all week. Stock has been very plentiful, long-stemmed, medium and short American Beauty roses in large quantities. White carnations had somewhat of a boom with the wholesalers and the prices on these stiffened, but reports from some of the retailers show light Mothers' day business. One prominent down-town dealer told the writer he had not sold a hundred. The hardy ferns this year are badly spotted and frost-bitten and in many places the wild adiantum is brown from the frost. Trade in general has been very dull, stock in many of the wholesale houses going to the rubbish pile. Perhaps with predicted warmer and fair weather things will change. Bedding and planting out has started, but has been delayed greatly by the very unseasonable weather of the past week.

### NOTES.

C. Loveridge and wife, who are attending the Traveling Men's convention here, visited the wholesale district and also the prominent retailers. Mr. Loveridge has 60,000 feet of glass at Peoria, Ill., and does a retail business, shipping the surplus to C. A. Kuehn and Geo. Angermueller of this city.

The Retail Florists' Association has sent out circular letters this week signed by Secretary H. C. Weber, Jr., asking the co-operation of all florists in helping to keep the retail business in its legitimate channels and co-operate with the society in maintaining its rights.

There will be quite a bit of excitement when the Bentzen Floral Co.'s baseball team and the C. Young & Sons Co.'s meet. Young's team is looking for revenge. The game will take place at the florists' picnic.

C. A. Kuehn and the W. C. Smith Wholesale Floral Co. are busy in their respective wire departments manufacturing hanging baskets for the local and out-of-town trade.

BIG TRADE ON MOTHER'S DAY.

The feature of the week was the demand on Saturday for Mothers' day flowers, particularly white carnations. These were in great demand and, although the trade generally expected a lively business and were prepared for it, there was a general clean up, particularly in the residence districts where not only white carnations but all colors and late in the day everything sold just so it was a flower. The central city stores felt the call and while they did considerable business on account of the holiday, there was not the eager buying of the home centers and some white carnations were carried over. The street men who sold out so quickly last year laid in extra large stocks and in some cases did not turn over completely. One street dealer having laid in something over 10,000 flowers had nearly one-third left. The sales, however, were much larger and the general observance of the day much greater, extending over more local territory than last year. In nearly all the churches and Sunday schools the sermons and lessons alluded to or had mother's love or devotion as their text. Carnations were sold in quantities to these bodies to be given away, which was also the custom in many lodges and societies. One, if not more, of the large department stores provided a white carnation for each of their thousands of employees which was worn on Saturday as well as the day following. Prices, considering the demand, were not very high, \$4 to \$6 being the price for good stock, with a few of the fancy bringing \$8 and some exceptional flowers as high as \$10. The florists of the country certainly owe a debt of gratitude to Miss Jarvis who, in founding Mother's day, has added another floral holiday, and given to the business of the early days of May, a much-needed impetus which promises to increase and grow into an event of great importance. The general stock of flowers is considerably in excess of the demand. Splendid Beauties are selling very low, as are many other varieties of roses. A writer says Jardine leads among the pink varieties. We wonder where to, not cer-

tainly to a fat bank account. Sweet peas are very popular and good stock is pretty sure of a ready sale. Stocks and snapdragon are scarce quantities and are in fair demand. Cornflowers are now in and make a welcome addition. Peonies are looming up, the earliest of the local stocks now being offered and will soon be seen in quantities. Snowballs and other outside shrubbery is also ready and it would seem as if all this Memorial day pro-vender will be past before May 30, a new experience in this neighborhood.

#### NOTES.

The new houses going up in this neighborhood are getting along nicely. Joseph Heacock & Co.'s house, 52x1000, is half finished and promises to be ready for planting by June 1. The

Lord & Burnham Co. has quite a force on the job, which, when finished, will be one of the show houses of this section. Victor Groshens' new house, 42x500, at Hillside built by the King Construction Co., is of the latest plan and certainly makes a very substantial structure. Its cement sides and table or ground bed borders of same material, make it practically indestructible and likely to, as President Elliott predicted of future houses, be handed down from father to son for several generations.

Leo Niessen Co. had a big carnation demand for Mother's day business, which came, Mr. Niessen said, at a good time and gave the business a much needed impetus. Extra fine stocks of Beauty roses are seen here.

At McKissick's eastern Bea Kaiserin are the features. They are exceptionally fine. Fifty thousand white carnations were handled for Mother's day.

The Robert Scott Co. is about to introduce a new rose of a shade of yellow that looks as if it only wanted to be shown to the public to make it a success.

Berger Bros. say that Mother's day demand was all right and used up carnations of all kinds; there was also a good demand for other flowers.

K.

#### Chicago Notes.

E. C. Amling says business during the past week has been away ahead of that of a year ago. Peonies he expects to be about the same crop as last year. Had the weather been different there would doubtless have been a record breaking crop this year. Mr. Amling does not expect local grown stock to be in time for Memorial day unless very hot weather occurs, which he is not hoping for. Prospects for Memorial day are remarkably good here, advance orders coming in freely already and many inquiries from retailers from out-of-town points who are anxious to secure stock.

O. P. Bassett and wife returned on Tuesday from California and will stay at Hinsdale for about two weeks, sailing from New York for Europe on the Prinz Frederick Wilhelm on May 26. Both are looking extremely well. The first visit will be to England, the vessel calling at Plymouth, and their stay will probably be about six months when they purpose returning to California.

# Special Announcement

**The Firm of FORD BROS., 48 West 28th St., New York,**

**Wholesale Commission Dealers in CUT FLOWERS, was dissolved by mutual consent, May 1, 1910, William Ford retiring from the firm.**

**In reference to the above, I wish to state that I have taken over the business and**

**Removed to 121 West 28th Street,**

a locality where the **Leading Wholesalers** are now locating, where I will continue the business under the former methods.

Asking a continuance of our former **cordial business relations**, I remain,

Yours Very Truly,

**M. C. FORD,**

**121 West 28th Street,**

**NEW YORK.**

## New York.

### LIGHT BUYING.

There is little change in the condition of the cut flower market. While the arrivals are not enormous in the wholesale district, the complaint is that buying is very light. Monday and Saturday of last week were fairly good days, but during the middle of the week business was slow. Mothers' day had some appreciable effect on white carnations, though the price as a rule did not go above three and 3½ cents. All good carnations were a little shy through the week and the best sold for three and four cents. Of roses, lilies, lily of the valley, orchids, gardenias and various less important stocks, there was an abundance and much of it moved very slowly. While peonies are on the market they are not in sufficient quantity to be a leading factor as yet. A feature with the decorators is a good supply of well flowered dogwood.

May 9.—On account of two days of wet and sultry weather, the market is slow. There is an abundance of everything and it is hard to move.

### NOTES.

As elsewhere announced, the firm of Ford Bros. has been dissolved and M. C. Ford continues the business at 121 West Twenty-eighth street. These brothers have been in business together for the past 15 years and in the business world and socially are respected and esteemed by all who know them. They have established a fine business, always handling the best of stock. There is no doubt that under the management of M. C. Ford the same high standard will be maintained. William Ford's retirement from the street will be regretted, as he has always been businesslike, genial and considerate.

The annual meeting of the New York Cut Flower Exchange was held May 7. G. Golsner, G. Matthews, John Schneider and Philip Einsmann were re-elected as directors. Fred Smith of Chas. Smith's Sons was elected a director to succeed A. S. Burns, who retired. The meeting was harmonious and the exchange was shown to be in a prosperous condition. John Donaldson remains president and Victor Dorval secretary.

George Cotsonas & Co. will, in a short time, remove from their present location, 50 W. Twenty-eighth street, to 127 W. Twenty-eighth street, between Traendly & Schenck and M. C. Ford. They will there enlarge their facilities for handling all kinds of florists' green. In addition they have taken another floor that will be devoted to all kinds of florists' supplies.

The wreckers are hard at work in Twenty-eighth street between Broadway and Sixth avenue, and the old stores of Traendly & Schenck, Walter F. Sheridan and Ford Bros. are being demolished to make room for more pretentious structures. In the meantime the aforesaid dealers are not worrying, as they are now in better quarters.

John Ross, decorator at Sherry's, Forty-sixth street and Fifth avenue, executed a very beautiful decoration on May 5, the occasion being a dinner given by Mayor Gaynor to the noted Prince Tsia Tao of China. Mr. Ross used many flowering plants and their artistic arrangement was the subject of much favorable comment.

Wm. Wallace Matthews, of Great Neck, has been shipping to Phil Kessler, 55 West Twenty-sixth street, very fine Bermuda lilies (Jamesii), the bulbs having been purchased from A. T. Boddington. The Matthews range is also noted for the fine blooms

of Ivory chrysanthemums, which are a feature of the fall trade.

Peter Mallon & Son, 516 Fulton street, Brooklyn, have made some changes in their business, having taken another store, next door to their old stand. This firm does an immense business in bedding plants and at present its store is a feature of that section of Brooklyn.

Mrs. Geo. Peters, wife of the head of the firm of Geo. Peters & Sons, growers at Hempstead, died on the morning of May 1 after an illness of three months of cancer. She was 54 years old and is survived by her husband, two sons and one daughter.

John Birnie of West Hoboken, N. J., is now sending to this market fine pelargoniums that attract much attention. He has also been selling a great stock of geraniums and other bedding plants, beside English ivies suitable for boxes.

Kessler Bros., the wholesale plantmen at 50 West Twenty-eighth street, are handling a great amount of fine flowering and foliage stock. A noteworthy feature is their large tubs of privet, which come from the Dreyer range, Woodside.

L. C. Hauser, the asparagus specialist, has been dividing his time between the Coogan building and the criminal court. He is on the jury.

The store of J. H. Small & Sons, 1153 Broadway, is profusely decorated with dogwood and it is a very attractive feature.

The annual outing and bean feast of the Florists' Club will be held June 28 at Witzell's Point View Grove.

J. K. Allen is handling the first peonies of the season and for early varieties they are very good.

A. J. Guttman is handling a good line of Ulrich Brunner roses.

TRADE FAIRLY GOOD.

The past week's business was fairly good, ending strong for Saturday and Sunday on account of Mother's day, which was perhaps more universally observed this year than any previous year. The papers gave considerable space in explaining and urging the public to observe this day. White carnations were very scarce, considering the numbers asked for; in fact, all carnations cleaned up entirely, not nearly enough of any color being obtainable. Roses also sold well, especially white. Beauties are in good demand, and the quality was never better. Killarney is much in demand and is steadily growing in favor. Sweet peas are good stock. Callas are in good demand. While it is a little late in the season for boxwood, those who know are using quantities of this stock to good advantage; the quality is fine. Good double white and purple lilac is now coming in. The frost we had the middle of the week did not damage the peonies to any extent and they will soon be coming in.

May 9 opened with a steady market, all stock cleaning up quickly. All retailers report an excellent day's business for Sunday, Mother's day.

## New York Notes.

The sympathy of the trade is extended to the Warendorff brothers on account of their mother, who is seriously ill at her apartments in the Ansonia hotel. Mrs. Warendorff has reached an advanced age, but until recently has been active about the retail store of her sons, which is located in the Ansonia. For many years she has been a notable figure in the retail trade of this city. In this connection Alex Warendorff, one of her sons, who has a store at 1193 Broadway, has for some time been suffering from a nervous breakdown and been confined to his rooms. It is now said that he is on the road to recovery.

A number of the young men who have been well and favorably known in connection with the trade of this city are now matrimonially inclined. Jos. Bosse, manager of W. H. Lee's store in the Hippodrome building, will, it is reported, be married very soon to an estimable young lady. Samuel A. Woodrow, representative of Bobbink & Atkins, will be married June 15. J. J. Davidson, now with John H. Shipperway, Norton, Conn., will be married June 21. Woodrow and Davidson served their apprenticeships together and as a mark of fraternal feeling will stand up together.

## New York Florists' Club.

The regular monthly meeting of the New York Florists' Club was held in the Grand Opera house building on the night of May 9, President Miller in the chair. The feature of the meeting was the address of Prof. John Craig of Cornell University on "Some Phases of Experimental Work in Relation to Floriculture." The address was well received. Appropriate resolutions on the death of Mrs. Vesey were adopted. Harry Bunyard reported for the outing committee that the next annual outing will be held at Witzel's Point View Grove. Wm. H. Siebrecht, Jr., for the plant market committee, reported progress. W. E. Marshall reported for the exhibition committee in relation to the cup offered by Hitchings & Co., greenhouse builders, for competition by members of the club. The cup will be known as the "Hitchings & Co. Cup of Merit." It is proposed that competition begin with the June meeting and end with the December meeting of this year, and to be presented to the winner at the first meeting of next year. It was recommended that should Hitchings & Co. present the cup for annual competition, that competition should begin the first of the year and continue through each monthly meeting. The following rules of competition were suggested: For plants and cut flowers only: Carnations, roses, gladiolus, not less than 25 blooms each; chrys-

Greenhouses: West View

anthemums not less than 10 blooms; pompons, not less than 12 sprays; stocks, snapdragons, dahlias, not less than 12; sweet peas, five bunches of 12 or more; peonies, not less than 10; violets, not less than 100.

HASTINGS, NEB.—Mother's day was celebrated here with great enthusiasm. The sales were 75 per cent over those of last year. All salable carnations and roses, daisies, sweet peas, in fact, every white flower, was picked up before 8 o'clock on Sunday. Many more could have been sold if they were obtainable.—J. M.

DESIGNS OR CUT FLOWERS

Will be delivered for the trade in other cities by the firms below, the Leading Retailers in the cities indicated on Wire, Phone or Mail Orders.

Kansas City, Mo.

sections of Ohio, Indiana and Canada.

Kansas City.  
STOCK SCARCE.  
Owing to the cold, rainy weather  
which has prevailed during the last  
week only about half the usual  
amount of stock has been received.  
Carnations especially have fallen off  
and orders which were taken during  
the great influx of last week had to  
be cut down. Prices have gone up in  
proportion as the stock has decreased.  
Select stock is bringing 3-4 cents  
with seconds closing out at 2-2½.  
Roses are only medium. Bride and  
Bridesmaid are plentiful in funeral  
stock but good flowers are scarce.  
American Beauty is good but not plen-  
tiful. Killarney has fallen off, there  
only being a small quantity of short  
stemmed stock on hand. Sweet peas  
are here in large numbers in all col-  
ors and grades. The market takes all  
that is brought in at 40 to 60 cents  
per 100. Peonies have commenced to  
arrive in small quantities but the ma-  
jority of the crop is being put in cold  
storage for Memorial day. Many large  
orders have been received for this  
flower and there promises to be a very  
large cut. There is still a good de-  
mand for bedding stock which makes  
business good for small plant growers.  
The small quantity of cattleyas  
brought in sell readily for \$3 per doz-  
en. The outdoor stocks, such as Span-  
ish iris, tulips, daffodils and lily of the  
valley are very scarce and bring good  
prices.

NOTES.  
L. Humfeld will soon commence  
work on the large conservatory which  
he has been planning for some time.  
His place at Sixth and Paseo will be  
torn down soon and the new buildings  
will go up immediately. A find resi-  
dence will be erected in connection  
with his greenhouse plant.  
Arthur Newell has been handling a  
large amount of stock lately. He says  
that funerals especially have been  
cleaning up his supplies.  
The Geo. M. Kellogg Flower & Plant  
Co. will make extensive repairs this  
spring. Probably a few houses will  
also be erected.  
Wm. Rock announces that the resi-  
dence which he has been building on  
Harrison boulevard is about com-  
pleted.  
Miss H. Jewell has moved two doors  
farther east and reports her present  
location much better than the last.  
The Jones Dry Goods Co. has closed  
its floral department which has been  
in operation for several years.  
Mrs. Geo. Bastian has been in Pleas-  
ant Hill for several weeks with her  
husband, who is very sick.  
A four-inch rain fell on May 6  
which did much damage to terraces  
and sunken gardens.  
Sam Murray has been doing a large  
amount of funeral work during the  
past week. MISSOURI.

## The Seed Trade.

### American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Duryea, New York, First Vice-Pres.; F. W. Bolgiano, Washington, D.C., Second Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J. June 21, 1910.

SOME dealers who have held wild Alaskas are not jubilant now.

The damage to peas in Wisconsin, except on low ground, is not as serious as anticipated.

DETROIT, MICH.—Kirby B. White and Will Bowen, of D. M. Ferry & Co., returned from the Pacific coast last week.

ARCHIBALD SMITH, formerly of Boston, Mass., and recently with the Leonard Seed Co., Chicago, has returned to England.

CHICAGO.—Contract prices on the board of trade May 11 for grass seed were noted as follows: Timothy, \$4.25, nominal. White clover, from 20 cents to 25 cents. Visitor: C. R. Chesmore, St. Joseph, Mo.

THE Long Island Agronomist in a recent issue printed several reports on analyses of alfalfa samples, both at Cornell and Washington, some of which show too much trefoil and dodder.

At the hearing, May 5, before the board of appraisers at New York regarding the classification of certain hyacinths for duty, testimony was heard on both sides, and the government and importers are awaiting the decision of the board.

THE weather in southern France continues moist and cool, not especially good for bulb development. Some dealers are placing definite orders with growers for partial supply, while others are holding off. The consensus of opinion seems to indicate little probability of a decline in the price of White Roman hyacinths, as some growers at the syndicate meeting of April 16 favored a price of 90 francs instead of 80 francs, and some will not dispose of their crops at the lower rate.

### California Seed Crops.

Well-informed correspondents report as follows concerning the condition of seed crops in their respective districts:

San Jose (Santa Clara District), May 4.—From personal inspection sweet pea crops of our own growing and those of others will not yield half a crop from present prospects. Radish also, generally speaking, will not be heavy. There is not sufficient mildew on onion at this writing to do any perceptible damage.

Hollister (Gilroy District), May 10.—All crops in this valley are now in good condition. There is some mildew on onion. Spinach, lettuce, parsley, salsify and sweet peas are good. Radish is fair, but not big. Onion bulbs for 1911 crop are fair to date. I have no personal knowledge of conditions in other sections, but information at hand is to the effect that there is much mildew in the Upper Santa Clara valley and in the Sacramento valley; other crops there are reported good.

### Imports.

During the week ending May 7, imports were received at New York as follows:

McHutchison & Co., 70 tubs laurel trees; 2 cases plants.

Julius Roehrs Co., 21 cases of plants. H. Frank Darrow, 17 cases plants; 30 tubs laurel trees.

To others: 294 cases plants, 249 bags seeds, 274 tubs laurel trees, 110 cases orchids, 9 cases trees and shrubs.

### Text of New York Pure Seed Bill Which Passed the Assembly Last Week—Now Before the Senate.

#### PAGE 1.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Article fifteen and sections three hundred and forty  
2 and three hundred and forty-one of chapter nine of the laws of  
3 nineteen hundred and nine, entitled "An act in relation to agricul-  
4 ture, constituting chapter one of the consolidated laws," are  
5 hereby renumbered to be article sixteen and sections three hun-  
6 dred and sixty and three hundred and sixty-one, respectively.

EXPLANATION—Matter in *italics* is new; matter in brackets ( ) is old law to be omitted.

#### PAGE 2.

1 §2. Such chapter is hereby amended by adding thereto a new  
2 article to be article fifteen thereof, to read as follows:

#### ARTICLE 15.

#### INSPECTION AND SALE OF SEEDS.

1 SEC. 340. Inspection and sale of seeds.  
2 341. Samples, publication of results of examination.

3 342. Provisions concerning actions.  
4

5 § 340. Inspection and sale of seeds. Within the meaning of  
6 this article "agricultural seeds" are defined as the seeds of  
7 alfalfa, barley, Canadian blue grass, Kentucky blue grass, brome  
8 (awnless) grass, buckwheat, alsike clover, crimson clover, red  
9 clover, white clover, field corn, Kaffir corn, meadow fescue, flax,  
10 millet, oats, orchard grass, rape, red top, rye, sorghum, timothy  
11 and wheat which are to be used for sowing or seeding purposes.  
12 No wholesale or retail dealer shall sell, offer, expose or have in  
13 his possession for sale for the purposes of seeding, any cereals or  
14 seeds of grasses or clovers, of the class known as agricultural  
15 seeds in quantities exceeding ten pounds, unless every receptacle,  
16 package, sack or bag containing such seeds, or a label securely  
17 attached thereto or enclosed therein, is marked in a plain in-  
18 delible

19 manner as herein provided. Said marks shall be on the recep-  
20 tacle,

21 package, sack or bag itself if there is more than ten per centum  
22 of injurious foreign seed. Marks shall include the following:

23 a. The full name and address of the seller.  
24 b. The name of the kind or kinds of seeds, except in the case  
25 of mixtures prepared for special purposes, when so labeled.  
26

#### PAGE 3.

1 c. The name of any foreign injurious seeds present to the  
2 extent

3 of three per centum or over by count and both the name and  
4 per-

5 centum of the following adulterants, if present:

6 Yellow trefoil in red clover.

7 Yellow trefoil, burr clover, sweet clover or dodder, in alfalfa.

8 Canadian blue grass in Kentucky blue grass.

9 Meadow fescue or rye grass in orchard grass.

10 Yellow trefoil in alsike clover.

11 d. With the claimed per centum of purity of the sample by  
12 count which shall be not more than three above the per centum  
13 determined by official examination.

14 The provisions of this act shall not apply to any person selling  
15 agricultural seeds or cereals to seed merchants, or shipping to a  
16 general market to be cleaned or graded before being offered or  
17 ex-

18 posed for sale for seeding purposes.  
19 § 341. Samples, publication of results of examinations.

20 Samples of seed shall be taken in duplicate, both samples  
21 shall be

22 sealed promptly and one shall be tendered and, if accepted,  
23 shall be

24 delivered at the time of taking to the person apparently in  
25 charge

26 and a receipt taken therefor, unless refused. The commissioner  
of agriculture is hereby authorized to publish from time to time  
the results of seed examination, together with the names and ad-  
dresses of dealers from whom the samples examined were taken.

§ 342. Provisions concerning actions. No action shall be  
maintained for a violation of any of the provisions of this article  
if the seed was not sold or exposed for sale; nor shall any such

#### PAGE 4.

1 action or any action for the breach of a legal duty or obligation  
2 in the sale of agricultural seeds be maintained by the buyer  
3 against the seller unless such action is commenced within a  
4 reason-

5 able time after the sale and before the sowing or other use of  
6 the

7 seeds, nor unless the claim or claims of such buyer are based  
8 upon

9 properly drawn samples of such seed from the bulk thereof.  
10 3. This act shall take effect July first, nineteen hundred

11 and ten.

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

C. W. Waid, New Carlisle, Pa., President;  
Franklin DeKleine, Grand Rapids, Mich.,  
Vice-President; S. W. Severance, 508 Illi-  
nois Life Building, Louisville, Ky., Secre-  
tary; M. L. Ruetenik, Cleveland, O., Treas.

### Seasonable Notes.

Among all the difficulties that confront the gardener there is probably none greater than late spring frosts. We may overcome all the others and stand helpless in a cold May night, which can in a few hours undo the work of months. We have had the most trying spring of our experience, and while we have not learned anything new, a good many facts have been again confirmed, and we will point out some of these.

We have part black land and part yellow clay; the former is always loose and well drained, while the latter is often wet and compact; hence these types vary greatly in earliness of crop. As a rule, the black land is away ahead in earliness and we aim to get most of the early things on this kind of land. However, this year's frosts were so severe that almost everything on the black land is destroyed, while the yellow type preserved a fair stand of such hardy things as cabbage, beets, radishes and lettuce. Why this should be so appears to be a puzzle, but upon investigation this is readily solved. We have before advised in these columns never to work tender crops such as corn, beans, tomatoes, etc., until all danger of frost is past. The reason for this we find in the fact that cultivation reduces the heat radiation from below, thereby exposing the crops to the slightest cold. The same thing is true of our black land. Its loose character leads to rapid radiation, hence the damage. In the winter the black type hardly ever freezes, while the yellow clay freezes to considerable depths. Therefore we plant all winter crops such as parsnips, oyster plants, horse radish, spinach, etc., on the black land.

To protect any extensive area is almost out of the question. Smoke and fires are useless against low temperatures and overhead sprinkling too expensive to install. To cover with soil is very practical if we have to deal with one cold night, but when the temperatures play havoc alternately for a month, the cost of covering and uncovering, together with the damage done, makes this unprofitable. A good way is to use more seed, reseeding the same area at intervals of a week, say three times, regardless of weather; one of the sowings will surely hit it and the poorer ones can be destroyed. We know of extensive sweet corn growers who depend upon this method entirely.

For planted out crops there is usually little gained by forcing the season; we believe in growing the best possible plants in cold frames and hotbeds and depend on our excellent plants and careful planting to gain the early market. We do not believe in pots and flats for plant growing,

as these are too expensive. However, we do believe in the use of a butcher knife to block out the plants in the frames. All our transplanted plants—lettuce, cabbage, tomato, pepper, egg plant—are dibbled perfectly in checks, say 2½ inches each way the first time. Just before the leaves lock we cut between the rows deeply one way; after a few days the other way. This will produce a powerful root system, which can be saved as easily as the pot plants, at one-tenth the cost.

Another factor in earliness is careful planting. If we wish to hurry up a crop we find it pays to water the plants as fast as set; to this water we add some nitrate of soda and sulphate of potash to get a quick start, say three pounds per barrel, using a preparation of one-third potash and two-thirds soda. A great deal depends upon good plants and well prepared land. We know one grower who invariably has a fine crop of early tomatoes. He uses large, soft plants on thoroughly prepared land at the right time. Another grower believes in hard, chilled plants and early setting. He is never early nor is his crop as good, and results count more than argument. Where plants in frames are close to the glass they need additional protection on cold nights. Plants touching either canvas or glass froze frequently, while uncovered plants escaped. If shutters are not available, a sprinkling of hay or straw on the glass or canvas is a big help.

MARKETMAN.

### Prices of Indoor Fruits and Vegetables.

New York, May 7.—Mushrooms, white, 50 cents per pound, brown 40 cents per pound; cucumbers, 75 cents to \$1.25 per dozen; lettuce, cold frame, 62½ cents per dozen heads; tomatoes, 20 cents to 25 cents per pound; grapes, Hambros, \$1.25 per pound. White dandelions for salad bring a good price but the supply is too small for the demand.

Chicago, May 11.—Mushrooms, 40 cents to 50 cents per pound; cucumbers, \$1 to \$1.25 per dozen; leaf lettuce, 22-25 cents per box; head lettuce, Louisiana, \$1-\$1.25 per hamper; \$6½ barrel (sugar barrel size); radishes 25-30 cents per dozen.

### Wichita, Kans.

#### GREAT DAMAGE BY HAIL.

A severe rain and hail storm on Sunday night, May 1, broke the drought that had prevailed in central and southern Kansas since February. Incidentally, it broke the record for 20 years for severity. The hail, while not of record-breaking size, was large enough to break most of the greenhouse glass in the territory visited, and was in such quantity that, after most of the glass was broken, it continued to fall and chop up the unprotected stock in the greenhouses.

Chas. P. Mueller lost about 35,000 feet; F. Kuechenmeister about 17,000 feet; W. H. Culp & Co. about 1,600 feet. The reports so far from other florists do not give amount lost, but the per cent of breakage was about the same. The Hersey greenhouses report about 90 per cent broken. G. R. Bixby says his loss is near 99 per cent, with a corresponding heavy loss in plants in greenhouses. The Fairview Greenhouses give 90 per cent as their estimate on glass. C. A. Rose states that his breakage is almost total. However, his frames covered with hotbed sash, escaped seri-

## Success In Market Gardening

REVISED AND ENLARGED EDITION.

A new and larger edition of this well known work on market gardening. It contains everything a market gardener wants to know, and in a form easily understood. It is an invaluable guide to any one in the business from the beginner to the most experienced.

PRICE \$1.10

AMERICAN FLORIST CO.,  
324 Dearborn St., Chicago.

## Now Ready...

To ship a very large stock of **Early Cabbage** and **Tomatoes** of the best leading varieties at \$1.25 per 1000; honest count. **Sweet Potato Plants** ready May 7 at \$1.50 per 1000. **Celery** ready May 15, three varieties.

Substitution of cheaper grades is thus easily exposed. Fresh sample brick, with illustrated book, mailed postpaid by manufacturers upon receipt of 40 cents in postage. Address

Trade Mark. American Spawn Co., St. Paul, Minn

ous injury, as they were protected by lath shades. The total breakage for florists alone will come near 65,000 feet, with about 35-40,000 more for market gardeners.

Coming at this time, the damage is especially severe, as the plant trade here sets in heaviest about May 1, and there is no time for stock to grow back into shape in time to meet the demand. As much of it is spring stock it cannot be grown on for fall sales. Young carnations were practically all in the fields and seem to have come through by a narrow margin. So far as known all the florists and most of the market gardeners were insured against loss to glass. The rainfall was very heavy, 2.58 inches during the first hour and a half being the weather station's report, with a total of over three inches.

A week of rainy and cloudy weather with not an hour of sunshine was the programme for the week preceding Mother's day. This sort of weather following the hailstorm, which broke greenhouse roofs so completely that all crops were practically outdoors, reduced production of stock to practically nothing. Consequently there was much skirmishing for stock. Most of us never before so fully appreciated the importance of the small odds and ends of production of our own houses. The Mother's day trade was all it could have been expected to be. The

# Vaughan's Lilium Harrisii.

**1911 Both Plants and Bulbs  
Carefully Selected.**

While we do not claim that our Harrisii are absolutely free from disease, or that every bulb will produce a perfect plant, we do claim that our growers' efforts in the way of spraying and roguing are producing results, our stock now being freer from disease than ever before and of genuine Harrisii type. In fact, the most general crop grown on the island of Bermuda.

**Vaughan's Seed Store**  
CHICAGO. NEW YORK.

only trouble seemed to be a scarcity of stock. Of course carnations had the call, but everything else was cleaned up too. Prices kept regular on most stock except carnations which advanced about 25 per cent, owing to the advance in wholesale prices. There was a stimulation of plant trade also, quite a few being sent as messages of remembrance. It surely seems that the observance of the day has come to stay, and that it will be a good thing for the retail florist, especially if the demand can be divided from carnations, and prices kept down close to normal.

W. I. CHITA.

#### Boston.

#### A GOOD WEEK.

The business of the past week was very encouraging both to wholesalers and retailers. Roses in all the popular varieties sold well and Mothers' day caused a good clean up in carnations, especially white. The price of the latter was up to four cents. Good stock of all kinds in fact cleaned up well and nothing is left over at the end of the day. The weather is fair and good both for business and stock.

#### NOTES.

Great interest is manifested in the coming orchid show which opens May 26. A gold medal and \$1,000 should be interesting and there are many other good prizes.

W. H. Elliott is sending in exceptionally good Killarney roses, also fine stock of Mrs. Humphrey Ward, the latter a fine novelty.

## French Bulbs, Immortelles White Roman Hyacinths

**NARCISSI**—Paper White, Grandiflora and Trumpet Major.

**True FREESIA REFRACTA ALBA**, and all other bulbs for forcing.

**ONE OF THE LARGE STEUR OPEAN DEALERS IN IMMORTELLES OF  
ALL COLORS, AT WHOLESALE ONLY.**

This is the right time to request quotations.

Orders should not be placed until you see my figures.

Agent wanted for above lines. Send full particulars to

**ALPHONSE ROCHE, Ollioules, [var.] France**

The Waban Rose Conservatories are sending in a very fine cut of roses in all varieties.

Welch Bros. report good business. They are handling large quantities of good stock.

## The Nursery Trade

### American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;  
W. P. Stark, Louisiana, Mo., Vice-President;  
John Hall, Rochester, N. Y., Sec'y.  
Thirty-fifth annual convention to be held  
at Denver, Colo., June 8-10, 1910.

VISITED CHICAGO: W. Van Kleef and  
F. W. Ebbinge, Boskoop, Holland.

HARRISBURG, PA. — The Berryhill  
Nursery Co. purchased 45 acres of  
land along the Jonestown road May 4.

W. F. HEIKES, of the Huntsville  
Wholesale Nurseries, Huntsville, Ala.,  
sailed on May 4 for Europe where he  
will visit the principal nursery dis-  
tricts of France and Holland. He ex-  
pects to return about July 25.

THE bush honeysuckles in Jackson  
park, Chicago, of which there is a  
very nice collection, were badly dam-  
aged by the recent freeze and are not  
nearly up to their usual form. What  
few flowers open properly do not look  
well owing to the foliage being  
brown and the same is true of many  
other shrubs.

### American Peony Society.

The annual meeting of the American  
Peony Society will be held at Horti-  
cultural Hall, 300 Massachusetts ave-  
nue, Boston, Mass., in connection with  
the regular peony show of the Massa-  
chusetts Horticultural Society, Thurs-  
day and Friday, June 9 and 10, 1910.  
This date is subject to change if  
weather conditions require.

A. H. FEWKES, Sec'y.  
Newton Highlands, Mass.

### Unlimited Control of Seed and Plant Trade PROPOSED BY SIMMONS BILL.

No more high handed piece of fed-  
eral control legislation has yet been  
proposed to our knowledge than the  
Simmons Bill, H. R. 15656, Section 3  
of which puts the secretary of agri-  
culture in entire and unrestricted con-  
trol of all seed importations. Further  
we learn the following from a gentle-  
man who was present at the nursery-  
men's hearing in Washington April 26  
and 27:

"One of the witnesses at the hearing  
was an official of the Department of  
Agriculture, who we had understood  
was slated for the management of this  
matter if the bill goes through, and  
he stated frankly and emphatically  
that in his personal opinion all for-  
eign nursery stock should be absolute-  
ly shut out. It is not difficult to guess  
what sort of trouble we should be up  
against if a man of that sort was in-  
trusted with the administration of the  
law."

Seedsmen will please take notice of  
the following part of Section 3 of this  
proposed law:

"The secretary of agriculture may  
at any time extend the provisions of  
this act to fruits and vegetables or  
bulbs or to other plants or seeds not  
specified in this act," so that it would  
seem to us that the florists and seed-  
smen are likely in the future to be  
bothered as well as the nurserymen.

Seedsmen and florists should write  
their congressmen and senators at

## ROSES Our Leading Specialty

opticon lectures on Horticulture and Arboriculture

once protesting against the passage of  
the bill and insisting that these trades  
be given a hearing.

### American Association of Nurserymen. ANNUAL CONVENTION.

We learn through Secretary John  
Hall, of the American Association of  
Nurserymen, that arrangements have  
been made by the entertainment com-  
mittee, of which F. A. Weber, Nursery,  
Mo., is chairman, by which members  
going to the convention, June 8-10, can  
reach St. Louis at a given time so as  
to meet fellow members and travel  
on to Denver in each other's company.  
We incline to the belief that this  
should prove a very happy combina-  
tion, affording opportunity for renew-  
ing acquaintances and enjoying a so-  
cial time together enroute, as well as  
giving an opportunity for discussing  
matters of business, etc., and thus sim-  
plifying things ready for action im-  
mediately on arrival at the convention  
city.

Eastern members desiring to travel  
by way of St. Louis will arrange to  
reach that city as early as possible on  
the morning of June 6, leaving via  
the Colorado limited, over the Bur-  
lington Route, at 2:15 p. m. It is par-  
ticularly desired that not only eastern,  
but southeastern and southern mem-  
bers observe the same schedule. Ar-  
rangements for through tickets and  
reservations can be made with the  
nearest agent. All roads will sell  
through tickets to Denver, but care  
must be taken to have tickets read  
over the Burlington, and arrange leav-  
ing time so as to make connection  
with the Burlington St. Louis train  
No. 13.

All "nurserymen special cars" will  
be consolidated at Oxford Junction on  
the morning of June 6, thus giving a  
daylight run together through west-  
ern Nebraska and eastern Colorado.  
The meeting place in St. Louis for in-  
coming delegates will be at the Bur-  
lington offices, 728 Olive street, up to  
12 noon; after that time near the in-  
formation bureau, Union station. A  
committee of St. Louis nurserymen  
will be glad to meet members and as-  
sist in any way possible. Reservations  
for the St. Louis sleepers can be sent

to F. A. Weber, Nursery, Mo., or to  
J. G. Delapaine, city passenger agent,  
Burlington route, 728 Olive street, St.  
Louis, Mo.,

Mr. Weber also confirms the previ-  
ously announced arrangements for  
the entertainment of members and  
their wives while in Denver, not the  
least interesting of which will be the  
proposed complimentary trip over the  
renowned Moffat route, said to be  
one of the finest scenic routes out of  
Denver. Funds for the entertainment  
features promise to be such "that the  
various stunts will be pulled off on  
schedule time."

The exhibits promise to be up to the  
average, if not in excess, and E. P.  
Bernardin, chairman of committee on  
exhibits, writes: "We are promised  
some fine Colorado grown ripe cher-  
ries, which all will enjoy." Every  
member reading this notice, and who  
has not yet sent in his name to the  
secretary, should do so at once, in or-  
der to be sure of a place in the badge  
book. Address John Hall, secretary,  
204 Granite building, Rochester, N. Y.

Members going by way of Chicago  
will leave this city on Burlington No.  
9, leaving 9:45 a. m., June 6, con-

solidating with the St. Louis train No. 13 at Oxford Junction at 8:25 on the morning of June 7, arriving at Denver 4:05 p. m. same day. Members going to St. Louis by way of Kansas City can leave that city on Burlington train No. 13, 9:30 p. m., June 6, consolidating with St. Louis train No. 13 at St. Joseph, Mo., at 11:25 p. m. Members going by way of Omaha to St. Louis will arrange reservations so as to take No. 9 out of Omaha, leaving at 11:25 p. m., June 6.

### Duty on Fig Trees.

Fig trees classified as nursery stock under paragraph 252, tariff act of 1897, were claimed to be free of duty as tropical or semitropical fruit plants under paragraph 560 by J. Leroy Nickel of San Francisco but the following decision has been made by the general appraiser: "The case has been submitted without evidence. These trees were shipped from London and, according to the statements in the protest, were produced in England. From the article on the 'Fig' in the New International Encyclopedia (Vol. VII, p. 596), we learn that the fig tree was introduced into England prior to 1257, and is grown in the south of England to this day; hence we must conclude it has become indigenous to that climate, and can not be considered of a tropical or semitropical nature. The protest must therefore be overruled."

JOHNSTOWN, PA.—The H. H. Mishler Produce Co. will build five greenhouses this summer, each 25x325 feet, using the King Construction Co.'s materials

## CANNAS

We are sold out of all Cannas with the exception of the following varieties; and offer until sold at prices quoted.

Mention the American Florist when writing

### Providence.

Business for the past week was not so satisfactory as it has been owing to unsettled weather. Frost has done several thousand dollars' worth of damage to early fruit flowers and vegetables and shortened up on first class cut flowers. Gladiolus America and Spanish irises are coming in more plentifully and sell well. Carnations are good in quality and there are plenty to go around. The same may be said of roses but these were bought up close. Indoor and outdoor bulbous stock remains very plentiful and of good quality. Sweet peas, orchids and gardenias are completely cleaned up here two and three times a week. Yellow daisies are plentiful and sell well. No bedding plants except pansies have sold during the week. Large orders for geraniums in bloom for Memorial day are being booked. Every outdoor flower was destroyed by the frost. The great glut of this stock that has been seen for the past two weeks was entirely wiped out and this means a harvest for the grower of indoor stock. With the dark weather of the past week indoor stock has shortened up but the prices remain the same as they were during April. That is owing to poor business.

### NOTES.

The executive committee of the State Board of Agriculture at its regular monthly meeting May 4 voted \$1,500 and other assistance to this city to fight the elm tree beetle and tussock moth, as well as voting to aid nine other cities and towns in the same work along other lines. City Forester Johnson appeared before the committee at the meeting and explained that the city did not need any

**J. L. DILLON,**

**Bloomsburg, Pa.**

instructions to carry on the work, nor did it need the apparatus. He said that if the committee would vote a sum of money and contract to supply the spraying material, the city itself would look after the rest of the work. This was done. There are two other cities and seven towns the state board will aid by supplying a man to take charge of the work, the apparatus and the material. The municipalities will furnish the help needed in the work. President William Williams presided at the meeting and there was a full attendance of the executive committee. About 100 persons have applied for work in the fight against the gypsy moth to be carried on by the board.

Wm. Hay has leased a store at the corner of Washington and Clemence streets to be used as a wholesale store for such stock as he raises on his place at Oakland. He has just received the material for the building of a new iron frame rose house 60 x 300 feet. A real estate agent has about completed the sale of Mr. Hay's greenhouses on Dyer avenue, the Olneyville section. This place consists of 60,000 feet of glass and dwelling. Mr. Hay is now located at his new place at Oakland.

Joseph L. Reynolds, of T. J. Johnston & Co.'s store, who has been in the Rhode Island hospital since Thanksgiving week with a complication of blood poisoning and pneumonia, underwent another operation dur-

ing the past week. Joe has the heartfelt sympathy of his many friends who hope to see him at his post soon.

Mothers' day was observed here Sunday, May 8, by several thousand people wearing a white carnation in their buttonhole. The Out Let Co., a large department store, gave away 5,000 white carnations to customers last Friday and Saturday to be worn on Sunday in honor of Mothers' day.

F. Macrea & Sons have completed a cold storage house for bulbous stock to be forced at all times in the year. Alex. Macrea finds this very necessary since he and Edward Brook bought the retail store business of the late T. J. Johnston.

James B. Canning expects to lease a retail store. He has not given out the exact location yet and says the present occupants are not to vacate till September 1.

M. J. Leach & Sons, Wm. Hoffman and Frank O'Reilly of Pawtucket, all report an immense business during April. Funeral and design work was exceptionally heavy.

Geo. A. Johnston, who has been confined to his home most of the past year with rheumatism, is about again. J. BRITON.

**HOUGHTON, MICH.**—The Pearce Hardware & Furniture Co. is building a large greenhouse here with materials supplied from Chicago.

# Palms That Bring "Repeat" Orders

That's the test of quality—not the first order, but the second and the third! We're glad for new business—and we're getting a lot of it—but we value most of all the patronage of those who have been with us steadily for years. Such orders prove beyond question the superiority of our Palms—prove the advantage of buying home-grown stock produced under the care of Palm experts.

All of our Palms are propagated from the seed, right here in our own houses. Ours are clean, strong and vigorous—vastly better than any imported Palms you could buy—yet they cost no more.

## Areca Lutescens.

6-in. pot, 3 plants in pot, 26 to 28-in. high...Each \$1.00  
7-in. pot, 3 plants in pot, 30 to 32-in. high...Each \$2.00  
8-in. pot, 3 plants in pot, 36 inches high...Each \$2.50  
8-in. pot, 3 plants in pot, 42 inches high...Each \$3.00

## Cocos Weddelliana.

2½-in. pot, 8 to 10-in. high  
Per 100.....\$10.00

## Kentia Belmoreana.

5-in. pot, 6 to 7 leaves 18-in. high.....Per doz. \$ 6.00  
Per 100.....50.00  
5-in. pot, 6 to 7 leaves, 20-in. high, Per doz.....\$ 9.00  
Per 100.....70.00

These Palms not only bring "repeats" to us, but to you, too—your customers will appreciate their excellence and will order again. It's little trouble to dispose of such "quality stock" and there's profit in it. Use Heacock's Palms for straight sales for store display and corating.

cont. acts, or entering; you can, in this way, build up a department showing a good income—florists everywhere are doing it.

We offer a very choice collection this spring and advise placing orders early before the stock is picked over. Shipments are made by fast freight, assuring quick deliveries at low carriage rates.

### Big Greenhouse Succumbs.

#### WIND'S QUEER PRANKS.

With a mighty noise resembling a terrific explosion, part of the mammoth vegetable greenhouse owned by W. H. Weinschenck of New Castle, Pa., gave way to the tremendous pressure upon it, during the heavy windstorm during the night of May 1, and several thousand dollars' damage resulted. The havoc wrought was brought about in a very peculiar manner. The greenhouse, which is some 600 feet in length and about 135 feet in width, has been in course of construction for a year or more past, and was almost completed. Neither of the ends have as yet been closed entirely. When the wind storm struck the building, it struck it in such a manner that the wind started through from both ends at once. When the currents met about the middle of the long structure, something akin to a gas explosion took place and about 250 feet of the building was blown to atoms. This was taken right out of the middle of the building and 200 feet were left standing on both sides of the destroyed section, but in a damaged condition.

The greenhouse was filled with spring vegetables and other greenhouse stock and the greater part of that in the destroyed section was ruined when the avalanche of broken glass fell upon it. This greenhouse is the largest one in this part of the state and the cost of

Fredericton, N. B.

May 1 entered with the snow cover-  
ing the ground. For several weeks  
past we have had unusually mild, hu-  
mid weather, but for a change a thun-  
der storm cleared the air, the wind  
changed to westerly and two or three  
nights we had eight or ten degrees of  
frost. We have had to resume firing  
again in houses, but the sun shines  
again now and the snow has mostly  
melted. The peas are up, rhubarb is  
well advanced, but the latter looks  
set back or chilled through and  
through. The Gladiolus nanus varieties  
in the benches are just coming into  
bloom and are going to be a great  
success, including Bride, Blushing  
Bride, General Scott, Mathilda, Peach  
Blossom, Queen Wilhelmina and oth-  
ers. The carnations look well; fu-  
neral work has been in great demand  
since Easter. Farming and putting in  
crops is the order of the day. There  
seems to have been a general glut of  
potatoes in these parts. During the  
winter many predicted they would be  
\$2 per barrel this spring, but they are  
down to 60 cents. Some have to feed  
them to their cattle, as there is next  
to no demand for them. Perhaps there  
will be far less planted this year, as  
farmers do not or cannot work for  
nothing all the time. J. B.

J. D. THOMPSON CARNATION CO.,  
JOLIET, ILL.

Albert Lea, Minn.

Clausen & Son have been very successful with their violets this year and returns for them were very satisfactory. In roses this year they will grow 2,000 White Killarney and 2,000 pink with a few each of Bride and Richmond. In carnations they are growing all the leading commercial varieties. Having had the misfortune to buy a poor grade of putty two years ago, which gave them a great deal of trouble this winter, they are now busy reglazing their entire plant. Clausen, Jr., is very fond of hunting and last winter tramped the woods for deer, securing as many as the law allows. He is now planning a fishing trip with O. J. Olson of St. Paul. ABYDOS.

## A. N. PIERSON, Inc.

CROMWELL, CONN.

## Gardenias

2¼-inch pots, \$7.00 per 100; 3-inch pots, \$12.00 per 100; 4-inch pots \$20.00 per 100.

Bedding Plants

For Immediate Shipment.  
NOW READY.

Godfrey Aschmann, the busy bee, is more active than ever. Come and look at what he and his sons and employees have done in four weeks' time. Inspect it yourself, judge it yourself, and you will say "Is it possible?" Ten greenhouses and equally as many frames are filled with choice bedding plants of all descriptions.

PRICE. \$1.00 POSTPAID.American Florist Co.,  
324 Dearborn St., CHICAGO, ILL.Morehead  
Steam Traps

The Morehead Return Steam Trap is specially designed and constructed for greenhouse steam heating plants. It fills the dual capacity of steam trap and feed water pump. It will create conditions enabling the florist to grow better flowers; save on fuel, water and labor bills, and derive general all around satisfaction from the installation.

Send for "Florist Trap Book."

MOREHEAD M'F'G. CO., Dept. N, Detroit, Mich.

## The Grate Does It!

Saves 10 to 25% of the  
coal your boiler is using.

Positive guarantee given

Send for circular "N"  
and our famous Lecture  
on Combustion.

U. S. ROCKING GRATE BAR CO., 77 Jackson Boulevard, CHICAGO.

## HEATING PLANTS

Standard Steam and Hot Water Heating Plants

WONDERFUL VALUES.

We can positively save you from 30 to 75 per cent on Heating Equipment of all kinds. Our plants are of the most modern type, and only the highest grade material enters into their construction.

We guarantee them to be exactly as represented, and highly satisfactory in every way. You run no risks. Send us a sketch or diagram of your building and let us make you an estimate. Do not wait until cold weather to install your plant. Start now.

Send for our Special Heating Catalog, filled with valuable information; tells you every angle and phase of the "Heating Question," and how you can make one dollar do the work of two by installing the plant yourself. Ask for Booklet No. 47.

CHICAGO HOUSE WRECKING CO.,

35th and Iron Sts., Chicago.

Wittbold  
Watering SystemThe saving in time and labor for  
one season will pay for a com-  
plete equipment.

# Ammoniated Lawn Lime

Kills Weeds.

Makes Grass Grow.

Applied as a light top dressing to lawns it kills all flat leaved weeds such  
as Dandelion, Daisy, Plantain, Sorrel, Chickweed, Moss, etc., in 48 hours  
and without other fertilizer produces a wonderful, luxuriant, rich, green growth  
of lawn grass—which is distinctly noticeable 50 feet away.

The use of Ammoniated Lawn Lime supersedes hand weeding of lawns,  
putting greens, etc. It saves the grass from being pulled up and in many  
cases ruined. Grasses take a new vigorous growth, avoiding probable  
trouble in the future.

Quantities: If very weedy 1-lb. to 40 square feet, 25-lbs to 1000  
square feet, (20x50). Half to one-quarter amount  
if moderately weedy.

ABSOLUTELY GUARANTEED. Money refunded if not satisfactory.

We want Seedsmen or Florists as agents and distributors in  
every important city and town.

Retail Prices: 2-lb. cans, 25c, 50 cans per case. 5-lb. cans 50c,  
20 cans per case. Bags, 25-lbs. \$2.00; 50-lbs.  
\$3.50; 100-lbs. \$6.00.

Descriptive Circular and Wholesale Prices on Request.

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.  
The pump is of brass throughout, simple and powerful.  
The mixing device keeps the contents of the tank well stirred up from  
start to finish.

When the machine is filled to within six inches of the top, a few strokes  
of the pump will compress enough air in the tank to produce a continuous  
mist-like spray for 15 minutes

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,

and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

Pasadena, Calif.

The date of the fall flower show of the Gardeners' Association will be November 3-5 and it will probably be held on the lawn of the Maryland hotel. A dinner was given May 3 by D. M. Linnard, manager of the hotel, to the leaders in the movement. Mr. Linnard suggested building a pergola inclosing a quadrangular piece of ground on his lawn to be covered with canvas in which the show could be held in a most beautiful setting. There was great enthusiasm shown, notwithstanding the spring exhibition resulted in a loss of \$200. The show was an artistic success but lack of public support was supposed to be due more to ignorance on the part of the public as to the nature of the show and it is hoped to do better at the fall show.

Myron Hunt, architect of the hotel, is taking quite an interest in the show and has offered his services in carrying out any of the details as well as a prize of \$10 for the fall show and a like amount for the coming spring show. Mayor Earley, who has always taken considerable interest in the association, suggested that special efforts be made to interest public spirited citizens and flower lovers and to induce them to offer prizes good enough to bring exhibitors from a distance as well as local ones. Plans for the future were talked over with enthusiasm and it is said that indications pointed to success and that the city with its natural advantages, should have a show equal to any in the United States. Those present as Mr. Linnard's guests were Mayor Earley, Otto Heutschey, president of

PIERSON

U-BAR CO.

DESIGNERS AND BUILDERS

1 MADISON AVE. NEW YORK.

## High Quality Not High Prices

Whenever we make a piece of material it is our aim to turn out the very best that can be produced; high quality is our object for nothing else will satisfy the man who wants to build a greenhouse and make a success. There can be no success without this striving after quality; without there be an effort to produce something better than was produced before. The man who believes in selling poor stock, low class goods, and gets what he can for his work, never progresses or succeeds permanently. We are working hard to make our construction more modern, to improve our patterns and our methods of manufacture, we must keep up with the times and stand at the head of the procession or drop out of the line. Prices are to be considered of course, in everything, but it's quality that counts after all. You forget the price but you don't forget the quality—

It's not what you pay but what you get for what you pay—that is economy.

**JOHNSTON HEATING CO., 138 E. 31st St., NEW YORK.**

Washington.

Casting aside the cares and worries of everyday business life, prominent business men of the capital, with ladies enjoyed the annual banquet of the Washington Florists' Association at Rauscher's May 3. The large banquet hall was transformed into a veritable fairyland of flowers, a masterpiece of the decorative art. Green and white were used effectively in the decoration scheme, and the banquet room was a scene of floral splendor seldom equaled in this city. Ninety-five diners were present, more than half of whom were beautifully gowned women, whose presence added much to the picturesqueness of the occasion.

A pleasant surprise to Toastmaster William F. Gude came shortly after the opening of the festivities, when Fred M. Owen, in an eloquent speech, presented him a handsome silver service. The set consisted of 12 pieces and was the gift of Mr. Gude's friends in daily business life. Mr. Gude was completely overcome, and it was

### McCray Refrigerator Co.

169 Lake Street, KENDALLVILLE, IND.

Albany, N. Y.

As a result of the May meeting of the Florists' Club the members are planning to hold the second annual flower show in November. The matter was dealt with at some length at the meeting and President Goldring was authorized to appoint an executive committee to have charge of all the details with power to appoint sub-committees, the same as a year ago. President Goldring immediately re-appointed the old executive committee with Fred A. Danker chairman. The subject will come up again at the June meeting when it is expected that more details will be elaborated. Edward Griffin, one of the members, arose to make complaint that a number of out-of-town growers come into the city to plant trees in front of householders' residences without first securing a permit to do so from the city authorities. President Goldring appointed Mr. Griffin, Patrick Hyde and E. P. Meaney a committee to bring the matter to the attention of the city authorities. The city regulations here require that the commissioner of public works issue a permit before a tree may be planted in any of the streets. The club agreed to donate about 400 white carnations to the Mothers' club which took orders for them and will devote the proceeds to its charitable work. Secretary Danker spoke of his efforts through the local chamber of commerce to induce the government to renew the publication at the city station of the daily weather map. Secretary Jones of the chamber showed Mr. Danker about 40 communications from railroads, traction companies, merchants and large shippers in this section, all of whom had protested against the discontinuance of the map. It was decided to continue the custom, begun last year, of decorating the soldiers' monument in the Rural cemetery with a large wreath on Memorial day. A similar wreath will be placed also this year on the grave of M. Hulbert, a member of the club and a G. A. R. veteran, who died during the year. The secretary announced one proposal for member-

### San Francisco.

Recently the Art Floral Co. was given the entire floral decorations for a banquet and reception given the officers of the Portuguese cruiser San Gabriel, which is visiting here. One of the most noticeable pieces made for the above affair was a small model of the cruiser made principally of Cape flowers and immortelles, the finishing or trimming work on which was done in fresh flowers and ferns. The model was taken by the officers of the cruiser and will be presented by them to the Geographical Society of Portugal when the vessel arrives there.

H. Plath has started a movement among the growers and florists of this city to purchase bonds from the committees of the Panama-Pacific International Exposition. His endeavors in this direction have already met with great success.

ARTUS.

KANSAS CITY, Mo.—The second annual exposition of the Missouri Valley Agricultural and Horticultural Society will be held at Electric park, September 24 to October 9, inclusive. The floricultural prizes aggregate \$1,186 with a silver loving cup or sweepstakes prize valued at \$50. The premium list is now being distributed.

## Greenhouse Construction.

By L. R. TAFT.

A complete treatise on greenhouse structure and arrangements of the various forms and styles of plant houses, for professional florists as well as amateurs. All the best and most improved structures are clearly described. The modern and most successful methods of heating and ventilating are fully treated upon. Special chapters are devoted to houses used for the growing of one kind of plants exclusively. The construction of hotbeds and frames receives appropriate attention. Over 100 excellent illustrations. 210 pages, 5x7 inches. Cloth \$1.50.

### Greenhouse Building.

Beaumont, Tex.—South East Texas Floral Co., two new houses for carnations.

Leavenworth, Kans.—Sunnyside Floral Co., two houses 24x150 feet for roses.

Johnstown, Pa.—H. H. Mishler Produce Co., five greenhouses 25x325 feet.

Denver, Colo.—The Curtis Park Floral Co. will rebuild its whole place.

Kennett Square, Pa.—Yeatman & Way, one greenhouse 60x200 feet.

Philadelphia, Pa.—Didden & Son, two new greenhouses 30x200 feet.

Grand Junction, Colo.—Piatt Bros., three houses, 28x120 feet.

Carthage, Mo.—Stephen Hyde, two greenhouses, 28x390 feet.

Boston, Mass.—Edgar Bros., one greenhouse, 43x200 feet.

# Attention!! Glass Buyers!!

## GREENHOUSE GLASS.

You will save money if you obtain our prices before you buy.

Quality A. No. 1. Prompt shipments.

## Hooker's Greenhouse White Paint

The most durable white paint for this purpose.

Half barrels, (25 gallons), per gal. \$1.85. 5 gal. pails, per gal. \$1.40

## H. M. HOOKER COMPANY,

WHOLESALE GLASS AND PAINTS,

Long Distance Phone  
Monroe 4994.

651-659 Washington Boulevard, CHICAGO.

## Garman's Antipest

INSECTICIDE AND FUNGICIDE

For the Garden, Orchard and Greenhouse

Non-poisonous and harmless  
to vegetation.

Kills Green Fly, Aphides, Bark Lice,  
Thrips Mealy Bug, Red Spider,  
Scale, Wire Worms, Ants  
and Slugs.

This is the grower's friend. Handy to  
use, cheap and effective, mixes readily in  
water. Destroys all insect pests and  
keeps down filth. Circulars on applica-  
tion. \$1.50 per gallon. Also in  
quarts, half gallons and in bulk.

**PERFECTION CHEMICAL CO.,**  
FLUSHING, N. Y.

MASTICA is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass, as occurs with putty. Lasts longer than putty. Easy to apply.

## HALF HOUR CHAPTERS FOR FLOWER GROWERS

### Peonies.

Wherever the supports have not been fixed to peonies it must be done at once or the increasing weight of the shoots and flowers will cause a lot of breakage. When they are planted in rows, stakes driven in every 20 feet or so and a wire stretched along on each side of the rows form a simple and effective method of keeping them up. Cross strings between the plants will prevent them falling lengthwise of the rows and are necessary when the clumps are planted at a good distance apart. Hoops and stakes to each plant are sometimes employed or three stakes driven in around each clump and tied around with stout strings. Any of these methods is good and well worth while for many of the best flowers will be beaten down and ruined unless support of some kind is given. There is still time to run through the plantation again for weeds, using hand hoes and keeping away from the plants. A good mulch of semi-decayed manure is also helpful if it can be spared and will keep the soil cool and moist during the hot weather, giving better flowers and assisting the formation of good crowns for another season.

### Late Sweet Peas.

One of the worst troubles of the sweet pea grower under glass is the dropping of the earliest and best buds of a sowing. The Spencer types, being stronger in growth than the smaller, winter flowering varieties, are especially liable to this trouble, which is frequently accentuated by over watering and excessive nitrogenous manure in the soil. It is almost impossible to prevent the earliest of the sprays from falling. In fact it is little loss when they do go for it is best to get some growth into the plants before flowering much, but when the bud dropping continues higher up, and when perhaps two out of a three-flowered spray drop, leaving only one bloom to expand then it becomes a serious loss to the grower. At such times the utmost care should be taken

in the watering and, when the soil is over rich, as is too often the case, only just enough to keep the plants from flagging must be given. As soon as the flowers begin to open regularly, however, there is less danger of over watering, and the plants are comparatively safe. Shading so far this season has been hardly necessary, but there is every prospect of brighter weather now and, in order to keep the plants growing and the color in the flowers, a light shade must be put on and added to as the sun gets more power. The plants must be tied in such a way that the sun and air plays freely between them, and they do not grow into a solid mass. When they are sown in clumps two of these can be drawn together, or in any other way that may occur to the grower. This will also allow of a little spraying during bright weather though this must not be overdone at any time.

### Care of Young Stock.

The most critical time in the life of the young stock may be said to have arrived, not on account of any particular difficulty in culture, but owing to the crowded condition of everything and the amount of work that has to be put through. This frequently leads to neglect and neglect for a week now means a check that the plants will not get over for months. Carnations may be standing close, either in small pots or in flats and time cannot be found to plant them out or the soil is not ready. When they are in pots they may be spaced a little more and this will be a temporary relief while running a knife each way through the flats between the plants will serve to make the roots ramify more and check the growth slightly, which is an advantage. But it is high time now that carnations that have to go to the field were there. Those to be kept inside may, if absolutely necessary, be planted at half distance and every other plant removed when new benches are ready, but avoid this if

possible. The good prices that roses are bringing prevents many growers from throwing the old plants out, but when the decision has been made as to which are to be left and which destroyed then the sooner they are thrown out the better. June will soon be here and the benches will have to be cleared and put in order. We often see young stock in pots overrun with grass and other weeds at this time. Not only do the weeds starve the roses by robbing them of the nutriment in the soil, but insects find congenial quarters in the weeds and soon spread to the young roses. A couple of good boys or cheap help of any kind can soon clean over and give a new stand to a large number of plants and it is well worth while. Grafted stock needs especial care. If allowed to grow into each other and become interlaced the plants are very difficult to separate without breaking them out at the point of union with the manetti and only the most careful help must be entrusted with this work.

#### Asters.

The early and midseason asters are now ready for planting out and no further time must be lost in preparing the quarters for them, and getting them out. Land that was well manured in fall and has been laying rough all winter will need very little preparation. The dry weather in March and the snow and rains since have mellowed the surface and all that is necessary in most cases is to harrow this down, also using a light roller to firm it if it seems necessary. The weather is so uncertain that it is best not to prepare more ground than can be planted in a day, or at most two—less than this if storms seem imminent—as the surface once firmed down does not dry out so quickly and delays are caused. Leave good room between the plants for cleaning and cultivation. Fifteen inches apart is none too much for the medium growers and more than this for the strongest. Also leave a path at every five or six rows to give good room for getting between the beds for dis-budding and other care of the plants and cutting the flowers. Plants that were pricked out on benches will lift with good balls of roots. The benches should be well watered an hour or two before lifting the plants, and this should be carefully done, laying them in flats to carry to the field. Trowels should in all cases be used. The use of dibbers causes the roots to be crowded together in the hole, the sides of which are hardened by the passage of the dibber rendering it difficult for them to get out, while, when a trowel is used, the sides are broken down, the roots spread out and the plants given altogether a better chance. The little difference in the time necessary to carry out the work properly is not worth considering in the light of the greatly increased chances the plants have for making good. Water thoroughly as the plants are put out and cultivate lightly as soon as the surface is sufficiently dry.

OLEAN, N. Y.—D. R. Herron has just purchased a new Cadillac touring car.

## THE RETAIL TRADE

### A Floral Pillow.

SEE SUPPLEMENT WITH THIS ISSUE.

The pillow as a funeral design appears to be more popular than ever, orders coming very frequently for it. Unfortunately a very poor imitation of what this design can be made is often put up for it. Go into the cheaper parts of any of our cemeteries and see the hideous productions that are sent to funerals of people of the poorer class and see how they are made. Such things are a disgrace to the business and the worst part of it all is that as much money or more is often spent upon these things as would suffice to make a really effective piece of work if handled properly. A few common ferns and callas or lilies and a little asparagus or boxwood will be enough in the hands of a skillful designer to turn out a good though not, of course, an elaborate pillow, while in the designs mentioned dozens of white carnations will be used to form a groundwork for some chenille letters and a fringe of ferns will be set straight in line on all four sides of the frame.

It is quite time that all the heavy, stiff arrangements of solid flowers were done away with for good. There is nothing pleasing or artistic about them; they use a lot of stock and are unsatisfactory generally. A pillow to be effective should be well raised in the center and the outside edges should be broken up with ferns, lily

to be properly arranged to show these characters. If they are going to be jammed in closely in a heap then one may just as well tie a piece of figured cloth over a frame and let it go at that.

### New Store of Chas. DeClerg, Green Bay, Wis.

Chas. DeClerg, of Green Bay, Wis., reports a heavy increase in business since the opening of his new store shown in the accompanying illustration. His Easter trade was double that of last year. The store is always well stocked with plants and cut flowers, this making it very attractive at all times. In connection with the store he has about 15,000 square feet of glass and two acres of land. His greenhouses supply him with carnations, pot plants and bulbous stock. He buys his roses on the Chicago market, having a shipment every day. Mr. and Mrs. DeClerg attend to the store and have the assistance of a young lady part of the week.

ABYDOS.

### Welch Brothers, Boston, Mass.

The firm of Welch Bros. is so well known throughout the country that it is a difficult undertaking to add to what is already known; that is, that they stand second to none in the wholesale cut flower business. The business was founded by Patrick Welch, who, though yet of youthful appearance, was old enough in 1876 to go to the Centennial exposition at Philadelphia as a representative of the late Col. Edmund Wood, of Natick, Mass. In 1877 he started for himself

INTERIOR OF CHAS. DE CLERG'S STORE, GREEN BAY, WIS.

of the valley or something of a light and graceful appearance, not placed in stiff lines, but prettily undulating. Lilies or callas may be mounted and raised in the center and kept well apart so that each flower shows its full beauty. Any other flower may be similarly treated. Because roses are used there is no need to crowd them in so stiffly that one cannot see between them. The beauty of the individual flowers should be seen, not a conglomerate mass of petals without rhyme or reason. Flowers are living things with characters and need

in the wholesale business at 164 Tremont street, Boston. Later his brothers, David and Edward, became associated with him in the business and the firm has for many years been known as Welch Bros.

On October 1, 1906, they opened for business in their present store, 226 Devonshire street. Their opening at that time was a gala day among the florists of Boston, many of whom attended. There were many handsome decorations in and around the store and it was a day of congratulations from the many visitors to the brothers.

A FLORAL PILLOW.

The pace which they set at that time in opening a large store in one of the finest business localities of Boston has been steadily and consistently maintained. They handle the stock of many of the best growers of New England and the constant increase in their business is a fine tribute to their fair dealing and sound business methods. Aside from managing this great business, Patrick Welch has always found time to take an active interest in everything that pertains to the advancement of floriculture. He is a member of the Society of American Florists, the Massachusetts Horticultural Society, the American Rose Society, the American Carnation Society and a past president of the Gardeners' and Florists' Club of Boston. He is a ready and effective speaker.

At the last meeting of the American Rose Society, held in New York, he was nominated for president, but positively declined the honor on account of his time being so occupied with his business. The other two members of this noted trio, while possibly not as well known outside of their home city and state as their brother, are both men of genial temperament and possess the solid qualities required in large business affairs.

A very noteworthy feature of their business is the careful attention to detail. Employing a large number of men, each has his work and is expected to attend to it; a thorough system is enforced. Most of the cut flowers handled are sold the day they come in, but there are the most modern and up-to-date facilities for cold storage. An entire floor, 60x125 feet, is devoted to florists' supplies, of which there is a most complete stock, as it is the aim of the firm to have everything that may be called for by the retail trade.

#### Miniature Landscapes.

One of the Fifth avenue, New York, florists is showing the most fascinating centerpieces made of dwarf trees. One can buy at this shop a large or small landscape; one with a mountain and brook, or a peaceful meadow scene with habitations in the foreground. For years one could purchase potted dwarf trees, but this selling of them set in miniature landscapes is quite new. The foundation for the centerpieces are earthenware trays, some being three feet long, though all are very shallow. On these are built the landscapes, perfect in every detail, and set out with tiny cedars and shrubs.—Life.

HOUSTON, TEX.—This city will have a floral parade during No-Tsu-Oh carnival. This was omitted in last year's celebration but the public demands it this year.

MEMPHIS, TENN.—Otto Schwill & Co., are planning to build 12 or 14 new greenhouses this fall, in addition to which the old plant now operated by the Idlewild Greenhouses (the property of the former firm) will be remodeled and moved to a more desirable location. Trade with this concern has been excellent the past season, due, no doubt, to the improving conditions in the south. Messrs. Schwill & Co., are looking forward to a large increase in business next season.

## ORCHID NOTES.

THE soldier orchid, *Habenaria militaris*, is the brightest red of any orchid known.

*CATLEYA MOSSIAE* is perhaps the most variable cattleya in existence and there are hundreds of named varieties known to specialists.

As soon as the growth of *Cypripedium insigne* and *Cœlogyne cristata* is finished place them in a shady frame for the summer and allow plenty of air.

*ODONTOGLOSSUM MACULATUM* lasts perhaps longer in good condition than any other odontoglossum. We have had it last in flower for over three months.

It is impossible to keep odontoglossums of the crispum and similar sections too cool under glass from now until September. Shade heavily and damp the stages and floors freely.

#### Hardy Orchids.

There are no more beautiful plants in existence than the hardy native, orchids of North America. Hardy plant specialists in other countries go to great expense and trouble in fixing up suitable quarters to grow them and spend quite a little money on the plants, yet we have but few specialists in this country that will take the trouble to grow them. Among the most beautiful are the native cypripediums, especially the mocassin flower, *Cypripedium spectabile*. The chaste beauty of this plant is not exceeded by the finest tropical exotic and with a little care this lovely plant could be grown to perfection in almost any garden where there is a little shade. This plant grows naturally in the swamps, often in a kind of knee-deep morass of decayed moss, where it is almost impossible to reach it, but where the delicate beauty of the flowers is even finer than when growing on drier soil.

This gives a good indication of the position likely to suit it under cultivation. Planted, as we have frequently seen it, on a dry border devoted to the hardy herbaceous perennials, with no protection from the scorching heat of the summer sun or winter's cold, it is little wonder that this beautiful plant succumbs. The conditions are so obviously wrong that one wonders at anyone with the smallest idea of plant growing trying to cultivate it under such conditions. But in many gardens there are low lying swampy places where water percolates through a light, rich, peaty soil and where the sun shines only part of the day, owing to shade cast by trees or shrubs. Here is the ideal place for *Cypripedium spectabile* and a few clumps of it planted while at rest in fall or early spring will be one of the most delightful features of any garden. The soil found in such positions is usually formed of decaying vegetation, such as leaves, and is ideal for the purpose.

Where such a spot does not exist naturally it should be made by turning in some water from whatever supply is at hand, first digging out

the natural soil if unsuitable and replacing it with peat, moss and a little loam and as much well decayed leaf mould as can be procured. The water should be so arranged that it seeps slowly through the whole mass of soil and with only a sluggish outlet, just the conditions, in short, that are found in the swamps. Besides *C. spectabile* there are other species that will thrive in a slightly drier soil better than in the swamps. *C. acaule* is a pretty native species widely distributed over the northern states and Canada. It pushes up a single flowered stem from the center of the crown and the flower has an attractive lip, varying in color from rose purple to nearly pure white. *C. pubescens* is another handsome species with a yellow lip and narrow petals and *C. parviflorum* is a similar but smaller species. Both are found growing wild in the northern states. *C. candidum* has a white lip striped with purple and the sepals are greenish, a very attractive little plant. *C. Japonicum*, as its name implies, is not a native of this country, but comes from the orient. It flowers early and is often damaged by frost, but is a pretty plant with a rosy white or light pink labellum. *C. Calceolus* is the only British species and is probably almost if not quite extinct there as a wild plant, though it can be obtained from British and continental dealers. The lip is a soft, bright yellow and shows up well against the deep brown of the other segments of the flower.

While these latter species do not, as a rule, require the wet, swampy conditions in which the mocassin flower delights they will not thrive well on hot, dry borders. They must have plenty of root moisture, but the soil should be kept open by the addition of grit of some kind, coarse sand or road grit answering well for the purpose. This kind of soil does well, too, for another pretty genus of native orchids, the *habenarias*. We have gathered these plants out in the middle of a sun-baked prairie in summer, but they have never been so fine in growth or flower as when a few chance plants have been seen near a water course or in semi-shaded positions, though they are beautiful and fragrant wherever grown. *H. blephariglottis*, *H. ciliaris*, *H. fimbriata* and *H. conopsea* are pretty species, the latter a native of European countries and not found wild in the United States as far as we know. These all like a little chalk or lime in the soil.

The genus orchis also comprises a number of pretty and useful garden orchids. *O. pyramidalis* is a most attractive little plant, throwing up in May and June pretty bright red heads of flowers on erect, slender spikes. It grows in open meadows and in woodlands in England, where it is one of the commonest species in the eastern counties. It bears transplanting well, if done while at rest, and thrives in any good garden soil. *O. maculata*, *O. foliosa*, *O. latifolia* and others are all well worth growing. The most frequent mistake owners of gardens make in trying to cultivate these hardy orchids is lifting the plants

when in full flower and transferring them to the garden. They cannot stand this kind of treatment and even if an extra strong specimen gets over the severe check incidental to such rough handling it will never be as good or as vigorous as one lifted and replanted while at rest. These orchises make very suitable subjects for rockery planting if well placed. Where rockeries are made as they should be, with the stones lying in natural beds or strata as they are found, the latter conserve a good deal of moisture and, even in the driest summer

group, it is one of the finest in the genus.

#### *Cattleya Gigas.*

The flowers of *Cattleya gigas* are the largest in the genus and among the most richly colored. The *Sanderiana* types in which the lip is large and heavily marked with bright crimson are among the finest orchids in existence, yet, for some reason, they do not sell as well in the cut flower market as do those of *C. Mossiae* and *C. labiata*. *C. gigas* is a good and free grower and likes a position as

good light. The pseudobulbs usually emit quite a number of new roots after flowering and whenever any repotting is necessary this time should be taken advantage of as it re-establishes the plants in the new compost. But always endeavor to anticipate this flush of roots for if the plants are disturbed after they start they are almost sure to be injured in the process of repotting and the young growth will be checked. The ordinary compost as advised for cattleyas generally will be suitable for *C. gigas* also the same temperature.

## CHRYSANTHEMUMS

### Chrysanthemums in the South.

The space devoted to the cultivation of chrysanthemums in the south has increased rapidly in the last decade. In the cities where elaborate floral decorations in the cemeteries are used on All Saints day the chrysanthemum is the leader. In such cities they have come to be called All Saints day flowers and not a little prejudice exists against their use in any other decorative effects. Such prejudice is happily passing away, especially since the introduction of some of the finer large varieties that succeed here. It is a fact that a great many varieties will not succeed under any kind of culture and the list of really good ones suitable for the south is rather meagre. I do not mean that the plants will not grow readily enough, but the finished flower will be so inferior as not to recoup the grower for his trouble. Again on account of the numerous varieties of insects ready to prey on the opening flowers only such varieties as develop quickly after taking the bud are reasonably sure to escape their attacks.

Very early varieties have never been a success and it is a safe plan never to take a bud before September 1 or

CATTELEYA BOWRINGEANA.

weather, the roots can find cool, congenial quarters under the stones. But this is impossible in the dry "pockets" of soil formed by sticking stones upright and at all kinds of angles, filling in soil between them and calling them rockeries. But whatever way they are grown there is much that is interesting and beautiful about them and we would like to see their culture taken up with spirit.

ORCHIS.

#### *Cattleya Bowringiana.*

The flowers of *Cattleya Bowringiana* are not as large as those of the *labiata* forms but they are very freely produced during a dull season for orchids—November and December—are very brightly colored and it is altogether a fine plant. The growth is strong and free and every shoot will flower when the plant attains sufficient strength. To grow it well *C. Bowringiana* likes plenty of room in the pots. The roots are freely produced on healthy plants and will take hold of quite a considerable amount of compost. It makes its growth very rapidly and flowers on the current years bulbs so that quite a little heat is necessary. If there is any difference let *C. Bowringiana* have the warmer and lighter end of the cattleya house and water very freely when the root growth is most active. In all other respects it thrives well with the ordinary treatment given to cattleyas and, outside of the *labiata*

close to the roof glass as possible. It is rather erratic in its habits, one set of pseudobulbs being hardly finished and flowered before it begins to grow away again and these will also flower again if the plants are in a

CATTELEYA GIGAS.

#### CHRYSANTHEMUMS IN THE SOUTH.

Flowers Grown Under Shelter by Robt. Lockerbie, New Orleans, La.

the very last few days in August. Buds taken before that date either succumb to thrips or develop into sorry looking specimens. Indoor and outdoor culture are both successfully practiced. As soon as the buds begin to show color outdoors cotton cloth is stretched on light frames over the buds to protect the flowers from the heavy dews. It is claimed, and with truth, that the finish of the flowers outdoors is never so fine as those grown indoors, but if sash are used instead of cloth the difference in finish is so small as only to be discernable to an expert. The chief objection to culture entirely in the open ground is that the plants are too much at the mercy of the weather. Heavy rainfalls are liable to drown them out unless the ground is high and has good drainage. The hot sun following such rains also causes some scald; yet, despite these drawbacks, cultivation in the open is practiced successfully.

Thrips, red spider, aphid, mealy bug and corythuca are the worst insect pests, and it is only fair to state that these rarely affect the plants grown in the open. Corythuca is a dirty kind of louse which affects the under side of the leaves and a bunch of them seen through a magnifying glass resembled a flock of sheep more than anything else. They are very destructive if allowed to gain headway. Kerosene emulsion is the best remedy for these and mealy bug. Mealy bug generally puts in an appearance in August and the best we can hope to do is to hold it in check. There are so many hiding places for it that it is impossible to get rid of it entirely. For red spider syringing must be practiced until there is danger of spoiling the flowers. Some of the nicotine

solutions must be used regularly for thrips and aphid. Only the early varieties like Monrovia, Mrs. Robinson, Mrs. O. P. Bassett, Golden Gate, etc., should be grown in the open unless they can be sash covered, as the rains in November are liable to spoil the whole business. Alice Byron, Silver Wedding, Golden Wedding, Timothy Eaton, Yellow Eaton, Col. Appleton, Dr. Enguehard, Mrs. Chadwick, Golden Chadwick and Yanoma are all good, sure varieties for this section. The pink varieties, as a rule, are disappointing, the color having a very faded appearance.

WM. LEAR.

#### Flowers from October to Christmas.

ED. AMERICAN FLORIST:—

I would like a list of chrysanthemums suitable for retail trade that would give me a steady cut up to Christmas. Would like to grow mostly white and yellow, but some pink. I have Touset, Ivory, Estelle and Chadwick in white; Bonnaffon in yellow, and a few Robinson and October Frost. I do not want expensive novelties.

J. M. M.

As the question of when and what to plant interests many we have concluded to give some information unsolicited in the above inquiry. The white varieties which "J. M. M." has at hand are all good ones, and if he has the desired quantity of each, there are but a few additions to prolong the flowering season required. October Frost is the earliest, provided it is planted by May 15 and the early bud reserved, and as Polly Rose (syn. Estelle) and Ivory are to follow in line of succession, these should also be planted early, to produce flowers from

October 15 to 20. Touset and Robinson may be expected in perfection about October 25, and will continue to November 1.

We are in need of more good whites to be ready November 5 to 10, and at present the only one we can suggest is President Taft, which will be followed by W. H. Chadwick, and may be had in fine condition for Thanksgiving. Yanoma will furnish the supply from December 1 to 15, and with Mlle. Jeanne Nonin to follow the entire season will be well covered. "J. M. M." may not succeed in securing a succession of blooms as easily as we have mapped it out on paper, and for this reason we would suggest he plant the late sorts, as follows: W. H. Chadwick (plant June 20 securing bud about September 20). Yanoma and Nonin benched July 1 to 15, and securing buds October 1 to 10 should prolong the crop to Christmas.

In yellow, Golden Glow is the earliest and can be had from the end of August to the end of September by planting in succession from early May to June. Monrovia is the next to follow, but to bring this about it is important to plant early and save the first bud. Cremo is a light yellow and should not be overlooked by those who succeed with Glory of the Pacific and Polly Rose, as it is identical in every respect except color. Robert Halliday, another light yellow, should fill up the gap between Cremo and Col. D. Appleton. Major Bonnaffon will come next. Among the later yellows we have four good ones, and it is more difficult to suggest the best as quality and time of flowering depends somewhat on the way in which they are treated. Golden Chadwick, Golden Eagle, Mrs. W. E. Kel-

ley and Nagoya are fine yellows. For November 15 to 20 we would prefer Golden Eagle, a dark yellow, fine incurved form and easy to manage. Nagoya and Mrs. Kelley will immediately follow. We would not consider Golden Chadwick were it not for the fact that the flowering period can be greatly changed, under favorable conditions. We have seen half developed flowers of this and the white form show the first week of November, and have also had fair blooms of both for Christmas.

To secure good blooms late in the season we must do all we can to promote growth rather than bud development. Planting late, treating fairly liberally in the application of water during the early part of the day, and curtailing the amount of air when the nights begin to cool off will have a tendency to keep the growth soft and thus delay bud formation. It is a well-known fact the buds are the result of hardening of the wood, and while the flowering season can be hastened or retarded to a certain degree, it is unwise to carry these operations to such a degree as to injure the crop. Pacific Supreme and Gloria are the two best early pinks; Mayor Weaver and Dr. Enguehard midseason, and Helen Frick and Mlle. Jeanne Rosette late. In addition to the foregoing all growers for retail trade should have a few each of the anemones, pompons and singles. They are all of the easiest culture, profuse bloomers and their use will lend grace and beauty to arrangement of all kinds. Again allow us to impress upon those who desire early flowers to plant early and those who require late flowers to plant late.

ELMER D. SMITH.

Adrian, Mich.

#### Lilacs at Highland Park, Rochester.

Again the lilacs in Highland park are displaying their beauties to admiring multitudes. They are perhaps in a greater abundance of floral profusion than they have ever been before, says the Rochester Democrat and Chronicle, and it will well repay people who have the opportunity to visit them frequently. With the importations that have come from Europe this spring the park board has in its possession 206 species and varieties of lilacs. This includes 14 species. Of course, what is meant by a species in regard to a lilac or any other plant is a unit composed of a greater or less number of individuals found growing in a wild state, and which reproduces itself true from seed, or within very limited variations. The different varieties of lilacs, like most other varieties of cultivated plants, have been produced by hybridization and selection and can only be perpetuated by artificial means.

Nearly all the cultivated varieties are the offspring of the common lilac, *Syringa vulgaris*, whose native home is on the banks of the Danube in eastern Europe. Most of the lilac species are indigenous to south and eastern Europe, China, Manchuria, Mongolia, and Japan. No lilacs are found growing in a wild state on the American continent. Some years since Dr. C. S. Sargent of the Arnold Arboretum, Harvard University, pro-

cured seeds of the common lilac in a wild state on the banks of the Danube, and raised a number of seedlings and presented a few of them to the park board. These are now in the park nurseries and have not yet flowered, but it will be interesting when they flower to ascertain how far they are removed from the highest types that have been produced by the skill of the hybridizer.

It is an error to suppose that lilacs have no particular charm or that they cannot be seen to best advantage except when they are in full flower. When the clusters are partly expanded, and the beauty of the unopened buds is contrasted with the open flowers, is really the time when the lilac displays its greatest charms. This is more particularly true perhaps in regard to the dark red flowering lilacs. Those single dark red lilacs, such as Uncle Tom, Congo Pasteur, Montgolfier and Negro, are charmingly handsome when the flower panicles are partly expanded.

Fifteen to 20 years since, Ludwig Spath was considered par-excellence as a dark red flowering lilac, and it is today a fine lilac, but there has been introduced during recent years a galaxy of showy lilacs, including those mentioned above, with deep purplish red flowers that are the peers of Ludwig Spath. It might be said that there are four shades or tints with their infinite variations in which the lilac re-

the park board purchased 18 years since from a nursery in Long Island. It is true the individual flowers are small, but they are deeply tinged with pink, and it is the nearest approach to a pink lilac in the collection. Macro-stachia, Lilarosa, Princess Maria, Crampel and Amoena are other distinctive single varieties that belong to this section, and there are many others.

The single white lilacs are particularly noticeable this year, and Noisetiana alba, Virginalis, Madame Moser, Frau Damman, Marie Légraye and Princess Alexandra have all their distinctive beauties. It is hard to choose or decide which is the best among these, but perhaps Princess Alexandra, in which the erect compound clusters, with large individual flowers, stand out prominently, might be placed at the top. Amongst the double white lilacs during recent years there has been a number of new comers. Madame Lemoine held the place of honor for a long time, but Rabelais, Obelisque, Jean D'Arc, Ellen Willmott, and Madame Casimir Perier are close rivals, and perhaps Madame Casimir Perier is superior to Madame Lemoine, in general excellence.

Amongst the lilacs in the range of color with lilac or bluish lavender flowers there is an immense number of single and double-flowered varieties varying more or less in depth and intensity. In the single lilacs Jacques

LILAC RUBRA TRIANONIANA.

veals its greatest beauties, namely white, creamy pink, lilac or bluish lavender, and purple red, and inside that general color scheme all the lilacs in cultivation range themselves whether they are double or single.

The most interesting lilac in the creamy pink color scheme is one under the name of Schermerhornii, which

Callot is an old variety, and is hard to excel. The individual flowers are about one inch across. Colmariensis Coerulea Superba, Fuerst Leichtenstein, Eckenolm and Christopher Columbus are single kinds that show the range of color in this section.

In the double flowering varieties President Carnot, Condorset, Alphonse

Lavalle, President Grevy, Lamarck, Rene Jarry des Loges, Abel Carriere and Dr. Masters are just a few of the numerous sorts in this range of color. If cool weather had not prevailed for the past two or three weeks all flowering plants and the lilacs would have been in flower four weeks ahead of last year and about two weeks ahead of the average season. At the present time it seems that they will be from two or three weeks ahead of last year.

## WITH THE GROWERS

### J. B. Keller's Sons, Rochester, N. Y.

The establishment of J. B. Keller's Sons, Rochester, N. Y., is on South avenue. The glass area is about 35,000 square feet. They do not grow any roses or carnations, as they find it more profitable to buy them for their cut flower trade, and devote the area to pot stock. About 10,000 chrysanthemums are benched for cut flowers. They have an immense retail cut flower trade as may be inferred from the fact that they force about 500,000 bulbs, such as tulips, narcissi, hyacinths, etc., besides a vast lot of other material that can be profitably given space for cut flowers. A considerable number of orchids are grown for cut flowers. Michael Keller says that *Cypripedium insigne* in different varieties, *Cattleya Trianae* and *C. labiata* are very useful and profitable for their cut flower trade. *Cœlogyne cristata* is grown considerably for cut flowers, but it is not nearly as useful as the orchids above mentioned.

The firm handles a large quantity of bedding plants, and about 50,000 geraniums, cannas, coleus, alternantheras, ageratums, etc., are grown. Over 50,000 annual and biennial plants are grown during late winter and spring. Fifty thousand table ferns were handled and sold during last year. By table ferns, of course, are meant small plants, 2-inch to 3-inch pots usually grouped in low vases in association with selaginellas. About 6,000 plants of the different forms of *Nephrolepis exaltata* are sold during the year, and immense numbers of *Kentia Forsteriana* and other popular palms are handled. They make a specialty of forcing choice shrubs, such as malus in variety, Chinese wistarias, white brooms, lilacs and other hardy subjects with much success.

Perhaps the firm is best known in the trade by its fine stock of perennials, and about eight acres are mostly devoted to them. Perhaps no other establishment in this country carries as large a stock of first-class, hardy perennials, and alpine plants. Their stock of alpine plants or low tufted perennials is certainly excellent, and to go over their grounds in spring is quite an inspiration to see how beautiful ornamental grounds may be made by a liberal use of masses or carpets of those in bloom. Amongst the plants that took our attention were *Cerastium Biebersteinii*, with its large pure white flowers. *Alyssum saxatile compactum* fl. pl. is a dense sheet of deep yellow flowers which Michael Keller says lasts much longer than the type; *Phlox stellaria erubescens*,

with clear lilac blossoms, one inch across, was remarkably beautiful; and *Bellis perennis* variety *Monstrosus*, is certainly the most beautiful English daisy we have ever seen. Some of the flowers by actual measurement were over two inches across. We think the varietal name is most unfortunate, for instead of being monstrous it is magnificent.

J. B. Keller, many years since, was foreman of the Ellwanger & Barry greenhouses during the time that this firm grew and sold greenhouse plants. He left Ellwanger & Barry in 1875, and started business for himself with a small greenhouse on the same grounds where the business has grown to its present proportions. Mr. Keller has a very extensive horticultural

own on Mt. Hope avenue, and John W. Keller is the efficient superintendent of Mount Hope cemetery, whose cordial manner and good humor is appreciated by all who know him. One son, Emil E. Keller, did not follow the craft, and he is an expert electrical engineer. Mr. Keller has a family of sons he may well be proud of, for they are all first-class citizens of the state, and that covers every function for any man in life.

JOHN DUNBAR.

### Hoerber Bros., Desplaines, Ill.

The best of soil, clean, new, light houses and a grower that knows his business form a pretty good combination when it comes to growing first-

LILAC CONDORSET.

knowledge, but as a specialist in his knowledge of hardy and perennial plants in their cultural requirements and propagation, there are none that can surpass him in this country, and for many years he contributed excellent articles to the *AMERICAN FLORIST* on hardy perennials. Mr. Keller retired from business about nine years since, but in order to have a little relaxation, he may be seen occasionally working amongst the orchids or other greenhouse plants. Mr. Keller is a gentleman of much refinement and culture.

The business is now conducted by the three sons, J. Michael who takes charge of the greenhouses and grounds, and does an important business planning and planting private grounds in Western New York, and Fernando J. and William L. Keller, who attend to the retail business on Clinton street. George J. Keller runs an independent florist business of his

class stock of cut flowers, and this can be seen in operation at the fine new plant of Hoerber Bros., Desplaines, Ill. Frank Bentley is certainly to be congratulated on his stock. The plants all around are healthy, clean and vigorous, while the flowers are good in every respect. On the day of our visit Frank had encased himself in overalls and was doing a little steam fitting on the side. He evidently is as much at home here as in the growing end and Hoerber Bros. are to be congratulated on having secured the services of so energetic and capable a man. The houses all through bear the unmistakable stamp of the careful grower, the absence of weeds and rubbish and the neat appearance of everything showing that he has his charge well in hand.

At the north end of the houses Victory carnation is grown and it is in great shape. The characteristic habit of the variety is well shown, the deep

red flowers looking well against the light foliage. The flowers are large, well colored and of good form and substance. Winsor comes next and the color is good, though the stems are rather on the short side. White Enchantress is a favorite variety here and does remarkably well, the flowers being large and pure in color. White Perfection is also largely grown and is in fine form. About 45,000 young plants have been propagated and the stock is clean and good. Planting in the field was in progress on the day of our visit, the soil working well, and enough are being set out to plant the new range of houses now under construction. The plants are given good room, 15 inches apart, and in the excellent soil here will doubtless make fine stock by planting time.

Roses are largely grown, Killarney especially. The plants are in fine crop and covered with young shoots, all showing the high color characteristic of this variety when healthy. This fine condition is noticeable in all the varieties grown, Richmond especially being in elegant shape. White Killarney is grown right at the south end of the range and is making a fine growth. Mr. Benthey, in common with other growers, finds that this variety is freer in growth and more easily propagated than Killarney, practically no loss being noticed in the cuttings. He believes in taking good wood for cuttings and certainly the appearance of the young stock justifies his predilection in its favor. The plants are now well rooted, the earliest in 5½-inch pots, the later rooted batches being in 2-inch and ready for a shift. In preparation for planting the new range 45,000 carnations 50,000 roses and 12,000 chrysanthemums have been propagated.

The new section will consist of six houses 27x250 feet and five 27½x288 feet, all running east and west. Moninger material will be used throughout and Garland gutters. The steam pipes and water runs are being laid and some of the gutter posts are up. All the material is ready on the ground and it will only be a short time before the new range is up, just doubling the size of this fine new plant. Messrs. Hoerber have been rather unfortunate in their boring for water, the artesian well having already been sunk 650 feet without striking a full supply, but they are still working at it and we hope that their efforts will soon be rewarded.

### Destroying "Spiders."

ED. AMERICAN FLORIST:—

Please tell me what I can do to get rid of spiders in our greenhouses.

W. G.

If by spiders "W. G." means the ordinary house spiders then cleanliness is the only remedy. The houses should be hosed and scrubbed down on every favorable opportunity, getting well into all corners and so disturbing the insects that they are made uncomfortable if not killed and will seek more suitable quarters. But red spider, an insect that attacks the plants grown in the greenhouses, is a different proposition. He is a most determined "sticker" and will not give

way to ordinary insecticides unless used at a strength that will damage most plants. But he abhors cold water and when plants that can be plentifully syringed or hosed with cold water are attacked this is the best way to clean them. Keep at it two or three times daily, and the insects will soon be killed. Sulphur fumigations are very distasteful to red spider, but they are also bad for plants, and the cure is apt to be worse than the disease. If it is red spider that is causing the trouble write again and we will endeavor to give fuller advice.

G.

### Horticulture at Brussels Exhibition.

The international exhibition at Brussels, although still in a very backward state, promises to be one of the best that has been seen in Europe for some years past. The grounds occupy about 225 acres, and are easily reached from all parts of the city by electric cars or taxicabs, the latter being far and away the best method if one can afford to pay for the luxury. From the Gare du Nord or the Gare du Midi, the two great stations at which strangers arrive, it takes about half an hour to reach the exhibition by street car.

acre within the buildings; but several acres of the grounds outside are devoted to the representation of horticulture as practiced in such countries as Belgium, France, Germany and Holland. During the summer months the outdoor gardening will be one of the features of the exhibition, but Americans need not be in a hurry to come over till about the end of June or July, by which time everything will be in perfect condition.

The indoor exhibition was of the usual continental, or rather Belgian, character. There were large groups of stove and greenhouse plants in which aroids, palms, cycads, bromeliads, azaleas, orchids and New Holland plants of great size were conspicuous. The weather was rather cold and changeable, and the tender-leaved caladiums soon felt the effects of the low temperature. The great tissue-papery leaves soon began to droop and by the second and third day looked like limp rags, far from beautiful. All the other plants, including the orchids, stood the cold remarkably well, and attracted large crowds of sightseers. There was one terrible drawback to the picturesque effect, and that was the numerous Belgian flags—masses of glaring red, yellow

COMMON WHITE LILAC.

This slow method of progression, however, enables one with plenty of time to see something of Brussels in passing to the Bois de Cambre—a beautifully wooded and undulating neighborhood adjoining the exhibition.

The horticultural display took place from April 30 to May 3 and gardeners and botanists from several countries were invited to take part as members of the jury or of the congress that was to be held during the last three days. The space allotted to plants, flowers, fruits and vegetables was little more than one-fourth of an

low and blue (or black)—hanging in great bunches from the top of the numerous upright supports to the building. Wherever one moved, the color of these flags intruded itself upon the eyes and jarred upon the nerves—to say nothing of spoiling the color contrasts of the flowers beneath. Perhaps one of the most charming exhibits was that put up by the king of the Belgians (King Albert). It consisted of a fine mass of blue flowered *Hydrangea hortensis* arranged in a semi-circular bed, and in bands around them were rosy nemesias,

deep blue cinerarias, Gloire de Lorraine begonias and yellow pyramidal *Celsia cretica*, bordered with *Ophopogon jaburan variegatum*, in the order given. At a short distance the effect was really fine and effective, one zone of color blending beautifully with another after the fashion of a rainbow.

Azaleas were of course models of cultural skill and some magnificent specimens of whites, scarlets, magentas, flakes, cerise, etc., were shown. A new and remarkable one shown by August Haerens, of Somergen, was named Lady Roosevelt, probably intended in compliment to the late American president's wife. The plant seems to be a sport or seedling from Rudolph Seydel, but it is unique in color. The individual blooms are  $3\frac{1}{2}$  to 4 inches across, semi-double and of a beautiful soft, clear flesh pink, reminding one somewhat of that of a *Nerium Oleander* or a Mrs. Burnett perpetual carnation. It is a variety in which there should be some money for growers.

Rhododendrons were not very largely exhibited, the only group of note being that of Jean Bracke Beyst, Loochrist, Ghent, who received a first prize a gold gilt medal. The most remarkable plant in his lot was White Pearl, a good vigorous sort which is deep pink in bud, but after opening gradually changes into a beautiful soft white, very faintly tinted with pink in places. It should make an excellent companion to the famous Pink Pearl. *Hippeastrums* are beginning to attract some attention on the continent, chiefly owing to the fine exhibits that have been taken over to Ghent and other places from time to time by Capt. Holford, an amateur, and Ker & Sons, of Liverpool. The latter firm were very much in evidence at Brussels with a magnificent group in which varieties leaning to the much coveted white were conspicuous. Six first prizes for new varieties were awarded the Liverpool firm for its enterprise. The Van Houttes of Ghent were the only natives with a similar display of *hippeastrums*.

American carnations are not yet largely grown on the European continent. The only exhibitors on this occasion were Low & Co. of Enfield, London, and M. Engelmann of Saffron Walden, Essex, Eng. The latter staged a fine group and received a gold medal. Among his group, specially attractive, was a new form called Carola, which may perhaps be best described as resembling a fine old clove carnation in color, only larger and quite as powerfully scented.

Mr. Stepmann of Molenbeck, near Brussels, put up one of the finest groups of lilacs that has been seen for some time. The plants had been very slightly forced and were in fine condition both as regards foliage and flower. Single and double-flowered varieties were about equal in number and were so arranged that the whites, purples and lilac colors helped to make each other conspicuous. Any one on the look-out for some good new lilacs as an investment will not make a mistake in buying the following: Princess Clementine, a magnificent double white with large erect trusses; Roi Albert (named after the youthful king of the Belgians), an excellent variety

with wine-purple flowers when young, gradually changing to bluish purple with age; and Reine Elizabeth, a charming single white. Altogether there were over 100 distinct varieties of lilacs shown, most of them being already well known.

The whole one side of the hall was devoted to examples of the very best kinds of orchids. Amongst the exhibitors were M. Firmin Lambeau, who staged about 25 yards run of beautiful cattleyas, *odontoglossums*, *ocidiums*, *renantheras*, etc., then came Mrs. Dietrich, Jules Hye, Theo. Panwels and Charlesworth & Co. of Hayward Heath, England. This firm had some excellent plants, among them being *Odontioda Charlesworthi*, O. Bradshawla, a fine *laelio-cattleya* called Golden Glory, and an improved form of the old *Cattleya Schroderae* called Frau Nanna Horsmann. Other groups of plants worth mentioning as lending grace and effect to the exhibition as a whole were some fine fringed and double forms of tuberous begonias; *Primula obconica* in various shades of purple, herbaceous *calceolarias*, glowing *anthuriums*, gaudy *strelitzias* and some huge white and pinkish forms of bedding daisy. The least known plant in the show was *Ficus Javanicus*, a curious shrub with roundish obovate leaves, deep green above, brownish beneath, and roundish fruits little bigger than peas. W.

#### Providence.

The weather for the past week was cool and cloudy, with plenty of rain, which has a tendency to shorten up on the supply and to reduce the transient trade. So the demand outside of funeral work and some few social functions is not very urgent. Stock is not coming in any too good in point of quality or great quantity. The sale of bedding plants has been held back very much owing to the weather, but it is expected everything in bloom at Memorial day will be cleaned out at an advanced price, owing to the scarcity of outdoor flowers, as about all kinds of this stock will be gone by. The heavy frost on May 6 did not do as much damage as was first reported. Lilac is in full bloom and outdoor tulips are making a grand display. American Beauty, Killarney, My Maryland, Richmond, Mrs. Jardine, Bride and Bridesmaid roses are coming in in good quality and plenty to go around. Colored carnations of first-class quality are not in oversupply and are selling out much closer. Mother's day caused a general cleaning out of white and delicate pink varieties at advanced prices. Sweet peas are not quite so plentiful, but the quality is good and prices are somewhat better. Spanish iris is more plentiful, of a good quality and sell well. *Gladiolus Blushing Bride* and G. America are more plentiful and are soon bought up. Lilies and callas are not so abundant as the past few weeks. Tulips in some varieties are scarce; those from outdoors are much better than those grown indoors. *Narcissus bicolor Victoria* from outdoors is plentiful and sells well. *Gardenias* and *cattleyas* are more abundant and are soon bought up. Outdoor lilac is in the market in immense quantities. Of *Asparagus Sprengeri*, A. plumosus, smilax and *adiantum* there is an insufficient supply. The nurserymen and seedsmen are having a most encouraging season, and, owing to the continued rain and cloudy

weather transplanting has continued up to the present time. Friday was Arbor day and was the cause of considerable business amongst the nurserymen. The weather was perfect for planting.

#### NOTES.

George Johnson & Son, of Elmwood avenue, reports business booming in floral decorations, funeral, landscape and forestry work. For the two latter Mr. Johnson finds it difficult to get experienced help. This concern had the decorations for the inauguration of the first mayor of the new city of Cranston that took place in the Park avenue high school on Monday. The rooms were handsomely decorated with palms, ferns, rubber plants, also Killarney, My Maryland and American Beauty roses. Alexander Johnson, of this firm, is city forester.

The Estate of Wm. Hoffman, of Pawtucket, Fred Hoffman, manager, has recently let a contract to Lord & Burnham Co., of Irvington, N. Y., for the construction of two new greenhouses—one 38x128 feet, the other 28x100 feet. This addition Mr. Hoffman has been contemplating for some time, as his business has greatly increased since opening his retail store on Main street, Pawtucket, two years ago. He is to rebuild several of the old houses this summer.

Lawrence Hay, of East Providence, is bringing in some very fine hybrid roses forced in pots. Mr. Hay reports business rushing, both at his greenhouses and in landscape work. He has charge of the Agawam hunt club grounds at this place and has a very extensive contract of grading, sodding and planting of shrubbery here. He purchased a horse sod cutter for the use of the club recently.

It is reported that the New York, New Haven & Hartford Railroad Co. is about to let the contract for the laying out and planting of the border of its roadbed between Boston, Providence and New York with rose bushes. Other varieties of trees, shrubs and herbaceous plants, no doubt, will be used.

John F. Wood had a very extensive wedding decoration at Woonsocket, for the Ellis-Pierce wedding, and used several hundred American Beauty, Killarney and My Maryland roses; also several carloads of decorative plants.

Earl Bavier, formerly with Mark Aitken of Worcester and Springfield, Mass., is now in charge of the flower department of L. Dimond and Sons' department store.

Winfield Seamens, formerly with J. H. Cushing, Quidnick, is now foreman and decorator at M. J. Leach & Sons' store, 20 Broad street, Pawtucket.

John A. Macrea is getting figures on a greenhouse, 50x400 feet, to be put up at once. This house will be for carnations principally.

John M. Greene, formerly gardener to Stephen H. Briggs, has opened a retail store at 238 Cranston street, corner of Bridgman street.

James B. Canning is building a summer residence near Rocky Point, and expects to occupy it by July 1.

Visitors: F. J. Sullivan, Springfield, Mass.; S. Geller, of the Geller Florist Supply Co., New York; G. Hampton, Philadelphia; W. S. Woodruff, Orange, Conn.; E. J. Fancourt, of the Pennock-Meehan Co., Philadelphia; W. P. Snyder, of the Edwards Folding Box Co., Philadelphia; also representatives of Welch Bros., Boston, and several Holland bulb men.

J. BRINTON.

THE fourth annual rose festival will be held at Portland, Ore., June 6-11.

**CANNA PLANTING.**—Canna growers of long experience assure us it is most important that the roots and soil of pot grown stock be thoroughly loosened before planting and that cannas may be planted three weeks earlier than ordinarily tender bedding stock, for the reason that most of their growth during this period is below the soil. A warm condition of the soil, or what is known generally as the corn-planting condition of soil and weather, is said to be the most suitable when planting cannas in the field.

THE fifth annual dahlia show of the New Jersey Floricultural Society will be held October 1 at Lindsley hall, Orange, and a fine schedule of prizes has been published and mailed. Wm. Reid is secretary.

JOS. H. CUNNINGHAM, Delaware, O., one of our continuous advertisers, advises us that he sold 421,000 pansy plants between October 10, 1909, and May 12, 1910. Many growers consign to the rubbish pile year after year thousands of plants which could be sold readily through our advertising columns

## National Council of Horticulture.

The eighth installment of the press service of the National Council of Horticulture contains articles on "Cruelty to Trees," "Watering Plants," "Planting a Canna Bed," "The Long Spurred Columbine" and "Melon Growing." The articles are timely and practical and are entirely free to nurserymen, seedsmen, florists and local editors applying for them to James H. Burdett, 1620 West 104th place, Chicago.

## The National Sweet Pea Society.

The National Sweet Pea Society has issued a list of additional prizes offered for the annual exhibition next July. The preliminary schedule will be mailed upon application. The regular schedule is now in course of preparation and if any concern or individual wishes to offer a prize at the coming show, Secretary Harry A. Bunyard, 342 West Fourteenth street, New York, should be notified without delay. The prospects are that some 3,000 vases will be on exhibition this summer. Full details will appear later.

## Ferns Lacking in Color.

ED. AMERICAN FLORIST:—

Will some one kindly inform me how to grow Boston ferns so as to obtain the dark rich green color. I am troubled by many of them being very light colored, though healthy in appearance.

A. E. H.

There are several things that may induce a pale color in Boston ferns. It is sometimes the effect of too much water but more often than not it is because of a lack of nitrogenous fertilizer in the soil. This is most likely to be the case in those "A. E. H." enquires about, as they are healthy otherwise. Try watering with nitrate of soda, one pound of the crystals to a barrel of water. But follow this with manure water of some kind as the nitrate is not a perfect plant food and is apt to "draw" the soil as it is termed by growers. Soot water is also an excellent stimulant to foliage if used with discretion. A fairly good rough test as to the cause of the poor color of the foliage is the following: If it begins in the center of the plant, it is caused by over-watering. If, on the other hand, the center looks healthy and the outer parts are yellow, then probably poverty is the cause. This test is not, however, infallible.

G.

## Glazing.

ED. AMERICAN FLORIST:—

Please inform me of the best way to glaze an even span house, giving details so that a novice may know how to proceed with the work.

F. O. S.

For glazing greenhouses it is best to use double strength "A" glass, although "B" quality is sometimes used. The first thing is to grade the glass according to its curvature, as otherwise a curved pane might be just above a flat one and result in a bad crack between the panes. Usually three grades are made, those whose ends are practically straight, or flat, those that are slightly curved, and, third, the panes with considerable curvature. Care is then taken to put in a given row the panes with the same curvature. Glass should be laid with the curved side up and if there is any great difference in the curvature of the two ends, the end having the greatest curvature should be at the top. The size of pane most commonly used is 16x20 or 24 inches, although in large houses glass 20 and even 24 inches wide is sometimes used.

Greenhouse putty is made from whiting and linseed oil, with the addition of about five per cent of white lead to increase its adhesiveness and durability. While quite a variety of glazing "points" are on the market, cut zinc shoe nails are generally considered best. Before the house is glazed, the sash bars should be painted and if it is new work, this should be preceded by a priming coat of oil with a small amount of white lead. The glazing is begun at the plate, first driving one or two glazing points about one-half inch below the edge to keep the glass from slipping. After working the putty until it will "run" easily, it is applied to the sash-bars so as to fill the rebates. This can be done very rapidly by holding in the hand and feeding it out under the thumb, which is used to press it into place. A layer of putty is also applied to the upper edge of the plate where the glass will rest. The lower pane is then put in place, pressing it down upon the sash-bars and squeezing out most of the putty. It is then fastened in place by driving glazing points into the sash-bars at the middle on each side and also near each corner. The lower ones should be an inch or so from the corners and the upper ones as nearly as possible three-sixteenths of an inch from the edge of the pane. The pane above can then rest against these points and will thus be prevented from slipping. Care should be taken not to have too wide a lap as dirt will collect between the panes, thus making a dark streak in the roof, while there will also be trouble from water which will collect and freeze, thus cracking the panes.

The brads, or points, should be driven so that they will not project more than three-sixteenths of an inch. The work should then be continued in the same way, either doing one or two rows horizontally, or running up a row of glass vertically, according to the form of staging used. When the glazing has been completed, another coat of paint should be given the sash-bars, taking care to cover the exposed putty both above and below the glass.

L. R. T.

**The Late Mrs. Vesey.**

ED. AMERICAN FLORIST:

Enclosed herewith find copy of resolutions of condolence of the death of Mrs. Vesey by the St. Louis Horticultural Society.

St. Louis, Mo., May 13, 1910.

Whereas, the officers of the St. Louis Horticultural Society have learned of the sudden and untimely demise of Mrs. M. S. Vesey and,

Whereas, the St. Louis Horticultural Society together with the horticultural profession is suffering severely by the loss of her counsel and her cheerful and congenial companionship, therefore,

Be It Resolved that the St. Louis Horticultural Society, as a mark of high esteem and expression convey to the sorrowful family our consoling sympathy. Every life, no matter if its every hour is rich with love and every moment jeweled with a joy, will, at its close, become a tragedy as sad and deep and dark as can be woven of the warp and woof of mystery and death, but in the night of death hope sees a star and listening love can hear the rustle of a wing; she added to the sun of human joy; and were every one for whom she did some loving service to bring a blossom to her grave, she would sleep beneath a wilderness of flowers.

The Executive Committee.  
Per OTTO G. KOENIG, Sec'y.

#### EVERYBODY SATISFIED.

It is seldom that such a healthy tone is noted in the market in the middle of May as this year. Everybody appears to be satisfied with the amount of business doing and both stock and prices are much more satisfactory than is usual at this season. Much interest naturally centers in the peonies. Large quantities of southern stock are being handled, some fine flowers of the redoubtable Festiva Maxima being among the best offerings at those houses which make a specialty of peonies. These flowers show practically no ill effects of the frost—that is, the best of them do not. Most of the pinks and light reds are slightly damaged and probably will not be improved by storage. Still, taking all into consideration, they are far better than was at one time hoped for. Local early pinks are already in and are only slightly damaged. We have seen them damaged as much by sun in some seasons, as they are by frost in this. Of course, there are many damaged flowers coming and many will have crooked stems, owing

to having fallen over and picked up again. The local varieties outside of the early pink will not be in for Memorial day, as the buds are moving very slowly indeed and many growers are greatly disappointed. Carnations are really magnificent flowers for this time of year. We never remember seeing in May such fine stems and large substantial flowers as this season. The price is high, as high as it frequently is at Christmas but, as a word to the wise, we would like to advise growers not to bank too much on the scarcity and hold stock for a late market, as they may be left. Although we like to see the high prices, yet it cannot be denied that Christmas prices around Memorial day are, to say the least, unusual and retailers will not be apt to force sales too much on carnations at \$50 per 1,000 or six cents per 100 wholesale.

Roses are fine, moderate in price when the quality is taken into consideration and clean up remarkably well daily. There are some magnificent Beauties in the market, long stems and finely colored, substantial flow-

ers, while, in the medium and shorter grades, the same fine condition is noticeable. White Killarney certainly seems all conquering. To a great extent it hurt the sales of Bride during winter and early spring and now it is whispered that some retailers who formerly put their money into Kaiserin in summer are taking White Killarney instead, owing to its shipping qualities. Kaiserin has splendid substance and is a grand rose, but it is easily bruised if not very carefully handled. Mrs. Jardine is becoming very popular; its color is not quite as good as it was a week or two back, but the flowers are fine and of good substance. Bride and Bridesmaid are exceptionally good for the season; so is Richmond. The rose situation, in fact, is about as good as it could be for the season.

In orchids Cattleya Mossiae still holds the stage, though a few good flowers of C. gigas are noted, also C. Loddigesii. The demand for them is good and the prices keep steady around the 50-cent mark. Lily of the valley, snapdragon, pansies and all classes of small flowers are still plen-

51 Wabash Avenue, CHICAGO

tiful. There is nothing like the usual amount of tree and shrub bloom, or of hardy outdoor stock, but its loss is hardly felt as there are plenty of fine indoor flowers. Callas and Easter lilies are still coming about equal to the demand. Sweet peas are fairly plentiful and the demand for the better grades keeps up well.

Although it is always unwise to prophesy there is every prospect of a record breaking business for Memorial day. Several prominent wholesalers say their advance orders were

never so good and one says that he has already more advance orders than the whole of his trade amounted to last year. Prices, except on carnations, have not advanced particularly and the quality of the latter makes them good value even at the rise. Peonies will not be as plentiful or as good as usual and there is considerable inquiry from retailers who are anxious to know how they stand. The flowers arriving from Missouri, southern Indiana and other points are of fair quality and there

will be a few early pinks from local growers. The bulk of the local stock, however, will not make the market.

### NOTES.

Poehlmann Bros. Co. is receiving fine consignments of home grown orchids now from Morton Grove. Cattleya Mossiae, of course, forms the bulk of the shipments, but there are also fine blooms of C. gigas and others. The roses here now are superb, white and pink Killarney in stems 40 inches long and flowers of remarkable

52-54 Wabash Ave., CHICAGO.

substance. Richmond is also extra fine, in fact the whole of the cut is excellent. Lilies continue to arrive in large quantities, also carnations and valley, all from the home ranges, while there is plenty of fine stock of all the smaller flowers. Trade has been very good during the week and orders for Memorial day are coming in briskly. It may be noted in passing that another big consignment of orchids has been received at the green-houses and these are likely to prove a leading specialty here.

Bassett & Washburn are long on all classes of stock and the quality is of the finest. Good American Beauty, Richmond, Killarney, White Killarney, Kaiserin and other roses are arriving in large quantities daily, and carnations are as good as any on the market with an extremely good demand. C. L. Washburn is very pleased with the way business is looking up, and says that Memorial day here promises to be a record breaker. E. B. Washburn is now at Tacoma, Wash., and hopes to be home in time to give a hand with the Memorial day rush. O. P. Bassett leaves this week for New York enroute to Europe.

At the J. A. Budlong range the growers must be as successful with sweet peas as they are with roses. The quality of the former now coming in is excellent and a quiet smile wreaths Phil Schupp's countenance as he unpacks the fine Spencers and other varieties day after day. The colors are clear and good and the flowers of fine size and substance. The roses are keeping just as good as they have been right through, splendid stock with good stems and foliage.

My Maryland and Field are proving to be two of the best roses at

Peter Reinberg's, and the flowers are fine. The Beauties now being cut are of strictly high grade, the flowers large and highly colored, the stems strong and well leaved. Altogether, the stock is first class and it is a question if this well-known house was ever in better shape to take care of Memorial day business than this year. Carnations are extra fine, long stems and firm flowers that bear shipping well.

At Kennicott's peonies are the principal attraction, and they are certainly handled in quantity. C. A. Samuelson turned in one order here for 500 dozen for \$300 and another order for 50 dozen the same day. The old red is not plentiful, the southern stock being over, but there are plenty of flowers of all the leading varieties and in excellent condition. Early Rose, Late Rose, Whitley and Festiva Maxima are among the best shown.

At Vaughan & Sperry's we noted some extra fine boxwood which should prove very useful for Memorial day, the leaves clean and bright and the branches well furnished. Gladioli in light and dark shades are a specialty here and big consignments are promised for the Memorial day business. Peonies are in great shape, good southern stock in the best selling colors as well as early pink grown locally.

Peonies are coming in good form to the J. B. Deamud Co., fine light and dark pink, white and rose varieties being noted. Some elegant gladioli are also among the offerings as well as large consignments of the double white narcissi. J. B. Deamud has been visiting the peony growers of the district, also looking up his growers for stock for the big demand for Memorial day.

Joseph F. Lang, identified with the retail trade of this city for the past 28 years, died at his residence, 2010 Melrose street, May 16, after an illness of five days. The deceased was born at Eltesweiler, Germany, in 1855 and came to Chicago in 1881. The funeral was held May 17 at St. Alphonso's church. Interment at St. Boniface cemetery.

E. C. Amling looks very cheerful these days, business coming his way in big slices. The stock shown is fine in all cases. We saw here the best Festiva Maxima peonies we have noted this season, and all other varieties are good. Stephanotis has been among the offerings here this week.

At Geo. Reinberg's, Bride, Bridesmaid, Killarney and Richmond roses are coming in great shape, the growers having been lucky in making Memorial day with some of the best stock of the year. The cuts of smilax continue good and orchids are also freely shown.

Mrs. Jardine rose is a strong feature at Wietor Bros., the flowers being large and of fine form and color. Stock cleans up well daily and orders for Memorial day have been coming in freely. Good carnations in all the popular varieties are also to be seen here.

Shipping trade keeps up remarkably well at Zech & Mann's and whenever we go there we always find all hands busy. Among the stock during the present week the fine color of the Bridesmaid roses was very noticeable.

Wedding decorations have been plentiful recently at the retail department of the Geo. Wittbold Co., and the force here has been kept very busy.

Desplaines, Ill.

The Desplaines Floral Co. is reaping the benefit now of the new houses erected last season in the extra fine quality of the carnations now being cut. The stock is fine in every way, the plants healthy and the flowers of excellent substance. The young plants are very fine and are now being planted in the field. About 15,000 asters, Queen of the Market, are just ready to go out and they are a vigorous, healthy lot. John Prickett is certainly an inventive genius and we were much interested in a new system of carnation supports he is working out. Upright castings are clipped over the sides of the cement benches with sliding blocks on them to be fixed at any height desired by means of a set screw. Each block has two holes in it and is wired trellises or frames are made to fit into these, thus obviating any strain on the ends of the benches, as each six feet or so is entirely distinct and self-supporting. This kind of thing would be very useful around propagating time or at any time when it becomes necessary to utilize part of the bench. John, as a mechanic, and Harry Blewitt, as a grower, form a mighty good combination and both are workers, this accounting for their success, which is well deserved.

The new foundry of the Geo. M. Garland Co. will be considerably larger than the old one and work on it is progressing rapidly. There was a talk of this firm leaving the town, but this has been averted, and when the new foundry is complete the capacity will be greatly increased. Orders for the Garland gutter and the new improved truss are coming in very rapidly and everybody is working

White Enchantress carnation and we have seldom seen this variety so good. At the Garland ranges carnations are the principal attraction, except at Frank Garland's, where the roses are in excellent shape, some fine Killarney and Kaiserin being seen. The latter is especially good and all the plants are clean, healthy and full of flower.

Chas. Wiffin's place is in good condition and we noticed particularly some excellent lavender double stock. Godetia is grown here as a "novelty." Mr. Wiffin is still out west, but the place is being taken good care of by his sons.

HILLSBORO, ILL.—Geo. L. Zeall is starting in the greenhouse business at this place and intends to grow florists' stock and vegetables. He expects to build a new greenhouse this season, 25x75 feet.

TRADE FAIR.

Business during the past week was rather quiet, but not discouraging. The retailers recognize the fact that the near approach of Memorial day, as any of the other great holidays, usually reduces trade, but they hope to make up for it when the day comes around. There is evidence of fine stocks of roses, carnations and all other seasonable flowers for Memorial day, as the weather has been clear and conditions are generally favorable. Wholesalers and growers say that had the demand of the past week been heavy it would have been hard work to supply it, as arrivals were rather light. Some very fine roses are arriving, but there is no surplus. Of the leading stocks it is probable that the shorter grades of roses are as plentiful as anything. There is no surplus of good carnations, but very good ones are arriving. There are plenty of orchids to supply all demands. Stocks, snapdragons, sweet peas, pansies, cut and in baskets, are all noteworthy features. Outdoor lily of the valley is seen in considerable quantities.

THE RETAILERS.

P. L. Carbone's store, at 342 Boylston street, is noteworthy, not only for fine flowers, but also for a great collection of garden and house pottery. There are china, marble and terracotta work in almost endless profusion and fanciers have an immense variety to choose from.

A feature of the Wax Bros. store is their fine window display of baskets of orchids and roses and tastefully arranged bouquets of pansies and sweet peas.

Henry R. Comley has an attractive store at 6 Park street. It should be easy for Mr. Comley to be a good florist, as it runs in the family.

Both of Doyle's stores, 6 Beacon street and 306 Boylston street, are handsome and stocked with the best the market affords.

PLENTY OF STOCK.

All prices are back to the season's level and perhaps a trifle below. Stock of all kinds is plentiful awaiting the commencements which start in next week and keep things a bit lively until the middle of June. American Beauties are seen in fine condition and as the prices are low, move very well. Eastern stock of this variety is particularly fine. White Killarney, Kaiserin and Bride appear to meet with about the same demand, the preference if anything being for Kaiserin. Special Killarney and My Maryland are seen with extra long stems. Peonies are coming in, large quantities of early red being offered last week, with an assortment of colors in the southern shipments. Sweet peas of good quality and variety sell very well; this is one of the most popular of the small flowers. Valley is again in good supply. Snapdragon is largely used in window decorations and sells well, the white, pink and yellow varieties being in good demand. One of the rose growers said of the month of May that it came very near to being third in point of money returns, as there were quantities of flowers which generally sold fairly well at fair prices.

### NOTES.

The Henry A. Dreer Co. is having a great run on pot roses. They are to be seen here by the thousands in almost endless variety. There is a large demand for those of the climbing or rambler class, which is becoming very popular. It will not be many years, Mr. Eisele thinks, before every house or cottage in the land will have its rose-covered porch or arched gateway of these fascinating varieties.

Robt. Craig says he finds it very difficult to get young stock of American Beauty roses. Several years ago this was a great center for these plants and thousands were shipped each season to other growers who desired to get the Philadelphia stock, but so many have given up its culture that there is scarcely enough young stock for the local planting.

Quite a few of the orchid growers of this vicinity will attend the display in Boston next week. This exhibition, the first national affair of its kind, marks a new era and will give a great impetus to the growth of these high class beauties which are coming forward at such a rapid rate.

We made an error in giving the size of the new house of the Joseph

Heacock Co. It is 55x600 feet and Mr. Heacock says is well under way, and all the iron work finished. They expect to have it all planted by June 15.

Some of these days the sign may read George Faulkner & Son, Florists. The junior member arrived last Friday. George has had several busy days with his hand and phone gathering in the congratulations.

K.

### Three New Acacias.

The genus acacia has been enriched by three new forms that have been raised in the celebrated nurseries of M. Ludwig Winter, at Bordighera. These neat, free-flowering shrubs or small trees, will rightly become favorites in the garden as soon as they come into commerce. The plants begin to flower in the middle of December and onwards till the end of February, and are good for the decoration of greenhouses and winter gardens under glass, and for cutting. Mr. Winter is the possessor of quite extensive plantations of acacias on a sunny slope lying between Bordighera and Oepadelettir. The three plants are hybrids—the first acacias yet raised—and they indicate a new route, not hitherto trodden by the hybridist, but which promise many surprises. The seed parent of all three is A. Podalyriaefolia, crossed with A. dealbata, and is named A. x Hanburyana the cross of the second with A. pycnantha, is named A. x Siebertiana, after the director of the palm garden at Frankfurt-on-the-Main; and the third is A. x de Neufville after the manager-director of the same garden. All of these hybrids differ in some points from each other, in foliage, size of the individual flowers, and a little in the shade of yellow of the flowers.—Horticultural Trade Journal.

MILBROOK, N. Y.—W. C. Russell has started excavating for the cellar of the new greenhouse he is about to build.

**New York.**

PRICES GOOD.

Business was rather dull during the first part of last week, but it improved at the end, Saturday being a good day. A comparison with former years shows, however, that there is no grounds for complaint. Considering that it is now the middle of May, the leading stocks, such as roses and carnations, bring a good price. Roses, in proportion, are more plentiful than carnations. The price of special American Beauty has dropped to 15 and 20 cents, the arrivals being heavy. A large stock of outdoor lily of the valley tends to lower the price of the greenhouse product. A better quality of peonies is now arriving. There is no scarcity of any stock, but the market cleans up fairly well. The weather has been rather freaky and rather cool, but on the afternoon of May 14 the city was visited by a heavy thunderstorm, accompanied with wind. There will be plenty of stock for Memorial day, and if our patriotic neighbors of other cities fear a shortage they can be supplied by making their wants known.

May 16.—The condition of the market is fair this morning. Indications point to high prices for carnations for Memorial day. Sweet peas are a good proposition and selling fast. Iris, German and Spanish, is now reaching this market in quantity and selling well. A large stock of it is being handled by B. S. Slim, Jr., in the Coogan building, Twenty-sixth street and Sixth avenue. A noteworthy feature of the market is the continued popularity of pansies. Thousands of them are being sold, both cut and as basket plants.

## NOTES.

Max Schling, who for the past eight years has had a very successful retail business at 1002 Sixth avenue, will soon remove to 22 West Fifty-ninth street, next door to the Plaza hotel, where he has secured a long lease. In his present location Mr. Schling has won many friends by his business-like methods and fair dealing. There is no doubt that in his new location his business will be greatly increased, as it is a locality patronized by the best people of this city.

The Growers' Cut Flower Co. has removed from 39 to 41 West Twenty-eighth street, and Manager Coan is well pleased with the change, as business has improved. They are handling a fine stock of red gladioli that clean up quickly.

The Central Park Flower Market, which is conducted by Changuris Bros., has of late been doing a fine business and is becoming one of the noteworthy stores of that locality.

James Blauvelt, who for a number of years was connected with the retail trade of this city, is now with H. F. Littlefield, of Worcester, Mass.

The John Young Co., Bedford, is shipping to Traendly & Schenck a fine stock of special American Beauty roses.

The Kervan Co. has been very busy handling green and the rush will continue until Memorial day.

Mrs. Warendorff, whose serious illness was reported in last week's notes, is now much improved.

H. E. Froment is receiving the best line of peonies we have yet noticed.

**The Horticultural Society of New York.**

The annual meeting of the above society was held on Wednesday, May 11, at the Museum building, New York Botanical Garden. The annual report was read, showing a year of increased activity all along the line. Three exhibitions were given during the year, one in June, a large one last fall at the American Museum of Natural His-

tory, and one in March in conjunction with the American Rose Society. At the meeting just held the membership was increased by the election of 21 annual members and one life member. This makes a total net gain during the year of 40 members, three of which are life members. This advance is most encouraging, for if the society can have a large membership, its usefulness in the world of horticulture will be greatly increased. If each member will consider himself a committee of one to add one more member to the society, the desired result will soon be accomplished. At the annual meeting the officers and members of the council for the succeeding year are elected. The election just held resulted as follows:

Geo. T. Powell, president; N. L. Britton, T. A. Havemeyer, Patrick O'Mara, Samuel Thorne, James Wood, vice-presidents; George V. Nash, secretary; F. R. Newbold, treasurer. Council, elected members: F. L. Atkins, J. W. Cromwell, Henry F. Du Pont, Henry Hicks, John E. Lager, J. A. Manda, E. S. Miller, Clement Moore, W. Nilson, F. R. Pierson, I. L. Powell, E. H. Roehrs, H. H. Rusby, H. A. Siebrecht, E. B. Southwick, James Stuart, J. H. Troy, Robert Simpson, W. H. Waite, C. W. Ward, C. W. Weathered, A. L. Willis.

It was decided to hold a summer exhibition of plants and flowers at the New York Botanical Garden, on Saturday and Sunday, June 4 and 5. All are invited to make this exhibition attractive, whether members of the society or not, by sending in exhibits. An attractive schedule has been prepared. A copy of this will be sent to any one desiring it by addressing the secretary, George V. Nash, New York Botanical Garden, Bronx park, New York.

**Buffalo.****WEATHER HINDERS OUTDOOR WORK.**

The weather is extremely cold, consequently outdoor work is greatly retarded. The greenhouse men are far from amiable and no one can blame them. Flower beds in the small parks have tulips, hyacinths, etc., in them, but show the effect of the cold. May 1 found all the florists in their same locations, which is a good omen. They are doing well and do not wish to move. The stores all show prosperity and the quality of stock seen in them is excellent. Weddings scheduled for this month are not large, but June promises great activity and together with school commencements everyone should be busy. Carnations, roses and peas are plentiful with fair sale. Bargain roses were in evidence on Saturday, 50 cents the dozen in boxes, and found a ready sale.

## NOTES.

The last meeting of the Florists' Club was productive of two things. The paper on "Summer Roses" by C. F. Guenther and the awakening of the florists' employees who seem to want a fall show more than the proprietors. We hope their wishes will be realized. The cause is good, the attempt courageous after the past experience of the club and, if successful, will be an everlasting banner to place in the front of the procession with the slogan "Buffalo Means Business," but by all means have the committee look for the one thing—a first class show.

Frank Good is thinking seriously of purchasing property in Canada. If the price is not satisfactory will bring the best part to this city. New York is large, but small towns in Canada have great attractions.

Business was suspended in the city last Monday. The B. P. O. Elks had

a mortgage on the city and the ball team. We won and there were "some" flowers sold.

President Joseph Streit of the Florists' Club has selected his committees for the year and put good live ones on all. Wait and see what is booked for our annual picnic.

S. A. Anderson and wife are in Michigan on a fishing trip.

Robert A. Scott is slowly recovering from his injury.

BISON.

**Baltimore.**

The abnormal, low temperatures continue, there being three mornings last week when frosts occurred. On May 15 the mercury at no hour has reached 60°, and by midnight it has gone down to 40° and still falling. The danger line as to spring frosts has been fixed for years unequivocally passed on May 10, and the tenderest plants have always been set out with confidence after that date. Business is being affected, of course, by the cool weather. Bedding out is delayed, lawn parties and picnics are as yet things to be anticipated. May is not a notable month for weddings, but there have been more than usual this year, which made some demand for cut flowers, but the market may be marked as dull.

The campaign goes on with enthusiasm for beautifying the city by the improvement of the back yards by planting shrubbery, vines and flowering plants, and by the use of attractive window boxes. The Municipal art society has raised a home garden committee, districted the city and offers a number of prizes for back yards and window boxes, and the Evening Sun also offers prizes of \$20 for the back yard showing greatest improvement, and \$10 for the most attractive window box in each of six districts. In the back-yard contest the judges will decide on the improvement made in arrangement, cleanliness, concealment of unsightly objects with vines, shrubbery, tall plants, etc. Photographs "before and after" are to be taken. Window boxes are judged by general appearance, quality, and judgment of selection of contents. Professionals are not eligible, nor yards and boxes cared for by professionals. The suggestion is made that the children be interested in the work, as likely to result in producing home-beauty enthusiasts, whilst nothing makes more for health than working in the soil and outdoor exercise.

The park investigation proceeded last Tuesday, developing, according to the newspaper reports, some bouffe features. John W. Barton, who claimed having been in charge of a botanical garden in Italy for four years and worked in Fairmount park, Philadelphia, for two, was the chief witness, and he was lively in his criticism of the methods in vogue, and told the board members to their faces they were not competent, knowing something perhaps about buying corn and potatoes, but not about making purchases for the parks. He said Gen. Latrobe was "too full of gas and real estate to properly supervise the work in the parks." E. A. Seidewitz described the Sun as "a gardener of Pikesville"; said the Olmsteads are more of engineers than gardeners, and that the parks are not in as good condition now as when under the supervision of W. W. Crosby.

S. B.

WASHINGTON, D. C.—The Florists' Club held a regular meeting May 10 and discussed plans for an outing in July. The flower show to be held in November was the principal topic of the evening.

V. S. DORVAL, Secretary.

Ludington, Mich.

Wm. Gregory came here many years ago as a gardener and raised flowers outside for summer resorts, the winter leaving him without customers. But he stuck, commencing with a hotbed and now has over 15,000 square feet of glass, raising carnations, all kinds of bulbous stock, pot plants and one house of roses. The town now has a winter population of about 10,000: in the summer many more. Mr. Gregory's son makes use of his spare time gathering ferns and shipping them to Chicago. The firm name is now Wm. Gregory & Son. ABYDOS.

WINCHESTER, MASS.—Samuel W. Twombly died April 27. He was born in Tamworth, N. H., in 1822.

J. P. Herzog has proved to the people here that a florist business in their town can be made a paying proposition. Mr. Herzog, an excellent grower as well as a business man, purchased a greenhouse plant here three years ago, and today he is the only florist in the town, owner of both the former plants and keeping some growers elsewhere busy supplying him with cut flowers. He has a large trade in neighboring towns.

### Boston Notes.

The A. T. Stearns Lumber Co. is getting busier as the building season opens. This firm is furnishing the material for two new vegetable houses for J. W. Stone, of Watertown. One of these will be 43x230 feet, the other 46x100 feet.

John Barr, of South Natick, who is represented in the market by his son, is showing fine carnation stock. Mr. Barr made a fine record as a private gardener and since he turned his hand to commercial work he is keeping it.

Albert Roper, of Tewksbury, is bringing in fine blooms of his carnation, Bay State. In this connection it may be noted that Fair Maid, his first noteworthy production, is yet a factor in this market.

The orchid show promises to be a great attraction for next week. The prize list is a very tempting one and cannot fail to bring together a magnificent collection of these plants.

The display of tulips in the public gardens and parks has been noteworthy this season. Old florists say that they have never seen it excelled.

Edward MacMulkin is now busy on landscape work, but his Boylston street store presents the same attractive appearance.

## New York.

Established 1874.

N. E. Corner 44th St.  
and Madison Ave.

Has his own correspondents in all the large cities of Europe and the British Colonies. Cable orders forwarded by private code. Telegraph and Cable Address, DARDSFLOR.

Kansas City.

PLENTY OF STOCK.

The market for the last week has been plentifully supplied with almost all kinds of flowers. Roses especially have been on hand in abundance. Bride, Bridesmaid, Richmond and Kaiserin have been of good quality and have sold well. Beauties have fallen off considerably on account of the dark weather, but a few days of sun will bring them out in quantity. Perle has stood up well with a ready demand for all grades. Peonies are arriving in large quantities, and are selling for three-four cents. The storage companies report an unusually large amount of this stock, which is being held for Memorial day. Gladioli have commenced to come in, but the supply is not large. Sweet peas are still in demand, with a large amount to select from. Carnations are decreasing rapidly and it is feared there will soon be a shortage, especially on May 30. The fancy fern which has been coming in has been very poor, sometimes half the boxes being unfit for use. The supply of orchids has been equal to the demand, but some florists state that their plants have about quit blooming. There are a great many Minnehaha roses being cut now. Although they are short they are of beautiful color and foliage.

### NOTES.

The Geo. M. Kellogg Cut Flower & Plant Co. has been cutting an immense amount of Kaiserin roses. They are exceptionally good, of long stem and good firm heads. Their Beauties have also been on hand in large numbers.

This month will long be remembered as one of the wettest and darkest in many years. There has been an almost constant fall of rain which in two weeks has amounted to nearly 10 inches.

Wm. Biederman has had a good plant trade the last few weeks which has kept all hands busy. He is talking of adding to his establishment at Thirty-fourth and Prospect streets.

Sam Murray reports a good business. He has been handling a large amount of stock lately which he has used in decorations and funeral work.

Roy Blessing, of the Rock Floral Co., had to resign his position on account of ill health. He has obtained an outdoor position which will help him to recover.

J. E. Meinhart, of Webb City, was in town May 14 looking up his old friends. He reports a good business at his new location.

Mrs. L. Fields has been cutting a fine lot of gladioli which have found a ready sale.

Visitors: M. Reukauf, of Bayersdorfer & Co., Philadelphia; — Cooper, with L. L. May & Co., St. Paul, Minn. MISSOURI.

TRADE SLOW.

The weather the past week has been cloudy and cool, raining almost daily, Spring seems to be late in coming and trade suffers considerably. The trees in the parks and boulevards in many instances bear a very sickly appearance. Stock is plentiful but the demand is slow. Carnations are plentiful especially Enchantress and the small Boston Market. American Beauties and other roses move slowly. The weather has cut off all summer garden business. Cape jasmines are in, but they seem to lack the sap and their keeping qualities are not equal to former years.

## NOTES.

The Florists' Club met Thursday at Odd Fellows' hall at 2 o'clock, 15 members being present, with President Geo. Windler in the chair. Owing to many members being busy planting out and unable to attend, many important measures were laid over to next meeting. The trustees at the next meeting were ordered to report in regard to the annual picnic to take place in July.

The Suburban Garden opened its doors last Sunday for the summer season. The floral decorations and the newly made sunken gardens are quite a feature. The design work has been by Alex Johnson, Wellston. Weather conditions, however, have greatly retarded the work.

C. Young & Sons Co.'s windows, together with their usual grand floral display, have been given a double attraction by some very pretty chickens, hatched by the Buckeye incubator and nursery, around a fine display of orchids, lily of the valley and other flowers.

The Paris Floral Co. will open up in the new LaSalle building, Broadway and Olive street. Fred Foster will be the manager. This is an A1 location, right in the heart of the business district.

H. J. Weber & Sons Nursery Co. will furnish the local representatives to the nurserymen's convention in June and will also try to bring the 1911 convention to our city.

Geo. Angermueller is handling orchids. These will be quite an addition to our rapidly growing wholesale market.

Some extra fine fancy Richmond roses were seen the past week at the W. C. Smith Wholesale Floral Co.

A fine lot of peonies, lily of the valley, etc., have been seen during the week at C. A. Kuehn's.

Otto Sander is still offering as a specialty his very pretty arranged one dollar box of flowers.

TOLEDO, OHIO.

All Orders Promptly Executed.

## The Seed Trade.

### American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Duryea, New York, First Vice-Pres.; F. W. Bolgiano, Washington, D.C., Second Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J. June 21, 1910.

TURNIP SEED will be scarce.

CORN planting has begun in northern Illinois.

SEED CORN of medium types continues to sell well.

ONION SETS in and around Chicago are looking well.

VISITED WASHINGTON: Chas. P. Braslan and J. E. Northrup.

ONE French seed grower reports May 3 that Paris Golden celery plants were all destroyed.

ONION SEED will not be a big crop in California this season, is a prediction made by one California grower.

AT Amoy, China, whence Chinese narcissus bulbs are shipped, the bubonic plague was declared epidemic May 16.

CONRAD APPEL has exhibits of his grass seed and tree seed specialties at the Brussels and Allenstein expositions this season.

PUGET SOUND cabbage seed will be a short crop in common with those in Europe; two Washington growers verify this report.

MEMPHIS, TENN.—Otto Schwill & Co., are preparing to build a 5-story seed warehouse with improved cleaning machinery and latest appliances.

CHICAGO.—Contract prices on the board of trade May 18 for grass seed were noted as follows: Timothy, \$4.25, nominal. White clover, from 20 cents to 25 cents.

THE Dutch bulb displays in the stores next fall will probably bear this sign: "Ex-President Roosevelt personally inspected these bulbs in bloom at Haarlem, May 1, on behalf of American consumers."

A LONDON seed house reports the following beet seed crop percentages May 2: Egyptian, Crosby's, Dewing, Fireball, Dirego, Half Long and Globe, 20 per cent; Bassano, Columbia, Blood, Eclipse, Edmund's Lentz, and Long, 30 per cent.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale  
Trade Only.

**SAN JOSE, CALIF.**

NEW YORK.—L. H. Archias, Sedalia, Mo., with his wife and two daughters, took passage on May 14 on the S. S. Konig Albert for Naples.—Carl Gloeckner's store ("Buds") is now fitted up in good shape, with all the appointments of a first-class seed store.

VISITED CHICAGO: Jesse E. Northrup and daughters, Minneapolis, Minn., returning from Europe; Chas. P. Braslan, San Jose, Calif., enroute to New York, sailing thence for Naples on the S. S. Princess Irene May 21; G. C. Eldering, representing W. J. Eldering & Son, Overveen, Haarlem, Holland; J. J. Van Waveren of L. Van Waveren & Co., Hillegom, Holland; Yost Sluis and P. Sluis, of Sluis Bros., Enkhuizen, Holland.

### Transparent Seed Packets.

At a recent meeting of the Wholesale Seedsmen's League, W. Atlee Burpee, chairman of the committee on postal affairs, concerning his recent interviews with the third assistant postmaster general, reported strongly in favor of the seed trade generally complying with rulings of the post office department as to using transparent paper. The third assistant postmaster general was most courteous and seemed disposed to be as liberal as possible in his interpretation of the word "transparent," in permitting the use of any paper that is not so opaque as to conceal character of contents of sealed packages. Quarts and pounds can be put up in opaque paper bags if only tied (not sealed) or in cartons, without sealing.

This ruling of the department is in no sense new, as the postal regulation under which it is made has stood for more than 20 years. Previously, however, the rulings have been only in individual cases and the subject has not before been made one of national scope.

[There has never been any claim that we have heard of that writing has been found in such packets in violation of the law. Why therefore the necessity for this drastic ruling?—Ed.]

### California Seed Crops.

Hollister, May 8.—Crops in the San Juan valley are looking well; in fact, we could not ask for anything much better. There have been a great many weeds this season and the expense of hoeing has been heavy, but now that the hoeing is done, the crops are coming along finely.

## Pieters-Wheeler Seed Company

HOLLISTER, CAL.

Growers of High Grade Seeds

Onion, Lettuce, Radish, Sweet Peas, Etc.  
CORRESPONDENCE SOLICITED.

Onion promises well and while there is a little mildew on this crop, it has done no harm here. Whether we shall escape cannot be told, however, as the foggy nights now prevalent are very favorable to this disease.

Radish is in good condition, but late here, as so much had to be resown on account of the cold weather. We do not anticipate any great surplus, but hope to have enough to fill orders for most leading varieties.

Lettuce looks very fine and we perhaps come nearer to being certain to have a crop of this staple than of any other thing we grow.

Sweet peas are a good stand and just coming into bloom. There should be plenty of the leading varieties.

Carrot, salsify and parsley are in good condition and promise good crops.

Reports from the bean growing section are favorable.

L. W. WHEELER.

### Bulb Classification Hearing.

A hearing was held May 5 before the board of United States general appraisers regarding the classification of certain hyacinth bulbs. The importers claimed that the bulbs were dutiable under paragraph 263, of the Payne-Aldrich tariff law as "all other bulbs, bulbous roots or corms which are cultivated for their flower or foliage" at 50 cents per 1,000. The government claimed that the bulbs were subject to duty under a provision of the same paragraph which provides for "hyacinth, astilbe, dielytra and lily of the valley clumps" at \$2.50 per 1,000.

The importers claimed that congress in construing the section of paragraph 263 providing for hyacinth, etc., at \$2.50 per 1,000 meant that the word clumps pertained to hyacinths, astilbe and dielytra as well as to lily of the valley. The government had a bulb grower from Holland and numerous dealers and growers from this country testify that no such thing as a hyacinth clump was known to the trade or ever imported.

The government claimed that the sprouted mother bulb, that is the large bulb with smaller bulbs growing thereon in places where cuts have been made, was not an article of commerce and therefore could not be what congress meant, because they would not presumably pass a law which provided for an article which was not bought and sold.

Prof. Corbett of the Department of Agriculture, testified that the government was conducting a station at Bellingham, Wash., for the purpose of raising and propagating hyacinths, and in his opinion the mother bulb was too delicate and required too careful handling to be imported. Both the government and the importers have handed in all their testimony and are awaiting the decision of the board.—New York Board of Commerce.

[The attempt of importers to force the above construction in the law, when the hyacinth bulb duty is already reasonable, does not seem creditable to plaintiffs and we do not believe will receive the support of the seedsmen or florists in good standing.—Ed.]

Vice-President; S. W. Severance, 508 Illi-  
nois Life Building, Louisville, Ky., Sec-  
retary; M. L. Ruetenik, Cleveland, O., Treas.

### Making Bordeaux Mixture.

The following instructions as to the making of Bordeaux mixture for use as a fungicide are taken from a bulletin of the Ontario Department of Agriculture:

"The first thing to do in the manufacture of the Bordeaux mixture is to decide on some recommended formula. The formula which has long been advocated in Ontario is known as 4-4-40 formula. It is as follows: Crystallized copper sulphate (Blue-stone), four pounds; quick lime, four pounds; water, 40 gallons.

"With good lime it only needs about one pound to act on all the copper; the excess given, three pounds, covers all danger which might arise from the use of a poor article. A large excess of lime is a disadvantage; it causes the Bordeaux mixture to exert a low fungicidal action, it is apt to cause the machinery to clog and to cause an uneven application, and, the particles of lime offering more resistance to rain, will cause the mixture to be more rapidly washed from the trees. It may be an advantage, however, in a very wet season, by causing the Bordeaux to retain its efficiency longer and by allowing less injury to be done to foliage.

"As both copper sulphate and lime dissolve and slake, respectively, much quicker in hot water than cold, it is better to use heated water in order to save time. The best lime obtainable is used, and if freshly burned, all the better. In slaking do not use an excess of water, but just enough to keep the lime moist. When the action is completed enough water is added to make a thin whitewash and then the whole is strained through coarse sacking to remove any lumps which would clog the nozzle of the spray pump. This done, enough water is added to make the volume up to one-half of what the final mixture will amount to. The copper sulphate solution is diluted to the same extent. The two are now mixed, the operation being best performed by two men, each with a bucket, one handling the lime and the other the copper sulphate. They are poured into the spray tank, two bucketsful at a time, until the whole is brought together. In this way a precipitate is obtained which will remain in suspension with only occasional agitation. If mixing is done before dilution, a very coarse precipitate is formed which settles rapidly to the bottom of the spray tank and requires almost constant stirring.

"If large quantities of spray mixture are going to be used, it is an excellent plan to make up stock solutions of the copper and lime. This can be done by dissolving, say, one

pound of copper sulphate in each gallon of water and making up a barrel full of it. Each gallon of the solution taken then represents one pound of the bluestone. The salt can be conveniently dissolved by filling the barrel with water and then suspending it therein, enclosed in a canvas sack. The lime can be handled in the same way, being sure, of course, that the contents of the barrel are thoroughly stirred up before dipping out any portion. Keep the barrels covered when not in use.

### PRECAUTIONS TO BE USED IN MAKING.

Before Bordeaux mixture is sprayed, it is absolutely necessary that all copper should be in the form of the sky-blue precipitate, i. e., enough lime must be used to act on all the bluestone. Formulae advocated by the experiment stations always contain enough lime to precipitate all the copper, but it may sometimes happen that such a very poor quality is used that there will be some of the sulphate left unchanged. There are several simple ways by which one can tell when enough lime is present. Those who are very familiar with the reaction which occurs can tell by the color of the precipitate, it having a greenish tinge when an insufficiency of lime is present instead of the deep sky-blue color. However, those who are not familiar with the process must use more decided tests. Three simple ones can be employed, as follows:

(1) "Take some of the clear solution which is left on top when the sediment settles and place in a white saucer. Add a few drops of a solution of potassium ferrocyanide to it. If a reddish-brown precipitate or coloration appears, more lime is needed.

(2) "Take a portion of the clear fluid as before, and blow the breath gently over the surface. If a thin white pellicle or covering forms over the top, enough lime has been added.

(3) "Take a bright piece of steel. In handling copper solutions use only wooden, brass, and copper vessels; all other receptacles would be corroded and destroyed by them; besides, the fungicide itself would be injured. Copper compounds are poisonous and therefore should not be left lying around where children or animals can get at them.

"Bordeaux mixture is quite often combined with Paris green to impart to it an insecticidal value. In this case the mixture takes the place of water for holding the green in suspension. Other recommended arsenicals can be used for this also, such as lead arsenate and calcium arsenate. But if soluble compounds of arsenic are used, such as sodium arsenite, it would be necessary to slightly increase the amount of lime used in making the original Bordeaux mixture."

### Prices of Indoor Fruits and Vegetables.

New York, May 14.—Mushrooms, 35 cents to 45 cents per pound; cucumbers, \$1.12 to \$1.37 per dozen; lettuce, cold frame, 75 cents per dozen heads; tomatoes, 25 cents per pound; grapes, Hambros, \$1.40 per pound; Frankenthals, \$1.40 per pound; Gros Colman, \$1.25 per pound; Muscats, \$2.75 per pound; peaches, French grown, \$15 per dozen.

Chicago, May 18.—Mushrooms, 40 cents to 50 cents per pound; cucumbers \$1 to \$1.25 per dozen; leaf lettuce, 22-25 cents per box; head lettuce, Louisiana, \$1-\$1.25 per hamper; \$6½ barrel (sugar barrel size); radishes 25-30 cents per dozen.

### Orange, N. J.

Dr. J. M. W. Kitchen of East Orange read a paper on the "Question of Heating for Orchid Culture" before the New Jersey Floricultural Society in Lindsley hall, 240 Main street, Friday, May 13. He recommended hot water as the best medium for heating and advised having plenty of radiating surface to prevent having the pipes so hot, which makes it more congenial for the orchids. A very interesting discussion followed in regard to time of shading. Dr. Kitchen said he shaded the latter part of January, and used white lead and kerosene for that purpose. J. A. Manda considered that time too early and said the latter end of March was time enough, and recommended crude oil and whitening as being the best material for shading and also the cheapest. John J. Dervan asked Dr. Kitchen what was the best thing to do to get rid of the cattleya fly. He replied by saying that he had tried all the different kinds of insecticides, but found he got the best results from strong fumigation with tobacco stems when the plants were not in flower.

The monthly exhibits for points were exceptionally fine and the competition very keen. Those who lead in the various classes at present are: Roses, A. B. Jenkins, gardener Albert F. Larson; carnations, Chas. A. Hathaway, gardener Max Schneider; vege-

Vaughan's

Lilium Harrisii.

**1911 Both Plants and Bulbs  
Carefully Selected.**

While we do not claim that our Harrisii are absolutely free from disease, or that every bulb will produce a perfect plant, we do claim that our growers' efforts in the way of spraying and roguing are producing results, our stock now being freer from disease than ever before and of genuine Harrisii type, in fact, the best general crop grown on the island of Bermuda.

## The Nursery Trade

### American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;  
W. P. Stark, Louisiana, Mo., Vice-President;  
John Hall, Rochester, N. Y., Sec'y.  
Thirty-fifth annual convention to be held  
at Denver, Colo., June 8-10, 1910.

VISITED CHICAGO: Henry Kallen, representing Kallen & Lunnemann, Boskoop, Holland.

WASHINGTON, D. C.—Secretary Dickenson, of the park commission, has appointed George E. Burnap, of New York, landscape architect to succeed George H. Brown, deceased.

AUGUST WOLF, 225 Hutton building, Spokane, Wash., writes as follows: "Reports from nurseries and growers are that between 4,000,000 and 5,000,000 one and two-year fruit trees will be planted in the four states and provinces of the Pacific northwest before the close of 1910. This means that more than 50,000 acres of land will be added to the area already under cultivation, thus giving a total of 400,000 acres in fruit in 1915." We have seen good fruit going to waste because it would not pay for picking.

### Lilacs at Rochester, N. Y.

Sunday, May 15, was Lilac Sunday. In the number of people that visited the park during the entire day all records were surpassed. The procession commenced at six o'clock in the morning and it was kept up until eight o'clock at night. From two o'clock in the afternoon until six o'clock at night dense crowds of people moved through the lilacs and other parts of the park. It was estimated that 50,000 people visited the park during the entire day and that perhaps was conservative. The lilacs were not fully in bloom, but they were in condition to be studied to the best advantage and the 206 species and varieties presented a scene of extraordinary brilliancy, which undoubtedly could not be equalled in any other municipal park in the world.

Late blooming tulips and narcissi, groups of tufted perennials, hardy primroses, pansies, Japanese, Chinese and Siberian crab apples, red-buds, spireas, bush honeysuckles and Chinese pearl bush, were some of the other principal things in bloom. A noticeable feature was the excellent behavior of the immense crowds of people. Nothing was injured and the people were supremely happy. It really seemed that the people had gone to worship peacefully at Flora's shrine, and no finer tribute could be paid to American democracy. A full account of the varieties of lilacs appears on page 806 of this issue.

### American Association of Nurserymen.

In our issue of May 14, page 782, we gave particulars of the arrangements for the convention of the American Association of Nurserymen, which promises to be a more than usually interesting and enjoyable one. The programme of addresses and papers is given herewith:

Address of Welcome—Col. J. S. Irby, representing the city of Denver.

### Railway Gives Away Trees.

The Detroit & Mackinac Railway Company has for the last five years experimented with a forestry nursery on its Tawas Beach property. At the present time there are on hand trees of the following kinds for transplanting: White pine, Scotch pine, western yellow pine, spruce and western white cedar. The company desires to dispose of these trees, and will give them to parties who will plant them and see that they are properly taken care of. The only charge made will be the expense of packing and freight charges from East Tawas to destination. The company especially requests that farmers on and adjacent to the line of the Detroit & Mackinac Railway make requisitions for these trees, for the purpose of setting them out for reforesting some of the lands that they have cut over on their farms.

READING, PA.—Herman Stebenow has been granted a permit to erect a greenhouse 20x100 feet at Twelfth and Exeter streets.

PEORIA, ILL.—Frank E. Rue opened a cut flower department May 9 in his seed store at 420 South Adams street. F. Nichols, who had the store in the Fey hotel, is in charge.

## Boddington's Quality Gladioli

Gladioli planted the end of May and in early June will flower after the regular crop and before the early planted stock; so if you are wise try some of the following NOW:

Remember you may deduct 5% if cash accompanies order.

|                                                                                                                                                                                                                                                                             | Per 100      | 1000   |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|--------|
| America. This beautiful new Gladiolus has produced as great a sensation as the now famous Princeps. The flowers, which are of immense size, are of the most beautiful flesh pink color, and, as a florist who saw it said, it is "fine enough for a bride's bouquet." ..... | 40c per doz. | \$3 25 |
| Boddington's White and light. Extra selected bulbs, 1 3/4 inches and up. .....                                                                                                                                                                                              | 1 25         | 10 00  |
| 1900. Nothing finer for florists' use. Flower is of a rich shade of red with very prominent white spots on three lower petals .....                                                                                                                                         | 1 75         | 16 50  |
| Mrs. Francis King. Color of flower is a light scarlet of a pleasing shade. .....                                                                                                                                                                                            | 3 50         | 34 00  |

## A BLUE ROSE

The Greatest  
Rose Novelty  
of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

Henry H. Barrows & Son, Whitman, Mass.

Mention the American Florist when writing

Worcester, Mass.

Business has been very good since Easter and the prospects are excellent for Memorial day with a probable scarcity of flowers on account of the early spring; the outdoor flowers, such as lilac, exochorda, etc., which helped out in bouquet making will be gone with little or nothing to take their place.

The first of the May exhibitions of the Worcester County Horticultural Society, was held at Horticultural Hall, May 5, and brought out some fine flowers and one of the best showings of rhubarb ever shown in the hall. The flowers were not as numerous as was desired but those shown were very good. The display of pansies grown by Geo. McWilliam of Whitinsville was a feature of the show. Each flower was as big as a dollar with quite a number of distinct colors from almost black to pure white. Allyne W. Hixon also showed a nice lot of pansies grown in the open all winter without any protection, as were Mr. McWilliam's. In the cut flower class, roses, carnations, spirea, marguerites, lilies, ramblers and heliotrope were shown by L. C. Midgley. The awards were:

Cut flowers.—L. C. Midgley, first; Allyne W. Hixon, second; Mrs. A. E. Underwood, third; Mrs. Simon E. Fisher, fourth.

Basket.—Allyne W. Hixon, first; Walter Draper, second.

Pelargoniums.—Mrs. A. E. Underwood, first. Hyacinths.—Mrs. Percy G. Forbes, first.

Prizes were awarded to Allyne W. Hixon and Mrs. F. W. Hixon for display of pansies, and Mrs. Thos. Pollard for English wall-flower.

Albert H. and Carl C. Lange moved into their new store, 371-73 Main street, May 3. Both members of the firm were busy receiving their friends and showing them about a store that

J. L. DILLON,

Bloomsburg, Pa.

is remarkable for the conveniences that have been installed. It is one of the finest florists' stores in New England. Every table, every stand and every case has its particular duty and is so arranged as to be adjusted to other positions in the store. The designing of the place was done by A. H. Lange, the architecture by Frederick Coulson and the work by Thomas & Co. The pictures are all of quartered oak and furnish a splendid background. Some of the up-to-date fixtures of the store which are especially noticeable are the specially designed refrigerators. One of these is designed for carnations and has movable glass shelves so that flowers of any height may be accommodated. There are cases designed for the keeping of ribbon, cords and tassels on the same side of the store. The other side is occupied with plant stands of peculiar construction. These stands are connected with a sink so that the water is immediately disposed of after all plants have been watered for the day. Another innovation is the absence of the long counter that is generally deemed a feature of all stores. In its place there are specially constructed tables made in such a way that they can be put together if a counter is needed, or separated when a special display is desired in any part of the store. Upright cases or cabinets containing baskets that are novelties are the product of arts and crafts workers. Other bas-

kets of the Pocahontas order are suspended from the balcony rail and the balcony itself is used for the display of palms, ferns and potted plants. Novel Swiss flower holders for table decoration are shown on one of the tables. These holders come in sections and are thus available for either large or small table decorations. By using only a few of the sections together a small decoration is obtainable, while by the insertion of more pieces the decoration may be extended to any size table necessary and different forms may be used. It is not in the display room that adaptability and convenience are to be specially noticed but in the workroom of the store itself. A large chute beneath the worktable disposes of all refuse and the table itself is fully equipped with everything necessary for the workman. The offices are well equipped and the store has exceptionally large windows, constructed so they can be built up to any form and design for special displays. The firm has been in business for 42 years in Worcester, 20 of which it was at 294 Main street.

**MADISON, N. J.**

Indianapolis.

John Bertermann moved during the past week to his country home for the summer. At this place he will entertain one of his daughters and her husband, Arthur Hotchkiss, who are coming to spend the summer with him. Bertermann has erected a garage on his farm for his newly acquired automobile.

Bedding and window box work is now in full sway, the weather having finally become more settled. Peonies will be on time for Memorial day this year, and may come on a little ahead of time. The outdoor lily of the valley seems to have become disgusted with the cold weather and stopped blooming.

Irwin Bertermann sold his residence at a profit and is now looking for an up-town location.

Lester Benson has lined the sidewalk for a square in front of his store with bay trees.

Smith & Young Co. are just com-

Petunias, 10 kinds, \$1.00. Cash with order.

BYER BROS., Chambersburg, Pa.

## Chicago Notes.

Preservation of Peterson woods, the only original piece of forest in this city or immediate vicinity, is the aim of Robert McCormick, president of the sanitary district. He has the support of the special parks commission which voted to refer a letter from Mr. McCormick to the city council with a recommendation that it take action to make a park district of Jefferson Park, which includes Peterson woods.

A conference of the Illinois Outdoor Improvement Association will be held at Springfield, May 26 and 27. The speakers include Governor Deneen, Dean Davenport, of the Illinois College of Agriculture, O. C. Simonds and Jens Jensen. The St. Nicholas hotel will be headquarters. Secretary A. P. Wyman, 17 E. Van Buren street, will be pleased to hear from those who expect to attend.

G. M. Reburn, representing Vaughan's Seed Store, has returned from his western trip.

Visitors: C. A. Brazee, Wilmington, Calif.; Frank S. Bayhouse, of Boise City, Idaho; J. L. Johnson, De Kalb; W. Wichtendahl, Maywood; Harry Fisher, Kalamazoo, Mich.; A. C. Brown, Springfield; John Bertermann, Indianapolis.

## J. A. Budlong,

37-39 Randolph Street, CHICAGO.

Toronto.

FUNERAL WORK GOOD.

The death of King Edward has caused the people of Canada to mourn for their beloved monarch. Government and public buildings are draped, flags are at half-mast and a general feeling of sympathy prevails. Trade has held up remarkably well and although there has been a falling off in the use of flowers for personal adornment and a number of festivities have been cancelled there has been considerable funeral work. Stock generally is plentiful and in good shape. American Beauty roses are in better supply and quality than they have been all season, while Richmond, Killarney and Bride are exceptionally fine. Carnations are coming in good, but the supply is short and it is difficult to fill orders. Orchids, sweet peas and valley are plentiful. What was considered to be an early season has developed to a backward one and the planting of outdoor flowers is delayed. The city parks and squares are resplendent with the vivid colors of the tulip beds. Owing to the scarcity of help a number of large landscape jobs are being retarded.

NOTES.

Although the campaign for Mother's day was given considerable prominence in the papers the desired hold of the public was not very strong, though some report increased business; with most of us it was only an ordinary Saturday.

A few of the more venture-some are planting out carnations, A. H. Houle having most of his planted.

# Bay Trees

We have just received four carloads of fine shapely trees in the following sizes:

### Standard or Tree Shaped.

| Stem about | Crown.       | Each.   | Stem about | Crown.    | Each.   |

# Roses plenty

In sorts listed page 789, May 14.

On own roots: summer grown; winter rested.

THE LEEDLE FLORAL COMPANY,  
SPRINGFIELD, OHIO.

Mention the American Florist when writing

Glen Cove, N. Y.

The regular meeting of the Nassau County Horticultural Society was held May 11, with a large attendance, President Dutlie in the chair. Three new members were elected and three applications for membership received. The schedule for the summer show to be held June 15 will be out in a few days and we may well anticipate a very successful affair. Messrs. Eccles, Gaut and Johnston acted as judges with the following decision: Monthly competition: three heads lettuce, L. I. Trepess first; twelve gardenias, G. Wilson first; twelve mushrooms, G. Wilson first. Cultural certificates were awarded to L. I. Trepess for tomatoes; I. Everet for a grand box of mushrooms; H. McDonald for cucumbers. Honorable mention to H. Matz for sweet peas, a very promising seedling; V. Cleres for a fine plant of Canterbury bells, also for three heads of lettuce; Paul Reul for collection of vegetables; F. Petroccia for beans; I. Reidenbach for lettuce, also citrus and for a fine vase of sweet peas; H. McDonald for a grand vase of antirrhinums; H. Fleishauer for two fine vases of tulips of the Darwin type, beautiful blooms, also for a bunch of fine rhubarb. G. Wilson received the thanks of the society for a very fine deutzia; H. Matz for vase of sweet peas; F. Petroccia for lettuce; Paul Reul for sweet peas and G. Wilson for asparagus. At the next meeting prizes will be for best pteris,

# LOOK! BARGAINS IN Bedding Plants

For Immediate Shipment.

NOW READY.

Godfrey Aschmann, the busy bee, is more active than ever. Come and look at what he and his sons and employees have done in four weeks' time. Inspect it yourself, judge it yourself, and you will say "Is it possible?" Ten greenhouses and equally as many frames are filled with choice bedding plants of all descriptions.

Cabbage Plants for field, \$1.25 per 1000.

J. C. SCHMIDT, Bristol, Pa.

Mention the American Florist when writing

best nephrolepis and best adiantum. In our last report we omitted a cultural certificate awarded to V. Cleres for a splendid vase of American Beauty roses, greatly admired by everyone.  
O. E. A.

# For Summer Bloom Plant at Once

## Kaiserin and My Maryland

We have a large stock of fine plants as large as ordinary 4-in. plants, at \$40.00 per 1000.

Order at once as they will soon be gone. Only a few grafted plants left.

W. H. ELLIOTT, Brighton, Mass.

BATAVIA, N. Y.—Gustav Noack has leased a store in the Masonic Temple which he will run in connection with his Bank street place.

## Have You Ever

Talked with a brother florist who uses Morehead Return Steam Traps?  
If not, do so at first opportunity and be convinced that you must install  
one at once.

30 Days Free Trial.

There are more MOREHEAD TRAPS installed in  
greenhouses than of all other makes of steam traps  
combined. The Morehead is distinctly a florist's  
trap. Every feature of its construction has been  
treated with a view of meeting the special needs of  
the florist.

Write today and ask for "Trap Book."

MOREHEAD MFG. CO., Department "W" Detroit, Mich.

BRIGHTON, MASS.—C. E. Holbrow,  
Oak Square, is building several green-  
houses on his Tremont street property.

# AMMONIATED LAWN LIME

## Kills Weeds — Makes Grass Grow

Applied as a light top dressing to lawns it kills all flat leaved weeds, such  
as Dandelion, Daisy, Plantain, Sorrel, Chickweed, Moss, etc., in 48 hours,  
and without other fertilizer produces a wonderful, luxuriant, rich, green growth  
of lawn grasses, which is distinctly noticeable 50 feet away.

The use of Ammoniated Lawn Lime supersedes hand weeding of lawns,  
putting greens, etc. It saves the grass from being pulled up and in many cases  
ruined. Grasses take a new vigorous growth, avoiding probable trouble in future.

Quantities: If very weedy, 1 lb. to 40 square feet; 25 lbs. to 1000 square feet  
(20x50). Half to one-quarter amount if moderately weedy.

## Absolutely Guaranteed

Money Refunded if Not Satisfactory

PRICES: 5 lbs., 50c; 25 lbs., \$2.00; 50 lbs., \$3.50; 100 lbs., \$6.00; 1000  
lbs. and over, 5c per lb. We will ship a 100-lb. bag of Ammoniated Lawn  
Lime at \$6.00, f. o. b. Louisville, to any superintendent of a cemetery, park or  
private estate where references are furnished. It is absolutely guaranteed as  
represented, if used as directed; if not satisfactory, we are to be notified within  
30 days from date of invoice.

Descriptive Circular on request.

houses. If your dealer does not  
carry it in stock, write us direct,  
giving us his name.

JOHN C. MEYER & CO., 1449 Middlesex St., Lowell, Mass.

## Evergreen Brand Flower Fertilizer.

A Pure Plant Food immediately available. It permanently enriches the  
soil. It prevents the onslaught of plant diseases or insect pests. Can be  
used at any time during the growing season, dry or in solution. Put up in  
12 pound cans, Price, \$2.00 each.

For Sale by Leading Jobbers

Further information can be obtained from

D. D. JOHNSON CO., 64-66 Wabash Ave., CHICAGO.

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.  
The pump is of brass throughout, simple and powerful.  
The mixing device keeps the contents of the tank well stirred up from  
start to finish.

When the machine is filled to within six inches of the top, a few strokes  
of the pump will compress enough air in the tank to produce a continuous  
mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,  
and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.

## High Quality Not High Prices

Whenever we make a piece of material it is our aim to turn out the very best that can be produced; high quality is our object for nothing else will satisfy the man who wants to build a greenhouse and make a success. There can be no success without this striving after quality; without there be an effort to produce something better than was produced before. The man who believes in selling poor stock, low class goods, and gets what he can for his work, never progresses or succeeds permanently. We are working hard to make our construction more modern, to improve our patterns and our methods of manufacture, we must keep up with the times and stand at the head of the procession or drop out of the line. Prices are to be considered of course, in everything, but it's quality that counts after all. You forget the price but you don't forget the quality—

It's not what you pay but what you get for what you pay—that is economy.

And a Wonderful Boiler**

It reams and trues up the three nipple openings in each section of boiler, at one time. It is adjusted fine as a watch, so there is no variation in any section.

This is but one example of the care and accuracy with which our Sectional Boiler is made. It was first designed right for greenhouse heating, and ever since it has been made right. Send for prices.

**S. WILKS MFG. CO.,**

3503 Shields Ave. CHICAGO.

Newport, R. I.

A regular meeting of the Horticultural Society was held on Tuesday evening, May 8, President James Robertson in the chair. The executive committee reported progress on the premium list for the fall shows. So far the list shows quite a reduction in the amounts offered for premiums and many of the usual classes are left out entirely, the general feeling being that in the past the society has been too generous and that a spirit of rivalry without considering alone the amount of money offered, should be engen-

## The Superior Standard

RETURN FLUE FIRE BOX BOILER

contains more heating surface, and less water space than any other steel boiler.

$\frac{2}{3}$  of the heating surface is in the tubes,

Ask the man that knows the one using different style boilers—names are yours for the asking.

After using our boiler one season, you will say like all others: Nothing but "Superior" for me.

This boiler has given better satisfaction than any other boiler on the market

MADE IN NINE (9) SIZES FOR HOT WATER.

Send for catalogue and list of growers that are using this boiler.

Samuel Haire, for many years gardener for the late Gordon McKay, is now gardener for Reginald Vanderbilt at Sandy Point Farm, South Portsmouth. J. BRINTON.

dered. The president named two committees on awards for the year, composed each of three members, as follows: John T. Allen, John Mahon and William McKay; Alexander MacLellan, Bruce Butterson and John A. Forbes. As the society has among its friends, not in membership, some who annually donate money or kind toward the premium list, it was voted that all such be elected to honorary membership, and 13 persons, ladies and gentlemen, were so elected. It was proposed that the revision of the by-laws be taken up at an early date.

Local retailers are well pleased with results of sales on Mother's day. The public began to buy on Saturday and the demand kept increasing until Sunday at noon when everything available was sold out. The demand for white carnations was very heavy and were it not for the fact that some of the public in many instances were willing to take other flowers or colored carnations it would have been impossible to supply the demand for white ones for all. The crop of white carnations on the part of local growers was somewhat off this year and orders were sent to the district around Boston and down the river in considerable amount. The increase in sales over the same day last year may be conservatively estimated at 20 per cent.

John T. Travison, who for some time had been in the employ of F. A. Danker, has started a retail store at 335 South Pearl street.

R. D.

Pittsburg.

TRADE FAIR.

Trade has continued fairly active during the past week. Of course Mothers' day created an unusual demand for white carnations and other flowers. This day is steadily growing better each year as a flower day, and if the retailers can persuade the public to wear other colors besides white it bids fair to be a big day. The top price, wholesale, for white carnations was six cents and this price held pretty steady. Good colored stock held stiff at three cents. Roses sold well at their usual price. Other flowers also found a good market at rather reduced figures.

The McCallum Co. has installed quite a novel stairway. They recently installed a summer salesroom in the basement and, in order to get a front entrance, arranged their second floor stairs in such a way that they will swing up from the bottom, leaving an entrance under them into the basement, a system of weights and pulleys making it effective and simple.

**HENRY A. DEER,**  
714 Chestnut St., Phila., Pa.

Cleveland.

There has been a steady demand for stock the past week. Outdoor stock not being overplentiful the carnation and rose growers are reaping the benefit. Kaiserin and President Carnot roses are in good crop at present and strong favorites. Easter lilies and callas are plentiful and meet with an excellent demand. String smilax has been in good demand. Asparagus plumosus and A. Sprengeri have been a little short of the demand. Sweet peas are not quite so abundant, the better grades selling rapidly. Carnations are still short of the demand. A few baby gladioli are on the market. Tulips are part of everyday stock. American Beauty is in good supply with a good demand, and the quality was never better.

NOTES.

Geo. Rettig has been appointed city forester to succeed Wm. Frink, who resigned. Rettig has been in the employ of the park department 14 years; he originally came from Chicago where he assisted in laying out the world's fair grounds. M. H. Howath is consulting forester, being one of the best landscape architects in the west.

At the dedication exercises of the Engineers' building Saturday, the speakers' stand in Central armory was profusely decorated with flags and flowers. Large bouquets of American Beauty roses and floral designs were everywhere, each bearing a card of congratulation from a bank or business house.

A \$200,000 fire on Lorain avenue gave the Ehrbar Floral Co. quite a scare for a time as it threatened its store. Miss Lillian Ehrbar and clerks carried such valuables as books, ribbons, etc., out of the store to a place of safety.

There will be a ball game between the retailers and the wholesalers Monday, May 30, at University grounds on Lexington avenue. Game called at 2:30 p. m.

## HALF HOUR CHAPTERS FOR PLANT GROWERS

### Poinsettias.

The old plants of poinsettias that have been resting under the benches must be got up without further delay and placed on a light bench, where they can be sprayed daily in fine weather to induce a full break of young shoots for propagating. Beyond removing any very weak or shriveled wood they should not be cut back, as it is easy to rub off any top shoots that are not strong enough for propagating, depending on the lower, stronger ones for stock. The cuttings should be left until there are three or four good leaves developed before taking them off, and they can then be removed with a thin slice of the bark from the stem. Take them with a keen knife and dip the ends in dry sand until enough have been taken. They root easily in the ordinary propagating bench with a little bottom heat if kept moist and shaded. As soon as rooted they must be potted and spaced out on a bench in a light house to keep them dwarf and prevent their running away to thin drawn growth.

### Pot Chrysanthemums.

There is quite a difference in the culture of chrysanthemums for pots and for cut blooms even early in the season. Growers for cut flowers like to keep their plants more or less soft and green right along, but with plants for growing into neat little specimens in pots their luxuriance must be more or less checked. The plants need not be starved; there is a great difference in this and in allowing them to have their head and grow as fast as possible. Pot plants should be propagated early and pinched to keep them dwarf. The first removal should be into small pots and here they should remain until the latter are well filled with roots, when as small a shift as can conveniently be made should be given. The soil at each shift should be made very firm to cause a hard, vigorous growth and the shoots must be pinched regularly to insure a bushy plant. From this

time on it is impossible to keep the plants too cool. In many localities the plants seem to do better in frames than fully exposed, but, as a rule, a plant protector with means of light shading is about all that is necessary, and if a careful watch is kept for insects the plants will be all right. Under these conditions the foliage will be hard and likely to stand well on the growth, and the latter will be slow but solid and of the kind that produces plenty of flowers. Keep a careful watch for green fly and spray with a good nicotine preparation at once if any is seen.

### Celosias.

Seedling *Celosia pyramidalis* should be looked after carefully, as the plants will be very useful in the summer after the bulk of the flowering plants are over. They should not be allowed to draw in the seed flats before being pricked out at about two inches apart each way. Lift them carefully with a label, have the soil loose and comparatively dry so that it falls down easily around the roots. As soon as a flat is filled take it to the bench where it is to remain and water thoroughly, giving a light shade for a few days. Allow plenty of air after the plants become established to keep them sturdy and hard, and as soon as the foliage meets the plants can be potted singly in 2-inch pots. A lightly shaded frame is best for the early summer culture of this pretty plant, but if this is not at command it will do very well on a light greenhouse bench sufficiently shaded to prevent injury to the foliage, but not enough to cause the plants to draw up long.

### Hydrangeas.

Cuttings rooted in February and March should by now be ready for potting and spacing out on a light bench or frame, where they must be kept growing steadily right along and not allowed to become potbound. In the culture of these plants the principal point to keep in mind is the production of hard, sturdy shoots

that, if well ripened by exposure to sun and air in fall, will throw large, shapely heads of flowers next season. Some growers root three or five plants in a pot, others a single cutting taken to a single flower, while others keep the plants single but pinch them to form two or more heads of bloom. Whatever system is followed, the idea to keep in mind is the same. We must have good, sound, prominent buds on the shoots if fine flowers are looked for, and these can only be produced by a free growth kept sturdy by plenty of light and air. Over-watering at any time, also over-feeding with liquid manure, must be carefully avoided, as either leads to a pale yellow tint in the foliage that is very unsatisfactory. To properly perform their functions, and by elaborating the sap help to swell up good buds, the large leaves must be healthy and exposed to every ray of light possible. The yellowing is a disease and diseased leaves cannot accomplish this.

#### Pelargoniums.

After the flowers of the regal and show pelargoniums are over the growth should be well ripened. This is best done by placing the plants outdoors in the sun or in a plant protector. Just at first a little shade should be put on, especially if the foliage is at all soft, as it is not good policy to let the leaves be damaged. After a few days the leaves will be inured to the altered conditions and the shading can be removed. For propagating purposes almost any kind of growth will be satisfactory and may be selected at any time now. The bulk of the plants should not be cut back for another month at least, when the growth should be shortened to within a few eyes of where it started last season and the plants practically dried off. Should stock be scarce this wood will strike all right if cuttings are made, placed three or four in a pot or in flats and put right in the full sun and kept wet.

#### Summer Conditions.

After Memorial day, when all the bedding and similar stock has been taken from the houses, there is more room for spreading out young stock that is coming along for fall and winter. A thorough examination of all benches should be made and any repairs necessary carried out. While up to the present the trouble has been to keep stock warm, from now on the aim of the grower will be rather to keep it cool by the admission of plenty of fresh air and by shading. A good run of frames is an excellent aid to the plant grower in summer. By judicious ventilating and shading a much more congenial atmosphere can be maintained in them than in the greenhouses, which are always more or less hot and dry in summer. Besides this, young plants of such stock as cyclamens, Jerusalem cherries, peppers, celosias and primulas are kept with their heads up near the glass and consequently are not inclined to draw but keep dwarf and stocky. For much of this class of stock a stage raised a few inches is placed in the frame and is very convenient for dampening the atmosphere by spraying or hosing down underneath without any risk of damaging the plants.

ELKS' WINDOW AT THE IDLE HOUR NURSERIES, MACON, GA.

Arranged for the Elks' Convention, May 18-19.

## THE RETAIL TRADE

### Elks Windows at Macon, Ga.

The illustrations herewith show two windows put up by the Idle Hour Nurseries, Macon, Ga., for the Elks' convention held in that city May 18-19, respecting which the firm writes: "The girl in one of the pictures is riding in a chariot drawn by a life sized elk. She is dressed in white silk with a purple sash across her shoulder with the letters B. P. O. E. on same, with words on a silk bando around her head 'Hello Bill.' The flowers used in this were larkspur and Easter lilies, with purple and white cheese cloth for a background.

"The other picture represents a woodland scene with an elk drinking at the spring beneath the overhanging rocks with palms and araucarias growing here and there. Blue paper was used for the sky with white clouds painted on same; purple and white stars were cut out in the sky and Halley's comet is seen on the right with the moon in the background but it is slightly covered by a palm leaf. In the front part of the picture is seen two wagons painted purple and white with 12 elks draw-

ing each wagon. The harness is made out of purple and white silk, the words and letters on the wagons are 'B. P. O. E.' and 'Hello Bill' in gold letters. All the flowers used in this were purple larkspur, growing all over the spring. Purple and white lights were used in the windows, which certainly were drawing cards. The best advertising a retailer can do is to keep his windows in the front rank at all times. We always put our windows in a week ahead of the time fixed for any affair that is held in the town. This keeps us in front at all times. Prizes were offered by the Macon lodge of Elks No. 230 for the best decorated windows and automobile, for which we won the first two prizes. The decorations were executed by our own designers."

### May Flowers in the New York Stores.

American Beauty roses, always a good proposition, have been selling very well this month on account of steamer orders. An enormous amount of stock is handled by local retailers for presents to departing tourists and traders throughout the country should note this, as they can secure good terms from their brethren in this city who make a specialty of filling out-

ELKS' WINDOW AT IDLE HOUR NURSERIES, MACON, GA.

For the Elks' Convention May 18-19

of-town orders. Other roses, particularly Killarney and White Killarney, have been going very well. There is also a fair demand for Chateaufort and My Maryland. The demand for red roses is limited at this season, but as Richmond seems to be the most popular red rose, it sells better than any other, possibly because it is not plentiful. We may as well write "finis" for the Bride and Bridesmaid roses. In their day and generation they played a worthy part, but they are now almost altogether superseded by Killarney and White Killarney. We regret the passing of these old favorites but it is inevitable, and growers should note this fact.

Carnations have not been as plentiful this month as they usually are in May, but there has been enough to supply all demands. It is said by some of the leading retailers that they do not care to handle the so-called novelties for the reason that the wholesale prices were too high. As previously outlined in these notes, it is evident that prices must be reduced. We are playing no favorites but we warn all branches of the trade that the plain people are growing wiser, and that, considering the tremendous output of flowers, it would be much

better for growers, commission men and retailers to get together and come to a reasonable understanding. The sale of flowers on the streets of this city has grown to be an abuse and a disgrace to the trade. We look to reputable dealers to correct it. Referring again to carnations, it may be said that, while Enchantress is yet a popular flower, there is a general impression that it is deteriorating. This will not be news to the experts, as it embodies the history of nearly every new flower that has been put on the market in the past 25 years.

Orchids are now arriving in very fine quality, and our local growers are putting forth their best efforts to knock the persimmons from the tall trees at the Boston show this week. Good gardenias sell well, but there is a large amount of inferior stock that is going for a song—going on the street corners or any other place where cheapness and not quality is the watchword. Although the best varieties of peonies have not yet arrived, there is a considerable amount of stock on the market. It has been selling at a fair price, but does not seem to greatly interest buyers. The same may be said of gladioli. While America and other good varieties

brought a big price when they first came in, the interest in them seems now to be waning. We are suffering from a surplus of good things. Sweet peas are good property and it is doubtful if any of what may be termed minor stocks, sell as well as they do. The winter flowering sweet peas cut a large figure in the trade of this city and it is now hard to see how we could do without them. Stocks and snapdragons are plentiful. These flowers are very useful in making up bunches and some of the retailers use them to advantage, in glasses, for exhibition purposes, in their show windows. The white and yellow daisies are also in the same class.

Lilac has been a very salable stock this season and an immense amount of it has been handled. It appeals to the people who were reared in the rural districts, of whom there are many thousands in this city. An unusually large amount of good white lilac has been sold here during this month. German and Spanish irises may be seen in fine quality. It is classed among the spring flowers, and is what people are looking for and it sells well. While pansies are generally considered to be old-fashioned flowers, their popularity does not wane. Thousands of them may be seen daily on the market. Lilies and lily of the valley are plentiful but rather slow. The outdoor lily of the valley is now on the market in quantity. It sells for less than one-half the price that is asked for the greenhouse product and many people prefer it. There is a large amount of yellow narcissus on the market but nobody seems to want it. In past years, before roses, carnations and various other native stocks were as plentiful as now, bulbous stocks may have been a paying proposition. We cannot see that to be the case under present conditions. It looks to us that, in bringing in so much bulb stock at this season many growers are merely throwing good money after bad. Although the weather is rather cool, the sales of geraniums and other bedding plants are considerable. In the stores, the most noticeable pot plants are the roses, Crimson Rambler, Baby Rambler, Agnes Steinhoff, and hydrangeas and daisies.

#### Masses of Floral Tributes at Wladzor.

The lawn adjoining St. George's chapel, a few yards from the tomb where the body of King Edward found sepulchre May 20, presented the appearance of a huge flower market, so great was the wealth of wreaths received from all parts of the world. Truck loads of floral offerings arrived at the castle throughout the day. Tributes in every conceivable form, from a cross of orchids measuring 7x14 feet, sent by the sultan of Zanzibar, to a tiny bunch of wild flowers from some workman's home, covered the place in a wonderful profusion of color. The tribute of President Taft was a wreath of palm leaves and orchids entwined with an American flag of silk. Mr. Roosevelt sent a wreath of white orchids. There were also wreaths from the American embassy and Mrs. Reid, the wife of the American ambassador.

EX-PRESIDENT ROOSEVELT AND OTHER VISITORS TO THE HAARLEM FLOWER SHOW.

The Center Group Reading from Left to Right is: M. de Breuk, Secretary Bulb Growers' Society; Mr. Roosevelt; M. Krelage, President; Mrs. Roosevelt; Mrs. Beaupre; Mr. Koothoven, Vice-President Bulb Growers' Society; Mr. Wavren, President Exhibition Committee.

### The Haarlem Jubilee Flower Show.

#### EX-PRESIDENT ROOSEVELT'S VISIT.

Ex-President Roosevelt visited the Jubilee flower show at Haarlem, Holland, on May 1, accompanied by Mrs. Roosevelt, Miss Ethel Roosevelt, Kermit Roosevelt, the American minister at the Hague and wife, and the Netherlands minister of foreign affairs. The party arrived in autocars from the Hague and were welcomed by a most enthusiastic crowd of many thousands of people. The ex-president happened to be the one hundred thousandth visitor and he was presented with a very nice silver model of the Half Moon on the occasion. When handing the little ship to Mr. Roosevelt, the president of the General Bulb Growers' Society, Mr. Krelage, addressed him as follows:

"Mr. Roosevelt: Do not expect a speech from me. You have come to see the flowers, and the best way to show our appreciation of your presence is not to abuse your time for other things. Therefore, allow me just to thank you most sincerely for your visit to our Jubilee flower show, but I may be permitted to add something which may be a surprise for yourself. Just before your arrival 99,999 visitors had passed the gates of the show and I presume that they wanted to honor you in their own way by enabling you to become just the one hundred thousandth visitor, a cipher which probably will not very much impress an American citizen, but of which we are rather proud in our little bulb land.

Ernst H. Krelage.

"We are particularly proud and happy that you, Mr. Roosevelt, are the hundred thousandth visitor as, according to our custom, this fact affords us a welcome opportunity of offering you a souvenir of our show. On behalf of the General Bulb Growers' Society of Haarlem which organizes this Jubilee flower show in commemoration of its half-centenary, I beg you to accept the reproduction of one of those ships which may be

considered as the symbols of the historic, commercial and family relations between Old and New Amsterdam, between Holland and America. Call it the Half Moon or the Mayflower, just as you like, for nobody exactly knows how they looked and therefore you may consider this reproduction the most accurate imitation of either.

"Neither the Half Moon nor the Mayflower had any tulips on board, but in our days 3,500,000 kilograms of tulips and other Dutch bulbs are yearly shipped to America alone, being not even a fourth part of the whole annual production, and this quantity will still increase if the duty on bulbs in America, which has already been reduced, is cancelled altogether. And this will be to the profit of the American consumer, to the profit of all American citizens, for it will then be possible to have cheap flowers in every garden, just as fine and as plentiful as here in our show. Flowers are the symbols of love, faith and peace and the more the flowers of Holland are spread all over the world, they will be mighty co-operators, eloquent interpreters and active propagandists of your noble ideas to the benefit of mankind and humanity."

The ex-president replied in a very eloquent speech saying how delighted he was to be in the land of his ancestors and in the most beautiful garden in the world. It had struck him that the Hollanders and especially the bulb growers knew how to combine beauty and commerce and he said that

FORCED HYACINTHS, ARRANGED IN BEDS, AT THE FIRST TEMPORARY EXHIBITION OF THE HARLEM JUBILEE FLOWER SHOW.

in this respect they gave an example to other nations. The ex-president showed himself extraordinarily pleased with the silver model of the Half Moon which he promised to give a prominent place in his house. The little ship is a real work of art, being manufactured by the Zaanland silversmith works of Amsterdam and Haarlem. The show was visited by the Roosevelt party with great interest and a fine pink variety called Alice Roosevelt was an object of admiration. The buildings had all been cleared from visitors so that Mr. Roosevelt could enjoy the extreme beauty of the special temporary show in perfect quietness.

## THE CARNATION.

ADMIRATION is highly spoken of in the British trade papers by experts in carnation culture. A fine illustration of it appears in the Gardeners' Magazine from flowers grown by Stuart Low & Co.

### Carnations in the East.

The cool nights and comparatively few hot days that have been experienced in the east during the present spring, have brought about a continuation of carnation crops that is rather uncommon for the season. Not that it is uncommon for flowers to be plentiful at this time, but rather that the quality should keep up so well, for with the hot periods that are so frequently experienced in May the carnation flowers soon depreciate in size, color and keeping qualities. The delicate shades, such as Enchantress, soon bleach out in hot weather, but this year they have stood well during May, of course having been protected from the full strength of the sun by a light shading

If the weather should continue favorable for a few days longer, it would greatly help the quality of the product for Memorial day, this being the main market day that the flower grower has to look forward to at the end of the season. After that date there is little that is able to relieve a congested market except the school commencements and June weddings, and they do not always succeed in creating a very lively demand. But it does not pay to neglect the stock at any time, and the last few weeks of the season may help much toward paying the coal bill. With this in view it is well to keep a close watch on the watering and syringing for without this attention the plants will soon be overrun with insects and the final crop of flowers ruined. Spring mulching with old manure is very

beneficial to the plants, not only in giving them some additional food, but also in keeping the roots cool and preventing the plants from drying out so rapidly.

Growth being so rapid at this season, the buds progress very quickly, and consequently there is no lack of disbudding to occupy any spare time that may be found, for without proper attention being paid to this detail stock of good grade will not be produced. As the weather grows warmer there are fewer opportunities for fumigating, and spraying becomes more necessary in order to keep down thrips. This pest multiplies rapidly in warm and dry weather, so does aphid, though the latter is much more readily removed by means of nicotine than thrips.

It is hard to give too much fresh air in the carnation houses at this season, and yet some judgment is needed in this routine matter, for a strong, drying wind does not benefit the plants greatly, and therefore one would better go over the houses several times in the day and adjust the ventilation to the weather, rather than work on the principle of making one job of it by raising the ventilators to the limit in the early morning and then letting them take care of themselves until night. Of course, a careful grower does not do these things, but there are others who cannot see the necessity for so much care in the culture of cool house stock such as carnations.

As the time approaches for the annual clean-out and the various repairs that are sure to be needed at that time, it is well to be prepared with some material for such repairs, for the majority of growers still have some wooden benches, and where there is wood there is almost surely some repairing to be found. That the bench of the future is likely to be a

Kokomo Men in the Public Eye.

"The rose looks fair, but fairer we deem it for that sweet odour in it doth live."—Sonnet 2 IV.

American Beauty Roses and Ribbon, and Boston Ferns.

concrete structure seems highly probable, and in new construction it would pay to work on that plan, but where one has good cypress benches it certainly would not pay to tear them out in order to make room for concrete. As to the question that sometimes arises whether there is any difference between the plants grown on cement benches and those grown on a wooden structure, various opinions have been expressed, but it is the belief of the writer that given the same care in each case there is little, if any, difference in the stock produced, especially where the concrete benches are supplied with a tile bottom, thus providing proper means for drainage and aeration of the soil. But in bright weather the cement benches are liable to dry out quite rapidly along the edges and thus need frequent attention in that particular.

W. H. TAPLIN.

#### Green Fly in Carnations.

ED. AMERICAN FLORIST:—

We have some difficulty in keeping down green fly on our seedling carnations in the greenhouse. They will shortly be planted outdoors. Please let me know the best way to destroy them.

E. H. H. S.

Fumigating with tobacco stems or with some of the excellent preparations on the market for the purpose is usually sufficient to destroy green fly or aphids. When the plants are planted outdoors the insects will probably leave them, though a couple of fumigations or spraying with a solution of nicotine will be advisable first.

G.

## THE ROSE.

KEEP the weeds down in the pots in which young roses are growing. They rob the soil and make good breeding places for insects.

#### Replanting Vs. Carrying Over Roses.

The principal work necessary now with the roses is to prune out all turgid growth from the old plants and to keep them well tied into the stakes, care being taken not to remove any good healthy foliage when pruning. If one is contemplating carrying over one or more houses for the second or third season, these plants should be given every attention; keep them vigorous by frequent feeding either by mulching or weekly applications of liquid manure. They will not require ripening until midsummer, and many fine flowers may yet be cut from the old plants, providing they can be kept clean and healthy.

Very often the grower lacking experience is rather undecided about carrying over the plants for several seasons. In a place of any size to replant each season is rather an expensive bit of work, taking into consideration the fact that the young stock will require probably three different shifts from the sand or grafting cases before it can be benched. Then the extra amount of soil, etc., brings up the expense considerably over and above the outlay required to handle the old stock the second season by carrying it over. So it is well to consider the matter in detail. The writer has found that by carrying over the stock two seasons it has paid

equally as well, if not better, than to plant young stock straight through every year, and where one has some of the houses arranged to grow the stock on raised benches and some in solid beds, the results obtained by transplanting the bench stock to the solid beds and replanting the raised benches with young stock was found to work very satisfactorily and economically. At the same time the stock to be carried over should by all means be strong, healthy plants, for it would be useless to attempt carrying over plants that could not be made to grow the first season on the benches or beds owing to diseases or other drawbacks, such as lack of drainage, unsuitable soil, etc.

Then there is the stock that has been in the solid beds during the past season. If in nice shape it should keep right on delivering the goods for at least another year. We do not advocate growing or carrying the stock over more than two seasons on a small place, not exceeding 25,000 square feet of glass, with the exception of certain varieties, such as Kaiserin, Carnot, and those varieties grown strictly for summer. These plants, being kept dormant or semi-dormant during the winter, allowing them to be cut back hard can be grown for many seasons without renewing. They are practically treated the same as the outdoor roses, the pruning being of great importance in handling; also time of starting, amount of resting, etc., making all the difference imaginable as to the number of seasons they can be carried over. In other words, the success depends on the skill of the growers at any and all stages of rose growing, and to repeat

one can only offer suggestions as to methods of handling roses under glass from time to time outlining the work in season. No set rules can be given as to watering, ventilating and many other things so essential to success. The grower must be alert and keenly observant; he must be with his plants daily, noting the slightest change as to the color of the blooms, the foliage, and a thousand other little things that can only be learned by the closest application to the work. This is not only true as regards roses; it applies to a growing crop of any kind indoors.

I recently read in one of the trade papers that geraniums could be grown by any one, and the writer seemed to think there was no skill required in growing these plants. I am not looking for argument, but in visiting half a dozen establishments where geraniums are the principal crop one can readily see there is some difference in the way they are grown and one doesn't always see a perfect lot of strong, sturdy plants of uniform size. Many a sorry lot meets the eye. And why? Because the skilled hand is lacking. But to go back to the subject of carrying over the roses. One need not hesitate to carry over a lot of strong plants on the raised benches the second year, for by resting them some, pruning them and giving them some fresh soil to work in, they will furnish fine cutting, and if the plants are exceptionally strong the cut will usually grade higher than the first season's cut. It is yet some weeks in advance to go into the details concerning this work. In the meantime, as stated above, get the old plants to make all the good growth possible, and keep them and their surroundings clean. Keep a supply of grape dust on hand, and keep right in front of the mildew instead of after it, for when mildew once gets a foothold after firing stops it will surely have its own way and we know of no worse predicament than to buck up against this state of affairs in the rose range.

E.

## THE FANCY LEAVED CALADIUMS.

By Arno H. Nehrling.\*

### Soils.

Various mixtures of soil have been recommended for caladiums. As in most of the plants grown in tropical countries, it need not be very rich in plant food. Of the different mixtures tested at the Missouri Botanical Garden the last four years, a mixture consisting of equal parts of compost, leaf-mold, peat and one-fourth of sand has proven the most satisfactory. The sand tends to keep the mixture porous and sweet, but if too much is added it impoverishes the soil. The soil should be chopped with a spade or sifted through a coarse sieve. The following mixture, recommended by Adolph Jaenicke for all araceous plants, was also used in these experiments, and found quite satisfactory: Two parts half rotten leaf-mold, two parts coarse fibrous peat, one part sphagnum moss, one part sand, one part broken flower pots or porous tile. As fertilizer one pound of wood ashes was added to every 50 pounds of this mixture. The large, fleshy leaves get their richness of texture mostly from the assimilation of nitrogenous foods, but this will be taken up in another paragraph under the heading of fertilizers and feeding.

After the tubers are potted they should be placed on the propagating bench, with a bottom heat of 75°-80°. In a few weeks the plants will require a shift and they may either be potted in larger pots or, if fine specimen plants are wanted for decorative purposes, three or four can be put in one pan, taking care that similar plants as regards size, number of leaves, etc., are placed together. Very little water is required until active growth commences. If the soil was in a moist condition at the time of potting, no water will be required, but occasional syringing will be necessary until a leaf is developed. After the plants have fully developed water should be given freely, at the same time each pot

should be examined carefully and overwatering avoided. The atmosphere should also be well charged with moisture. This is done by dampening the floor and stages of the house frequently. If this is properly done the plants require no syringing. By avoiding the use of the syringe, the tender leaves are not disfigured and, as they are used principally as show plants, this is quite important. Although the temperature can now be lowered from 5° to 10°, we have found that, on account of the damp atmosphere, one can hardly give them too much heat.

### Shading.

There seems to be a difference of opinion in regard to the shading of caladiums. Some growers claim they should be kept near the glass, and shaded from the sun during the hottest part of the day, the object being to secure the delicacy of color in the leaves, while at the same time the leaf stalk is made self-supporting. Plants intended for conservatory or greenhouse decorations should be gradually exposed after the full development of the leaves. The writer has found the above method quite satisfactory, and he has also found that the plants are amenable to almost any treatment, provided the changes are not brought about too suddenly. Many gardeners shade far too much, which causes the leaves to develop their colors nicely, but the leaf stalk becomes weak and needs support, spoiling the real beauty of the plant. Some varieties can stand a greater amount of sun than others, and some will color up splendidly when not grown in shade, but this is a matter which the grower must ascertain through observation. As a rule the exquisite transparent varieties demand more shade. There are a great many devices for shading plants. Wood blinds, made of laths, can be recommended as being the most practical for caladiums. They admit plenty of light and distribute the sun's rays evenly. A cloth covering inside the houses, which can be drawn down over the plants when the rays of the sun are very powerful, will also prove quite

\*Mr. Nehrling's paper commenced in our issue of July 10, 1909, and was continued July 31, October 9, November 27 and January 8, February 19, April 9 and May 7, 1910.

C. W. McKELLAR'S CAR AT THE RECENT CHICAGO AUTO PARADE.

satisfactory. These can be used in addition to the lath blinds, but ordinarily the blinds will be sufficient. A thin coat of paint or whitewash in addition to the wood blinds will sometimes prove satisfactory.

#### Application of Fertilizers.

As soon as the plants are growing freely and the pots become filled with roots, fertilizers in liquid form should be applied from time to time. In a previous paragraph we mentioned that the large and mostly fleshy leaves get their richness in texture from the assimilation of nitrogenous foods. It is therefore advisable to use a preparation containing a large percentage of nitrogen. Phosphoric ammonia or Chile saltpetre dissolved in water are excellent for this purpose. A weak solution of Peruvian guano about the color of sherry can also be recommended. This rule in regard to quantity of any commercial fertilizer should be followed, and all dangers of an overdose will be eliminated. Any other artificial fertilizer with a tendency to burn the roots should be avoided, as these are affected easily. When a quantity of roots are observed on the surface of the pots, a top dressing of light rich soil will be very beneficial. This answers better than giving the plants another shift. Cow manure as a fertilizer will also give satisfactory results and it should be applied occasionally to vary the stimulant previously mentioned. It can be used as a top dressing or in a liquid form.

#### Insect Pests.

Caladiums are but slightly subject to insect pests. The only kinds that affect them are greenfly and red spider. The greenfly attacks the undeveloped leaves, crippling them in the early stages. They can easily be dislodged by a slight fumigation with tobacco stems or by dipping the heads of the plants in tobacco water. If this insect is allowed to get the upper hand, the beautiful leaves, especially those of lighter varieties, will be found to be full of blemishes. Red spider can be kept at bay by proper syringing and never allowing the plants to suffer from want of water.

#### Drying the Tubers.

Years ago growers were of the opinion that caladiums needed no rest. Some people still firmly adhere to the opinion that the proper way to treat them is to keep them growing the year round. They claim that the exact conditions for the bulbs in a dormant state cannot be maintained in a mixed collection of plants, and that all the losses experienced in drying off and wintering the tubers are in this way eliminated. In recent years caladium specialists have found that even in a mixed collection of plants the tubers can be given the proper attention in a dormant state and that this is the only successful way of growing them. The method of drying or curing the tubers at the Missouri Botanical Garden is as follows: By the beginning of October, the plants started in March will be evincing signs of wanting to rest. These should be isolated from the other plants, put into another house and exposed to the full glare of the sun. Water should be gradually withheld, and stopped entirely when the foliage has completely died down. This slow ripening of the tubers is an important factor, and results the following year will depend largely upon this process of exposing the tubers to the sun. When they are thoroughly dry they are ready to store for the winter.

#### Twenty Years Ago.

MAY, 1910.

The pretty *Adiantum decorum* was a good deal grown for cut fronds.

A good deal of correspondence was going on in the AMERICAN FLORIST respecting the poisonous qualities of *Primula obconica*.

There was a great scarcity of carnations in New York.

Orchid jewelry was the latest novelty in New York, orchids very closely imitated in gold and silver and studded with costly gems being the rage.

Other cities were advising Chicago to "get a move on" horticulturally with regard to the world's fair.

Burning the leg of an old boot in a greenhouse infested with green fly was recommended in all seriousness by a wiseacre. The florist to whom the advice was given told the young man to "call again."

"Really good blooms" of chrysanthemums, Mrs. Heale and Jeanne Delaux among the number, were reported from Hinsdale, Ill.

"Cost of production" was beginning to be a live subject among growers. The old brick flues were still in use on many florists' places.

Belle Isle park, Detroit, was being improved by planting and road making.

#### To Be Done Now.

IN THE GREENHOUSES.

Keep seedling primulas well up to the light and avoid over watering at the roots.

Should greenfly appear in the shoots of *Lilium lancifolium* fumigate lightly on several successive evenings and spray the plants the next morning.

Keep the forward dahlia plants growing gently in a cold frame or house but see that no frost reaches them.

As long as there is any heat used in the houses keep the propagating benches full.

Plant out seedling ferns as soon as ready on benches or in flats.

Air slaked lime and soot sprinkled around the fern benches not only creates a good atmosphere in the house but helps to keep slugs and snails at bay.

For good, clean solid growth on kentias the night temperature should not be above 60° at any time except in the heat of summer when it is unavoidable.

Look out for the earliest signs of mildew in the chrysanthemums and take measures to clean them at once.

Get the poinsettias up from under the benches and moisten them slightly, preparatory to starting them up for cuttings.

Keep *Begonia Gloire de Lorraine* and others of this section growing gently. There is no need to try and hurry them at this time.

Clean out a house or a portion of a house for showing samples of bedding and other plants so that customers can see them there. This will save a lot of time and confusion around Memorial day in showing customers around the houses.

#### OUTDOORS.

The hoe is the finest stimulant for early crops. Use it freely on all possible occasions.

Don't be too hard on the moles in the garden. They would not be there if there were not cutworms and other injurious pests which form their food.

Plant out asters, stocks and other half hardy annuals but leave the tender ones, such as *Tagetes pumila* under cover until June 1.

Propagate doricums and other early flowering hardy plants by division as soon as the flowers are over.

Plant out hardy ferns in a moderately shaded position and give a mulch of short litter or leaves to keep the soil moist.

Keep the hoe going between the rows of sweet peas and stir in a little superphosphate if the color of the foliage is not good.

The great bindweed or convolvulus is a beautiful plant for covering arbors or trellises but must not be planted where the roots can run among other plants or it will soon overrun everything else.

Plants of herbaceous subjects purchased at stores should be bedded into flats or frames and livened up a little before going into their permanent quarters on the border.

Never dig in fresh manure in the herbaceous borders or flower beds. Good composted or well rotted manure is far better, as it leads to a more floriferous, solid growth than fresh manure which is too strong and causes the growth to be too rampant.

#### A Definition of Digging.

The illustrious Loudon missed nothing in gardening; and all the tools and the labors of gardening are described by him in an equally pompous and scientifically detailed manner to the following: Digging.—The spade is a thin wedge with a lever attached in the same plane, and the operation of digging consists in thrusting in the wedge by momentum (or weight and motion) of the operator, which effects fracture. A movement of the lever next effects separation, whilst the operator, by stooping and rising again, lifts up the spittle or section of earth on the blade or wedge of the spade, which, when so raised is dropt in a reversed position, and at a short distance from the unbroken ground. The separation between the dug and undug ground is called the trench or furrow. . . . Would a garden laborer understand that? Science v. practice!

## OBITUARY.

#### Mrs. A. E. Riehl.

Much sympathy is felt for A. E. Riehl of the Monarch Fruit Farm, Alton, Ill., in the death of his wife, who for years had been a devoted helpmeet to him. Mrs. Riehl was well advanced in years and died May 20. They settled at Alton about 50 years ago and have been in the nursery business all the time. At first Mr. Riehl made a specialty of sweet potatoes, afterwards growing small fruits. He later went into peony culture and has now a fine collection of the better sorts. He also is an enthusiast in lilac culture. Besides her husband, Mrs. Riehl leaves two sons.

#### Thomas Gowanlock.

Thomas Gowanlock of Eighteenth street and Joy road, Detroit, Mich., died on Monday afternoon, May 23, at Grace hospital as the result of a street car accident a week previously. Mr. Gowanlock, was born at Delaware Ont., December 20, 1843, and came to Detroit 50 years ago. He was a member of the Florists' Club and the club will send a design to the funeral which is to be held May 26 at the Woodlawn cemetery. Mr. Gowanlock is survived by a widow and two children, W. J. Gowanlock and Mrs. Frank Burtenshaw. J. F. S.

PECKVILLE, PA.—The new greenhouse of W. J. Broad situated at the gates of Prospect cemetery will be completed by Memorial day.

KENDALVILLE, IND.—The Johnson Floral Co. will build an iron frame greenhouse 28x56 feet, using the King Construction Co.'s material.

"I like to see my flowers grow  
Like soldiers crowding on parade;  
Not specimens on sentry-go,  
But regiments massed in full brigade."

**LONDON FLORISTS' LOSS.**—There is no doubt whatever that the death of King Edward will mean a great loss to London florists, especially those in the west-end, who look to do their chief business during May and June, when the society season is at its height. Now, unless there is a considerable departure from the usual rules governing national mourning, the loss to florists and to growers of flowers and plants for house and hotel decorations will suffer terribly.—Gardeners' Magazine.

SECRETARY ESLER of the Florists' Hall Association receives many compliments on his prompt settlement of claims.

YOUR neighbors are probably buying at distant points many plants, while you are overstocked with the same kinds. Why not tell them about your surpluses through our advertising columns.

**APHINE.**—James Whiting, foreman of the Department of Floriculture, Massachusetts College of Agriculture, Amherst, says of Aphine, which he has tested: "I believe it to be a valuable addition to the insecticides for greenhouse work."

OUR next issue will contain a full, illustrated report of the great orchid show at Boston, as well as practical illustrated articles on orchids. Greenhouse construction will also have special attention and it will be an especially good issue for advertisers along these lines, who will greatly oblige by sending copy early on account of the intervening holiday.

On page 866 of this issue the secretary of the Morris County Gardeners' and Florists' Society gives some particulars of the show to be held under the joint auspices of the Chrysanthemum Society of America and the society named above. It looks promising and the Morristown people are apparently anxious to do their part. A good show seems assured as, owing to the support already promised, the premiums will be above the average.

THE schedule of prizes of the peony show of the Massachusetts Horticultural Society, to be held in Horticultural Hall, Boston, June 9-10, has been mailed. The dates are subject to change if necessary. Good prizes are offered in the commercial and amateur classes by the American Peony Society and also by the Massachusetts Horticultural Society, the latter offering two silver and two bronze medals in addition to money prizes.

THE manure question is growing more serious every day. Prices are going up and the prospects are that they will continue to advance on both natural and artificial fertilizers. Few growers can attempt the solution of this problem as it has been solved by A. N. Pierson, Cromwell, Conn., by the establishment and maintenance of a stock farm in connection with his greenhouse business, the chief purpose of the farm being the production of manure. The question is one of vital importance to every commercial grower.

## Society of American Florists.

### DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the violet, "Marie Elise," by Thomas DeVoy's Son of Poughkeepsie, N. Y., becomes complete.

### REGISTRATION OF FERN.

Public notice is hereby given that the American Rose & Plant Co. of Springfield, O., offers for registration the fern described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the

secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

### RAISER'S DESCRIPTION.

**Nephrolepis Roosevelt.** — A sport from *Nephrolepis Bostoniensis* that is a great improvement upon that variety, being of the same habit, but of somewhat more vigorous growth. Fronds six to eight inches in width. The edges of the pinnæ are decidedly ruffled in wave-like undulation that is very distinctive. As the fronds mature the undulations become more pronounced, giving the individual fronds and the plant as a whole a marked wavy effect. It does not run back, the type being fixed.

H. B. DORNER, Sec'y.

May 10, 1910.

## The American Rose Society.

### TO BE REPRESENTED IN EUROPE.

The American Rose Society has commissioned the Rev. Dr. Spencer S. Sulliger, of Vancouver, Wash., an amateur rosarian of repute and one of the Pacific coast members of several years' standing, as representative to the annual rose show in England. Dr. Sulliger leaves New York this month for Great Britain.

Robert Vincent, Jr., of White Marsh, Md., takes a letter to the International horticultural meeting at Belgium, which he is going to attend. These gentlemen will give an account of their observations abroad in the proceedings of the society.

John F. Huss of Hartford, Conn., one of our prominent members, goes to France and Switzerland, and this trip also is in the interest of roses.

The society has paid up its premiums as awarded at the spring show with one exception. The membership of paid dues exceeds the number at any time received previously from regular members.

An inquiry has been received from one of the government departments, as to the value and volume of roses used commercially in the United States, and inquiries forwarded to the various distributing centers have brought responses which indicate that probably one-fourth of the value of all flowers grown under glass are roses. The observations made in travel indicate that the rambler class of roses is becoming more and more in evidence, all of which shows that with the growth of the country, the growth of nice things is also coming in for large development.

The officers of the society wish to thank the many donors of special prizes for the prompt response and payment of their respective premiums.

BENJAMIN HAMMOND, Sec'y.

[In a communication to the FLORIST dated May 18 Mr. Hammond says, "As to a summer show in June I have heard nothing of it this year. The last we held was in Bronx park in connection with the New York Horticultural Society. These June shows are pretty hard things to manage, except in a local way, and any suggestions that you have to offer I would be glad to have."]

**Meetings Next Week.**

**Albany, N. Y., June 2, 8 p. m.**—Albany Florists' Club, W. C. Kings, 24 and 26 Steuben street.

#### CALM BEFORE THE STORM.

There has been quite a falling off in many lines of business since our last notes and although a fairly good clean up was reported at the end of the week it took some pretty lively hustling and not a little scheming to get clear of the stock. Saturday was a fair day only, especially as regards the city trade, and although we heard from the hot air merchants about the big business done we know that houses of good repute and with a good following of buyers who at all times will purchase with spirit had quite a difficulty in starting the week with fresh stock. The price of carnations especially took a tumble and some exceedingly low prices were taken late in the day for 1,000 lots. But there is nothing to be alarmed at in this. It seems to be an inseparable prelude to a holiday that trade will be dull and prices low and they were certainly no worse than they have

frequently been before at this time of year. Out-of-town shipments, while not as large or as numerous as the previous week, kept up better than the city trade while inquiries and orders for Memorial day continued to arrive freely. Monday was a blue one all right.

Stock kept in very fair condition. The Beauties and Richmonds were were not quite as good in color as they have been recently and in some of the poorer grades of the former there was a decided blue tinge though the longer stemmed flowers were all right. Otherwise the rose situation was little changed. Carnations still keep up fairly well in quality and though we are inclined to think that some of the soft stock seen around the market was more the effect of keeping than owing to the weather, no doubt this also had its effect. Peonies are arriving in continually increasing numbers and commission salesmen say their growers are advising large shipment

during the rest of the week. Some local stock will be on hand for Memorial day and there are reports of large lots from points in Iowa. The peony field is a wide one and widening yearly. Sweet peas are exceedingly fine and fairly plentiful. Stocks, snapdragons, cornflowers, Narcissus Soliel d'Or, pansies and marigolds make quite a bright and pretty showing both on the market and in the retail stores. The weather has hurt the sale of orchids some and they were somewhat of a drug early in the week. Lily of the valley is plentiful and good. Callas and lilies are equal to the demand and other stocks are running about even. The hardy common ferns need a lot of picking over now and the process can be seen in operation any day in any of the stores. The new stock will soon be in. Boxwood, asparagus, smilax and greens generally are not too plentiful.

Tuesday was a bright day and the trade quickly felt the benefit of it, local orders coming in much more

# Bassett & Washburn

Store and Office: 76 Wabash Ave.,

CHICAGO

Greenhouses: HINSDALE, ILL.

freely. There were also many good out-of-town orders that helped to clean up stock. Peonies arrived in great quantities, local reds and pinks being among them. As showing what an effect a few dull, wet days have, the carnations arriving on Tuesday were much softer than those shipped of late. It is to be hoped that the weather will keep dry from now on until Memorial day, for when stock has to be shipped long distances it must be dry and hard for the start or it is likely to be very poor on arrival.

#### NOTES.

The Lord & Burnham Co. has taken title to the tract of land at Desplaines, where the new factory is to be built and the plans are in a forward condition. Many concessions, including a good road and a low water rate for fire protection have been made by the town in its anxiety to insure this firm locating there and the town is to be congratulated as well as L. & B. for finding such a good site. Geo. Sykes, their representative, has been busy with negotiations for months and is apparently well able to hold his end up. Among the recent contracts received by him are one for a curved eave house for J. K. Lyon, 21x60 feet; a structure at Detroit consisting of a curved roof palm house and aviary, also a rose and carnation house, and one at Melrose Park, Calif., for J. B. Coryell, 22x88 feet.

Kyle & Foerster have been doing big business all the week and the stock handled is first rate in every particular. Of the gladioli we noted magnificent spikes of the red Mrs. Francis King, the light pink Augusta and others. The local red peonies here, Officialis, were splendidly colored, clean flowers that looked as though there had been no frost where

## "The Busiest House in Chicago"

## Double White Narcissus...

The hit of the season. Plenty for everyone. The one best bet for Decoration Day. If you have not already ordered, wire us and we will take care of you.

## J. B. DEAMUD CO.

51-53 Wabash Ave.,

CHICAGO

they grew. Carnations, too, were in fine order, all the most popular kinds being represented. We also noted fine Adiantum Croweanum, long stemmed, well developed, hard fronds perfect in every way.

Richmond roses were among the best showings at Peter Reinberg's during the week, the flowers coming in large quantities and of excellent stem and color. The shipping trade here has been unusually heavy to all points and the orders for Memorial day are much above the average, forecasting a very busy week end. Carnations continue to arrive in large quantities and of excellent shipping quality.

At the J. B. Deamud Co.'s store the double white narcissus is proving a great seller, orders coming in for it very freely. Large consignments of the blue cornflower are being handled, some 3,000 or so daily. Gladioli in light and dark shades are especially good, and the usual fine stock of carnations is on hand daily. All hands

have been busy unpacking peonies which are coming in large quantities.

At the A. L. Randall Co.'s store we noticed some of the finest sweet peas of the season, principally of the Butterfly or Spencer types. Frank Johnson returned from his trip on Monday and reports business good at all points visited. The Evergreen Brand fertilizer is still a great seller here, orders coming thick and fast as well as testimonials as to its merits from those who have used it.

A dinner with covers for 40 guests at the Blackstone gave John Mangel an opportunity to put up a very pleasing decoration. A maypole was placed in the center of the table with ribbon streamers attached leading to baskets of spring flowers, such as sweet peas, pansies, daisies and others, a novel and pretty effect.

The fame of Daphne Hilmers, daughter of Henry Hilmers, for many years a retailer of this city, has reached here from Berlin, where she went to study music. Miss Hilmers

Large Stock of Superb Cape Jasmines, \$1.00 to \$2.00 per 100

# VAUGHAN & SPERRY

LONG DISTANCE PHONE  
CENTRAL 2571.

52-54 Wabash Ave., CHICAGO.

is evidently something out of the ordinary as a musician, and the local papers devoted a large amount of space to her on Sunday last.

At Poehlmann's stock continues to arrive in great quantities, all the popular roses and carnations being in full cut. The flowers are up to the usual high standard as seen here, and that is saying a good deal. My Maryland is extra good, as is White Killarney and the orchids continue to come in first-class order.

Bassett & Washburn report very heavy cuts of Beauty and other roses, their most popular varieties being in better shape than ever before at this season. Kaiserin is also in excellent order. Carnations are slightly off crop. E. B. Washburn is expected home on Friday.

Zech & Mann have been showing some of the finest lilies seen on this market for a long time, the flowers of great size and substance and evidently splendidly grown. Victory carnations were also strong here.

Gardeners' and Florists' Union No. 10615 extends an invitation to the trade to attend the meeting at Lyric Theatre May 29, 2 p. m., where a protest will be made against recent injunction rulings.

Vaughan & Sperry are extra strong on cape jasmines this week, the flowers arriving in first-class order. The cut of Beauty roses is still on, fine flowers in quantity being received daily.

Peonies still rule the roost at Kenicott's but we also noted some elegant flowers of Gladiolus Childs and other varieties, as well as good showings of all the leading stocks.

At Geo. Reinberg's the roses in all varieties are coming with extra fine stems now. The tall, fountain-like Asparagus elongatus shown here is a telling and pretty green.

The quality of the roses and carnations is well maintained at J. A. Budlong's, all the varieties being in excellent shape. Mrs. Jardine continues in first-class order.

Mrs. E. A. Riehl, wife of E. A. Riehl of Alton, a frequent consignor of stock to this market, died May 20.

Visitors: Wm. Breitmeyer, Detroit, Mich.; Mrs. Spickerman of the Sandwich Greenhouse, Sandwich; J. H. Boelter, of Boelter & Zuehlke, Appleton, Wis.

#### Providence.

The market has shown some improvement, the cut flower supplies not being so heavy and the demand much steadier. The first half of the week was very bad for transient trade or the sales of bedding plants as it was cold, cloudy and wet, but the last half was better for all branches. All extra help available is put to work at once. Bedding and decorative plants are moving with a great rush. Roses and carnations of a very good quality are coming in. The great influx of hardy bulbous stock, shrubbery and flowering trees is over, although we are getting some very fine outdoor lily of the valley. Darwins and other late varieties of tulips and narcissus, gladioli, Blushing Bride and Peach Blossom and irises are coming in more plentifully. In pot plants hydrangeas, hardy roses and geraniums are most prominent and some fine ones are to be seen as well as bedding plants which are moving well.

There is always a great demand for green goods. This class of goods has not been plentiful since Easter when they were cut very close.

#### NOTES.

A committee of three was appointed at the monthly meeting of the

Rhode Island Horticultural Society on the evening of May 19 to arrange for an excursion in June, with full power to act. This committee consists of Richard M. Boweh, Thomas Hope and Miss Annie M. Lincoln. The meeting was presided over by President Edwin H. Burlingame. A communication was read from the Newport Horticultural Society inviting entries to the exhibitions to be held by that association. On recommendation of the executive committee Richard C. Sanger was elected to membership. After the transaction of business the meeting was turned over to the Ladies' Auxiliary, and the president, Miss Addie F. Holland, presided. Interesting papers were read by Miss Armington on "The Arbutus" and by Miss Annie M. Lincoln on "Azaleas." These were generally appreciated. Rev. John A. McColl, pastor of the Pilgrims Congregational church, gave an address on "Reminiscences of Foreign Travel."

William Appleton says this spring business surpasses all others of his former 20 years' experience. Mr. Appleton was head gardener at Swan Point cemetery for 15 years previous to going into business here. This place gave Mr. Appleton a great field of experience in this line of work. Eugene Appleton, his oldest son, has charge of the greenhouses.

John F. Woods, Westminster street, is on the lookout for a new location, as his lease of this store at the present location expires June 1, 1910. Mrs. Woods has returned from a few weeks' visit to her folks at Worcester, Mass., and is back in her usual seat at her desk in her husband's store, where she looks after the books of this concern.

Olney Williams & Son, Poccassett, does an immense business as a grower of cut flowers for this market. Mr. Williams was recently appointed custodian of his father's, the late A. A. Williams, estate, with a bond of \$15,000. This place embraces a tract of land of 75 acres and contains 100,000 square feet of glass.

Henry Patry is now permanently located with John F. Woods as head designer and salesman. Mr. Patry

left this position a year ago to become a drug clerk in the Handy Drug Co. but he has decided that there are more attractions for him in the florist business, where he can handle the real article.

T. O'Connor, Sr., celebrated his seventy-third birthday May 17. Mr. O'Connor is still hale, hearty and very active for a man of his age. He is at his place of business every morning before his men. Mr. O'Connor does the business of the 400 and his real estate holdings run well into the seven figures.

Michael Sweeney reports everything in the florist line is just booming. Sales in cut flowers, decorations and bedding plants was never better. The Misses Sweeney, Mr. Sweeney's daughters, take charge of the floral part of the business. Mr. Sweeney also does an immense business in landscape work.

John Burke, William Hay's foreman and salesman, is to embark in business as a wholesale grower this fall. It is reported he has a place bought. We all wish him good luck in his new venture.

Eugene McCarron is extremely busy with landscape work. His place is located in one of the best residential sections of the city.

All the various members of the trade called upon report a rushing business but we have not space to refer to them individually.

M. J. Leach & Sons are bringing in fine geraniums in bloom in 4-inch pots.

BINGHAMTON, N. Y.—S. H. Decker has opened a down-town branch at the Guilfoyle drug store, 72 Court street.

NEW CASTLE, PA.—Work has been started on the rebuilding of the greenhouse of W. H. Weinschenck, which was badly damaged by a recent windstorm.

PEORIA, ILL.—Alpha Florist, which is the new department at Rue's seed store, is to be strictly a six-day shop. This will be the only store in town not keeping open on Sunday.

PLENTY OF STOCK.

While the weather last week was not ideal there was plenty of sun to bring out a good supply of stock. Many roses, carnations and bulbous flowers were received which sold at good prices. Carnations are in good demand and the prospects are brighter than a week or so ago for a good supply for Memorial day. Almost all shipments received are of good stock, there being very few or no splits. On account of the growers tearing out their roses the shipments have been reduced considerably. There are hardly any Beauties on the market and those which are on hand are of poor quality, especially in the foliage. Kaiserin continues to increase in numbers and in quality, which helps to fill the retailers' coolers in good style. Carnot, Chateau and My Maryland are still holding out well with prospects for a better supply in a few weeks. There are hardly any Richmond or Perle and those which are received have very short stems. Sweet peas, gladioli and irises are plentiful and the demand is good for them. There is an unusual shortage in Asparagus plumosus and A. Sprenger, which is hard to account for. Smilax is good and there is plenty of it.

### NOTES.

The Geo. M. Kellogg Flower & Plant Co. has not been receiving the usual amount of stock lately on account of having torn out so many rose benches. The rains last week washed out nearly all their carnations, plants and gladioli bulbs, so that they had to be replanted.

W. J. Barnes says that last week was the best in the history of his business, especially in flowering plants and bedding stock. He believed that the custom of decorating yards is rapidly increasing each year.

The Feunsteuck Flower Co. has sold out to J. F. Ephronson. Mr. Ephronson has had a great deal of experience

full of choice carnations and roses, such as My Maryland, Beauty and Killarney.

Arthur Newell took a trip to Bonner Springs last week and while there placed an order for several thousand peonies for Memorial day.

Will Biederman is still busy making up porch boxes and laying out flower beds. He says from all appearances he will be doing this all next summer. The Rock Floral Co. reports cutting a large number of roses and carnations. None of the houses will be changed this year.

Sam Murray has some very good gloxinias, which make an exceedingly pretty window display.

#### PEONY WEEK.

This is peony week and the flowers are to be seen in great profusion. They were never in better condition, being large and well colored. Festiva Maxima is superb and experts say the best ever offered in this market. The long wet spell has helped very much and caused a strong and vigorous growth which is reflected in the flowers. Prices have taken a sudden drop and good stock is offered at \$3 and even less per 100. Choice Maxima command \$10. There appears to be a large quantity of everything. Roses, carnations, sweet peas, snapdragon, gladioli, irises, etc., are crowded into the boxes and cool rooms of the various commission houses awaiting customers who just now are treated with the greatest courtesy. Some especially choice Kaiserin and White Killarney roses are now coming in, the best that have been seen this season. Orchids are quite plentiful, that is cattleyas, which appear to hold the price well. This is one flower that it would seem should have its price controlled as there are comparatively few growers. From the additional stocks that are constantly being added it would appear that the growers are well satisfied with the returns. New dagger ferns are now being brought in by local gatherers; it was time, as the cold storage stocks were beginning to look badly. The bedding plant men are having a great business, large quantities of stock going out daily. Geraniums in flower are scarce, everything with a flower being grabbed up quickly.

The Robt. Craig Co. is having a great run on its scarlet sage. Pot roses are also going out by the wagonload. The young cyclamens, houses of them, are a sight worth going miles to see, healthy, vigorous plants, some now in 6-inch pans that insure well-flowered specimens long before Christmas.

The commission men report business fair for the immense amount of stock on the market. The Leo Niesse Co. is handling a splendid line of peonies, having the entire cut of a

large local grower. American Beauty roses are also seen in quantity.

M. Rice and wife have left for home from their European trip on the steamship Gen. Grant and have secured, Mr. Rice says, some very fine novelties that will be among the best things they have ever offered.

The Joseph Heacock Co. is doing the greatest spring business ever had in palms. Mr. Heacock says: "We just have to push them out to make room for the young stock that is in turn pushing us for the room."

Keegan, late of Thirteenth street, is fitting up a store on Sansom above Thirteenth. It was formerly his supply depot but will soon blossom into

a fine retail store which should do well so near the busy center.

The H. A. Dreer Co. is having a great run on pot roses and although they grow them by the hundred thousand they are at this early date running low on popular varieties and of some are entirely sold out.

Edward Reid is right in it with Festiva Maxima peonies, superb stock cut from his own place, brought in daily by the car load (Packard car); they sell well.

McKissicks are offering superb Eastern rose stock, American Beauty and Kaiserin, the latter being exceptionally fine.

LEWISTON, ME.—Ernst Saunders has opened a new store on Lisbon street with Miss Grace Barker in charge.

CORRY, PA.—Mrs. M. Caldwell has opened a store in the traction office to relieve the Memorial day rush at the North Center street place.

WASHINGTON, D. C.—A new store has been opened at 905 G street by Leapley & Meyer, both of whom are specialists in funeral designs.

SANTA CRUZ, CALIF.—Dr. P. J. Parker, who has spent some months in the Phillipines collecting orchids, is expected to return in the early autumn.

CLEVELAND, O.—The Schneider Floral Co. has been incorporated by A. E. Kramer, E. S. Byers, C. D. Friebolin and others, with a capital of \$25,000.

MUNCIE, IND.—The Warfel Floral Co. of this city has been incorporated with a capital of \$10,000. The directors are Hiram Warfel, Lottie C. Warfel and Francis A. Shaw.

NEWARK, N. J.—While the chauffeur was out for a "joy ride" May 19, the auto of August Begerow turned turtle and landed in a ditch. The four occupants were thrown out but escaped with slight injuries.

NATCHEZ, MISS.—Supt. Taylor of the National Cemetery has been seriously ill for six weeks with septic poisoning in his right hand, brought about by a rose thorn penetrating the middle joint of the index finger. He is certain to lose that finger, if the results are not more serious.

## New York.

## TRADE DULL.

The market conditions of the past week were very unsatisfactory. Roses in particular dropped off heavily in price. While there was nearly always some special stock selling fairly well as the market opened, it was very hard to move anything at a fair price throughout the most of the days and all varieties of roses suffered alike. A few selected American Beauties sold for 15 cents and 20 cents each, but many others that might be called fairly good specials went for eight to ten cents and even lower. As to the short grades, the less said of them the better. Some very good Richmond has been arriving, but much of that stock reaches the market so open that it is hard to handle and we have noted otherwise good stock that could not be sold for eight cents. Both Killarney and White Killarney have been practically a glut and the shorter grades are practically unsalable, for, as a well-known dealer expressed it, "when they can buy good long-stem roses for three and four cents they do not care for the short ones." There are some good Kaisers on the market but they are suffering in the general slaughter. The carnation situation is not quite so bad as, in proportion, they are less plentiful than roses, but it is hard to sell the best for more than two cents. The supply of peonies is increasing and prices are falling. There may be some improvement when the best varieties arrive. Orchids are moving fairly well. The better grades of gardenias are selling but there is a large amount of inferior stock that is almost worthless. Of stocks, sweet peas, snapdragon, and various outdoor stocks there is an abundant supply and it seems as though the fancy of the people now runs largely to anything that may be classed as spring flowers. This is doubtless a contributing feature to the glut in roses. The weather is now warm and the sales of geraniums and other bedding stocks are reaching large proportions.

May 23.—The condition of the market has not improved. There is much complaint that the roses arriving are too open; this is probably due to the warm weather of the latter part of last week.

## NOTES.

M. A. Bowe has been very busy of late with wedding decorations. One of his very notable efforts was a decoration for the wedding of Miss Madeline Borland to Clarence C. Pell, which took place at the Church of the Incarnation May 17. Peonies and other spring flowers were largely used and Mr. Bowe's work was highly commended.

The plant market, at Canal and Washington streets, is now, from midnight until 6 a. m., a very busy place. Among the notable plant growers who have space in this market and sell an immense quantity of fine stock, John Birnie, West Hoboken, N. J., and Wm. F. Koenig, Guttenberg, N. J., may be mentioned.

The department stores continue to buy enormous quantities of stock, much of which it is said, is received from other cities. The leading retailers of this city consider this an abuse. They should be powerful enough to make their influence felt in the Society of American Florists and kindred organizations.

L. D. Moore, son of Frank L. Moore, of the well-known wholesale firm of Moore, Hentz & Nash, sailed for Europe on May 21, where he will enjoy an extended vacation. Returning in

July he will go to Cuba where he has extensive business interests.

The Julius Roehrs Co. of Rutherford, Lager & Hurrell of Summit, W. A. Manda of South Orange and Jos. A. Manda of West Orange, all in New Jersey, will have fine exhibits at the orchid show in Boston.

W. W. Kimmel, a well known retailer of Washington, D. C., spent some time in this city during the past week and called on a number of old friends and business acquaintances.

Wm. Elliott & Sons are selling an immense amount of plant stock at auction. It is not unusual to see from 6 to 12 wagons waiting to be unloaded at their store.

Paul Meconi, who is well known in the wholesale district, will, on June 3, open a wholesale store at 132 West Twenty-eighth street.

There is talk of a large delegation going from here to the orchid exhibition at Boston.

## Buffalo.

The past week has shown great advances in flowers outdoors, weather conditions being more favorable and the calls on all stores and greenhouses are: "When will you fill my veranda box or lawn vase?" Here the answer is "not until after Memorial day." We are liable to frost it is true, but another reason is that greenhouse men have all they can do to get plants ready for the sale on Memorial day. As to down-town stores they are not bothered so much with small plant trade as the ones near the cemeteries but have quite a call for wreaths of galax, etc., ordered by individuals and not as much by the schools as in past years. What was always a big day, has got to be quiet as for large designs being ordered by the schools.

Halley's comet has had its innings in this city and among others was Palmer, who had a good model of the globe and on it several who were looking through telescopes at the comet, all being executed by W. H. Grever. Many people have seen or imagined that they have seen all kinds of forms and faces in the comet. Those who viewed Palmer's claim that velvet poinsettias in pots with ever-ready pot covers were seen bearing the name of Anderson. Also Park Commissioner Kasting was seen in his automobile looking for a suitable place for a road drivers' speedway and a hospital site.

There has been an unusual sale this year of boxwood for lawns in small tubs and pyramids, also laurels; shrubs are handled so much by department stores that the florists do not bother with them.

The florists' picnic is in the air, also a ball game. It would be very interesting to see a game captained by the former New Yorkers—McGraw, Slattery and Stallings Good.

The death of one of this city's prominent canoe men and president of the American canoe association, gave some elaborate funeral orders to several of the retailers.

McClure & Son, Townsend & Fleming and Jas. Allard, who are our leading landscape architects, have been very busy this season.

S. A. Anderson has torn down a small house to replace it with a show house about 20x50 feet for showing begonias.

## BISON.

SOMERSWORTH, N. H.—G. S. Ramsburg is the proprietor of the new greenhouses at this place. He is making preparations for a big Memorial day business.

## WORTH READING

San Francisco, Calif., May 13, 1910.

This will advise you that I have thoroughly tested out your product APHINE and can highly recommend same for exterminating aphids. Our outside roses in Golden Gate Park were badly infested with aphids. With the first application of APHINE the pest was entirely destroyed.

(Signed) JOHN MCLAREN,  
Supt. Golden Gate Park.

"Uplands," San Mateo, Calif.,  
May 10, 1910.

The APHINE you sold me I have used on orchard trees and ornamental plants infested with scale, green and white fly, thrips, mealy bug, etc., and found in every case that it completely destroyed the pests in question, with not the slightest harm to the subjects treated. It is without doubt the finest insecticide I have ever used.

(Signed) WILLIAM MUNRO,  
Supt. to C. T. Crocker, Esq.

Miami, Biscayne Bay, Fla.,  
April 26, 1910.

The sample of APHINE you kindly sent me was used on a lot of palms which were infested with mealy bug, and I am glad to say it entirely destroyed them without injury to plants. I shall include APHINE in my next order for supplies.

(Signed) E. J. ANDREWS,  
Gardener Hotel Royal Palm.

Hill Crest, Purchase, N. Y.,  
May 14, 1910.

Replying to your letter of March 31st, I wish to say that we have given your APHINE a thorough test, and have come to the conclusion that it is one of the best insecticides ever sent out.

(Signed) A. UNDERWOOD, Supt.

Morristown, N. J., April 25, 1910.

It gives me great satisfaction to tell you that APHINE has entirely cleaned my gardenias of mealy bug. I used it 1 part to 35 water. I have tried many things with more or less success, but this was the first complete success. There was no injury to buds or foliage.

(Signed) EDWARD REAGAN.

Concord, N. H., May 8, 1910.

Received the APHINE and gave it a good test. As I wrote to you before, my 'mums were literally covered with lice, but that is a thing of the past. I regard APHINE practically as an insurance against insects, and I shall not be without it in the future.

(Signed) H. D. WHITNEY,  
Prop. Fern-Croft Farm.

Pasadena, Calif., April 11, 1910.

It may interest you to know that of the three fluid insecticides which I have tested, APHINE has proved to be the best. First, it did not disfigure foliage or flower; Second, it mixed with water perfectly; and last, but not least of its merits, it is less expensive than any of the others, considering the work accomplished.

(Signed) P. D. BARNHART,  
Editor of Pacific Garden.

We will supply many reports, equally as praiseworthy, of the merits of APHINE as those submitted above, or any other particulars you may like to obtain.

**V. S. DORVAL,** Secretary.

ROME, GA.—John T. Taylor writes: "We are having some very disagreeable weather for this season, cold and rain. Fire is comfortable in the house at night. A very general observation of Mother's day was participated in by the churches and literary societies of our city. This year for the first time the teachers gave flowers to the pupils, and the people on the street wore flowers. We do not open on Sunday, consequently we sold flowers Saturday evening and night. Carnations were the principal flowers, but as roses, hydrangeas, peas, pansies, gardenias, magnolias and a few others were blooming outdoors, there was no scarcity. We have had a very good trade in plants and cut flowers this season."

TRADE RATHER QUIET.

The weather has not been of the best here during the past week and this has had the effect of making business rather on the quiet side. The present week opened fair and warm with a great increase in the supply of roses, carnations, peonies and all other classes of stock. Roses are especially plentiful and all are looking forward to an exceptionally busy Memorial day. Owing to the large amount of stock on hand it is not thought that prices will be high; even carnations are coming in now in good shape which removes anxiety on their account. Orchids are good, so are sweet peas and most other stocks are in good shape.

NOTES.

On May 24 Welch Bros. received a shipment of good yellow chrysanthemums. Large shipments of orchids also continue to arrive.

W. H. Elliott is cutting from 35,000-50,000 roses daily. Wholesale dealers are placing heavy orders for Memorial day.

Madison, N. J.

The monthly meeting of the Morris County Gardeners and Florists' Society, held May 11, was given over by previous arrangement to the rose growers to fix the rose classes for the final flower show schedule, which it is hoped will be ready for the printer in June. This schedule will be much more comprehensive than was at first expected. As has been before stated, all of the eastern societies, and many of the societies from the middle-west have promised to help make up the show. The prizes are enticingly large, there being at this date \$3,000 available for this purpose besides, the medals and special prizes yet to come in.

The Whippany river club house, Morristown, is the place selected for the show. It is easy of access, by railroad and trolley, and when it comes to room, it will at least have as much space as Madison Square garden, New York. Of course the chrysanthemum will be at its best, November 2-4. We hope for roses in quantity and we cannot do without the carnation. In addition to these, negotiations are in progress for the seedsmen and nurserymen to make trade exhibits; there is ample room. Whippany river club is owned by something like 200 gentlemen, every

kinds will be obtainable to take care of the trade. Snowballs and bridal wreath are expected to be a factor. String smilax is plentiful. Asparagus is a little more plentiful. Boxwood is still a good seller.

L. F. Darnell, manager of the Gas-ser Co., met with a painful accident last week in a friendly scrimmage with the "boys" at his home Sunday afternoon. In the "melee" his foot turned under him and they all went down with a crash. The result was a broken bone and torn ligaments in his lower leg that will take some five weeks to heal up. This is unfortunate coming at the height of a busy season.

The ball game on Memorial day promises to be a lively affair, and every florist who can get away from his work should attend.

C. B.

GRAND RAPIDS, MICH.—Nick Luth has started in business here, growing vegetables principally, and a few flowers. He has four greenhouses 30x100 feet.

one of whom is behind this show. The flower show committee of the club consists of Dr. D. Hunter McAlpin, Dr. Leslie D. Ward and Otto H. Kahn, who work hand in hand with the society committee. Twenty of the most influential people in Morris county have accepted appointments as honorary vice-presidents and 200 or more will be added as honorary members. This show ought to be a huge success. Morristown likes flowers. There is a population of over 12,000 to draw from and the Whippany river club committee promises to give us 2,500 paid admissions of society folk.

E. R.

Cleveland.

Stock has been a little more plentiful the past week and will continue to be so from now on. A few days of good warm sunshine and peonies and other outdoor stock will be in for Memorial day. Carnations are becoming more plentiful. Sweet peas in white and lavender have been a little shy of the demand. Pink sweet peas in all shades are over-plentiful. Easter lilies are coming in by the thousand with a fairly good demand. Callas are a little scarce. Roses are plentiful, especially Kaiserin, Richmond, Bride, Maid and American Beauty are all in full crop and even if outside flowers do not arrive, enough indoor stock of all

## New York Plant Auctions.

Down in the seed district, in the vicinity of Vesey and Cortlandt streets, Tuesdays and Fridays are auction sales days, and the excitement is quite as great as at the smart uptown auction salesrooms. Women stand rows deep, and the commuter and the commuter's wife run a race with the small dealers to get seeds and plants at cut prices.

It is a curious phase of the auction business that has developed in this line and brings out some interesting side lights of human nature. With lots of women, and particularly since the bungalow craze attacked the community, the fever for seeds, bulbs, plants and bushes with which to ornament their garden plot has eclipsed the desire for personal adornment, and each auction day one will find them out in force, seeking for horticultural bargains as most women seek for those sartorial.

There are plant and flower cranks, too, just the same as in other lines. One woman buys only hydrangeas, another a certain kind of rose. Still others are ever on the lookout for some bush or shrub that will increase the beauty of landscape architecture.

"How much am I offered for this

## New York.

Established 1874.

**DARDS**

and Madison Ave.

Has his own correspondents in all the large cities of Europe and the British Colonies. Cable orders forwarded by private code. Telegraph and Cable Address, DARDSFLOR.

fine rose bush, this wonderful Du Barry? It's a fine, faultless flower, a free bloomer, grows vigorously, is deliciously scented, hardy and can stand even a late spring over in Jersey?" cries the auctioneer. The Long Islanders and the Bronxites in the crowd smile patronizingly at their Jersey brethren and at the slur on Jersey climate, but the latter, warned by long experience, are impregnable to jibes and keep their eyes on the main chance.

"Fifty cents? 50 cents, am I offered? No? 49 then—" No answer and the price drops to 30.

"Twenty-five cents," pipes up a meek little woman in brown, standing near the door of the shop. She is seen to be laden down already with queer shaped bundles, from which emerge the straggling twigs, proclaiming her a bargain counter customer.

"Roses are her hobby," explains the auctioneer's assistant in an audible aside. "Every auction day she's here at the drop of the hat and doesn't leave till the place is cleared up. She must have a thousand different varieties of roses, more or less. Now that tall, thin woman over there with the hatchet face, she's the hydrangea crank. Sometimes she buys the plants and sometimes the bulbs (of hydrangea), but nothing else much interests her, unless it's box for her garden hedge.

"Box is pretty expensive, you know, and it takes a lot of plants to enclose a garden, even a small one. You can plant the seeds but it takes forever to grow, so it's more satisfactory to get the small plants. These cost as much as 50 cents each at retail; that is, for the very tiny ones. If you buy at auction you can generally get them for 25. I suppose that when she gets a little extra pin money she just stops and buys a couple of box plants, the same as some women would fancy neckwear. In time she'll have enough to go all around her garden and she won't feel the expense getting them in this way."

Not only flowers and seeds but fruits and vegetable plants, fresh from the cold frames, are sold in this way, and persons are falling over themselves in their efforts to stock their gardens cheap. For, according to the head of one of the big seed establishments downtown, the sale of seeds as well as growing plants, is unprecedented this year.—New York Herald.

HOLLAND, MICH.—Jones & Ebelink have mutually dissolved partnership. Henry Ebelink taking the Central Park greenhouses and conducting the florists' business. Ralston S. Jones takes the Glenwood fruit farm and nursery and will conduct a general nursery business.

The Romance of the Violet.

The modest violet is everywhere, but how many admirers of this universal favorite are familiar with the story of her wanderings and fidelity and of her gradual change from white to blue? Viola's history is inextricably bound up with that of the beautiful Io, daughter of the King of Argos, priestess of Juno, and beloved of Jupiter who, on account of the jealousy of Juno, changed Io into a milk-white heifer. But this stratagem could not escape detection by Jupiter's queen, and through her blandishments she obtained from him the gift of the heifer, which she placed in her grove at Mycenae, under the charge of watchful Argus with the hundred eyes, of which only two ever slept at one time.

Now to the rescue comes Mercury, most wily, most versatile of all the gods. Mercury, was a young man in a broad-brimmed hat adorned with wings bearing a staff in his right hand and winged sandals on his feet. He was herald general to the gods, interpreter of dreams, god of eloquence and presiding deity of thieves; he prophesied with loaded dice, bound Ixion to the wheel, chained Prometheus to the rock, and at length borrowed the pipe of Pan with which he lulled hundred-eyed Argus to sleep, cut off his head and delivered Io, for which exploit we are duly grateful, because, without the wanderings of Io in the form of a white cow tormented by a gad-fly, which pursued her in a state of frenzy over the whole earth, perhaps we should not have the gentle violet to brighten our spring rambles and make glad our hearts. Thus we are told that the dainty violet was created by Jupiter and dedicated to Io to be her companion during her wanderings up and down the earth. Wherever she went to escape the persecutions of Juno in the form of a gad-fly violets sprang up to keep her in good cheer and remind her of Jupiter's constancy. Especially in pastures green and along the borders of shady streams are these beautiful flowers found in great abundance, for to such retreats resorted Io to find sustenance and seek refuge from her tormentor. Even to this day, although most of the violets have become blue from looking up at the sky, where Io now dwells, they love to follow the cows wherever they go, whether to mossy dell, moist meadow or shady wood, and whenever you find bossy standing knee deep in the brook down by the "old swimmin' hole" just look along the banks and there you will find great companies of Io's faithful retainer and consoler, the humble, modest, delicate violet.—Philadelphia Record.

## The Seed Trade.

### American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Duryea, New York, First Vice-Pres.; F. W. Bolgiano, Washington, D.C., Second Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J., June 21-23, 1910.

ONION SETS in the Chicago district average very well for this time of year.

THE fourth annual meeting of the Iowa Seed Dealers' Association will be held at the Chamberlain hotel, Des Moines, June 9.

SAGINAW, MICH.—A. T. Ferrell will make a recreation trip to Europe, sailing from New York to Liverpool on the Steamer Minnetonka May 28.

W. ATLEE BURPEE and Howard M. Earl passed through Chicago May 25 enroute to the Pacific coast. They intend returning in time for the convention, June 21-23.

ALPENA, MICH.—Conditions have been quite favorable for peas. We had a dry spring which gave the farmers a good seeding time and we are now having much needed rain.

CHICAGO.—Contract prices on the board of trade May 25 for grass seed were noted as follows: Timothy, \$4.25, nominal. White clover, from 20 cents to 25 cents.

FRENCH White Roman hyacinths are reported higher; some growers asking 88 to 90 francs May 20 in the Toulon district. Slight changes are reported in other French bulbs from the figures previously named in these columns.

PROVIDENCE, R. I.—At a meeting of the stockholders of W. E. Barrett & Co., May 16, Geo. F. Williams was elected to fill the office of treasurer rendered vacant by the death of his father. W. A. Fisk is president and Leon Williams secretary.

THE Waukesha Canning Co. at Waukesha, Wis., was adjudged bankrupt May 19 at Milwaukee. Judge J. V. Quarles of the United States District court appointed William H. Nicholls and A. B. Cambier receivers. The assets were placed at \$903,180 and liabilities at \$576,862. The company has branches at Rice Lake and Barren, Wis., Hampshire, Ill., and Frankfort, Ind.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale Trade Only.

**SAN JOSE, CALIF.**

### American Seed Trade Association.

An attractive programme has been prepared for the twenty-eighth annual convention of the American Seed Trade Association to be held at the Strand hotel on the beach at the foot of Pennsylvania avenue, Atlantic City, N. J., June 21-23. The programme includes the following: "Recent Science in Plant and Animal Breeding," "Methods and Apparatus for Seed Testing by Seed Merchants," "State Legislation—Present and Future," "The Advancement and Protection of the Interests of the Seed Trade" and "Past, Present and Prospective of the Seed Trade of America."

All members and their families are cordially invited to spend Friday, June 24, at Fordhook farms. Special trains will stop at the entrance and luncheon will be served at 1 o'clock. W. Atlee Burpee and Howard M. Earl will be back from California in time to welcome their guests.

Notice is given of an amendment to the by-laws raising the dues to \$20.

#### HOTEL RATES.

Single room, without bath, for 1. \$3.50  
Double room, without bath, for 2. 7.00  
Single room, with bath, for 1. 5.00  
Double room, with bath, for 2. 9.00  
Including all meals.

Secretary Kendel has received a communication from the hotel management in which appears the following: "These rates will be given to your association regardless of locations. In other words, rooms facing Pennsylvania avenue and Ocean front will be the same price as land side rooms, and persons engaging accommodations in advance will have the preference."

### Pieters-Wheeler Seed Co., Hollister, Calif.

The Pieters-Wheeler Seed Co. has a ranch of 320 acres and other smaller tracts of land making in all 500 acres devoted to the production of high grade seeds. The original company was formed by President A. J. Pieters in 1906 as the A. J. Pieters Seed Co., L. W. Wheeler joining in February of this year and becoming secretary of the company. Both are experienced seedsmen and horticulturists. Roguing is very carefully done here, either by Mr. Wheeler or Mr. Pieters personally with the necessary help. About 50 men are at present employed, all knowing their work well so that everything runs smoothly and in a well regulated system.

## Pieters-Wheeler Seed Company

HOLLISTER, CAL.

Growers of High Grade Seeds

Onion, Lettuce, Radish, Sweet Peas, Etc.  
CORRESPONDENCE SOLICITED.

Onion seed raising is a specialty here and great care is taken to keep the stocks absolutely true to name. Several hundred acres are devoted to the culture of sweet peas, lettuce and radish. Large quantities of the former, especially the newer varieties, are shipped to Europe, as well as to New York, New England and the eastern states generally. Salsify, parsley and other vegetable seeds are also grown besides many specialties in flower seeds. The trial grounds are extensive and very carefully managed and altogether it is a fine example of what an up-to-date seed growing establishment should be.

### April and May Seed Business.

The J. Steckler Seed Co., New Orleans, La., writes: "While we had a very dry spring, which affected business generally, we did more business in April and May, up to now, than we have ever done before in these two months, and we figure that if we had had a little more rain that our business would have been far in excess of previous years."

Wm. Elliott & Sons, New York, write: "So far the season has been very satisfactory; in fact, it is better than last year, although we cannot tell until we balance our books the amount of money we have made. The auction business has been running away ahead of last year; in fact, it has almost doubled itself and will certainly turn out a banner year."

John Lewis Childs, Floral Park, N. Y., says April and May business has been quite as good as usual with the possible exception of last year when he had a phenomenally large business in these months. The business for April and May is ahead of that in 1907 and 1908, however, and seems to be in a satisfactory condition all along the line.

Northrup, King & Co., Minneapolis, write: "Our April trade was satisfactory until about the latter part of the month when we had heavy snowstorms which had a depressing effect on business. We have had a drought in the northwest until a week ago, when we had plentiful rains. Since then the retail trade has been satisfactory."

Wood, Stubbs & Co., Louisville, Ky., write: "Our business in the retail garden seed department this year has been far above expectations, and considerably ahead of last season. We have had a very nice business and the demand seems to hold up exceptionally well, especially for small items."

James Vick's Sons, Rochester, N. Y., write: "The season of 1910 was exceptionally good, the orders averaging larger than usual. The open weather in March made an unusual rush of orders, bothering us some to get them out on time. April really was not quite up to last year, still the average business of 1910 will be far ahead of a year ago."

Henry F. Michell Co., Philadelphia, writes: "We have had an unusually busy season. There seems to be a general scarcity of almost everything in the vegetable seed line. Orders are still coming in quite heavily, and we have this year more hands engaged at this season than in other years."

CHICAGO.—The first carload of cantaloupes arrived in the city this week, consigned to H. Woods & Co. Watermelons and California apricots have also arrived.

### Field Culture of Mushrooms.

Where the conditions are favorable to the culture of mushrooms in pastures, this phase of gardening is attended with much pleasure, little labor and a fair chance of considerable profit. Everything turns on the conditions and quality of the land being conducive to success. This secured, the rest is highly satisfactory. The first and prime necessity to secure is some old pasture land with a good depth of soil, say, 1½ feet to two feet, not too heavy or too light, and free from the shade of too many trees. Mushrooms will not grow on poor pastures resting on shallow light soils. It is useless to attempt their growth on such land. Presuming the land to be suitable, I would advise the beginner in the work to embark on it cautiously at first, in order to gain confidence by experience on a limited and inexpensive scale. By taking this course much disappointment is saved as well as valuable knowledge acquired, which may afterwards be turned to profitable account on a larger scale. I then propose to treat of a square pole of land only (30¼ square yards). This is an easily understood quantity, and may, if desired, be duplicated as many times as the planter may desire.

The best time to plant the spawn is towards the end of April, by which time the land will be gradually getting warmer, and the subsequent warm months of May, June, and July will afford the best conditions possible for the spawn to run and permeate the surrounding soil for some considerable distance, resulting, if all has gone on well, at the end of August and through September in an abundant crop of mushrooms. A square hole 12 inches wide and as many inches deep should be dug out in every square yard, making 30 holes to the pole. In taking the turf off these holes, care should be taken to do the work neatly, as they will again be wanted to cover the holes after the spawn has been planted. (It should be cut two inches thick only.) The mushroom consists very largely of nitrogen, and the material for its growth should have this agent well represented in its composition. For this purpose nothing is so good as horse manure, and especially that from corn-fed horses. Therefore sufficient of this should be collected in

fresh condition to fill up the holes to within 2½ inches of the surface. The manure should be collected every morning and placed thinly on the floor of an open shed or some other place where it can be protected from rain, but otherwise exposed to the weather.

It should be turned over every three or four days until there is a body large enough of it (say a cart load, more or less, depending on the extent of the land to be laid down), and this should be collected within the space of 10 days or a fortnight, or it becomes stale, and its value depreciated. In collecting the manure the short litter which always accompanies it should be included to the extent of a quarter of its bulk, but not any of the longer straw. The manure should now be thrown together into a heap, and allowed to remain so for four or five days, until it becomes well heated, opening it well out at the end of this time for the rankest of the steam to escape, putting it together in the same way in the course of three or four hours afterwards for it to heat in like manner again, to be again opened out at the end of four or more days. By this time sufficient rank heat will have escaped; that which is left will be comparatively sweet, and will be required in the manure when placed in the holes to stimulate the spawn into activity. The manure when placed in the holes should be moderately dry, well pressed in by ramming, and the holes filled to within 2½ inches of the surface.

Much depends on the quality of the spawn, and no trouble should be spared in procuring the best. It should not be more than 12 months old, and the brick of spawn should be full of dormant, healthy mycelium; that is to say, the thread-like particles running through the brick of hair-like proportions, and not swelled out in size, or appearing of a whitish color. This will be an indication that the spawn has been by some means excited into premature growth, which materially discounts its value. But usually manufacturers and dealers in spawn, for their own credit's sake, are careful to only deal in the best. It is usually sold by the bushel, this consisting of so many bricks, and the price varies according to the quantity purchased. The spawn should be inserted in the manure as soon as it is placed in the holes. A brick spawn should be divided into six parts, one piece to be placed in the center of the manure in each hole. It should be placed in sideways, not flat, and fixed perfectly tight and deep enough to be half an inch below the surface of the manure. When the spawn is fixed, half an inch of soil should be placed over the manure and well pressed down, afterwards placing the turf over the holes and ramming it. A dressing of soil a quarter of an inch in thickness should be placed over these turves, in order to prevent the sun drying it up and to help to make it grow faster. The slight heat from the manure and the gradually increasing power of the sun will give the requisite warmth to cause the spawn to spread out into the soil in many directions, and the warm showers and rather cooler temperature of late

## Success In Market Gardening

REVISED AND ENLARGED EDITION.

A new and larger edition of this well known work on market gardening. It contains everything a market gardener wants to know, and in a form easily understood. It is an invaluable guide to any one in the business from the beginner to the most experienced.

summer will furnish the best conditions for the production of good and continuous crops.

The after management consists of a liberal dressing of stable manure to the land each winter and of agricultural salt each spring, at the rate of half a ton to the acre. As long as the conditions are favorable, spawn will go on reproducing itself in the same land for an indefinite period. Hot summers, with copious showers at the end of July and August, are the most favorable seasons for this crop. Wet and cold summers are the reverse.—The Garden.

### Prices of Indoor Fruits and Vegetables.

New York, May 21.—Mushrooms, 40 cents per pound; cucumbers, 75 cents to \$1 per dozen; lettuce, cold frame, 62½ cents per dozen heads; tomatoes, 17½ cents per pound; grapes, Hambros, \$1.15 per pound; Gros Colman, \$1.50 per pound; Muscats, \$2.50 per pound; peaches, French grown, \$10 per dozen.

Chicago, May 25.—Mushrooms, 40 cents to 50 cents per pound; cucumbers, \$1 to \$1.25 per dozen; leaf lettuce, 22-25 cents per box; head lettuce, Louisiana, \$1.-\$1.25 per hamper; 6½ barrel (sugar barrel size); radishes 25-30 cents per dozen.

### A Commercially Managed Botanical Garden

The statement that "the Frankfort palm and botanical garden is one of the most celebrated in the world" is made in a published description forwarded by Consul-General Richard Guenther. Furthermore, "contrary to most gardens of this kind it is managed upon a strictly commercial basis by a stock company, which explains the presence of devices for pleasure and sport."

ST. PAUL, MINN.—Holm & Olson took out permits, May 17, to build eight new greenhouses at Duke and Pleasant streets. Five houses will be 22x98 feet, two 17x97 feet, and one 9x124 feet. Work is to be commenced at once.

Vaughan's

Lilium Harrisii.

1911

Both Plants and Bulbs  
Carefully Selected.

While we do not claim that our Harrisii are absolutely free from disease, or that every bulb will produce a perfect plant, we do claim that our growers' efforts in the way of spraying and roguing are producing results, our stock now being freer from disease than ever before and of genuine Harrisii type. In fact, the best general crop grown on the island of Bermuda.

Vaughan's Seed Store

CHICAGO. NEW YORK.

**Market Needed at Providence.**

Providence is 20 years behind in some branches of the florist business, particularly in the marketing of cut flowers and plants. The marketing of such stock is done in the old way of keeping a man and team on the go two-thirds of the day and all day if there is stock enough to dispose of. There has never been a wholesale flower store or market and one is much needed as there is between \$5,000 and \$10,000 worth of cut flowers to be disposed of each month and \$10,000 worth of bedding stock to be sold every spring. These are the conditions in the county of Providence alone, and \$5,000 worth of bedding plants are sold every spring at a loss of 30 to 40 per cent to the growers which they pay to the peddler for selling this stock. These may seem large figures for the peddler, but an experienced peddler with a horse and wagon will not do it for any less than 30 per cent. And when plants and pots that are rendered useless by being carted around are added to this it will bring the figures up to 10 per cent more. Without a market as the conditions are now, it is a great deal more convenient to telephone to Boston and get flowers by express than to send a man around the city looking for what is needed. If we had a market here near the center of the city convenient to the retailers there is no doubt we could carry the same stock here as they do in Boston, as some of the best growers in New England are located in Rhode Island.

HOUSTON, TEX.—The Alvin Japanese Nursery Co. of this place, has been incorporated with a capital stock of \$225,000 by C. L. Bradley, Joe M. Sam and S. Arai.

### Neviusia Alabamensis.

This is a rather rare shrub from Alabama, where it is known by the common name of snow in summer. In the United States it is highly thought of as an ornamental flowering shrub, the blossoms being stated to be white and borne profusely. So far as profuse flowering is concerned, no objection can be raised to it in England, but instead of being white, says the Garden, the flowers are usually tinged with green. It has, however, been found to be a very useful shrub for forcing, for it may be had in flower in February, and the green tint of the blossoms almost disappear under glass. Growing under natural conditions it attains a height of four feet or more, and forms a large bush. The leaves are more or less ovate, but offer no particular attraction. Under normal conditions the flowers appear about the end of May. They are peculiar by reason of their fringed appearance, which is due to very narrow petals. Cuttings taken in summer root readily, and plants grow vigorously in loamy soil. Plants intended for forcing should be kept to a few stems to encourage lightness of habit. When from two to three years of age they are at a useful size, but fully grown specimens taken up from an open border are quite as useful.

### Some Convolvuluses.

The name convolvulus is used amongst gardeners rather to denote flowers of a certain class than as a botanical name, for plants belonging to at least three different genera are included in the term. All are beautiful, and none more so than the small bindweed (*Convolvulus arvensis*) of our cornfields, a thick patch of which emits such a delicious perfume, and *Convolvulus sepium* (*Calystegia sepium*) of our hedges, which produces the largest, or nearly the largest, blossom of any wild flower in this country. The name *calystegia* in Greek denotes a beautiful covering, and well the plant deserves it, and from this point of view it might be applied to the whole class, for there can be few flowers of more perfect shape, says the Gardeners' Magazine. Botanically, the main distinction between the convolvulus and the *calystegia* consists in the two large green bracts which almost enclose the unopened flowers of the latter, but are totally absent from the former.

The great white bindweed is a beautiful adornment to our hedges, but we cannot admit it into the garden for reasons known to everyone. The plant we will first consider is the great single pink flower sometimes called *Calystegia rosea*, and sometimes *C. sepium rosea*. There is scarcely any limit to its growth, either above or be-

# A BLUE ROSE

## The Greatest Rose Novelty of the Century

*It flowered with us this season and was greatly admired.*

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

low ground, though it is very much easier to get rid of than the wild form. I have grown it in the garden for many years, and should be sorry to be without it, the clusters of its large flowers, on an arch, fence, arbor, or what not, being well worth the little trouble of keeping it in bounds. It should not be planted within reach of cultivated ground, but in odd corners or places where it is bounded by walls or gravel paths, so that it cannot spread unduly. Then it is a valuable garden climber, and when it can be said that it is quite hardy, never dies out or needs replanting, flowers from June to September, and is beautiful withal, that surely should be enough to atone for the rampancy of root which has made it so many enemies.

A plant which is generally included in nurserymen's catalogues, while the last-named is omitted as a pestilent weed, is *Calystegia pubescens* (syn. *hederacea*) flore pleno, the double Chinese bindweed. It is useful for covering trellis or rustic work of any sort, growing to the height of six feet or so, and producing a profusion of double pink flowers from June to September, while in general growth and appearance it bears some resemblance to the single pink one above referred to, except that to lovers of the form of the single flower these double flowers are less beautiful. It spreads at the root, but is not likely to become a nuisance, unless amid very favorable surroundings, as it requires a warm soil and situation to do really well, being rather weedy in appearance in a cold wet soil. Well grown it is not without beauty, which is enhanced, however, when it is a little distance from the observer.

Leaving these perennial forms, there are two annual ones which most have grown at some time or other. One is the morning glory, known as *Convolvulus major*, or *Ipomoea purpurea*. It will grow in any ordinary garden soil if not too dry, and in any aspect, but it pays for pretty good conditions, as it is never rampant, rarely exceeding six feet in height. It is best grown

borders, growing a foot or more in  
height. It needs fairly good cultiva-  
tion, and full sunshine, if it is to do  
really well, when it lasts in flower for  
a long time, the color being some-  
what similar to those of C. major.  
It is, however, one of these annuals  
which are sometimes ruined for the  
season by a July thunderstorm, and  
unless its growth is pretty sturdy is  
apt to go down in an ordinary rain  
when in flower. Still, it makes a very  
gorgeous patch of color.

ASPARAGUS SPRENGERI.

# Asparagus

## ASPARAGUS PLUMOSUS NANUS

We handle this Asparagus both in seed and plants of all sizes, in very large quantities and make very close prices on larger amounts on application. Our seed is pure, fresh, of best germinating quality and vitality.

### Northern Greenhouse Grown Seed.

Per 100 seeds, 60c; 250 seeds, \$1.25; 1000 seeds, \$4.00; 5000 seeds at \$3.50 per thousand.

**SPRENGERI** 100 seeds, 15c; 250 seeds, 25c; 1000 seeds, 75c; 5000 seeds \$3.25.

**Starting Asparagus Plumosus Nanus Seed.** This seed may be sown at any time of the year, but April or May is the natural time. Bottom heat is of great advantage. If soaked four days, and given good bottom heat, say 70 degrees, the plants can be sprouted in 25 days and transplanted 25 days later.

SINGLE SPRAY ASPARAGUS PLUMOSUS NANUS.

**Vaughan's Seed Stroe**, 84-86 Randolph St., CHICAGO.

Mention the American Florist when writing

Davenport, Ia.

Business in the cut flower trade has been up to the standard for this time of year, with hardly enough stock to meet the demand. Carnations were poor last week, but are coming in more plentifully again this week. Some extra fine Giganteum lilies are to be seen, and come in handy. The outlook for flowers for Memorial day is poor. Most of the peonies will come in too late and outdoor flowers will be of but little value. This has been the most disagreeable and most discouraging spring ever recorded here. Carnations that have been planted out in the field are a sorry sight. Some look more like straw than plants, so badly have they been nipped.

The regular monthly meeting of the Tri-city Florists' Club was held at the home of Treasurer Wm. Knees of Moline, Ill., May 19, with nearly every member present. "Shrubs and Evergreens for Lawn Decoration" was the topic which brought out many valuable points, occasioned some heated discussions, and proved one of the most interesting topics to date. One new name was brought in for membership. The club accepted Theo. Ewoldt's invitation to meet with him some time in June. Mr. Ewoldt stating, however, that no prizes will be given out this year, as there is to be no strawberry eating contest, owing to the fact that nearly all of the berries have been killed. This is sad news to several of the past year champions. After inspecting the fine establishment of the host a good supper was had and a jolly hour was spent over the cigars.

## BENCH ROSES WANTED

Growers will oblige by sending to the undersigned lists of all the Bench Roses they have to offer, with prices. Advertiser can use Kaiserin Augusta Victoria, American Beauty, Killarney, Richmond, My Maryland, Mrs. Jardine, Sunrise, Perle des Jardins and others, if the plants and prices are right. In quoting, state when the plants will be ready for delivery. Address

Key 989, care American Florist.

### Montreal.

#### TRADE STEADY.

Trade has been steady with supply limited, especially carnations which are higher than before Easter. Outdoor bulb stock sells very well and, owing to the prolonged cold weather, keeps a long time. The late severe frosts have done a lot of damage to hardly perennials which came through the winter unharmed. The warm weather during March brought things along to the point usually reached the first week in June. Dicentra, hollyhocks, peonies and forgetmenots suffered most, while vegetables were damaged badly. Farmers, misled by the warm weather, had planted freely in the open with the result that whole fields of early cabbages, cauliflowers and other truck was killed outright. Shade trees also suffered but the effect will be less noticed; it only amounts to some crippled foliage. The fruit trees were not in bloom and apparently have not been hurt. Bedding plants are not selling yet but everything is ready for the coming rush and rush it will be. The early spring has given plenty of opportunity to lay out new grounds and prepare beds. Tulips, which usually hang on till the second week in June, are almost over. Geraniums are again most in evidence, but there is also a good demand for other plants. Cannas, achyranthes and other stiff things or set beds, are not wanted,

and tastes lean more towards plants like petunias, antirrhinums, salvias, salpiglossis, heliotrope and loose free growing things generally.

#### NOTES.

The retail clerks association has induced the city council to pass a by-law that all retail stores are required to close every Wednesday and Thursday at 7 p. m. This was very objectionable to florists and a test case was made with the Canadian Floral Co. Mr. Hay, manager, on advice of ex-Alderman James McKenna defended the case on the ground that he also sold at wholesale and won, the city being condemned to pay the costs.

T. Gorman, Outremount, has sold the whole of his place to a building company. This is the place where the famous Gorman melons were grown and the passing of this probably means the passing of the famous variety.

The appointment of a superintendent and city gardener has not been made yet. The city council and the board of control are unable to agree on the applicants.

E. Heyward of Cote St. Paul, a beginner, is building two houses 20x80 feet for a general line of plants.

S. S. Bain, besides a fine lot of bedding plants, has a fine house of Richmond roses.

Camille Gratton, St. Laurent, will build a house 20x100 feet for roses.

LUCK.

## Mr. Florist:

Do you grow 'Mums, and do you still grow Ivory for your home trade? If so, how would you like a **Yellow Ivory**? I have it. It's a true sport exactly like its parent in all but color.

I can quote you immediate delivery on 2½-inch pot plants at **\$2.00** per dozen; **\$15.00** per 100; **\$125.00** per 1000.

**CHARLES H. TOTTY,**  
MADISON, N. J.

Carnations for fall delivery. **Smilax, Violets**  
**IN BEST VARIETIES.**

Prices low. Send for list.

**Wood Brothers,** FISHKILL, New York.

Pittsburg.

At last we are having a spell of sunshine and the stiff market we have had for the last few months is now at an end and retailers can have their selection at almost their own prices. Roses never were better nor more plentiful, pink especially over-abundant. Beauties move out fairly well at low figures. Lilies are plentiful but not much sought for. Fine Spanish iris from the south is plentiful and finds a good market. Local peonies are now here in quantity.

### NOTES.

Joe Ueberle, formerly a local wire-worker and now on the U. S. S. Cumberland, paid his old friends a few days' visit. Joe has just completed a cruise to the Philippines and back. One of Marshall Anderson's errand

**C. E. RUCH,** Richmond, Ind.

New Orleans.

Copious rains have fallen the past week and broken the long drought which had caused lots of damage to all outdoor plants. Newly planted asters and chrysanthemums have been much benefited thereby. Gladioli have been in bloom for the past two weeks and find a pretty good market. Sweet peas, except where they have been well irrigated, are short in the stem and past their prime. Store trade has been very poor but quite a few good-sized wedding orders are booked for next month. Society leaders are flocking to their summer homes on the coast and quite a few large plants are being shipped to decorate the grounds and piazzas.

There was quite a good attendance of members at the regular monthly meeting of the Horticultural Society held May 17. But little enthusiasm was displayed and nothing of importance transpired. The fixing of a date and place to hold the annual meeting was again left over to next meeting. This has been a source of argument for three months now and bids fair to rival the historic trials of "Arma virumque cano Trojae qui primus ab oris" in founding a Roman city, so eloquently related by our ancient friend, Virgil. Next meeting is sure to be a bumper, as the society will then be the guests of Mrs. Theard at the Dixie brewery.

Hermann Doescher has taken in Morris Jones as a partner and will extend the nursery business. Both young men are well known to the trade and will undoubtedly make a success in their venture.

J. A. Newsham left, May 16, for Boston to attend the orchid show.
